

## **FNP Role-Specific Competencies**

1. Translate knowledge from clinical practice and other professions to improve population health outcomes.
2. Provide healthcare services within scope of practice boundaries, which include health promotion, disease prevention, anticipatory guidance, counseling, disease management, palliative, and end of life care.
3. Demonstrate responsibility to practice in the NP population focus area defined by your education, certification and license.
4. Advocate for policies that support population focus NPs to practice at the full extent of their education.
5. Provide holistic person-centered care by developing a culturally-informed, mutually acceptable, cost-conscious, and evidence-based plan of care.
6. Implement evidence-based guidelines and strategies that enable effective transitions of care and care coordination.
7. (Ethically) Use information and communication technology to support documentation of care and communication among providers, patients, and all system levels.
8. Analyze data to evaluate interventions, inequities, and gaps in care.
9. Demonstrate clinical judgment using a systematic approach to inform, improve, and advance NP practice processes and outcomes.
10. Evaluate quality improvement processes and evidence-based outcomes.
