Catalog Disclaimer

This catalog provides information about programs, policies, and procedures for Ana G. Méndez University (AGMU) academic year 2026-2027.

This catalog includes the main terms pertaining to the relationship between students and AGMU. Regardless of its effective date, the institution reserves the right to admit, re-admit or register a student only for a semester or session separately. The institution binds itself only during the semester for which the student has enrolled and paid the corresponding tuition fees.

AGMU reserves the right, wherever it deems advisable: (1) to change or modify its tuition and fees, (2) to withdraw, cancel, reschedule, or modify any course, program of study, degree, or any requirements in connection with the foregoing, and (3) to change or modify any academic or any other University policy.

Changes in information in this catalog and new academic regulations will be published prior to the beginning of each academic term in each section, as applicable.

It is the student's responsibility to know and comply with the content of this catalog and all the AGMU rules and regulations. This catalog complies with the institution's bylaws, regulations, administrative orders, and duties under Federal and State Law. The catalog is subject to subsequent amendments.

In preparing this catalog, all efforts were made to provide pertinent and accurate information. AGMU assumes no responsibility for catalog errors or omissions.

This catalog does not constitute a contract nor a binding agreement.

An electronic copy of this catalog is available at www.agmu.edu.

Notice of Nondiscrimination

AGMU does not discriminate on the basis of race, color, disability, national or ethnic origin, creed, gender, age, socioeconomic status, political, religious, or social beliefs, or other legally protected status. The University is required by Title IX not to discriminate on the basis of sex in educational programs and activities.

The University Title IX Coordinator for any inquiries by students, parents or guardians, employees and applicants for admissions and employment is Ms. Luz Velázquez and she can be reached at 5575 S. Semoran Blvd. Suite 502 Orlando, FL 32822, Telephone: 407-563-6501, email: lnvelazquez@agmu.edu.

Ana G. Méndez University

Ana G. Méndez University (AGMU) is a private, nonprofit institution of higher education located in Florida, with a main campus in Orlando and two additional locations in Tampa and South Florida.

AGMU offers a variety of academic offerings, from technical diplomas to doctoral degrees. The institution serves a diversified student body with a variety of economic and educational backgrounds. AGMU offers programs in English, Spanish and Bilingual. AGMU offers programs face to face, hybrid and online modalities.

Mission

AGMU is an accredited post-secondary institution committed to delivering academic excellence to the community we serve, through face-to-face and distance learning modalities. AGMU provides the highest quality education, service, and continuing education in a bilingual culture and environment. We promote innovation, research, academic collaboration, and community engagement that enhance our learning environment and reflect our commitment to serving the student community.

Vision

AGMU will strive to be the premier private not-for-profit institution for non-traditional students in the state of Florida.

Institutional Values

AGMU is committed, as an institution of higher education, to:

- Freedom of ideas and expression is the fundamental structure of the search and diffusion of knowledge.
- Excellence is the highest ambition in all its affairs related to education, research, and service.
- Respect for diversity and dignity of the human being.
- Integrity in all its actions as an educational entity.
- Equity by acknowledging the value of education as an instrument to access better opportunities and develop the full potential of the human being.
- Innovation through continuously guaranteeing the relevance of its programs and services.
- Social responsibility towards the needs of the community, the country, and humanity of which we are a part.

Institutional Goals

To fulfill its mission, Ana G. Méndez University:

- Promotes academic programs adjusted to the demand of local and international markets.
- Diversifies the academic offerings through the design of programs in various disciplines for postsecondary, undergraduate, and graduate levels.
- Offers continuing education opportunities for professional development and the general community.
- Promotes an academic environment that allows for opportunities for growth, continuing professional development, and participation in institutional processes for faculty and associates.

- Provides essential tools to ensure that students achieve their goals and obtain the academic degree they desire.
- Establishes an academic and institutional assessment unit to develop a continuous improvement plan for quality standards and institutional processes.
- Strengthens the online student services program by ensuring support and feedback to students in approximately 24 to 48 hours.
- Fosters institutional values in academic, student, and administrative initiatives and processes.
- Develops community programs and projects which contribute to improving the quality of life of the populations we serve.
- Maximizes the use of technological infrastructure associated with the offering of courses and the provision of student services for on-site and online students.
- Identifies emerging technologies to maximize efficiency through innovative processes and services.

Licensure, Accreditation and Affiliations

Statement of Licensure

AGMU is licensed by the Florida Commission for Independent Education, Florida Department of Education. Additional information regarding this institution may be obtained by contacting the Commission at: 325 West Gaines Street, Suite 1414 Tallahassee, FL, 32399-0400; Toll-Free telephone number (888) 224-6684 (www.fldoe.org/cie).

Accreditation

Institutional Accreditation

Ana G. Méndez University is accredited by the Middle States Commission on Higher Education (MSCHE). The MSCHE is an accrediting agency recognized by the U.S. Department of Education. MSCHE is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation (CHEA). MSCHE physical mailing address is: Middle States Commission on Higher Education, 1007 North Orange Street, 4th Floor, MB #166, Wilmington, DE 19801 and the phone number is 267-284-5011.

Memberships and Affiliations

The Florida Postsecondary Reciprocal Distance Education Coordinating Council has approved AGMU to participate in the reciprocity agreement between member states and territories to offer distance education programs and courses. NC-SARA is a voluntary agreement that allows AGMU to offer its programs and courses without having to undergo the licensing (approval) process in each authorized state in which it is interested in promoting its academic programs. For more information on NC-SARA visit: <https://www.nc-sara.org>.

AGMU is accredited as an authorized provider of continuing education by the International Association of Continuing Education and Training (IACET) until 2028. For more information, IACET is located at 21670 Ridgetop Circle, Suite 170, Sterling, VA 20166; Tel: (703) 763-0705. For more information on IACET visit: www.info@iacet.org.

In addition, AGMU has membership or is affiliated with the following professional associations:

- Accreditation Council for Business Schools and Programs (ACBSP)
- American Association of Collegiate Registrars and Admission Officers (AACRAO)
- American Library Association (ALA)
- Council on Higher Education Accreditation (CHEA)
- Florida Association of Postsecondary Schools and Colleges (FAPSC)
- Hispanic Association of Colleges and Universities (HACU)
- National Council for State Authorization Reciprocity Agreements (SARA)
- Student Affairs Administrators in Higher Education (NASPA)
- Puerto Rico Association of Student Financial Aid Administrators (PRASFAA)

University Governance

Legislative Board

The University Council of AGMU serves as the legislative body of the Institution. Its primary role is to establish the University's institutional policies in alignment with the bylaws of Ana G. Méndez University, Inc. The Council reviews and approves all significant academic, student, and administrative policies, regulations, projects, and proposals. It includes representation from the academic, administrative, student, and faculty areas.

The Academic Senate is responsible for recommending academic policies, adopting new programs, approving the awarding of degrees, and evaluating the hiring, contract renewals, promotions, and leaves of absence for full-time faculty. It advises the University Council on academic and student affairs, including program proposals, reviews, assessments, and faculty and student policies. The Senate includes representation from the academic, administrative, student, and faculty areas with faculty holding the majority representation as required by regulation.

Statement of Legal Control

Ana G. Méndez University, Inc., is a private not-for-profit corporation registered under the laws of the State of Florida. The corporation is governed by its Board of Directors under its systemic bylaws. Ana G. Méndez University, Inc. is registered with the Florida Department of State, Division of Corporations, to do business in Florida as Ana G. Méndez University.

Board of Directors:

Dr. José F. Méndez – Permanent Member

Online Division: 1-833-877-1919 (Spanish)/1-800-640-3677 (English)

The Metro Orlando Campus, AGMU's main campus, offers academic programs through on-site, hybrid, and online modalities, providing high-quality education to local and international students. Programs are delivered through a comprehensive educational model and instructional design that support the integral development of students.

The campus operates within a modern 33,000-square-foot facility featuring smart classrooms, industry-standard technology, and high-fidelity simulation laboratories, particularly in allied health disciplines. AGMU also utilizes innovative technologies to provide efficient, student-centered services.

In addition to health sciences, the campus offers programs in Business, Management and Strategic Leadership, Psychology, Social Work, Criminal Justice, and Forensic Investigation, among others. Students have access to robust online services, including virtual academic advising, digital library resources, learning management system support, and remote administrative services, ensuring continuity of support across all instructional modalities. On-site administrative offices, specialized laboratories, computer labs, a comprehensive library, welcoming student spaces, and ample parking further enhance the student experience.

Phone: 1-800-774-3030 / 954-885-5595 Fax: (954) 885-5861

Located in the heart of Miami Lakes, AGMU at South Florida provides students with tools, resources, and personalized support to achieve academic excellence. This modern, two-story, 51,000-square-foot facility is equipped with industry-standard technology and high-fidelity simulation equipment, giving students valuable hands-on experience in their chosen fields. Serving a vibrant and diverse community, the campus offers high-quality academic programs tailored to meet the needs of today's student population.

This location features 31 classrooms, a science lab, three nursing labs, a pharmacy lab, and a massage therapy lab, as well as two computer labs, a comprehensive library, and a conference room. Students can relax and connect in the welcoming downstairs lounge, while an upstairs lounge also offers a variety of convenient food options. Administrative offices and a dedicated staff lounge ensure a supportive environment for both students and faculty.

Admissions

Diploma and Undergraduate Degree Programs

General Requirements

The applicant must submit 1) an application for admission, and 2) evidence of a high school diploma or a recognized equivalent.

Additional requirements will apply to specific academic programs.

Acceptable documentation of a high school diploma or recognized equivalent include:

- A high school transcript demonstrating an earned high school diploma.
- A GED Certificate.
- A state certificate awarded after passing an authorized test and that the state recognizes as equivalent to a high school diploma, such as the Test Assessing Secondary Completion (TASC) or the High School Equivalency Test (HiSET), or a state-recognized equivalent of a high school diploma.
- The applicant must provide the official transcripts of credits from the transferring institution.
- Successfully completed homeschooling at the secondary level according to the laws of the state in which the student resides. Acceptable documentation varies by state.

The admissions officer shall examine any document to corroborate, in their best judgment, that it is original and has no visible alterations to comply with the requirements. If AGMU has reason to believe a student's diploma or transcript is not valid or was not obtained from an entity that provides secondary or postsecondary school education, it will complete additional steps to try to determine if the document is acceptable. These additional steps may include contacting the granting institution or confirming with a relevant department or state agency. AGMU reserves the right not to accept documents for the validity of which it cannot determine.

Applicants seeking admission to undergraduate programs must meet the following guidelines to complete the undergraduate student enrollment process:

1. For students seeking to transfer to AGMU, AGMU must receive official transcripts from postsecondary institutions within forty-five (45) calendar days from the beginning of the term to complete the student file. Failure to meet this deadline may result in the cancellation of the student's enrollment and admission.
2. All official transcripts and diplomas from institutions outside of the United States that are not in English must have a commercial translation or evaluation.
3. Students must submit a full-color front and back copy of a valid identification (government-issued ID) with a photo to evidence of an address where the applicant resides (i.e., driver's license).
4. International students must submit two (2) forms of evidence, including a passport of their country and valid identification (government-issued ID).

Additionally, prospective students should note:

1. AGMU reserves the right to restrict the size of enrollment in selected programs based on limited facilities and other institutional factors; and
2. AGMU reserves the right to deny or rescind admission to any applicant or student, for reasons that include, but are not limited to, the falsification of the admissions application or the submission of fraudulent documents.

Graduate Studies

Master's Degrees Programs

General Admission Requirements

The applicant must submit 1) an application for admission, 2) an official transcript providing evidence of an earned baccalaureate degree with a minimum cumulative grade point average (CGPA) of 2.25*.

*Applicants with a CGPA of less than 2.25 may be admitted to the institution at the discretion of the Dean of Academic Affairs or the designated academic representative via a documented personal interview.

Additional requirements will apply to specific academic programs.

The admissions officer shall examine any document to corroborate, in their best judgment, that it is original and has no visible alterations to comply with the requirements. If AGMU has reason to believe a student's diploma or transcript is not valid or was not obtained from an entity that provides secondary or postsecondary school education, it will complete additional steps to determine if the document is acceptable. These additional steps may include contacting the granting institution or confirming with a relevant department or state agency. AGMU reserves the right not to accept documents for the validity of which it cannot determine.

Supporting Documentation for Master Programs

Acceptable documentation to meet AGMU's requirement related to the prior academic experience and/or achievement include:

- Official Transcript of Credits documenting graduation with a baccalaureate degree from an accredited post-secondary educational institution and earned CGPA.
- Certification prepared by a post-secondary institution or by an agency recognized by the US Department of Education, or by an appropriate government agency, board, etc. confirming completion of a baccalaureate degree or equivalent and earned CGPA.

Applicants seeking admission to Master programs must meet the following guidelines to complete the graduate student enrollment process:

1. AGMU must receive official transcripts of credits from post-secondary institutions within forty-five (45) calendar days from the beginning of the term to complete the student file. Failure to meet this deadline may result in the cancellation of the students' enrollment and admission.
2. All official transcripts of credits and diplomas from institutions outside of the United States that are not

in English must have a commercial translation or evaluation.

3. Students must submit a full-color front and back copy of a valid identification (government-issued ID) with a photo to evidence of an address where the applicant resides (i.e., driver's license).
4. International students may submit a citizenship card or certificate of citizenship (i.e., passport of their country).

Additionally, prospective students should note:

1. AGMU reserves the right to restrict the size of enrollment in selected programs based on limited facilities and other institutional factors.
2. AGMU reserves the right to deny or rescind admission to any applicant which can include the falsification of the admissions application and/or the submission of fraudulent documents.

College Credit Certificates (Graduate Certificates)

General Admission Requirements

The applicant must submit 1) an application for admission, 2) an official transcript providing evidence of an earned baccalaureate degree with a minimum cumulative grade point average (CGPA) of 2.25*.

*Applicants with a CGPA of less than 2.25 may be admitted to the institution at the discretion of the Dean of Academic Affairs or the designated academic representative via a documented personal interview.

Additional requirements will apply to specific academic programs.

The admissions officer shall examine any document to corroborate, in their best judgment, that it is original and has no visible alterations to comply with the requirements. If AGMU has reason to believe a student's diploma or transcript is not valid or was not obtained from an entity that provides secondary or postsecondary school education, it will complete additional steps to determine if the document is acceptable. These additional steps may include contacting the granting institution or confirming with a relevant department or state agency. AGMU reserves the right not to accept documents for the validity of which it cannot determine.

Supporting Documentation for College Credit Certificate

Acceptable documentation to meet AGMU's requirement related to the prior academic experience and/or achievement include:

- Official Transcript of Credits documenting graduation with a baccalaureate degree from an accredited post-secondary educational institution and earned CGPA.
- Certification prepared by a post-secondary institution or by an agency recognized by the US Department of Education, or by an appropriate government agency, board, etc. confirming completion of a baccalaureate degree or equivalent and earned CGPA.

Applicants seeking admission to College Credit Certificates (Graduate Certificates) must meet the following guidelines to complete the graduate student enrollment process:

1. AGMU must receive official transcripts of credits from post-secondary institutions within forty-five (45) calendar days from the beginning of the term to complete the student file. Failure to meet this deadline may result in the cancellation of the students' enrollment and admission.
2. All official transcripts of credits and diplomas from institutions outside of the United States that are not in English must have a commercial translation or evaluation.
3. Students must submit a full-color front and back copy of a valid identification (government-issued ID) with a photo to evidence of an address where the applicant resides (i.e., driver's license).
4. International students may submit a citizenship card or certificate of citizenship (i.e., passport of their country).

Additionally, prospective students should note:

1. AGMU reserves the right to restrict the size of enrollment in selected programs based on limited facilities and other institutional factors.
2. AGMU reserves the right to deny or rescind admission to any applicant which can include the falsification of the admissions application and/or the submission of fraudulent documents.

Doctorate Degree Programs

General Admission Requirements

The applicant must submit 1) an application for admission and 2) an official transcript of credits providing evidence of an earned master's degree with a minimum cumulative grade point average (CGPA) of 3.30. The applicant must also submit the following documents to the Department Director for admission consideration 1) an Essay and 2) an updated curriculum vitae (CV) or resume.

Additional requirements will apply to specific academic programs.

The admissions officer shall examine any document to corroborate, in their best judgment, that it is original and has no visible alterations to comply with the requirements. If AGMU has reason to believe a student's diploma or transcript is not valid or was not obtained from an entity that provides secondary or postsecondary school education, it will complete additional steps to determine if the document is acceptable. These additional steps may include contacting the granting institution or confirming with a relevant department or state agency. AGMU reserves the right not to accept documents for the validity of which it cannot determine.

Supporting Documentation for Doctorate Degrees

Acceptable documentation to meet AGMU's requirements related to prior academic experience and/or achievement include:

- Official Transcripts of Credits documenting graduation with a master's degree from an accredited post-secondary educational institution and earned CGPA.
- Certification prepared by a post-secondary institution or by an agency recognized by the US Department of Education, or by an appropriate government agency, board, etc. confirming completion of a

baccalaureate degree or equivalent and earned CGPA.

Applicants seeking admission to doctoral programs must meet the following guidelines to complete the doctoral student enrollment process:

1. AGMU must receive the official transcripts of credits from post-secondary institutions within forty-five (45) calendar days from the beginning of the term to complete the student file. Failure to meet this deadline may result in the cancellation of the students' enrollment and admission.
2. All official transcripts of credits and diplomas from institutions outside of the United States that are not in English must have a commercial translation or evaluation.
3. Students must submit a full-color front and back copy of a valid identification (government-issued ID) with a photo to evidence of an address where the applicant resides (i.e., driver's license).
4. International students may submit a citizenship card or certificate of citizenship (i.e., passport of their country).

Additionally, prospective students should note:

1. AGMU reserves the right to restrict the size of enrollment in selected programs based on limited facilities and other institutional factors.
2. AGMU reserves the right to deny or rescind admission to any applicant which can include the falsification of the admissions application and/or the submission of fraudulent documents.

Readmission to Undergraduate, Graduate, and Doctoral Programs

Once admitted to a program, a student is expected to register consecutively for each term and maintain satisfactory academic progress.

Students who have interrupted their studies for at least one semester, excluding summer semester, must apply for readmission to AGMU and:

- a. Have a cumulative GPA that meets the retention index;
- b. Have completed the required percentage of credits of the total attempted credits;
- c. Have completed any applicable period of suspension due to academic reasons, accumulated credits or for disciplinary reasons, if applicable; and
- d. Fulfill the current existing admission requirements of the program of study applied to, and all other general admissions requirements that apply.

In addition to these requirements, a student who was not in compliance with the standards of satisfactory academic progress (SAP) at the time they last attended or who was dismissed from AGMU for academic or disciplinary reasons is required to meet with their assigned Academic & Retention Counselor or Director of Retention to discuss their potential readmission application and any SAP requirements.

Students who are readmitted will be subject to the current curriculum and catalog in effect for their program of study at the time of readmission as well as any other institutional policy.

International Students

1. Admission, readmission, and transfer requirements are the same for all applicants. In addition, international students must also satisfy additional requirements which may vary by program.
2. Interested applicants must contact the Director of Admissions at each campus for the related requirements and processes.
3. Admission for international students is also subject to the immigration laws and regulations in effect.

Non-Degree Seeking Students

General Requirements:

Students who wish to take credit courses for the purpose of special certifications or transfer of credits to another institution may seek admission and will be classified as non-degree-seeking students. Non-degree-seeking students must meet the established admissions criteria and submit all required documentation, including 1) an application for admission and, in some cases, 2) additional supporting documents, such as official transcripts of credits, and transient student approval, which may vary depending on the desired academic coursework. Non-Degree students do not qualify for federal financial aid.

Additional requirements will apply to specific programs.

Admission Validity

1. Students may only enroll in programs offered at the time of their admission or readmission.
2. Admission or readmission decisions are valid for one full semester, beginning on the date it is granted.
3. Students must fulfill the admission requirements by the dates established in the academic calendar.

Conditional Admissions

Conditional admissions acceptance is available for students applying while still in high school and for undergraduate, master's and doctoral students awaiting official documents from outside sources who have met all other admissions requirements. Federal financial aid is not available to conditionally admitted students.

Students must complete the enrollment process of their program of study within ten (10) calendar days from the first day of class. Conditional Admission is contingent upon the successful completion and submission of all the required documentation to satisfy admission requirements. Failure to do so will result in conditional admissions being canceled.

Conditional admissions may have exceptions in accredited programs or programs in the process of accreditation.

Appealing Admissions Decisions

Applicants may appeal admission decisions to the designated university personnel identified in the AGMU Appeal of University Decisions Policy.

Deferment of Admissions

Upon request, the Admissions Office may defer admission to the following semester of the same academic year for which admission was granted.

Transfer Credit Policy

The following criteria generally govern the transfer of credit at AGMU. Additional requirements will apply to specific academic programs, which are listed in the Academic Programs section on the Academic Catalog.

- For Diploma Programs: Only courses with a grade of C or better are accepted in transfer. Courses must be in a student's program of study.
- For Undergraduate Programs: Only courses with a grade of C or better are accepted in transfer. Courses must be in a student's program of study.
- For Graduate Programs (master's and doctorate): Only courses with a grade of B or more will be considered for transfer. Note that some graduate programs do not accept transfer credits.
- U.S. based institutions must be accredited by a national or regional accrediting body recognized by the U.S. Department of Education. Foreign institutions must be recognized as institutions of higher education by the appropriate Ministry of Education or another governmental agency.
- Each School must establish the requirements for validating transfer credits of courses with grades of (Pass), S (Satisfactory), or similar non-quality grades. The reasons why a course cannot be considered for validation must be justified.
- Courses for transfer must be similar in objectives and content to those offered by AGMU. Course work must be in a curricular area generally recognized for credit at AGMU.
- The courses for transfer can be applied toward graduation requirements.
- All credits submitted by the student will be evaluated under this policy and any program specific policies. Courses must be reported to AGMU using a final, official transcript. Such transcripts must bear the signature and/or seal of the issuing official. Official transcripts must be written in English or Spanish and contain the institution's name, the student's name, dates of term(s) attended, title of each class taken, grades earned and academic credit system for each class (if applicable).
- Students hoping to receive transfer credit may be required to submit additional documentation or receive course evaluations, as required by AGMU in its discretion.
- Each School must establish the requirements to evaluate students' competencies to accept credits that have been obtained in a period of more than 10 years. The reasons why a course cannot be considered for validation must be justified.
- Students must comply with the Residency requirements for the purpose of granting a degree (see Residency Requirements in Academic Catalog). Students must obtain 25% of approved credits at AGMU in order to receive a diploma, an associate degree, a bachelor's degree, a master's degree, or a doctorate. This population must complete a 25% prescribed number of credit hours within their program of study to be evaluated toward recognition of honors.
- Remedial courses, Continuing Education, or exams taken at other university institutions will not be validated, except Advanced Level.
- Official transcripts from all institutions attended must be received no later than forty-five (45) calendar days after the start of the student's first term at AGMU to receive transfer credit.

Any exception to this policy, in particular regarding the caducity of the courses, must be evaluated by the designated representative of the respective department to which the courses that will be evaluated for transfer

belong. Transfer credit accepted from another institution is generally reflected on the AGMU transcript with a grade of "T", not the actual grade received at the other institution. Courses accepted for transfer will be included in the credits attempted and the credits earned in the calculation of satisfactory academic progress. Transfer credits are not included when calculating the GPA. For additional information, please refer to the sections in the catalog entitled Satisfactory Academic Progress. Transfer credits (T grade) will not be considered for the calculation of the retention or graduation index.

An authorized representative from AGMU shall establish equivalencies for the courses, after consultation with the designated representative of the respective departments, or Dean of Academic Affairs and if necessary, with the faculty specialized in the area. In some cases, the offering institution's catalog and official course description provided by the student may be used to create course equivalencies. No official evaluation of transfer of credit is made until the student has been accepted by AGMU and an official transcript from the institution awarding the credits is received.

Students must follow the following procedures regarding potential transfers of credit:

1. The student will provide an official transcript and any other documentation, including relevant course descriptions or an academic catalog requested by AGMU to validate transfer credits. The student has forty-five (45) calendar days from the start of classes to submit the official transcripts and other required documentation.
2. Admissions will evaluate the documents submitted by the student. If the documents comply with what is required, the documentation will be referred to the Registrar's Office to continue the validation process.
3. The student will be notified through the institutional email if the requested credits have been validated.
4. If the student does not agree with the decision on the granting or placement of credit earned at another institution, the student has the right to submit an appeal within thirty (30) calendar days of receiving the decision. Appeals shall be made in writing to the Registrar's Office. The student will be required to provide reasonable documentation to support the appeal. The appealing student will generally receive a decision within fifteen (15) business days after the appeal has been submitted. If the Registrar finds merit in changing the decision, the student records will be updated accordingly.

Other Transfer Requirements

1. Accepting credits from foreign institutions

- a) As part of the process of validating courses, AGMU will accept courses completed in foreign institutions if they are equivalent to the program of study the student is admitted in.

Requirements:

- a) Courses are required to be certified by some sort of homologation agency such as World Education Services (WES), Educational Credential Evaluators (ECE), etc., as well as be approved by the U.S. Department of Education. If the student does not have a certification of equivalency from an agency approved by the Department of Education, AGMU's registrar or its designee will complete a credential evaluation and review in order to satisfy this requirement.

2. University Credits – High School Students

This alternative is to grant incoming students the opportunity to further their academic progress. University-level courses taken in High School will be eligible for the validation process. The course will be considered by number of credits and relation to the program of study.

Requirements:

- a) Students must present the courses' official certification along with the grade and credits earned within the course.
- b) Students must have completed High School.

3. Transfer Courses by Learning Experiences

AGMU, in its interests to recognize and stimulate students' academic excellence, has identified the following alternatives as courses by learning experiences and they will be valid for academic transfer. These non-traditional learning experiences include:

a) College Level Examination Program – CLEP and Advanced

Placement – AP

This alternative consists of exams designed for courses generally required within the first year of university. Within accepted topics offered in this mode one can find Spanish, English, and Mathematics.

Requirements:

- 1. Students must obtain fifty (50) points or more in these College Level Examination Program exams.
- 2. Students must obtain a minimum of three (3) out of five (5) points in Advance Placement Exams.
- 3. Students will present a request for evaluation of one or more exam results to the office of admissions. In some cases, exam results can be received directly from the agency/institution where they were taken.

b) Challenge Exams

General Dispositions

- 1. These are departmental examinations designed with the purpose of granting students the opportunity to demonstrate their proficiency within a course relating to their program of study. If the student passes this exam, it will be recognized as credits corresponding to their program.
- 2. Seminar courses, laboratory courses, practice courses, or supervised activity courses will not be eligible as challenge exams.
- 3. Only courses previously identified by the academic program can be challenged.
- 4. Courses challenged through this method must obtain a grade of C or higher to be considered as an approved course.
- 5. Students will not be allowed to challenge courses they have previously failed.

6. Students that do not pass a challenge exam will not be awarded a grade in their academic record. They will have a total of two opportunities to pass. If failed, the student must enroll and take the corresponding course.
7. The maximum number of credits granted by challenge exams will not be greater than 20% of the total credits required for the course.

Requirements:

1. Students must be registered on the course and must pay the corresponding quota set forth by the Fees Bulletin.
2. Students must fulfill the specific requirements established by the academic program.

c) Active Military

General Dispositions:

1. The university recognizes and values the education acquired by active military and their direct dependents through military experience and formal courses.

Requirements:

1. Only courses that are similar in content and objective of the students' academic program will be validated.
2. Military courses must be certified by an official transcript of credit.

d) Portfolio Credits

General Dispositions:

1. Academic works or other forms of educational evidence that demonstrate and validate a student's professional experiences, and/or their acquired skills and goals. The purpose of this mode is to transfer academic earnings towards university credits.

Requirements:

1. The student must be officially registered to AGMU and the department of study they wish to apply portfolio credits to.
2. The student must prepare a portfolio in accordance with the rules and regulations presented within the course.

Transcripts

Official transcripts which bear the seal of the Institution will not be given to students or alumni. This document will be sent directly to institutions specified by the students in their official request to the Registrar's Office. Transcripts will only be issued to those students who comply with the transcript withhold regulation § 668.14(b)(33). Any claims regarding the status of the transcript request must be made within 15 calendar days of its filing. AGMU does not provide copies of other institutions' transcripts to the students or to other institutions.

Residency Requirements

A student must complete a minimum of 25% of their applicable program credits from AGMU to meet the residency requirements. Transfer students must complete a minimum of 25% of the prescribed number of credit hours within their major area of study in order to be measured for recognition with honors.

Student ID Number

After the student applies for admissions, they will be assigned a student identification number (S-ID). The S-ID consists of an "S" followed by eight (8) digits. The S-ID is used to identify student's permanent academic records, such as the transcript, registration, grade reports, enrollment certifications, student accounts, etc.

Student Email Account

All enrolled students have access to a university-sponsored email account. This email account will be the official means of communication between the University and students. The University will use these email addresses to notify students of changes made to their account or courses, important university business, registration information, deadlines, tuition and fee changes, and changes to university policies and procedures. Students are expected to check their university email daily.

FERPA and the Release of Student Information

AGMU is committed to protecting the privacy and access rights of its students by adhering to the Family Educational Rights and Privacy Act (FERPA) of 1974, 20 U.S.C. § 1232g, and its implementing regulations, 34 C.F.R. Part 99. Administrators, faculty, staff, and student workers will protect the privacy of students' education records as required by federal law and regulations and as set forth in this policy.

PROCEDURE

Student Rights to Access Records

FERPA affords Students certain rights with respect to their education records. These rights include:

1. The right to review and inspect their own education records. A Student has the right to inspect and review the student's education records within 45 days after the day AGMU receives a request for access. A Student should submit to the Registrar a written request that identifies the record(s) the Student wishes to inspect. The appropriate records custodian will make arrangements for access and notify the student of the time and place where the records may be inspected. The University will also respond to reasonable requests for explanations and interpretations of the records.

If circumstances effectively prevent the Student from exercising the right to inspect and review the Student's education records (e.g., the Student does not live within commuting distance of the University), the University will provide a copy of the requested records, or make other arrangements for the student to inspect and review the requested records.

The University will not destroy any education records while there is an outstanding request to inspect and review them.

2. The right to request an amendment of the education record. An eligible student has the right to seek amendment of the student's education records that the student believes to be inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.

a. A student who wishes to ask the university to amend a record should write the records custodian responsible for the record, clearly identify the part of the record the student wants changed and specify why it should be changed.

b. The university will, within a reasonable time after receiving the request, decide whether to amend the record as requested.

c. If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. The hearing will be conducted by a party who does not have a direct interest in its outcome. The student will be afforded a full and fair opportunity to present evidence relevant to the issues raised. The University will issue a written decision based solely on the evidence presented at the hearing, including a summary of the evidence and the reasons for the decision. If the University decides after the hearing not to amend the record, the student has the right to place a statement in the record commenting on the contested information or stating why the student disagrees with the University's decision, or both.

3. The right to provide signed and dated written consent before personally identifiable information is disclosed, except when FERPA authorizes disclosure without consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Ana G. Méndez University to comply with FERPA. Complaints may be filed with the Student Privacy Policy Office (SPPO), U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202-8520.

Disclosures Without Consent

The University may, and from time to time does, disclose education records without a student's prior consent when authorized by FERPA, including to school officials whom the University has determined to have legitimate educational interests. A FERPA consent must be signed and dated and must specify the records to be disclosed, the purpose of the disclosure, and the party or class of parties to whom disclosure may be made. Consent may be provided electronically if it identifies and authenticates the signer and indicates the signer's approval.

AGMU defines "school officials" and "legitimate educational interests" as follows:

- "School officials" include (a) persons employed by AGMU in an administrative, supervisory, academic, research, or clerical or support staff position; (b) persons serving on the board of directors; or (c) persons serving on an official University committee, such as an honor, disciplinary, or grievance committee, including students serving on such committees.
- A school official also may include a volunteer, contractor, consultant, or other party outside of the University (i) who performs an institutional service or function for which the University would otherwise use its own employees, (ii) who is under the direct control of the University with respect to the use and maintenance of education records, such as an attorney, auditor, or collection agent, or a student assisting another school official in performing the official's tasks, and (iii) who is subject to the obligation not to

disclose personally identifiable information from any education record without the student's prior written consent.

- "Legitimate educational interests" include performing a task or engaging in an activity related to (i) one's regular duties or professional responsibilities, (ii) a student's education, (iii) the discipline of a student, (iv) a service to or benefit for a student, (v) measures to support student success, and (vi) the safety and security of the campus.

In addition to disclosures to school officials with legitimate educational interests, AGMU may disclose education records without the student's prior consent under the following circumstances permitted by FERPA:

- a) To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled, for purposes related to the student's enrollment or transfer;
- b) To authorized representatives of the Comptroller General of the United States, the U.S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities in connection with an audit or evaluation of Federal- or State-supported education programs, or for the enforcement of or compliance with Federal legal requirements relating to those programs;
- c) In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility, amount, or conditions of the aid, or to enforce the terms of the aid;
- d) To State and local officials or authorities under a State statute adopted after November 19, 1974, concerning the juvenile justice system and the system's ability to effectively serve the student before adjudication, subject to the conditions imposed by applicable law;
- e) To organizations conducting studies for or on behalf of the University to develop, validate, or administer predictive tests; administer student aid programs; or improve instruction, provided that the studies are conducted in a manner that does not permit personal identification of students by anyone other than representatives of the organization and that the information is destroyed when no longer needed;
- f) To accrediting organizations to carry out their accrediting functions;
- g) To parents of a dependent student as defined in Section 152 of the Internal Revenue Code of 1986;
- h) To comply with a judicial order or lawfully issued subpoena, provided that the University makes a reasonable effort to notify the student in advance of compliance so that the student may seek protective action, unless the court or issuing agency has ordered that the existence or contents of the subpoena not be disclosed;
- i) To appropriate parties in connection with a health or safety emergency if the University determines that there is an articulable and significant threat to the health or safety of the student or other individuals and that the information is necessary to protect the health or safety of the student or other individuals. The University will record the date of the disclosure, the parties to whom the information was disclosed, and the articulable and significant threat that formed the basis for the disclosure;
- j) To victims of an alleged crime of violence or non-forcible sex offense, limited to the final results of any disciplinary proceeding conducted by the University with respect to that crime or offense;

- k) To parents of a student under the age of 21 regarding the student's violation of any Federal, State, or local law, or any rule or policy of the University, governing the use or possession of alcohol or a controlled substance, if the University determines that the student has committed a disciplinary violation with respect to such use or possession;
- l) Information the University has designated as directory information, under the conditions described in the Directory Information section of this policy;
- m) To the student;
- n) To an agency caseworker or other representative of a State or local child welfare agency or Tribal organization that is legally responsible for the care and protection of the student, if the agency or organization is authorized by law to access the student's case plan;
- o) When the University initiates legal action against a student or the student initiates legal action against the University, to the court or other parties to the extent the education records are relevant to the legal action;
- p) As required by Federal law, information concerning a student who is required to register as a sex offender under Federal law.

Directory Information

Directory information is information contained in a student's education record that generally would not be considered harmful or an invasion of privacy if disclosed.

Under FERPA, AGMU designates the following categories of information as directory information:

- Name
- Address
- Telephone listing
- University email address
- Date and place of birth
- Major field of study (academic program)
- Participation in officially recognized activities and sports
- Enrollment status (full-time or part-time; undergraduate or graduate)
- Photograph
- Student identification number or other unique personal identifier displayed on a student ID card or badge, but only if it cannot be used by itself to gain access to education records and is used only in conjunction with one or more factors that authenticate the student's identity
- Dates of attendance and degrees and awards received
- Most recent previous educational institution attended

Any student who does not wish directory information released must file written notice to this effect in the Office of the Registrar within 14 days of the start of each academic term.

Annual Notice

Annually, AGMU informs Students currently in attendance of their rights under FERPA as required by regulation. Questions concerning FERPA may be referred to the Registrar's Office.

Retention and Disposal

All records custodians follow the prescribed records retention and disposal schedule as outlined in the AGMU Student Record Retention and Disposal policy.

Course Modules and Language of Delivery

Programs at AGMU are offered in Spanish, English or Bilingual. Students complete their program of study face to face (on-site) or online. Some programs might be offered through blended/hybrid modality, as applicable. These modalities are defined as:

1. **Face to Face** (on-site) is the interaction between the faculty and the student which is offered in a traditional classroom on the campus where the learning-teaching process is developed.
2. **Online**: Course in which all contact hours are offered through the online modality supported by the learning management system authorized by AGMU. The course includes synchronous and asynchronous activities in course planning and delivery. It requires a pre-planned instructional design.
3. **Blended/Hybrid**: A course combining face-to-face and online learning. 50% or more of the contact hours are offered in person, and the rest are in the online education modality. The component offered in the online modality will comply with all the requirements of said modality.
4. **Remote Course** – course in which no less than 75% of the contact hours are offered synchronously supported by the learning management system authorized by AGMU. The remaining 25% of the hours may be offered in individual and group asynchronous activities. This modality requires a previous coursework plan.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

COMPLETING A COURSE OR PROGRAM IN ANOTHER LANGUAGE OTHER THAN ENGLISH MAY REDUCE EMPLOYABILITY WHERE ENGLISH IS REQUIRED.

Academic Requirements, Regulation and Students Classification

Governing Catalog

A student's AGMU governing catalog is the Academic Catalog and Student Handbook in effect at the time of the student's initial admission or subsequent readmission.

The student's governing catalog remains in effect as long as the student does not break enrollment for one or more academic semesters.

A student must seek re-admission if they break enrollment for one semester. Students who are re-admitted will be required to comply with the requirements of the Catalog under which they were readmitted.

Prerequisites and co-requisites

Some courses require prerequisites or co-requisites.

- A prerequisite is a course which must be satisfactorily completed before a higher-level related course can be taken.
- A co-requisite is a course required to be taken in the same Part of Term (PT) as another course. Co-requisite courses must be registered for at the same time.

Enrollment and Registration

The VP of Enrollment Management determines the University's enrollment and registration procedures. Students are required to enroll for classes during the dates established for their respective cohorts, in accordance with the Academic Calendar schedule published by the University.

This enrollment registration is the process through which students develop their course schedule and enroll in courses. The academic year consists of three semesters: fall, spring, and summer.

Students using VA benefits may receive priority registration status.

Enrollment and registration information and updates are communicated through institutional email.

Students will be provided with recommended courses each semester. For each recommended course, students are required to confirm their registration. The Enrollment Confirmation is a mandatory process that allows students to review and confirm the courses they intend to take during the upcoming semester.

By reviewing and signing the Enrollment Confirmation, students acknowledge and confirm their registration with AGMU based on the recommended and selected course(s). Students further acknowledge and agree that they are financially responsible for all tuition and fees assessed as a result of their registration, regardless of the funding source(s).

Students who do not complete the Enrollment Confirmation by the communicated deadline will have their registered courses canceled. Completion of the Enrollment Confirmation does not guarantee eligibility for or receipt of any type of financial aid or educational benefits, including Title IV financial aid, veterans' educational benefits, private scholarships, or other sources of financial assistance. Failure to complete the Enrollment Confirmation may affect a student's eligibility to receive financial assistance or educational benefits for which the student may otherwise qualify.

Method of Instruction

- Non-degree and degree programs may be offered on a schedule of five (5), eight (8), fifteen (15) or sixteen (16) week sessions. During summer a (10) ten-week session is also offered.
- The Dean of Academic Affairs reserves the right to schedule courses based on the nature of the class and the required contact hours.
- Each course offered is assigned a unique number known as a Class ID.

Registration Holds

Students with an active registration hold must resolve the hold in order to register, make changes to their academic schedule, request a transcript, apply for degree conferral, etc.

Sample registration holds may include, but are not limited to student conduct hold, missing document hold, financial hold, administrative hold, etc.

Maintaining the Academic Offerings, Programing of Courses, Closing and Eliminating Sections

The Institution will follow the university's established procedures for maintaining academic offerings: programming of courses, closing and elimination of sections.

Programming of Courses

Academic Affairs is responsible for determining which courses will be offered, the number of sections to be created and the faculty assigned to each course.

Program Moratorium or Campus Closure

The University must periodically evaluate fluctuations in the enrollment of programs and specialties, and the demand of the labor market for the same, to determine the continuity of their academic offerings. Accordingly, the institution has the power to place in moratorium programs or specialties due to a decrease in the required enrollment.

Late Registration

Late registration will be held as reflected in the academic calendar. No student will be able to register after the period determined for late registration.

After the add/drop period, all courses become a permanent part of the student's record. Students may request to cancel or withdraw from one or more classes by completing the appropriate cancellation and withdrawal request form.

Advanced Standing

A student's time to complete their program of study may be shortened through transfer of credit, or credit from prior learning. The maximum amount of advanced standing credit, regardless of source, cannot exceed 75% of the total degree program length for undergraduate programs.

Academic credit that is awarded through one of these methods is not calculated in the student's cumulative grade point average but is factored into the determination of the maximum time in which a program must be completed as published in the Satisfactory Academic Progress Policy for financial aid purposes. Advanced standing through transfer credit or credit from prior learning credits do not apply to students pursuing diploma programs.

Transferability of Institutional Credits to Other Institutions

The transferability of credits is solely at the discretion of the accepting institution. It is the student's responsibility to confirm whether credits completed at AGMU will be accepted at any other institution.

Program Changes, Withdrawals, and Transient Registration

Re-classification of Program or Major

Active students may submit a request to change their program or major by submitting a *Student Services Request Form* by the deadline established in the Academic Calendar. Program and major changes are subject to program requirements and space availability.

Academic Withdrawal

Introduction

AGMU is committed to helping its students successfully complete courses and persist academically toward their educational goals. On occasion, it may be in the student's or the University community's best interest for the student to withdraw from some courses but not all ("Partial Withdrawal") or withdraw from all courses ("Total Withdrawal") in a semester/term (officially or unofficially).

The purpose of this Academic Withdrawal Policy is to define the University's academic withdrawal policy and process. Non-academic withdrawals may be addressed in other policies and procedures.

Scope

This policy applies to all students enrolled at AGMU.

For federal financial aid (Title IV) purposes, this policy also applies to Title IV recipients (students) enrolled in eligible programs offered in (1) a standard semester/term (payment period) in which all courses span the entire length of the payment period (e.g., 16-week fall and spring semesters or 10-week summer term); or (2) a standard term (payment period) comprised of modules in which a course or courses (e.g., 5-week or 8-week courses) do not span the entire length of the payment period (also known as part-of-terms).

GENERAL PROVISIONS

AGMU encourages students considering a partial/total withdrawal to consult with the Office of Retention and the Office of Student Financial Aid before requesting a withdrawal to review potential consequences (e.g., effect on Title IV Funds eligibility, financial obligations, and academic standing) of dropping a course or withdrawing from all courses.

Withdrawal Process

To request an official withdrawal (partial/total withdrawal), the student must complete and submit the *Withdrawal Request Form* electronically through the University's Student Portal. Alternatively, students may provide oral notice of withdrawal to the Retention Office. The form allows a student to request a Partial Withdrawal (dropping individual course(s)) or a Total Withdrawal (withdrawing from all courses) for the semester/payment period, or for a student on an approved Leave of Absence (LOA), to notify the University that they will not return to school.

Types of Withdrawal

1. An Official Withdrawal is a student-initiated action to:
 - a. withdraw from a course(s) but not all courses for the semester/payment period (Partial Withdrawal);
 - b. withdraw from all courses for the semester/payment period (Total Withdrawal); or

- c. notify the University that the student will not return to school from an approved Leave of Absence (LOA).

In other words, the student begins AGMU's official Withdrawal Process or otherwise provides official notification of intent to withdraw.

2. An Unofficial Withdrawal refers to a student who ceases academic attendance without providing official notification of withdrawal to the University. Examples include:
 - a. Ceasing attendance/participation in one or more courses before the end of the semester/payment period and failing to complete the courses (i.e., receiving withdrawal failure ("WF") grades as determined by the instructor(s)).
 - b. Failing to provide official notification of withdrawal due to circumstances beyond the student's control (e.g., death, illness, accident, grievous personal loss);
 - c. Not returning to school after the end date of an approved LOA without notifying the University; or
 - d. Being administratively withdrawn from a course or all courses due to failure to establish academic attendance (i.e., "WN" grade).

Course Grades for Partial/Total Withdrawals

A student who completes the University's Withdrawal Process for an Official Withdrawal (partial/total) before the deadline published in the Academic Calendars will receive a grade of "W" (Official Withdrawal). For purposes of calculating a student's quantitative (completion rate and maximum timeframe) component of SAP, a W grade is counted as hours attempted but not earned. For the qualitative (CGPA) component of SAP, a W grade is not counted in the CGPA calculation. Students who cancel their enrollment or withdraw within the published add/drop period for a course do not receive a grade for the course and the course is not included in the SAP calculation.

A student who fails to complete the University's Withdrawal Process for a partial/total withdrawal and has not established academic attendance in a course(s) by the Census Date published in the Academic Calendars will receive a grade of "WN" (Never Attended Course (No-Show)). A student who establishes academic attendance in a course, does not complete the University's Withdrawal Process for a partial/total withdrawal before the deadline published in the Academic Calendars, and ceases academic attendance in a course will receive a grade of "WF" (Withdrawal Failure). For purposes of calculating a student's quantitative (completion rate and maximum timeframe) component of SAP, a WF grade is counted as hours attempted but not earned whereas a WN grade is excluded from the completion rate and maximum timeframe calculation (i.e., not counted as hours attempted or earned). For the qualitative (CGPA) component of SAP, a WN or WF grade is not counted in the CGPA calculation, as both letter grades have no quality points.

Rescind Withdrawal Request and Course Reinstatement

In the event a student chooses to rescind (discontinue) a previously submitted partial/total withdrawal request and requests reinstatement in a course or all courses, the student must submit a formal request to the Registrar's office by complying with the following requirements:

1. To rescind a withdrawal request and seek reinstatement in a course or all courses for the semester/payment period, the student must complete the *Rescind Withdrawal Request*, located on the Student Service Request section of the University's website. In the form, the student must certify that they will remain in academic attendance through the end of the semester/payment period.
2. The Registrar's office must receive the completed *Rescind Withdrawal Request* within three (3) calendar days (excluding holidays and weekends) from the date of the student's original withdrawal request, but no later than five (5) calendar days before the deadline to file partial/total withdrawals, as specified in the Academic Calendar.
3. The Registrar's office will evaluate the request for reinstatement in coordination with the course instructor(s), render a decision, and notify the student of the outcome. As appropriate, the course instructor(s) and University staff will receive notification that a student has been reinstated in the course(s). The Office of Student Financial Aid will reverse the Return of Title IV (R2T4) calculation, if one was completed, and redisburse any returns of Title IV Funds for which the student remains eligible for the same semester/payment period, as a result of the course(s) reinstatement. Other forms of financial aid the student received will also be reviewed and adjusted accordingly.
4. After the process of reinstatement in the course(s) has been completed, if the student wishes to submit a new withdrawal request to drop a course but not all courses (within the dates established in the academic calendars), the effective date will be the date on which the new withdrawal request is filed.
5. After rescinding a previous official notification for Total Withdrawal, if a student officially withdraws again from all courses in the same payment period, the student's Withdrawal Date is the last date of documented academic engagement/participation or the student's original Withdrawal Date from the previous official notification. The Date of Determination for the student's withdrawal is the date on which the University became aware that the student did not, or will not, complete the payment period.

The above process applies to student-initiated withdrawals. If a student was withdrawn from a course due to failure to begin academic attendance (i.e., WN grade), the process described in the Add/Drop Period and Census Date Policy applies.

Transient Registration

AGMU students will have the opportunity to take courses at accredited institutions of higher education as transient students if the courses are not offered at the institution and are required to continue course work in subsequent semesters.

1. To enroll as a transient student at another institution, students must request to transient to their campus Registrar's Office. The student will be notified of the decision of their request, subject to the approval of the School Dean, within 10 business days.
2. Approval shall only be granted for those courses listed within a specific term.
3. Students must be in good academic, financial, and conduct standing.

4. Courses completed with a grade of "C" or higher will be accepted for students seeking a degree in undergraduate and diplomas programs. Courses completed with a "B" or higher will be accepted for students in the graduate programs if the academic program permits transfer credits.
5. The credits will be recorded as attempted credits and will not be considered for GPA.
6. Students must submit official transcripts to AGMU within 45 days of completion of the course to be considered for transfer credit.

Class Attendance

Regular attendance and participation in class discussion and activities are expected. It will enhance and enrich the experience for the entire class. If the student expects to miss class for any reason, it is the student's responsibility to notify the faculty by email or telephone prior to class. Faculty may take student attendance into consideration when grading and should explain the possible impact of absences on the student's grades. Faculty are not required to allow students to make up work. Students are responsible for all material covered during the course, regardless of whether they are present in class. Thus, attendance is strongly recommended to better facilitate student achievement of academic goals.

Leave of Absence

Introduction/Purpose

AGMU understands that a student may face unexpected challenges that could necessitate a temporary suspension of their program of study. A student who meets this policy's eligibility and procedural requirements may be granted an approved leave of absence ("LOA") in compliance with licensing, accrediting, and federal requirements.

SCOPE

This policy applies to students currently enrolled at AGMU campuses and/or locations.

GENERAL PROVISIONS

AGMU offers a currently enrolled student the opportunity to request an LOA as long as documented, legitimate extenuating circumstances require the student to interrupt their education.

Examples of extenuating circumstances (i.e., LOA reasons) and supporting documentation include but are not limited to:

- Medical reasons (official letter from his/her physician)
- Military service requirements (copy of the military orders, which include the period he/she is required to serve and the location to which he/she was assigned.)
- Jury Duty (jury summons)

Conditions and Eligibility Requirements

- In almost all cases, a student will not qualify for a Title IV leave of absence but may qualify for an institutional leave of absence. AGMU will review the options available depending on the student's situation and will advise the student which type of leave of absence is available.
- The student must formally request an LOA in writing and provide detailed information (i.e., the reason for the LOA) justifying the request.
- The student must complete, sign, and date the LOA request in advance. The request must include:
 - documentation to support the LOA reason;
 - the start and end dates of the LOA; and
 - the expected (scheduled) return date from the LOA.
- The total number of calendar days on LOA(s) must not exceed 180 calendar days during any 12-month period.
- Students enrolled in a term-based credit-hour program should request an LOA to begin on the start date of the next session/term. Such students must have completed the most recent session/term and received academic grades (A-F) for that session/term. If approved, the student will be granted an institutional LOA.
- Students enrolled only in an externship course may request an LOA at any time during the externship if no other Semester Credit Hour course(s) are being attempted in the same term (payment period). If approved, the student may be granted an institutional or Title IV LOA.
- The LOA request must be submitted and approved before the start date of the LOA.
- Students are responsible for understanding and being aware of the implications of an LOA on their financial aid and academic progress toward their degree completion. A student on a LOA may be considered withdrawn for federal financial aid purposes.
 - For an institutional leave of absence, the student will be reported as withdrawn to the National Student Loan Data System (NSLDS). This will result in the student entering their loan's grace period or loan repayment.
 - If a student is granted an institutional LOA during a semester:
 - The student's withdrawal date reported to NSLDS will be determined by the institution's withdrawal policy.
 - The student may be subject to a Return of Title IV calculation, which may result in a balance due to the institution.
 - If a student is granted an institutional LOA between semesters, the student's withdrawal day reported to NSLDS will be the final day of the term in which the student was last enrolled.

- If a student is granted an institutional LOA, they will lose “legacy status” for pre-July 1, 2026 federal loan limits (if applicable).
- For a Title IV LOA, the student will not be considered withdrawn for Title IV purposes provided the student returns at or before the end of the LOA. If the student does not return at or before the end of the LOA, the student will be reported as withdrawn to NSLDS as of the start date of the LOA and the student may be subject to a Return of Title IV calculation, which may result in a balance due to the institution.
- Students who are contemplating an LOA should be aware that one or more factors may affect their eligibility to graduate within the maximum program completion time:
 - Students returning from an LOA are not guaranteed that the course(s) required to resume their education will be available at the time of re-entry.
 - Students may have to wait for the appropriate session/term when the course(s) is offered.
- A student granted an approved LOA will retain their academic standing and be exempt from the University’s continuous enrollment (registration or attendance) requirement.
- During the student’s approved Title IV LOA period, federal student loan funds will not be disbursed; however, the University may disburse grant funds intended for current or prior terms (payment periods).
- A student returning from an approved Title IV LOA must resume training at the same point in the academic program that they began the LOA.
- Upon return from an institutional LOA, a student enrolled in a term-based credit-hour program will be expected to continue and enroll in the course(s) offered in the normal sequence of the educational program. A student enrolled only in an externship course(s) and returning from an institutional or Title IV LOA (as approved by AGMU) will be required to resume attendance in the same externship course(s) from which the student interrupted studies before the LOA and receive final grades for the course(s). The University will not assess any additional institutional charges for completing the externship course(s) from which the student took leave.
- The University does not grant an LOA retroactively.

PROCEDURE

1. The student must be officially enrolled at the time the request is made.
2. To apply for an LOA, the student must submit a completed, signed, dated Leave of Absence Request Form and supporting documentation to the Registrar’s Office.
3. The Registrar’s Office, in coordination with the Financial Aid Office, will evaluate the student’s LOA request based on the documentation submitted and the student’s academic status and render a decision before the start date of the LOA. The Registrar’s Office will inform the student if the LOA is approved or denied and if approved whether the LOA was approved as an institutional or Title IV LOA.

4. The student will be responsible for meeting with the School Dean to address academic affairs.
5. Upon return from a Title IV LOA, the student continues to earn the Title IV aid previously awarded for the payment period, and the student will be integrated into the course(s) on the scheduled return date indicated in the request. The student must comply with the material discussed and work assigned by the course professor.
6. If the student fails to return from a Title IV LOA on or before the scheduled return date, the student will be considered and processed as an Official Total Withdrawal (W) as of the start date of the LOA. The student's enrollment status will be updated from "A" (approved leave of absence) to "W" (withdrawn) on NSLDS, which may require federal student loan borrowers to enter repayment of his/her student loan immediately. As noted above, a student approved for an institutional LOA is considered withdrawn for Title IV purposes during the institutional LOA.
7. The student financing office will guide the student on the impact of the LOA on his/her financial aid, repayment, and academic goals.

Add/Drop Period and Census Date Policy

Introduction

The purpose of the AGMU Add/Drop Period and Census Date Policy is to:

- Allow students the opportunity to adjust their course schedule at the beginning of each term or Part of Term (PT) without academic or financial penalty; and
- Verify whether students have established academic attendance in each registered course by the Census Date published in the Academic Calendar, and outline the consequences for failing to do so, particularly as it relates to student financial aid eligibility.

SCOPE

This policy applies to all students enrolled at any AGMU campus in all academic programs and learning modalities (i.e., on-ground, blended/hybrid, 100% online).

PROCEDURE

Add/Drop Period

The Add/Drop Period is the timeframe at the beginning of each term or PT during which students can make adjustments to their course schedules (e.g., add, change, drop a course(s)) without academic or financial penalty. The Add/Drop Period is a specified number of calendar days and varies by the term or PT in which a student is enrolled, as published in the Academic Calendars. A student who wishes to drop any or all of their courses before the end of the Add/Drop Period of a term or PT should provide written notice to the Registrar's office via email/mail or complete and submit the *Withdrawal Request Form* electronically through the University's Student Portal.

A student who drops a course(s) during this period will receive a full refund of tuition and fees for the dropped course(s), or the appropriate adjustment considering any added courses. Courses dropped during the Add/Drop Period will not appear on the student's official transcript. However, dropping a course(s) may reduce a student's enrollment status/academic load (e.g., Full-Time to Half-Time) for the semester/payment period, and the amount of financial aid initially awarded (e.g., Title IV Funds, institutional or state scholarships/grants, etc.) may be reduced or recalculated based on the reduced academic load.

All students must complete their enrollment by the end of the Add/Drop Period.

The Add/Drop Period may be adjusted due to holidays, inclement weather, or other mitigating circumstances.

Census Date

AGMU is required to confirm a student began attendance in courses used to determine the student's eligibility for federal financial aid (Title IV). Therefore, faculty are required to report any student who failed to complete at least one academically related activity for a course by the published Census Date for the term or PT.

Students are expected to establish academic attendance in all registered classes by the published Census Date for each term or PT, beginning with the first-class session.

- A student can establish academic attendance for a course by attending an on-ground (in-person) course or by actively participating in an academically related activity (e.g., an assignment, an exam, or a substantive discussion post relevant to the course content) for an online course. Attendance needs only to be established once by the Census Date.
- A course(s) officially dropped after the Add/Drop Period will be assigned a "W" (Official Withdrawal) grade if academic attendance was established in the course; otherwise, a "WN" (Never Attended Course) grade will be posted.
- A student's failure to officially drop a course(s) by the end of the Add/Drop Period or establish academic attendance in a registered course(s) by the applicable Census Date does not constitute an automatic drop or withdrawal from the course(s). The student will be administratively withdrawn from the course(s), resulting in a "WN" (Never Attended Course) grade posted on the student's transcript. The "WN" is a non-punitive grade signifying the student never established academic attendance in the course(s). The student's eligibility for Title IV and other financial aid will be adjusted (as appropriate) as a result of receiving any WN grades.

Please refer to the Institutional Refund Policy for information regarding adjustments to tuition and fees charges for dropping a course(s).

RESPONSIBILITIES

Students

Enrolled students must establish academic attendance for each registered course by the applicable Census Date published in the Academic Calendars for each term or PT to maintain enrollment on which their financial aid eligibility is based.

- A student will receive an email notification of non-academic attendance from the Registrar's Office if they fail to establish academic attendance in a course(s). A Retention Officer will follow up with the student and, if applicable, assist the student in requesting reinstatement in the course(s) from the course instructor. The faculty member will determine if the student may be reinstated in the course.
- Students who establish academic attendance in any registered courses and subsequently officially or unofficially withdraw from all courses before the end of a term or PT may be required to repay a portion or all aid disbursed.

Faculty

Each faculty member is responsible for completing the Census Certification for all students enrolled in their courses by the "Census Certification" dates published in the Academic Calendars for each PT. Faculty must complete this process electronically through the Faculty Portal, certifying the academic attendance status of each student, including those who did not establish academic attendance by the published Census Date.

- Upon submission of the census report completed by each course faculty member, a student who did not establish academic attendance in a course(s) by the Census Date will receive an email notification of non-academic attendance in the course(s).
- Each course instructor will review student requests for course reinstatement and notify the Registrar's Office of approvals/denials within one (1) calendar day of receiving such requests.

Academic Directors

Each Campus Academic Director is responsible for ensuring that census reports are completed by faculty and received for each class roster.

Registrar's Office

The Registrar's Office will be responsible for notifying faculty of the established dates for the submission of Census Reports and providing guidance on the applicable procedures and requirements. The Registrar's Office will also manage the electronic process for the administrative withdrawal of courses for students who, based on the information provided by faculty, have not established academic attendance.

The Registrar's Office will send clear and timely communications to students who have not established academic attendance, outlining the administrative withdrawal of the course, the applicable financial consequences, and the reinstatement process.

Financial Aid Office

The Financial Aid Office must:

- Review any changes to students' enrollment status as a result of receiving WN grades, adjust financial aid awards (as applicable), and notify students of changes to their financial aid awards.
- Determine ineligible funds due to enrollment status changes and process Return of Title IV calculations, as applicable.

Finance Office

The Finance Office must process the return of ineligible funds to the proper source due to enrollment status changes or withdrawals.

Evaluation of Student's Academic Achievement

Definition of a Semester Credit Hour

One semester credit hour is equivalent to a minimum of fifteen (15) hours of planned learning experiences composed of hours of instruction and individual or group activities as indicated in the course outline under the guidance of a qualified faculty. In addition, students are expected to engage in a minimum of two hours of out of class student work or 3 hours of lab per each course credit hour, per semester.

The equivalent amount of work as required in paragraph 1 of this definition of other academic activities including but not limited to laboratory work, internships, practicums, studio work, and other academic work leading to the award of a semester credit.

Please note that some programs require additional time for hands-on learning.

Partial and Final Evaluations:

1. Each part of term (PT), faculty will evaluate students based on the competencies required of the course where there will be at least three (3) partial evaluations and a final evaluation.
2. The weight of each evaluation will depend on the judgment and evaluation method of each faculty. These evaluations may consist of exams, projects, cases or other appropriate activities in the judgment of the faculty and depend on the nature of the course.
3. It will be the responsibility of the students to clarify with the faculty any situation related to their evaluations.
4. If the student has been absent for justified reasons, the faculty may give the student an opportunity for make-up exams or other means of evaluation.
5. Students must complete the work required for the evaluations on the date stipulated by the faculty.

Responsibility of the Faculty:

1. It will be the responsibility of the faculty to comply with the academic calendar and to inform the students, at the beginning of the course, of the course objectives and content, exams and other work that will be required for their evaluation.
2. It will be the responsibility of the faculty to provide weekly evaluation and feedback to students for all academic activities before the last date established for partial withdrawals.

Student Evaluation System

The purpose of the AGMU Student Evaluation Systems Policy is to:

- Establish institutional standards for the assessment and grading of students at AGMU.

- Promote academic excellence, support student learning and retention, and provide a systematic process for evaluating the knowledge, skills, and competencies established by the University and its academic programs.

Scope

Ana G. Mendez University (AGMU) uses a letter grading system to evaluate students' academic performance and academic progress. This policy applies to all academic offerings and programs of Ana G. Méndez University and to all instructional modalities and locations in which AGMU academic programs are offered.

Policy

Student assessment shall be aligned with the learning outcomes, competencies, and academic requirements established by AGMU, its academic programs, and applicable accreditation standards and regulations.

Assessment shall be conducted through a variety of formative and summative evaluation strategies that allow faculty and academic units to determine the extent to which course and program learning objectives have been achieved.

Formative Assessment

Formative assessment should be conducted throughout the academic term to monitor student academic performance and provide timely information regarding student progress.

Assessment activities may include, but are not limited to, examinations, written reports, oral presentations, portfolios, collaborative activities, assignments, projects, and other assessment activities established by the faculty member or academic unit.

The specific assessment activities, their number, weight, and sequence shall be established by the academic program and documented in the applicable program handbook or course syllabus, consistent with the principles set forth in this Policy. Where the nature of a course or program does not lend itself to the assessment structure described below, the academic program shall establish an alternative structure that satisfies the purposes of this Policy, subject to approval by the Dean of the corresponding school.

A. Undergraduate Level

Formative assessment at the undergraduate level shall ordinarily include a minimum of three (3) independent partial assessments administered at reasonable intervals during the academic term. An academic program may establish a different formative assessment structure where warranted by the nature of the course or program, including practicum, clinical, internship, studio, laboratory, thesis, capstone, and comprehensive examination courses, subject to approval by the Dean of the corresponding school and documentation in the applicable program handbook or course syllabus.

Programs shall provide students with multiple opportunities for formative assessment and feedback throughout each course. Each program shall establish appropriate assessment thresholds or milestones for communicating students' progress before the final assessment.

In addition to regular feedback, students shall be informed of their current academic standing upon reaching the applicable program-established assessment threshold or milestone, and within any timeframe established by the program or academic calendar.

B. Graduate Level

Formative assessment at the graduate level shall ordinarily include a minimum of two (2) independent partial assessments administered at reasonable intervals during the academic term. An academic program may establish a different formative assessment structure where warranted by the nature of the course or program, including practicum, clinical, internship, studio, laboratory, thesis, dissertation, capstone, and comprehensive examination courses, subject to approval by the Dean of the corresponding school and documentation in the applicable program handbook or course syllabus.

Programs shall provide students with multiple opportunities for formative assessment and feedback throughout each course. Each program shall establish appropriate assessment thresholds or milestones for communicating students' progress before the final assessment.

In addition to regular feedback, students shall be informed of their current academic standing upon reaching the applicable program-established assessment threshold or milestone, and within any timeframe established by the program or academic calendar.

Summative Assessment

A final examination or final assessment shall form part of the summative evaluation, unless the academic program establishes an alternative summative measure appropriate to the nature of the course, subject to approval by the Dean of the corresponding school. The summative assessment shall represent the overall results obtained through the assessment activities administered throughout the academic term.

The final grade shall reflect the student's overall academic performance in accordance with the assessment criteria established for the course.

Final Examinations and Assessments

Faculty members shall administer final examinations or final assessments on the date and at the time established by the University.

Faculty shall submit the final examination or assessment, including examinations or assessments associated with students who had received an incomplete grade, and the corresponding answer key or evaluation criteria, to the appropriate academic unit in accordance with institutional procedures.

General Provisions

Course Grades

Course grades are based on the quality of academic work measured through graded assignments, quizzes, written tests, laboratory work, term papers, or projects, as specified in each course syllabus. Grade reports are available to students after each semester.

At the end of each semester/term, the faculty member or respective personnel will submit grades by the grade submission deadline published in the **Academic Calendar** for courses in which students are enrolled. The grade for each course is final and certified by the Registrar's Office in the students' official academic record, except for grades changed through the **Grade Appeal Procedures**, resolution of an Incomplete, or correction of a documented clerical or administrative error. Grades are education records subject to the University's student records and privacy obligations.

Grade Chart

The chart below lists letter grades used by AGMU and describes the impact of each grade on a student's Satisfactory Academic Progress (SAP) at each evaluation point, which occurs after the end of each semester.

Grade Chart for Undergraduate and Graduate Programs				SAP Impact		
				CGPA	Completion Rate	
Letter Grade	Numeric Range	Description	Quality Points	Count in CGPA	Count in Credits Attempted	Count in Credits Earned
A	90 – 100	Outstanding	4.00	✓	✓	✓
B	80 – 89	Above Average	3.00	✓	✓	✓
C	70 – 79	Average	2.00	✓	✓	✓
D	60 – 69	Below Average	1.00	✓	✓	✓
F	0 – 59	Failing	0.00	✓	✓	✗
T	N/A	Transfer Credit	N/A	✗	✓	✓
P	N/A	Pass	N/A	✗	✓	✓
NP	N/A	No Pass	N/A	✗	✓	✗
W	N/A	Official Withdrawal	N/A	✗	✓	✗
WF	N/A	Withdrawal Failure	0.00	✓	✓	✗
WA	N/A	Administrative Withdrawal	N/A	✗	✓	✗
WN	N/A	Never Attended Course (No-Show)	N/A	✗	✗	✗
I	N/A	Incomplete (IB, IC, ID, IF)	N/A	✗	✓	✗
IP	N/A	Course in Progress	N/A	✗	✓	✗

Explanations of Non-Passing, Withdrawn, and Administrative Grades

The following are further explanations for the non-passing, withdrawn, and administrative grades, as listed in the **Grade Chart**.

Grade	Explanation
F	A course with an “ F ” grade indicates the student completed the course but did not meet the course’s minimum expectations. The grade is considered an earned “F” and is calculated into the CGPA, with the credit hours counted as attempted but not earned.
T	Transfer credits accepted for an equivalent course offered by AGMU will appear as a “ T ” on a student’s transcript, and in accordance with AGMU’s Transfer Credit Policy . Accepted transfer credits are treated as both attempted and earned credits for SAP and maximum timeframe calculations and are not included in the CGPA.
P	A “ P ” indicates that the student met the minimum expectations of the course. A “P” grade is not calculated into the CGPA but is counted as credit hours attempted and earned.
NP	A course with an “ NP ” indicates that the student did not meet the course's minimum expectations. Students in Comprehensive Exam courses who were reported during the Census Certification but did not attend the exam date.
W	A “ W ” indicates an official partial or total withdrawal from a course requested by the student after the Add/Drop Period and before the deadline to withdraw from the course, as specified in the Academic Calendars .
WF	A grade of “ WF ” (Compulsory Withdrawal) will be assigned to students who were certified as having established academic activity (show) during the census-taking process but subsequently discontinue participation in the course.
WA	A “ WA ” indicates an administrative withdrawal from a course(s) for the following reason(s), as approved by the Campus Director: ○ The student’s continued enrollment in the course(s) may jeopardize the health and safety of the student, other students, and/or staff or faculty. ○ The student’s refusal to comply with AGMU’s “Student Regulations and Code of Conduct,” and/or the student’s action(s), constitutes serious misconduct.
WN	A “ WN ” indicates no academic engagement was established in a course before the Census Date published in the Academic Calendars . This is reported in the official census, and the grade is excluded from SAP evaluation.
I/B, I/C, I/D, I/F	An Incomplete grade is a provisional grade assigned when a student has not completed a required course evaluation component and the faculty member grants the student additional time to fulfill the outstanding requirement, in accordance with the provisions outlined in the “Incompletes” section below. The outstanding requirement may involve any evaluative component of the course and is not limited to the final assessment.
IP	A course that is currently in progress. Student complied with the established work plan but did not complete all course requirements.

Effects of Non-Passing/Withdrawn Grades and Required Course Repeat:

A student who receives an F, NP, WA, or WF in a required course must retake and successfully complete the course before graduation. A student who receives a W in a required course must re-enroll in and successfully complete the course. A student who receives a WN must enroll in and successfully complete the course. A student may also repeat a required course in which a grade of D was received. When a student repeats a course, only the higher grade is used in the CGPA. The lower course grade will include a double asterisk (**) to indicate that the course has been repeated. Both original and repeated credits will be counted as credit hours attempted in the completion rate percentage. Federal financial aid may be received for a repeated course only to the extent permitted under applicable Title IV requirements.

Effects of Grades on GPA Calculation:

- Grades that affect the GPA are A, B, C, D, F, and WF.
- Grades that do not affect the GPA are I, IP, NP, P, T, W, WA, and WN.

Effects of Grades on Completion Rate Calculation:

- Grades that count in credit hours attempted are all grades, except for WN. Credit hours attempted are also included in the calculation of the maximum timeframe for program completion.
- Grades that count in credit hours earned are A, B, C, D, P, and T.
- Grades that do not count in credit hours earned are F, I, IP, NP, W, WA, WF, and WN.

Refer to the **Course Repeat Policy** and **Satisfactory Academic Progress Policy** for more information.

Grade Point Averages

After grades are posted at the end of a semester, **Earned Quality Points** for each course are calculated by multiplying the course's credit hours by the grade's quality point value (e.g., A = 4.00, B = 3.00, C = 2.00). The **Grade Point Average (GPA)** is calculated by dividing the total quality points earned by the total number of credit hours attempted for which grades were awarded (as classified in the Grade Chart).

GPA Formulas:

- Earned Quality Points (per course) = Credit Hours × Quality Point Value
- $GPA = \text{Total Earned Quality Points} \div \text{Total Credit Hours Attempted in Courses with Grades That Affect the GPA}$

Example Calculation (Term GPA)

A student completes two courses in the first semester: one three-credit course and one four-credit course (total of 7 credit hours). The student earns a grade of "C" in the three-credit course and an "A" in the four-credit course. The GPA is calculated as follows:

Course No.	Credit Hours Attempted	Grade	Quality Point Value	Calculation	Earned Quality Points
Course 1	3	C	2.00	3 X 2.00	6.00
Course 2	4	A	4.00	4 X 4.00	16.00
TOTALS:	7				22.00
Term GPA:	22.00 ÷ 7 = 3.14 (rounded to two decimal places using standard rounding rules).				

Term GPA vs. Cumulative GPA (CGPA)

- **Term GPA** reflects academic performance for a single semester.
- **Cumulative GPA (CGPA)** includes all courses in the student's program of study to date and is used to determine academic standing, graduation eligibility, and honors.
- Both the **Term GPA** and **CGPA** range from **0.00 to 4.00** and are calculated using all GPA-bearing coursework applicable to the student's academic record, including remedial and developmental courses (if applicable).

Grade Appeal Procedures

The Grade Appeal Procedures provide students with a formal process to contest a final grade in a course on the grounds set forth in the **Acceptable Reasons for Appeal** section below.

Acceptable Reasons for Appeal

A grade appeal may be submitted only if:

- The final grade was assigned on a basis other than academic performance in the course;
- A procedural error occurred in calculating or recording the final grade for the course; or
- The final grade was not fairly given according to the stated course syllabus and policies.

Note: Disagreement with grading policies or an instructor's academic judgment is not considered an acceptable reason for appeal. A grade appeal may result in the grade being raised, lowered, or remaining the same.

Student Checklist for Appeal

To request a grade appeal, the student must:

- ✓ Complete a detailed written statement explaining the reason(s) for the appeal, in accordance with the Acceptable Reasons for Appeal section. The statement should be addressed to the course instructor and include the desired outcome sought;
- ✓ Provide supporting documentation (e.g., syllabus, graded work, email correspondence); and
- ✓ Submit the appeal within the published deadline (see table below).

Deadlines for Filing a Grade Appeal

Semester Grade Issued	Deadline to Appeal
Fall	The deadline date is published in the following Spring semester of the Academic Calendar.
Spring	The deadline date is published in the following Summer semester of the Academic Calendar.

Summer	The deadline date is published in the following Fall semester of the Academic Calendar.
---------------	--

If deadlines cannot be met due to extenuating circumstances (e.g., illness, military service, or an approved disability-related accommodation), the student may request an extension from the Academic Dean before the deadline expires. Supporting documentation may be required, and the Academic Dean will respond to the request in writing.

Steps in the Appeal Process

- **Step 1:** The student submits a completed written statement for the grade appeal, along with supporting documentation, to the course instructor by the published deadline.
- **Step 2:** The course instructor reviews the grade appeal and provides a written decision to the student, typically within 10 business days of receipt.
- **Step 3:** If the student is not satisfied with the decision, the student may submit a written appeal to the Academic Dean within 10 business days of receiving the course instructor's decision.
- **Step 4:** The Academic Dean will review the appeal and notify the student of the decision in writing, typically within 10 business days of receiving the student's appeal. The Academic Dean's decision is the final institutional decision and cannot be appealed further under these procedures.

Incomplete Grade

This section outlines the conditions under which an **Incomplete ("I")** grade may be assigned, the process for resolving an "I" grade, and the responsibilities of students and faculty.

Conditions for Resolving I Grade

- The student is responsible for making arrangements with the instructor for completing any remaining coursework, including methods for submission of remaining coursework.
- If the remaining coursework is completed and submitted within the allotted timeframe, the instructor will complete a *Change of Grade* form to replace the "I" grade with a final grade.
- If the remaining coursework is not completed by the completion deadline:
 - The University Registrar will convert the Incomplete grade to the appropriate grade as applicable.
 - The final grade will be included in the evaluation of SAP.
 - If the converted grade is an F, it will be included in the cumulative GPA. In all cases, the credit hours will be counted as credit hours attempted.

Impact on Academic Progress

- An Incomplete grade is excluded from the CGPA calculation until it is resolved.
- The credit hours associated with an Incomplete grade are counted as credit hours attempted for SAP and Title IV eligibility purposes.
- Failure to resolve an Incomplete within the allotted timeframe may affect financial aid eligibility and academic standing. Students receiving financial aid are encouraged to consult with the Office of Student Financial Assistance (OSFA) to understand potential impacts.

Responsibilities

Faculty

1. Establishing and communicating the assessment criteria for each course.
2. Administering formative and summative assessments in accordance with this policy and applicable academic requirements.
3. Providing students with timely information regarding their academic progress.
4. Administering final examinations or assessments on the dates and times established by the University.
5. Submitting final grades within the deadlines established by the academic calendar.
6. Maintaining appropriate documentation of student assessment and grades in accordance with institutional procedures.

Academic Unit

1. Schools, departments, programs, and other academic units shall establish and monitor assessment practices consistent with institutional requirements, academic program standards, and applicable accreditation requirements.
2. Academic units may establish additional or alternative assessment requirements when warranted by the nature of a particular academic program or course, provided that such requirements are approved by the Dean of the corresponding school, documented in the applicable program handbook or course syllabus, and consistent with University policies and procedures.

Registrar's Office

1. Maintain the official academic record and process grades and grade codes submitted by faculty in accordance with established institutional procedures.
2. The Registrar's Office shall ensure that official grade records are processed within the applicable academic calendar and institutional requirements.

Finance Office

Process the return of ineligible funds to the proper source due to enrollment status changes or withdrawals.

Repeating Courses

General Requirements

If a student does not meet the required minimum course grade, the student must repeat the course if required by the student's program of study. The required minimum course grades and program requirement can be found in the Academic Programs section.

1. A W or WN does not count as a graded attempt.
2. In all course repeats, the failing or previous grade is not expunged from a student's academic record. However, the highest grade obtained for the course is the grade that will be counted towards the student's GPA.
3. No additional credits will be earned for repeating courses for which credits have already been earned.

4. No student may repeat a specified course until they have received a final grade.
5. Repeated courses will count towards the evaluation of the student's Satisfactory Academic Progress (SAP).
6. If a graduate student obtains a final grade of C or less and it lowers the minimum graduation GPA requirement of 3.0, it will be compulsory for the student to repeat the course(s).
7. The minimum passing grade for courses in pre-licensure nursing programs is C. If the minimum progression GPA falls below the minimum requirement of 3.0, it will be compulsory for the student to repeat the course(s). The minimum grade for courses in graduate nursing courses is B. Failure to meet this requirement will require retaking the course of the class, and students will be unable to progress in the course sequence. A student who fails two courses or the same course twice must appeal to the Nursing Progression Committee to continue in the program.

Federal Financial Aid

In addition to the general requirements above, federal financial aid regulations limit the number of times a student may repeat a course and receive federal financial aid for that course. In any case, retaken classes may count against SAP, and the student's eligibility is still constrained by all SAP requirements.

1. A student may receive federal financial aid when repeating a course that was previously failed.
2. A student may receive federal financial aid to repeat a previously passed course (with any grade higher than an F) one additional time.
3. Once a student has completed any course twice and earned a passing grade (with any grade higher than an F) they are no longer eligible to receive federal financial aid for that course.

Independent Study

Independent study courses will be offered as an alternative for those students who require a course not scheduled in their graduation year. Courses may or may not be offered by independent study if they meet the following specific eligibility or exclusion conditions.

1. Eligibility:
 - a. The course is not scheduled or available as an intercampus course at another AGMU location.
 - b. The course content cannot be substituted by another. There is no equivalent course available.
 - c. The course will not be offered in the year the student will receive their academic degree, according to the sequential academic program in which they are enrolled.
 - d. The course is required in the student's sequential curriculum.
 - e. Students may take up to 25% of the courses in their curricular sequence as independent studies modality.
 - f. The student can apply for independent studies for the same course only once; if the student fails, the course cannot be repeated under this modality.

- g. If the student obtains an F in a face-to-face course, they will not be able to apply for it in the independent study modality.
- h. Special cases will be evaluated on their merits by the school dean, specialized school, the department director, or the director of the program offering the course.
- i. As part of special cases to consider, the school dean will submit an annually updated course list by August 1 to the course scheduling unit of programs with the internal moratorium or with a low admission rate that is eligible under this procedure.
- j. If the courses have objectives that develop techniques and skills for group interaction, the faculty must adjust the assessment activity to ensure to comply with the course objectives.

2. Exclusion:

- a. Laboratory courses that require preparation of materials or use of specific media (e.g., chemistry, biology, nursing, etc.) that are onerous for single-student work.
- b. Courses that involve the development and measurement of psychomotor skills.
- c. Seminar-type courses that require group activities related to internships.
- d. Laboratory courses that require immediate production and application of knowledge and skills (e.g., nursing, massage, and the like).

Each school will identify courses that should not be offered through the independent studies modality. The school dean will submit an annually updated course list by August 1 to the course scheduling unit. The course scheduling unit will include this information in the bulletin of courses not offered under the independent studies modality.

Procedure

1. The student requests the independent studies course to the school, specialized school, or locality to which they belong according to their curricular sequence.
2. The school dean, specialized school, academic director, program director, or corresponding officer will analyze:
 - a. The student's academic evaluation and class schedule for the term in which the student requested to seek independent study.
 - b. The current academic year's schedule.
3. The course will be scheduled in the system after the course is authorized by the school dean, specialized school, academic director, program director, or the corresponding officer. *A request must be sent to the scheduling department.*
4. The faculty member will be identified, and the student will be notified of the procedure to be followed (enrolling in the course, etc.).
5. If the requested course pertains to another school or university location, the school dean or corresponding officer of the school, specialized school, campus director, or program director will submit the application along with the academic evaluation to the school, specialized school, or university location that corresponds to the course.

6. If the course is approved, the appropriate school dean or officer will submit the form to the registrar's office for processing and placement on the student's record. *The independent study will not be effective if this document is not submitted to the Registrar's Office.*
7. The school, specialized school, or university location that offers the requested course may authorize or deny the application. In any case, the student must be notified of the university unit of origin, indicating the reasons.
8. If the request is not recommended, the student's retention officer will notify the student via email, stating the reasons for the decision.
9. The student may request a reconsideration from the academic dean. The decision of the school dean will be final and cannot be appealed.

Students enrolled in an independent study course are required to adhere to the required engagement hours.

Satisfactory Academic Progress

Federal regulations require students who receive Title IV (federal) financial aid to make deliberate and measurable progress toward their degree to continue to receive these funds. This requirement is called Satisfactory Academic Progress or SAP.

The evaluation criteria for SAP include qualitative (grade-based) and quantitative (pace) components. The qualitative measure is based on the cumulative grade point average (CGPA). The quantitative measure is based on the number of credit hours the student attempts and earns. Students are also expected to complete their program within 150 percent of the length of the published program length as measured in credit hours.

Maintaining Satisfactory Academic Progress

The Satisfactory Academic Progress of students enrolled in associate, bachelor's, master's, and doctorate degree programs will be assessed at the end of every two (2) semesters. The academic progress of students enrolled in diploma programs will be assessed at the end of each semester. The registrar's office will notify students in writing, through e-mail, of their academic status.

Students are prohibited from receiving federal student financial aid after attempting 150% of the number of credit hours required for their academic program, unless an appeal is successfully approved. The maximum timeframe calculation includes the attempted credits, including transfer credits related to the student's academic program. Students may continue in their academic programs after exceeding the 150% maximum timeframe, provided they meet AGMU academic requirements; however, they are not eligible for federal student financial aid unless an appeal is approved.

To maintain good standing, students must comply with the following:

Qualitative component

AGMU establishes specific minimum CGPA requirements by program level (i.e., diploma, associate, bachelor's, master's, and doctorate degree programs). The student must meet the minimum retention rate according to their academic program. This index increases when considering the credits attempted and approved. Refer to Appendix A, Satisfactory Academic Progress Tables, for the qualitative components per program level.

Quantitative component

AGMU uses a graduated completion percentage by program level. The student must earn the minimum percentage of attempted credits depending on the program level and academic year in which the student is enrolled.

All credits attempted and earned, including transfer credits that count towards the student's program of study, are considered in the calculation.

Refer to Appendix A, Satisfactory Academic Progress Tables, for the quantitative components per program level.

Maximum Timeframe

Students are prohibited from receiving federal student financial aid after attempting 150% of the number of credit hours required for graduation in their academic program, unless an appeal is successfully approved. The maximum timeframe calculation includes the attempted credits, including transfer credits related to the student's academic program. Students may continue in their academic programs after exceeding the 150% maximum timeframe, provided they meet institutional academic requirements; however, they are not eligible for federal student financial aid unless an appeal is approved.

Changes in Status or Program

If a student wants to enroll in a different academic program, the student must request approval from the school dean. For SAP purposes, the quantitative measure will include all attempted and earned credits applicable to the new program, including transfer credits accepted toward program requirements. Only grades from the program in which the student is enrolled are included in the qualitative measure. Students are encouraged to carefully consider program changes because federal regulations limit total lifetime financial aid eligibility.

Students who discontinue their studies and subsequently apply for readmission will be readmitted under the current SAP policy and will have the same SAP status that resulted as of the end of the last term attended. Students applying for readmission will be referred by the Office of Enrollment to the Registrar for evaluation. If the student does not meet SAP, AGMU will determine if the student may be readmitted, provided an appeal has been approved.

Students requesting admission into a new academic program after graduation will begin the new program with a new SAP history. If a student transfers credits from the completed program of study, only those transfer credits that apply to the student's current academic program will be considered when measuring SAP.

Impact of Course Repetitions, Withdrawals, Incompletes and Transfers on Satisfactory Academic Progress

- **Course Repetitions** – Federal regulations limit the number of times a student can repeat a course paid for with Title IV financial aid funds. Generally, failed courses may be repeated until passed and courses that a student has passed can be repeated only once. Please check with the Financial Aid Office if you are not sure whether a course can be repeated with financial aid. If a student repeats a course, only the highest grade earned will be included in the student's cumulative GPA. However, each attempt at

the course will count as credits attempted and will appear on the official transcript of credits.

- **Withdrawals** – If a student withdraws from a course, the credits for the course count toward the determination of credit hours attempted but not earned and will not be considered in the cumulative GPA.
- **Incomplete Courses** - If a student has an incomplete in a course, the credits for the course count towards the determination of credit hours attempted but not earned. The credit hours will be considered earned once the course is completed. The course will not be considered in the cumulative GPA until a grade is assigned. If a final grade is posted prior to the next evaluation point, the updated credits and grade will be reflected in that evaluation.
- **Transfer Credits** - If a student transfers in credits from another institution, the accepted credits count toward the determination of credit hours attempted and credit hours earned but will not be considered in the cumulative GPA. Only those transfer credits that apply to the student's program of enrollment at the Institution will count as credits attempted and earned. Refer to the Institution's catalog for requirements on accepted transfer credits from another institution.

Remedial and Developmental Courses

Financial aid recipients may receive aid for a maximum of 30 semester credit hours in developmental coursework. Students enrolled in remedial courses are expected to receive passing grades in those courses to progress into the next term. Remedial and developmental courses count toward the determination of credit hours attempted and earned and will be considered in the cumulative GPA when determining SAP.

Financial Aid Warning and Failure to meet Satisfactory Academic Progress (non-degree programs)

Students enrolled in diploma programs, for which SAP is evaluated at the end of each semester, will be placed on financial aid warning status for the next semester attended as a consequence of not making Satisfactory Academic Progress. AGMU uses this status without appeal or any other action by the student. The Registrar's Office will notify the student in writing, through e-mail, of the financial aid warning status.

The student must meet SAP as of the next evaluation point (by the end of the next semester attended) to receive financial aid in future terms. Students who do not meet SAP as of the next evaluation point become ineligible for federal financial aid funds and may continue their studies at the Institution at their own cost. If the student believes there are extenuating circumstances associated with the student's inability to meet SAP, they may appeal the termination status to the Appeals Committee. See section titled Financial Aid Ineligibility and Appeal Procedures below.

Please note that certain scholarship and grant programs may not allow for a financial aid warning semester. In these cases, failure to meet SAP in any given term may result in the termination of scholarship or grant funds. Please refer to your scholarship or grant information materials or contact the Financial Aid Office.

Financial Aid Ineligibility and Failure to Meet Satisfactory Academic Progress (degree programs)

Students enrolled in degree programs, for which SAP is measured at the end of every two semesters, will be informed in writing, through e-mail, of their loss of financial aid eligibility at the measurement point. The student will be advised of SAP requirements, appeal procedures and the process for re-establishing financial aid eligibility.

Failure to meet SAP in any given term may result in the termination of scholarship or grant funds. Please refer to your scholarship or grant information materials or contact the Financial Aid Office.

Appeal Procedures and Financial Aid Probation

Students who have lost eligibility for financial aid based on a failure to meet SAP standards may appeal their loss of eligibility if they have suffered extenuating circumstances beyond the student's control, such as the following:

- Student's injury or illness,
- Death of a relative, or
- Other special circumstances determined by the Institution, which may include Family difficulties, such as divorce or illness, financial hardships that significantly affected the student's ability to attend class or complete academic work, or Other significant personal circumstances that affected the student's academic performance.

Students who wish to make an appeal must be current on all financial obligations. Students may not use financial aid to make retroactive tuition and fee(s) payments.

As part of the request for an appeal, the student must present how the critical situation prevented them from meeting the academic progress. The student must also describe how their situation has changed in order to allow the student to meet the SAP standards at the next evaluation point. As part of the appeal, the student must submit the following:

- SAP Appeal Form (please refer to the form for further instructions),
- Signed and dated letter, and
- Supporting documentation (third-party documentation may be required as appropriate)

The student must submit the appeal after the receipt of the failure to meet SAP notification. For the appeal to be considered, the student must submit the SAP appeal documentation to the Academic Advisor, who will submit the documentation to the Appeals Committee.

The Appeals Committee is composed of a representative of the following offices: Academic Advisor, Registrar, Financial Aid, the Academic Director and the Campus Director or designated representative. It is presided by the Campus Director or designated representative. The Appeals Committee will evaluate the merits of the appeal by reviewing the documentation submitted as well as the student's previous academic performance at AGMU. The Appeals Committee may request additional information or documentation, as needed. The Dean of Student Affairs will notify the student in writing, through e-mail, of the determination made by the Appeals Committee. AGMU will generally provide its decision within ten (10) business days after receiving the student's appeal documentation.

Financial Aid Probation and Reinstatement

If the SAP appeal is approved, the student will be placed on financial aid probation for the next semester attended. The student may also be placed on an academic plan at the Appeal's Committee's recommendation. AGMU will advise the student in writing of the progress the student must achieve to meet the requirements of the SAP policy or of the academic plan by the end of the next semester attended. Students will be eligible for financial aid while on financial aid probation.

After the end of the financial aid probation semester, AGMU will measure the student's Satisfactory Academic Progress. The student will retain financial aid eligibility only if the student meets published minimum SAP standards and meets the requirements of the academic plan at the end of the semester of financial aid probation. If the student does not comply with SAP or does not meet the requirements of the academic plan at the end of the probation semester, the student will no longer be eligible for financial aid funds unless the student successfully appeals their status again.

Any student who loses financial aid eligibility due to failure to meet SAP and attends school at their own cost will regain financial aid eligibility in the academic semester following the semester in which the student meets the minimum SAP standards.

Appendix A **Satisfactory Academic Progress (SAP) Tables**

Diploma Programs		
Credits Attempted	% of Credits Earned	GPA
1 - 15	55%	1.65
16 - 30	60%	1.75
31 - 45	64%	2.00
46 +	67%	2.00

Associate Degree Programs		
Credits Attempted	% of Credits Earned	GPA
1 - 28	57%	1.70
29 - 56	62%	1.85
57 +	67%	2.00

Associate Degree in Nursing (for students admitted/started on and after August 2025)		
Credits Attempted	% of Credits Earned	GPA
1 - 24	60%	3.00
25 - 48	64%	3.00
49 +	67%	3.00

Bachelor's Degree Programs		
Credits Attempted	% of Credits Earned	GPA
1 - 30	55%	1.70
31 - 60	60%	1.85
61-90	64%	2.00
91+	67%	2.00

College Credit Certificates		
Credits Attempted	% of Credits Earned	GPA
1 - 12	60%	3.00
13 +	67%	3.00

Master's Degree Programs		
Credits Attempted	% of Credits Earned	GPA
1 - 18	55%	3.00
19-36	60%	3.00
37+	67%	3.00

Doctoral Degree Programs		
Credits Attempted	% of Credits Earned	GPA
1 - 18	55%	3.00
19-36	60%	3.00
37+	67%	3.00

Use of Artificial Intelligence at AGMU

Emerging technological and innovative changes have brought new challenges and opportunities for agile, productive development and, in turn, worrisome for developing content and advances in science, among others. Artificial intelligence (AI) has quickly been integrated into our lives, and we are perhaps unaware of its application in different areas of daily life. Our technological equipment and its assistants, common examples of which include SIRI, Alexa, and others, respond to us, recognize, and facilitate countless daily, personal, academic, work, and scientific research functions. Technological applications integrate artificial intelligence elements with multiple productivity functions such as, for example, translations, data analysis, and recommendations, among others. This type of artificial intelligence allows us to assist users, including those with visual or hearing needs.

Some higher education institutions also integrate elements of artificial intelligence, such as algorithms, into their marketing, retention, enrollment, interview, and research processes, among others. These facilitate functions and communications, recruitment, and continuous improvement of services and academic tasks.

Based on the rise that AI has taken, we consider it relevant and important to establish regulations on the use of these tools in academia. Therefore, responsible, guided, and clear integration is promoted on how, for what, and in what areas these processes could be implemented at AGMU. This will promote clarity and transparency while establishing the institutional perspective and position on the use of AI in academic, social, and intellectual activities.

This policy aims to guide, oversee, and regulate the use of artificial intelligence in an ethical, safe, responsible, and integral manner for the entire university community at AGMU. This policy incorporates a holistic approach considering the current AGMU policies on copyright, intellectual property, and overall academic fairness.

Scope

This policy will apply to all users of AGMU technological resources. This includes the university administration, students, teaching staff, contractors, external suppliers, consultants, job applicants, new entrants such as students and visitors, and corporations affiliated with AGMU. The regulations cover the direct or indirect use of AI technology, regardless of its geographical location.

Norms and Procedures

A. Norms

Ethical considerations and academic honesty

At AGMU, we recognize that AI has the potential to boost education, research, and innovation. However, along with this potential, we must also ensure the ethical and responsible use of AI and AI-based tools. Generative AI technologies are becoming common and popular and AGMU strives to ensure that members of the academic community, intentionally or due to lack of knowledge, engage in acts that fail to comply with academic integrity. An example of these potential acts is plagiarism (plagiarism reference). The fact that these technologies are not “human” does not mean that using their generated product may not be considered plagiarism. Ultimately, its “training” is based on other people's work and is not a product of the knowledge of the person who uses it.

Certainly, these tools can help in the creative, administrative, and intellectual process, but they cannot become a substitute for human thought and input. Although plagiarism is perhaps the ethical concern that first comes to mind, there are others that are equally important, in areas such as equity and justice (many AI tools perpetuate biases, discrimination, and injustices to members of certain groups), privacy and protection of data (type of use of personal data in institutional AI programs), security (cyber-attacks and unauthorized access to institutional data), among others.

Within the framework of this policy, it is essential to consider academic honesty as an essential pillar of institutional academic processes. Academic honesty refers to the practice of maintaining integrity and ethics in the educational field, including the following aspects:

- **Authenticity of Work:** All work submitted by students must be their own effort. This involves avoiding plagiarism, which is presenting another person's work, ideas, words, or data as if they were your own.
- **Ethical Use of Technology:** In the context of AI, academic honesty also encompasses the ethical and responsible use of technologies such as machine learning systems and language models in

research and learning. This means avoiding undue reliance on these tools for academic tasks and ensuring that their use does not violate established academic standards.

- Integrity in Exams and Assessments: Maintain honesty during exams and other assessments, avoiding fraud, cheating, and other forms of academic dishonesty.
- Respect for Institutional Rules: Adhere to the policies and regulations established by AGMU in relation to academic conduct, including rules on tasks' collaboration, presentation of work, and use of academic resources.
- Research Transparency: Maintain a transparent and ethical research practice, reporting results honestly, without manipulating data or results, and appropriately recognizing the contributions of others, including AI.

The Academic Integrity Commission of the Academic Senate will collaborate in the implementation and compliance of this policy to establish the position of the Ana G. Méndez University on the use of Artificial Intelligence.

All course syllabi and guides, regardless of the teaching methodology and/or format used for the course in the LMS, will include the following text:

"The Ana G. Méndez University maintains a firm commitment to ethics and academic honesty in all areas of the educational and research process. All submitted work is expected to reflect original efforts from the mind of a human being, and any use of external material must be properly cited in accordance with the Academic Integrity policy. The ethical and responsible use of artificial intelligence in any of its aspects is urged. Works created by artificial intelligence to represent an original contribution may be considered plagiarism."

B. Examples of AI permitted uses

Using or consulting with generative AI tools will be treated analogously to assistance from another person.

Examples of permitted uses of AI include, but are not limited to:

- Idea generation - developing outlines in the planning phase of projects, tasks or assignments
- Writing assistance - checking grammar and style; and obtaining writing suggestions provided the final content is reviewed and adjusted by the author.
- Research and development - generating and refining ideas; refining questions or hypotheses; consulting on a topic.

C. Examples of where AI is not permitted

The use of generative AI tools is not permitted for the following activities, among others:

- Content development – creating substantive content for academic work such as assignments, exams, essays, presentations, theses, dissertations, or research projects required for a course.
- Discussion forums and class participation – using the tool to write substantive responses in discussion forums assigned to the student, participate in debates, or any other activity that requires student expression.
- Group projects – completing an assigned task as part of a project or group work.

- General academic activities – the student is expected to demonstrate his or her own knowledge, skills, and effort in academic activities. These should not be completed with the help of generative AI.

D. General Considerations

- Associates – AGMU associates may use AI to generate information and facilitate decision-making and operations. You must comply with existing copyright, privacy, security, and data integrity policies and laws.
- Faculty – AGMU faculty members may use AI to improve teaching and learning, generate content, and provide feedback. Faculty may authorize students to use AI as long as they comply with existing copyright, privacy, security, and data integrity policies and laws.
- Research - The university community permits research development through the assisted or generated implementation of AI. In addition, it allows its application in various fields, ensuring that researchers comply with existing copyright, privacy, security, and information integrity policies. University organizations or external funding agencies will regulate the investigative processes.
- Personal Use - Personal use of AI at the University, whether in work, academic, or research contexts, must comply with current institutional regulations and policies. Personal use of AI, through public or private services, or as part of work tools not officially adopted by the University, must adhere to the acceptable use of technology policies. The University is not responsible for the personal use of AI or its personal consequences, and institutional policies will apply if AI is used inappropriately.
- External hires – Any person or entity hired by AGMU that uses AI must comply with existing copyright, privacy, security, and information integrity policies.

E. Use of Confidential or Personal Data

The use of Artificial Intelligence where confidential university data or personal data is included is prohibited. Public AI platforms can represent a security risk, as the information could be accessible to an unauthorized third party, compromising institutional privacy and security.

F. Disciplinary Measures

Any person who violates any provision contained in this Policy will be subject to disciplinary and/or corrective measures according to the severity of the violation and the applicable policies imposed by AGMU. Any possible violation of the provisions of this Policy and applicable laws will be referred to by the Vice Presidency of Academic Affairs for evaluation and determination.

Academic Integrity

Academic Integrity: All forms of Academic Misconduct are expressly prohibited and not tolerated in any form.

At the beginning of each course and on the syllabus, faculty are responsible for explaining the University's expectations for Academic Integrity, the penalties for Academic Misconduct, and referring students to this policy. Students are responsible for knowing this policy and the penalties for committing Academic Misconduct. Failure of an individual faculty member to remind the student as to what constitutes Academic Integrity or Academic Misconduct does not relieve the student of this responsibility.

Any member of the University community who receives information, knows of, or suspects that a student has engaged in Academic Misconduct, the individual is encouraged to submit a report, including a brief narrative of the situation, to the Dean of Academic Affairs.

Initial Report and Conference

Any faculty member who receives information about, knows of, or suspects that a student has engaged in Academic Misconduct in their course, should promptly communicate with the student in writing, present the student with relevant evidence, and arrange a conference with the student to discuss the matter. At the conference, the faculty member will inform the student of their concerns, and the student will be given the opportunity to present their version of the facts.

- A. If the student can explain the incident to the satisfaction of the faculty member, no further action is warranted.
- B. If the student denies committing an act of Academic Misconduct at the conference and the faculty member continues to believe the Academic Misconduct may have occurred, the faculty member will refer the matter to the Dean of Academic Affairs or its designee (the “Dean”) or its designee for a hearing and potential consequence according to both this policy and the Student Code of Conduct.
- C. If the student does not respond in a timely fashion to the faculty member or does not attend a requested conference, the matter will be referred to the Dean for a hearing and potential consequence according to both this policy and the Student Code of Conduct.
- D. If the student admits to committing an act of Academic Misconduct, the matter will be referred to the Dean for potential consequence according to both this policy and the Student Code of Conduct.

If a report or allegation of Academic Misconduct occurs outside a particular course, or if the relevant faculty member is unavailable, the Dean for Academic Affairs or its designee will appoint a member of the University’s academic leadership to assume the role of the faculty member for the Initial Report and Conference.

Once an allegation of suspected Academic Misconduct has been communicated to the student, the student may not withdraw from the course or academic project in question.

Hearings and Sanctions

For matters referred to the Dean for a hearing or sanctioning, the following procedures will apply:

- A. The Dean will provide written notice (including e-mail) to the student alleged to have committed Academic Misconduct, including a link to these procedures, the specific allegations, and potential sanctions. The notice shall also include the date, time, and location (including an online meeting) of the hearing, to be held promptly following notice.
- B. The Dean will hold a hearing in which the faculty member (or designee) will present the evidence against the student. The student shall have the opportunity to provide additional and relevant information.

- C. The hearing will be closed to non-participants and the public. If preferred, the student may be accompanied by one AGMU academic advisor or another personnel the student chooses at any time during the process. The role of the advisor shall be limited to support and consultation; the advisor may not speak, except privately to the student. The Dean will decide who, in addition to the above, may be present at the hearing.
- D. A student who fails to appear at a scheduled proceeding without good cause (e.g., documented serious illness) after proper notice may be adjudicated in absentia and forfeits all rights to an appeal unless it is for lack of proper notice.
- E. The Dean will determine whether or not the evidence indicates that Academic Misconduct has taken place based on the preponderance of the evidence standard. Preponderance of evidence means that a greater weight of evidence supports the conclusion that a fact is true, or to establish that an event occurred. A preponderance of the evidence does not necessarily mean the greater amount of evidence, but rather the greater quality of evidence - making it more likely than not the matter in question is true.

If the Dean determines, based on the preponderance of the evidence standard, that Academic Misconduct has not taken place; the matter will be closed.

If the Dean determines, based on the preponderance of the evidence standard, that Academic Misconduct has taken place; the Dean will determine a sanction consistent with this policy and the following guidelines:

- For a student who seems mistaken in practice rather than guilty of intention, or in the case that seems to warrant leniency (such as a first offense):
 - Grade the work under question “zero” or “failing”;
 - Allow the student to demonstrate that they can fulfill an assignment through their own
 - honest effort, such as resubmission, or
 - Receive a failing grade for the course.
- For an offense which seems to be a clear case of intentional academic misconduct or which does not seem to warrant leniency (such as a second or subsequent offense):
 - Receive a failing grade for the course;
 - Suspension; or
 - Expulsion.

The Dean may also consider additional sanctions, in their discretion, such as a written warning, a loss or restriction of privileges, loss of student employment with the University, or other reasonable sanctions. The Dean may consult with the relevant faculty member or school to determine the sanction.

The outcome will be conveyed to the student in writing, typically within fifteen (15) working days following the hearing.

Appeal

The student may appeal the Dean's decisions in writing to the Vice President of Academic Affairs within fifteen (15) working days of the written notice of the outcome. The Vice President of Academic Affairs may:

1. Alter, amend, and/or overturn disciplinary sanction;
2. Schedule a rehearing with a different member of the University's academic leadership; or
3. Uphold Dean's determination and sanction.

One appeal is permitted. The decision on the appeal is final and shall be conveyed in writing to the student, typically within fifteen (15) working days after the submission of the appeal.

Internship/Externship and Practicum Requirements

Students must abide with the required hours, procedures and policies set by the state, local and accrediting agencies for internship/externship and practicum experiences. Also, students must comply with state and local certification requirements for the academic program, as applicable. Furthermore, students must comply with all requirements established by the internship/externship and practicum centers. Students must review policies and requirements specific to their program.

Students must complete their internship/externship package by the specified deadline, or they will not be enrolled in the internship/externship. AGMU reserves the right to remove a student who does not present themselves in a professional manner when working at an external site.

Students enrolled in a program with clinical or internship/externship practicum experiences must review the *Learning Environment Free of Drugs, Alcohol, and Tobacco Policy* and all institutional policies and the respective program's alcohol and drug testing procedures in the program manual.

Academic Writing Standards

All academic writing work produced by the student as a requirement of a diploma, undergraduate or graduate class assessment at AGMU must be written and presented according to the most recent version of the American Psychological Association (APA) norms.

Accumulated Credits Required and Retention Index

Accumulated credits are the sum of the credits corresponding to the courses the student registers in annually and those accepted as transfer. To complete a degree, a student must complete all academic requirements in a period of time not to exceed 150% of the total credit hours required to obtain the degree. The total of approved credits to complete the degree must meet a minimum average for graduation as established by major.

Time to Degree Completion

Based on a course workload of 12 credits per semester, the estimated time to degree completion is five years for undergraduate programs. For master's degrees, the estimated time is two years with a 12-credit workload per semester, and four years for doctoral programs with a 6-credit workload per semester.

Graduation Requirements

Eligibility to Obtain an Academic Degree

- Students must have successfully completed the courses required for the degree as specified in this Academic Catalog and Student Handbook and comply with all academic requirements for their degrees including but not limited to tests, comprehensive exams, practicum, and internships.
- Students must have successfully completed the total number of credits required for the degree with a minimum GPA of 2.00 for diploma and undergraduate degree programs and a minimum GPA of 3.0 for master's and doctoral programs. There are programs that require a specific graduation minimum GPA. Please refer to the information about your program of study in the Academic Programs section.
- Students must have successfully completed the total concentration or major courses with a minimum GPA as required by the program for non-degree and degree programs. Please refer to the information about your program of study in the Academic Programs section.
- Students must satisfy all financial obligations before degree conferral.
- Students must satisfy all admissions documentation requirements.
- All final grades must be posted on the official transcripts before degree conferral.
- It is the student's responsibility to ensure that they have fulfilled all graduation requirements.
- All students, including transfer students, must meet the 25% residency requirements.
- When calculating the GPA for graduation, only the courses approved at the institution and required for obtaining the degree will be considered.
- All students admitted to the University will be subject to the graduation requirements in effect the year of their admission. Nevertheless, when the curricula of the programs have been modified, the student may opt to take the program in effect, but never a combination of both.
- Students must satisfy programmatic academic achievement requirements established for specific programs (Governing Catalog).
- Students must complete the Graduation Application for each degree or certificate and submit it prior to the graduation application deadline for the semester in which the student plans to graduate by the deadline established in the Academic Calendar.
- Students must pay the graduation fee by the deadline established in the Academic Calendar.
- All students applying for readmission to the institution will be subject to the graduation requirements in effect the year they are readmitted (Governing Catalog).
- Students receiving associate and bachelor's degrees with a grade point average ranging from 3.50 to 3.74 will graduate with honors Cum Laude, those within the 3.75 to 3.89 range will graduate with honors Magna Cum Laude, and those with a grade point average ranging from 3.90 to 4.00 will graduate with honors Summa Cum Laude.
- Diploma program students with a grade point average ranging from 3.90 to 4.0 will graduate with High Honors.

- Commencement will be held only once a year at the end of the spring academic semester. To be eligible to participate in the University Commencement ceremony, all students are required to wear the appropriate graduation regalia established by the University.

Diploma Information

Diplomas are mailed to the address on the student record. Students must provide their updated mailing address on their Graduation Application.

Student Classification

AGMU establishes the following categories of academic load by academic levels and credits per semester:

Undergraduate Level				
Level	Full-time	$\frac{3}{4}$ Time	Half Time	Less than Half Time
Associate	12 credits or more	11 to 9 credits	8 to 6 credits	5 or less
Bachelor	12 credits or more	11 to 9 credits	8 to 6 credits	5 or less
Diploma	12 credits or more	11 to 9 credits	8 to 6 credits	5 or less

Graduate Level				
Level	Full-time	$\frac{3}{4}$ Time	Half Time	Less than Half Time
College Credit Certificate	3 credits or more	N/A	2 credits	1 or less
Master	3 credits or more	N/A	2 credits	1 or less
Doctorate	3 credits or more	N/A	2 credits	1 or less

By credit hours leading to a degree – Undergraduate

- **First year students** – Those who have completed a minimum of 0 to 30 to credit hours.
- **Second year students** – Those who have completed a minimum of 31 to 60 credit hours.
- **Third year students** – Those who have completed 61 to 90 credit hours.
- **Fourth year students** – Those who have completed 91 to 120 credits hours.
- **Fifth year students** – Those who have completed 121 or more credits hours.

By credit hours leading to a degree – Graduate

- **First year Students** – Those who have completed a minimum of 3 to 12 credit hours.
- **Second year Students** – Those who have completed a minimum of 13 to 24 credit hours.
- **Third year Students** – Those who have completed 25 or more credit hours.

Academic Load

The structure of each academic program is established in this Academic Catalog and Student Handbook using a curriculum. This curriculum represents the students' guide to completing their academic degree within a time frame established by licensing and accrediting agency regulations. Any alteration to this curriculum will require evaluation and authorization by the school dean or program director.

The following are the provisions for authorizing the students' academic loads:

1. Diploma, Associate, and Baccalaureate Programs: The maximum academic load during the semester will be fifteen (15) credits or what is established in the curriculum. Students needing additional courses, up to a maximum of twenty-one (21) credits per semester, will require an evaluation of the student's academic progress and financial counseling from the campus and authorization from the school dean.
2. Master's Programs: The maximum academic load during the semester will be twelve (12) credits. Students needing additional courses, up to a maximum of fifteen (15) credits per semester, will require an evaluation of the student's academic progress and financial counseling from the campus and authorization from the school dean.
3. Doctoral Programs: The maximum academic load during the semester will be twelve (12) credits. Students needing additional courses, up to a maximum of fifteen (15) credits per semester, will require an evaluation of the student's academic progress and financial counseling from the campus and authorization from the school dean.
4. For diploma, associate, bachelor's, and master's programs, the maximum academic load during the summer will be twelve (12) credits. The student will be allowed a maximum of three (3) additional credits, for a total of fifteen (15), should they be required to complete their degree in the summer. For doctoral programs, the maximum academic load during the summer will be six (6) credits.
5. According to the Satisfactory Academic Progress (SAP), the student with no progress status must be evaluated by the counselor for the recommendation of an academic plan of study.

Each semester and summer session, controls will be set up in the mechanized system for students to select the academic load corresponding to their study program. For each part of term of 5 or 8 weeks the academic load may not exceed 6 credits. Each program has an order and sequence of courses that in some cases may exceed 15 credits per semester.

Financial Information

Fees and Tuition Costs

The information regarding fees, tuition costs, direct deposits, reimbursements, etc., applies to all programs. The Board of Directors approves tuition costs at all levels.

The information included in the catalog does not represent a contract between the University and the student. Due to changing situations, it may be necessary to alter the fees and tuition costs before the publication of the next catalog. AGMU will notify students in a reasonable timeframe of any changes.

Once a year, the Financial Office publishes the cost bulletin with information about the tuition costs for all the academic programs, as well as other fees that apply. This information is available on the institution's website: www.agmu.edu.

GENERAL FEES

Description	Frequency	Cost
Student Activities / Service Fee	Per Credit Per Semester	\$15
Electronic Resources Fee	Per Semester	\$50
Technology Fee	Per Semester	\$375
Graduation Fee	Per Request*	\$275

- All general fees apply to all students enrolled in academic programs, regardless of residency status. For information on refunds and payment terms, please refer to the Institutional Payment Terms, Stipends, and Refund Policy.
 - The Technology Fee and Electronic Resources Fee are charged to all students enrolled in the comprehensive exam course.
 - The University reserves the right to modify fees and charges for educational services at any time.
 - Students should also plan for indirect costs, including books and supplies, transportation, and personal expenses, which may vary depending on individual preferences, travel habits, and program of study.
- * The Graduation Fee must be paid in full when submitting the Graduation Application by the deadline specified in the Academic Calendar.

OTHER CHARGES

Description	Frequency	Cost
Challenge Exams or Portfolio *	Per Request	50% of the cost of each course to be taken
Degree Conferral Certificate Fee	Per Request	\$25
Diploma Duplicate Fee	Per Request	\$25
ID Card Duplicate Fee	Per Request	\$5
Returned Payment	Per Request	\$25
Transcript Fee	Per Request	\$10
Late Payment Fee	Per Request	\$100
Shipping Fee	Per Request	Varies

- All general fees apply to all students enrolled in academic programs, regardless of residency status. For information on refunds and payment terms, please refer to the Institutional Payment Terms, Stipends, and Refund Policy.
 - The University reserves the right to modify fees and charges for educational services at any time.
- * No additional fees are applied.

Academic Program Legend:

ASN – AS in Nursing
CHMC – MS in Counselling in Clinical
Mental Health
CYBS – Diploma, Associate, and Bachelor in
Cybersecurity
DNP – Doctor of Nursing Practice
EDUC – Doctor of Education (both
specializations)
REFR – Diploma in Refrigeration and Air
Conditioning Technician

ESCS – Med with specialization in Social and
Community Services
FNP – MS in Nursing in Family Nurse Practitioner
MEDA – Diploma in Medical Assistant
PCTC – Diploma in Patient Care Technician
PHLE – Diploma in Phlebotomy Technician
PHAT – Diploma in Pharmacy Technician
PHAR – Associate of Applied Sciences in Pharmacy
Technician

Proof of Puerto Rico Residence

A student's Puerto Rico residence is determined by:

- Submission of a non-expired Government ID that includes the Puerto Rico mailing address at time of admission.
- If a student changes their residence to Puerto Rico after studies have begun, they must submit a non-expired Government ID that includes the Puerto Rico mailing address and submit a completed *AGMU Proof of Residency Affidavit* certified by a Public Notary in Puerto Rico. All tuition and fees will be adjusted to the Puerto Rico Resident rate for the next semester after the valid address change. All fees remain at the prior residency rate during that semester.

Technology Fee

The institution has a technology fee for each academic semester. The Technology Fee provides students with adequate technological experience through these objectives:

1. Strengthen the quality of the academic experience using technology in support of the curriculum.
2. Provide additional students access to technological resources and equipment that are needed in support of instruction and to maintain and enhance the technological competency of students as it relates to their academic endeavors.
3. The technology fee is not refundable.

Additional Expenses and Fees

Please note that in attending any institution, you will need to allow for other expenses, such as books and supplies, uniforms, digital resources, transportation, meals, and other personal needs.

Ana G. Méndez University is focused on supporting affordability, facilitating transparency and ease of student procurement of course materials, and complying with applicable rules, standards, and laws. The primary considerations in the selection of textbooks and other course materials are promoting learning and ensuring instructional quality.

Course materials can range from traditional textbooks to simulations, professional memberships, software, videos, practitioner books, supplies, etc. Course materials are listed on the course syllabus and in the Learning Management System (LMS). Students will typically have the option to acquire course materials through the supplier of their choice. Some courses require fees, in which the cost of course materials are included. The approximate cost of course materials vary based on the course and/or program and additional course fees may apply.

Some learning resources, textbooks and teaching materials are provided through the virtual library and the Learning Management platform (Canvas). In some cases, faculty will recommend textbooks, which students may acquire through the supplier of their choice. Please refer to the Textbook Information section in Canvas.

Graduation Fee

The student must apply for Graduation by the date established in the Academic Calendar, along with a non-refundable graduation fee.

Payment Terms, Stipends and Refund Policy

Introduction

This policy establishes the standards and procedures that govern student financial responsibilities at Ana G. Méndez University (AGMU). It provides guidance on payment terms, the issuance of stipends, and the processing of refunds, ensuring compliance with applicable institutional, state, and federal regulations. The objective of this policy is to promote transparency and accountability in all financial transactions involving students.

Scope

This policy applies to all AGMU's students. It outlines the processes related to tuition payments, financial aid stipends, refunds, withdrawals, and debt collection procedures.

A. General Provisions

1. All students are responsible for the full payment of their cost of studies. At the time of enrollment, they must identify their payment source by completing the corresponding form. If the payment source changes, they must complete and submit the updated form.
2. Tuition costs and fees are established and published annually in the Tuition and Fees Bulletin (Cost Bulletin) available on the Academic Catalog and Student Handbook and AGMU's website.
3. Tuition costs and fees are calculated based on credit hours of each course and per semester. It is the student's responsibility to stay informed regarding the costs and payment terms.
4. During each enrollment period, tuition costs and fees are charged and due on the first day of class of each term.
5. To officialize the enrollment, the student must pay their tuition cost and fees by selecting one of the following payment sources:
 - a. United States Department of Education (USDE)'s financial aid funding available based on eligibility, such as Pell Grant, FSEOG Direct Loans, other grants, or

- b. Submit official documentation for employer-sponsored payments or private scholarship information, or
 - c. Veteran benefits (VA), or
 - d. Personal funding through AGMU's student portal, including the option of setting up a payment plan. To establish a payment plan, the student must make an initial payment of, at least, thirty-five percent (35%) of the total tuition and applicable fees. The remaining balance must be paid in monthly installments, between the start date of each term and its corresponding payment deadline. These payments can be made through the student portal or via telephone by contacting the Bursar's Office.
6. AGMU permits its active students to carry a maximum total debt balance of \$2,000 in order to continue their studies. Any amount owed in excess of this maximum amount must be paid in full prior to attending classes. Students must establish a payment plan to cover the \$2,000 balance according to institutional guidelines. Once the excess is paid student will be allowed to register in the next semester available to enroll.
7. Active students who exceed the maximum balance established in provision six (6) and do not pay the balance by the enrolled semester's payment deadline described in the table below will be subject to a financial or registration hold for the next semester. If this occurs, the students' access to their courses will be restricted in the Learning Management System (LMS), and in some cases, they may be unable to register for future courses, or the current enrolled courses will be removed at the end of the add/drop period.

Semester	Payment Deadline
Fall	November 30
Spring	April 30
Summer	July 31

8. A \$100 late fee will be applied to any student account with an unpaid balance after the end of the payment deadline established in provision seven (7). This penalty does not apply to students using VA's benefits.
9. Students seeking readmission after a period of inactivity must satisfy all outstanding financial obligations before their readmission can be processed.
10. Other than academic transcripts, students with outstanding balances, regardless of the amount, will not be eligible to receive AGMU's official documents.
11. A \$25.00 fee will be applied to each returned payment.
12. Payments for tuition and fees costs can be made using the following methods: debit/credit card, money orders, checks, certified checks, and/or online payments.
13. Students must comply with all established payment, withdrawal, stipends, and refund policies and deadlines.

B. International Students

To be enrolled, all international students may be required to provide additional documents, including an I-20 or Certification of Finance.

1. International students officialize their enrollment by making an initial payment equal to or greater than fifty percent (50%) of their total cost. The remaining balance must be paid in monthly installments between the start date of each term and its corresponding payment deadline. These payments can be made through the [student portal](#) or via telephone by contacting your Bursar's Office. All such payments are subject to the institutional refund policies.
2. International students must comply with all general provisions, except for the percentage established in provision A-5d, which is replaced by the previously stated provision.

C. VA Students

Students using VA's benefits must provide a VA Certification Letter, based on the type of chapter the student will be utilizing. The amount VA pays is based on the type of training program and training time. VA students are responsible to meet all of VA's requirements to receive their VA's payment benefit. The student is responsible for paying the difference between the amount billed and what the VA is expected to pay.

VA Chapter 35 benefits are paid monthly in arrears directly to the student, not to AGMU. Students are responsible for paying any outstanding balances by the payment deadline previously detailed. Changes in enrollment may result in a debt with VA.

D. Non-Attendance or Withdrawals

Enrollment cancellation and/or withdrawals can be made in person, email, certified mail, or by administrative action.

AGMU define students' non-attendance and/or withdrawals as follows:

1. **ENROLLMENT CANCELLATION** – Any student who cancels their enrollment on or before the first day of classes will have 100% of the tuition and fees refunded.
2. **ADD/DROP PERIOD** – If the student cancels any or all of their courses on the add/drop period, the student will be refunded 100% of tuition and applicable course fees. The add/drop period consists of the first seven (7) calendar days after the start day of class.
3. **TERMINATION DATE** – In calculating a refund, the student's last date of attendance is considered, unless an earlier written notice is received from the student.
4. **NON-ATTENDANCE** – Any student who does not attend their enrolled courses will be administratively withdrawn once identified during the census period and will be charged 25% of the cost of the reported unattended courses.
5. **PARTIAL WITHDRAWAL** – Any student who, after the add/drop period, was identified as attending, and then withdraws from one or more (but not all) of their enrolled courses will be responsible for 100% of tuition and fees related to such courses. USDE's financial aid and VA's benefits could also be impacted. Students should consult with a Bursar Officer or Financial Aid Officer prior to requesting a withdrawal to understand the full financial impact of it.

6. **TOTAL WITHDRAWAL** – Any student who, after the add/drop period, was identified as attending, and then withdraws from all their enrolled courses within the first sixty percent (60%) of the semester may be eligible to a pro-rata refund calculated to the following formula:

$$\frac{\text{Total days elapsed}}{\text{Total semester days}} \times \text{total semester tuition and fees cost}$$

Note: Total days elapsed is calculated considering the term start date, according to the Academic Calendar.

After sixty percent (60%) of the total days of the semester have elapsed, the student will be responsible for 100% of tuition and fees. USDE's financial aid and VA's benefits could also be impacted. Students should consult with a Bursar Officer or Financial Aid Officer prior to requesting a withdrawal to understand the full financial impact of it.

7. **MID-POINT WITHDRAWAL** – Any student who was identified as attending after the add/drop period and subsequently receives a WF ("withdrawal failure") in all courses at the end of the semester will be responsible for 100% of their total tuition and all fees. If the student receives USDE's financial aid, it will be adjusted to 50%, and the student will be responsible for any remaining balance. VA's benefits could also be impacted.
8. **RETURN OF TITLE IV FUNDS (R2T4)** – If a student who qualifies for Title IV (USDE's financial aid) funds does not complete the term, AGMU will complete a pro-rata calculation to determine the percentage of the Title IV funding the student has earned for that term in accordance with the Return of Title IV policy.

E. Stipends

All stipends and refunds will be processed according to the following guidelines, unless otherwise required by applicable law:

1. If the amount paid to the student account exceeds the cost of tuition and fees, a stipend will be processed using the student's selected delivery method (check or direct deposit).
2. Stipends will be processed within fourteen (14) days after the financial aid funds have been disbursed into the student account, unless the student has completed a *Cash Management Authorization Form*.
3. The student is responsible for any outstanding balances incurred after the stipend has been processed.
4. Students have ninety (90) calendar days to deposit the stipend check. If the student does not deposit the check within the established time, the check will be canceled, and the funds will be returned to the original funding source.
5. Students are responsible for updating their personal contact information and bank information through AGMU's student portal.

F. Reimbursement

1. Reimbursement for student payment through personal funding will be processed within thirty (30) days of the determination date of the student's withdrawal or receipt of a

written Cancellation Notice, as applicable. Reimbursements will be sent via check.

2. Reimbursements will first be applied to any outstanding amounts owed to AGMU.
3. Students should report concerns related to stipends or reimbursement in writing to their campus Bursar's Office.

G. Outstanding Debts

AGMU retains all legal and equitable remedies to collect unpaid debts and will apply these remedies as appropriate. Students with outstanding debt to AGMU will incur fees or may be referred to third-party debt collection agencies.

Return of Title IV Funds

If a student who qualifies for Title IV (federal financial aid) funds does not complete the term or part of term, the university is required to complete a pro rata calculation to determine the percentage of the Title IV funding the student has earned for that term. The pro rata calculation, called a Return of Title IV (R2T4) calculation, is based on the premise that a student “earns” financial aid for each calendar day they remain enrolled and in attendance during a term or part of term. The R2T4 calculation must be performed if a student notifies the university of their withdrawal (official withdrawal), is dismissed, or stops attending all their courses without notification (unofficial withdrawal). For students who officially withdraw, the date the student began the official withdrawal process or provided official notification to the university of their intent to withdraw will be considered their last date of attendance. For students who unofficially withdraw, the midpoint of the term will be considered their last day of attendance. If a student was only scheduled to attend a part of term course (i.e., a course that does not span the entire term) and they unofficially withdraw, the midpoint of the part of term will be the last day of attendance. For students who are dismissed, their date of dismissal will be considered their last date of attendance.

The pro rata calculation uses the number of days the student attended as the numerator and the number of days in the term or the days they were scheduled to attend if enrolled part of term (excluding any scheduled breaks of 5 days or more) as the denominator. For example, if a student attended 40 days of a term of 100 days, they will have earned 40% of their Title IV aid for that term.

If a student attends beyond the 60% point of the term, they have earned 100% of their financial aid for the term.

If the R2T4 calculation determines the student has received more in Title IV disbursements than they have earned, the unearned portion of Title IV funding must be returned to the U.S. Department of Education no later than 45 days from the date the university determined the student ceased attending. There may be both an institutional and student portion to return. The university will return the institutional portion of loans and grants and the student portion of grants to the U.S. Department of Education, and the student will be responsible for repaying the university for any resulting balance on their student account. The student portion of the grant overpayment is any amount of the grant overpayment that exceeds 50% of the amount of grant aid received by the student. The amount that must be returned is the lesser of:

1. The institutional charges multiplied by the unearned percentage of the Title IV funds: or
2. The entire amount of excess Title IV funds.

Any unearned funds are returned in the following order:

- Unsubsidized Direct Loans;

- Subsidized Direct Loans;
- Direct PLUS Loans;
- Federal Pell Grants;
- FSEOG Grants;
- IASG Grants;
- TEACH Grants.

The student portion of grants will not be returned if the grant overpayment is \$50 or less. Any loan amount to be returned by the borrower must be repaid according to the terms and conditions of the borrower's Master Promissory Note (MPN).

If the R2T4 calculation determines the student has received less in Title IV disbursements than they have earned, the student may be offered a post-withdrawal disbursement (PWD). The university may automatically disburse all or a portion of the PWD that consists of grant funds in order to satisfy tuition and fees within 45 days of the date the university determined the student ceased attending. The university will seek the student's permission to use PWD grant funds for all other educationally related charges. Any PWD of loan funds must be offered to the student or parent borrower in writing within 30 days and accepted by the student or parent borrower and disbursed within 180 days of the date the university determined the student ceased attending. Loan borrowers who are offered a PWD of loan funds will receive written instructions for declining the PWD or accepting all or a portion of the PWD. A borrower can never receive a PWD for funds for which they did not meet the eligibility criteria at the time they ceased attending.

A student is exempt from the R2T4 calculation if any of the following conditions apply:

- They complete all requirements for graduation in the same term they cease attendance.
- They successfully complete one or more part of term courses that includes 49% or more of the number of days in the student's payment period.
- They are enrolled in a program offered in a part of term format and they successfully complete coursework equal to or greater than the university's definition of a half-time student.
- They are enrolled in a program offered in a part of term format and provide written confirmation that they will begin attendance in another part of term course in the same term within 45 calendar days from the date they ceased attending. If the student does not subsequently begin the part of term course, they confirmed they would attend, a R2T4 calculation is required.

Although a student may be exempt from the R2T4 calculation, other adjustments to the student's financial aid may be required.

The R2T4 calculation does not apply to Federal Work Study or non-federal financial aid programs.

The R2T4 calculation is separate from the university's refund policy. If a student ceases attendance during a term, the Title IV funds that previously paid or were anticipated to pay the student's account balance may be reduced resulting in the student owing a balance to the university. The university will seek payment from the student for any funds it returns to the U.S. Department of Education that results in a balance due

on the student's account. We encourage students to carefully consider the academic and financial consequences of withdrawing and to consult with the Financial Aid Office prior to withdrawing.

Financial Aid Credit Balances

AGMU will issue a credit balance payment when a student's financial aid payments received exceed the tuition charges on their account. All credit balances will be processed according to the following refund guidelines:

1. If the amount paid to the student account exceeds the cost of tuition and fees, a check or direct deposit will be processed.
2. Financial Aid credit balances will be processed within 14 days after the financial aid funds have been disbursed into the student account.

Credit Balance and Refund Procedures

Credit balance payments and refund payments will be processed according to the following:

- A payment will be sent via Direct Deposit to the students who have submitted the University's Direct Deposit form. Students who have not completed the Direct Deposit form will receive a check via US mail.
- The student is responsible for any outstanding balance in their account that may result from any adjustments made in their academic load after the credit balance or refund disbursement.
- All uncashed checks expire 90 days after the date of issuance.
- If the student does not cash the check within the established time or the direct deposit is unsuccessful, the Bursar's Office will contact the student, inquire how they would like to receive the funds, and provide next steps. If the Bursar's Office is unable to reach the student, the funds will be returned to the original funding source (i.e., U.S. Department of Education, state agency, etc.). If the source of the funds was a payment from the student (i.e., not financial aid or another third-party payment) and attempts to contact the student are unsuccessful, the funds will be held on the student's account until the student inquires or the student incurs new charges to which the credit balance may be applied.
- Students are responsible for notifying the Bursar's Office of any changes to their address, bank account or any information required by AGMU to locate the student.
- AGMU will not issue a new Direct Deposit or check until the student has completed the corresponding form for a stop payment.
- All claims regarding this procedure or the cancellation, refund and credit balance policies shall be made in writing to the corresponding Bursar's Office.

Financial Aid

The University makes every effort to help its students obtain federal financial aid for those who qualify.

Financial aid consists of many components of which the most common are federal grants and federal student loans. Federal grants, if eligible, are applied first to cover the cost of tuition and fees. This aid has no cost and does not have to be repaid. Federal student loans are available at a low interest rate and must be repaid to their lender.

Undergraduate Students

Federal Grants

Federal Pell Grant

If eligible, this grant assists with covering educationally related costs for approximately 6 years of undergraduate studies. The Department of Education establishes the maximum award limit each year. Eligibility is determined by the FAFSA submission each award year. Additional information can be obtained from the Financial Aid department.

Federal Supplemental Educational Opportunity Grant (FSEOG)

This grant helps undergraduate students with exceptional financial needs determined by the FAFSA submission and is contingent upon the availability of funds.

Federal Student Loan

Federal Direct Loan

Federal Direct Loans are offered at a fixed interest rate that changes on a yearly basis for loans disbursed after July 1st. For “Direct Subsidized Loans” the government pays the interest while students are in school or in a deferment or forbearance period; for “Unsubsidized Loans” students are responsible for paying the interest while they are in school. If they choose not to pay the interest, it will accrue and be capitalized (added to the principle). This loan must be repaid; the repayment should begin six (6) months after the student graduates or ceases to study.

Federal Direct Parent Loan for Undergraduate Students (FDPLUS)

“PLUS” loans are borrowed by parents for dependent students at a fixed interest rate that changes on a yearly basis for loans disbursed after July 1st. The Parent PLUS loan requires a parent (biological, legal stepparent or adoptive parent) to process a credit check to determine eligibility. The maximum award amount is no more than the cost of attendance minus additional aid received. The parent is responsible for repayment of this loan, which begins 60 days after the first disbursement is made.

Important Notice Regarding Federal Student Loan Changes

Beginning July 1, 2026, Federal Direct Parent PLUS Loans remain available to eligible parents of dependent undergraduate students; however, federal law establishes annual and aggregate borrowing limits that may restrict the total amount a parent may borrow. Eligibility remains subject to credit review and other federal requirements. Parents are encouraged to contact the Financial Aid Office for the most current information regarding loan limits, eligibility requirements, and repayment provisions.

Federal Work-Study Program (FWS)

The FWS is a program that requires the student to work a maximum of 20 hours per week. The student is paid a competitive wage and is able to gain experience in their area of study.

Veterans' Educational Benefits

Veteran's Education Benefits are provided by the Department of Veteran Affairs for Veterans and/or Dependents of Veterans. For more information regarding VA eligibility, please contact your campus Registrar or VA school certifying official.

In accordance with Title 38 US Code 3679 subsection (e), the University adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent the student's enrollment.
- Assess a late penalty fee to the student.
- Require the student to secure alternative or additional funding.
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class.
- Provide a written request to be certified.
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

Except for dependents, students using VA/military educational benefits are required to submit their Joint Services Transcript (JST) or the Community University of the Air Force transcript if they wish to use their benefits.

Student records for individuals receiving Veterans Affairs (VA) benefits are retained for a period of three years following the date of the student's last attendance or graduation, whichever occurs later.

How to apply for Federal Financial Aid

To be considered for federal financial aid, a student must complete a Free Application for Federal Student Aid (FAFSA) at www.studentaid.gov. The FAFSA collects financial and other information used to calculate the Student Aid Index (SAI) and should be renewed by June 30th each award year that you are enrolled in school.

The amount of financial aid awarded may vary each year and is determined by the SAI, the type of aid they are eligible for, their academic performance and available funding.

Eligibility Requirements

In order to meet the eligibility requirements, students must:

- Have financial need as determined by the FAFSA.
- Must be enrolled as a regular student in an eligible program.
- Be working toward a degree or diploma.
- Be a U.S. citizen or eligible non-citizen.
- Have a valid Social Security Number.
- Not owe a refund on a Federal Grant or have been approved for the Fresh Start Initiative Program with the Department of Education.
- Maintain Satisfactory Academic Progress.
- Be enrolled at least half-time except for the Federal Pell Grant, which allows less-than-half-time enrollment.
- Not have earned a bachelor's degree, to qualify for Pell and FSEOG.
- Provide all verification or required documents requested by the Financial Aid Office.
- Submit all documentation required for admission.

Important Note: The Institution complies fully with the privacy Rights of Parents and Students Act of 1974 (Title IV of the U.S. Public law 90-247), for more information about FERPA please refer to <https://studentprivacy.ed.gov/ferpa>

Graduate Students

The University makes every effort to help its students obtain federal financial aid for those who qualify. Graduate students do not qualify for any federal grants but may qualify for federal unsubsidized and Graduate PLUS loans.

Federal Loans

Federal Direct Unsubsidized Loan

Federal Unsubsidized student loans accrue interest while the student is enrolled in school. The student is responsible for repaying the loan plus all interest accrued starting six (6) months after the student graduates or ceases enrollment. If they choose not to pay the interest while in school, it will be capitalized (added to the principle).

Federal Direct PLUS Loan for Graduate Students

The U.S. Department of Education makes Direct PLUS Loans to eligible graduate or professional students through schools participating in the Direct Loan Program. PLUS Loans require a credit check to determine eligibility which is completed online at www.studentaid.gov. PLUS Loans are offered at a fixed interest rate that changes on a yearly basis for loans disbursed after July 1st. The maximum award amount is no more than the cost of attendance minus any additional aid received. Repayment begins 60 days after the first disbursement is made.

Important Notice Regarding Federal Student Loan Changes

Pursuant to federal legislation enacted through the One Big Beautiful Bill Act (OBBBA), the Federal Direct Graduate PLUS Loan program is no longer available to most new borrowers beginning July 1, 2026. Students who previously borrowed federal student loans and meet certain grandfathering provisions may remain eligible for a limited period while completing their current academic program. Graduate and professional students should be aware that new federal annual and aggregate borrowing limits may apply under the Direct Unsubsidized Loan Program. Students are encouraged to contact the Financial Aid Office for the most current information regarding eligibility and available funding options.

Federal Work-Study Program (FWS)

The FWS is a program that requires the student to work a maximum of 20 hours per week. The student is paid a competitive wage and is able to gain experience in their area of study.

Veterans' Educational Benefits

Veterans' Educational Benefits are provided by the Department of Veterans Affairs, students interested in Veterans' Educational Benefits should contact their campus Associate Registrar.

In accordance with Title 38 US Code 3679 subsection (e), the university adopts the following additional provisions for any students (Chapter 31, 33, and 35) benefits, while payment to the institution is pending from the VA. This university will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class;
- Provide a written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

Except for dependents, students using VA/military educational benefits are required to submit their Joint Services Transcript (JST) or the Community University of the Air Force transcript if they wish to use their benefits.

Student records for individuals receiving Veterans Affairs (VA) benefits are retained for a period of three years following the date of the student's last attendance or graduation, whichever occurs later.

How to apply for Federal Financial Aid

The student must submit the Free Application for Federal Student Financial Aid (FAFSA) or FAFSA renewal to the U.S. Department of Education at www.studentaid.gov.

Graduate students are eligible for unsubsidized loans up to the aggregate limit of \$138,500, including undergraduate loan usage, and can apply for Graduate PLUS loans through a credit check.

Eligibility Requirements

In order to meet the eligibility requirements, students must:

- Must be enrolled as a regular student in an eligible program.
- Be working toward a graduate degree.
- Be a U.S. citizen or eligible non-citizen.
- Have a valid Social Security Number.
- Not owe a refund on a Federal Grant or have been approved for the Fresh Start Initiative Program with the Department of Education.
- Maintain Satisfactory Academic Progress.
- Must not have adverse credit history to be approved for a PLUS loan.
- Provide all verification or required documents requested by the Financial Aid Office.
- Submit all documentation required for admission.

Important Note: The Institution complies fully with the Privacy Rights of Parents and Students Act of 1974 (Title IV of the U.S. Public law 90-247) for more information regarding FERPA please visit <https://studentprivacy.ed.gov/ferpa>

Student Services available to all students

The University offers exceptional support services for all students on all campuses, in all modalities. All campuses are staffed with professional staff focused on student success, retention, and completion. These professional staff include the staff in the following Student Affairs departments: Bursar, Financial Aid, Career Placement, and other Student Affairs support staff who assist students from point of admission to graduation and beyond as university Alumni. They also include the professional staff in the following Academic Affairs departments: Retention, Academic Advising, and Library services.

Many university services are available in person and online, on days and at times that are tailored to our students' needs.

All staff contact information and hours of operation are regularly updated on the University website.

Student service hours of operation:

Monday, 8am-7pm

Tuesday, 8am-7pm

Wednesday, 8am-7pm

Thursday, 8am-7pm

Friday, 8am-5pm

Saturday, 9am-1pm

Registrar Services

The campus Registrar staff help students with a variety of services related to the student educational record such as transfer credit processing, VA certification, transcripts, diplomas, among others.

Campus Registrars are available to meet with students in person, virtually, and via phone and email.

Bursar Services

The campus Bursar assists students with their student accounts, setting up payment plans, and serving as the campus administrator who officializes student registration.

The campus Bursar is available to meet with students in person, virtually, and via phone and email.

Financial Aid Services

The campus Financial Aid staff help students to navigate grants, work-study, loans, and scholarships to help make the student's education more affordable.

Financial aid can come from federal, school, and private sources to help pay for the students' post-secondary education.

The campus Financial Aid Officers are available to meet with students in person, virtually, and via phone and email.

Career Services

Career Placement provides the students with the essential knowledge to help them succeed, from career guidance to building a resume and pursuing a career. The goal is to assist students and alumni in every aspect of career exploration and goal fulfillment. Career Placement will help the students by preparing them for the professional world. Career Placement offers the following services: 1) career development workshops, 2) resume review, 3) job search support, 4) interview preparation, 5) career events and fairs, and 6) connections with local employers.

The Director of Career Placement is available to meet with students virtually, and via phone and email. The Director also regularly visits the campuses and hosts career events on campus. The institution does not make any guarantee of placement.

Student Retention and Academic Advising

All students have an assigned advisor. Students are encouraged to remain in regular contact with their assigned Retention staff members. These staff serve as student advocates, advisors, and guides and help to ensure that our students are supported in their academic, personal, and professional goals.

The Retention staff assist all students with the following:

- Identifying possible academic, degree, and career options.
- Reviewing academic program guidelines, progress, and graduation requirements.
- Understanding and navigating through the enrollment and registration process.
- Clarifying college procedures and guidelines associated with academics.

Academic Advisors are also available to provide the following services:

- University and community resource referrals.
- Support for Title IX cases, serving as Title IX Deputy Coordinators.

- Advocacy and support for students seeking and securing disability accommodations.
- Advocacy and support for students who are identified in the SAP process (Satisfactory Academic Progress) and who are experiencing academic difficulty (probation & suspension.)
- Tailored academic advising and planning for students in academic or personal distress.
- Student Retention and Academic Advising

Student Wellness Center Quality of Life

The **Student Wellness Center Quality of Life** provides a safe, supportive, and confidential environment dedicated to enhancing students' overall well-being throughout their academic journey. The Center promotes emotional, personal, and academic wellness through individualized guidance, supportive services, and access to resources that help students navigate life challenges, strengthen resilience, and maintain a healthy balance between academic responsibilities and personal development.

The Center is committed to fostering a culture of respect, empathy and professionalism, ensuring that every student has access to a welcoming space where their needs and concerns are addressed with care and confidentiality. Through a holistic approach to student success, students are empowered to develop self-awareness, effective coping skills, and healthy lifestyle practices that contribute to their academic achievement and overall quality of life.

Recognizing that well-being is a vital component of student success, the Student Wellness Center Quality of Life serves as a resource for personal growth, helping students achieve their educational goals while promoting lifelong wellness and positive engagement within the university community.

Library Services

The library is a flexible space where technological tools, human resources, spaces, and services (some electronic resources are provided at any time and accessible from anywhere) converge and are integrated to support student learning and research. The library serves the information resource needs of the entire university community. The LRC also has a diverse and varied availability of resources and collections in electronic format that can be accessed remotely. The services offered are as follows:

- Bibliographic resources (books, journals, etc.) and bibliographic databases that respond to academic programs and current topics.
- Services for the development of information and technological competencies.
- Workshops for students and faculty on information about the resources available in our virtual library, as well as on the use of online platforms or tools.
- Maintains and guarantees remote operation and service.
- Maintains the availability of electronic resources through our portals 24/7.

These services are essential to meet the information needs of students and faculty, as well as to comply with the requirements of their academic specialties. All resources comply with accrediting agencies and existing academic programs.

Student Disability Services

Ana G. Méndez University is committed to providing reasonable accommodations to qualified students with disabilities, to ensure that such individuals have the opportunity to participate in educational programs and services on an equal basis. To that end, AGMU strives to create an inclusive educational environment for all members of the University community in accordance with provisions of applicable laws including, but not limited to, the Americans with Disabilities Act as amended (ADA), and Section 504 of the Rehabilitation Act of 1973 (Section 504). The following terms are applied by AGMU in accordance with applicable federal law and regulations and are summarized below.

An individual with a **Disability** is one who has a physical or mental impairment that substantially limits one or more major life activities, who has a record of such impairment, or who is regarded as having such an impairment.

A **Qualified Individual with a Disability** is an individual with a disability who meets the academic and technical standards requisite for admission or participation in the educational program or activity, with or without reasonable accommodation.

A **Reasonable Accommodation** is any modification or adjustment that enables a qualified student or applicant with a disability to enjoy equal educational or employment opportunities and participate fully in all programs and activities. Reasonable accommodation must address the particular disability and shall not impose an undue burden on the University or produce a fundamental alteration of the University's programs or services.

The University prohibits discrimination based on disability. The University also prohibits retaliation against individuals in connection with the assertion of rights under this policy.

In accordance with applicable law and University policies, AGMU will provide Reasonable Accommodations to Qualified Individuals with Disabilities on an individualized, case-by-case basis and in a timely manner.

To support students requesting Reasonable Accommodations, AGMU has empowered the Directors of Retention and the Academic Advisors with the authority to review and make decisions about whether an individual is a Qualified Individual with a Disability and what constitutes a Reasonable Accommodation. The Directors of Retention and Academic Advisors will make determinations regarding both academic accommodations as well as accommodations for other AGMU programs or activities and will coordinate with the Academic Affairs leadership as appropriate. All information pertaining to a Disability and potential accommodation will be stored securely and will only be shared with other University personnel on a need-to-know basis in compliance with applicable University policies and law.

Process to Request Reasonable Accommodations

A student may generally request a Reasonable Accommodation in accordance with the following procedures:

- Contact the Director of Retention or Academic Advisor to receive guidance on the services, procedures, and documents needed to request a Reasonable Accommodation. Documentation requirements vary according to each individual's disability and situation. If documentation is required, the student will provide written and current documentation of their Disability from a qualified professional with relevant experience and no personal relationship with the individual

being evaluated. Appropriate documentation should provide information to establish the existence of the Disability, describe the nature of the Disability, explain the limitations of the student, and offer accommodation recommendations. Documentation must be on a professional letterhead, signed, dated, and include a licensure number.

- Complete the Reasonable Accommodation Request form and provide the required documents.
- The Director of Retention or Academic Advisor will interview the student and engage in the interactive process.
- Once all the required documentation and information has been provided and the request for Reasonable Accommodation has been completed, it will be evaluated.
- The student will be notified of the outcome of the evaluation and the accommodation to be provided.
- The Director of Retention or Academic Advisor will draft the letter of Reasonable Accommodation.
- The Director of Retention or Academic Advisor will deliver the letter to all relevant faculty. The accommodation will be effective once the faculty member receives the letter of Reasonable Accommodation. The student will also be notified. The student should discuss the letter of Reasonable Accommodation with their faculty and the best ways to implement the accommodation.
- The student will be responsible for returning the letter of reasonable accommodation signed by their faculty members.
- No accommodation will be provided retroactively. AGMU also reserves the right to modify accommodations. The student has the responsibility each semester to decide whether they want to continue to receive accommodations or services. If the student decides they need accommodation or services for a particular term, the student must renew the request for a reasonable accommodation for that term in accordance with this policy.

A student can request a Reasonable Accommodation at any time, but students are encouraged to submit a request for Reasonable Accommodations at least two weeks before the start of any academic term. Once a student has established their eligibility for Reasonable Accommodations, AGMU will provide the appropriate accommodation as expeditiously as possible; however, some accommodations can require a longer period of time to arrange.

The Director of Retention or the Academic Advisor will offer and coordinate student support resources of the institution and can guide the student in referrals to services with community agencies, which can provide additional support. For additional information about a reasonable accommodation, please contact your Director of Retention or your Campus Academic Advisor.

AGMU is not required to provide services of a personal nature such as personal attendants, individually prescribed devices, transportation, or readers/tutors for personal use or study.

AGMU is committed to providing prompt and effective resolution of alleged incidents of discrimination and harassment. Any type of retaliation against an individual for requesting an accommodation, using an accommodation, or for filing a complaint or appeal with the University or an external governmental agency is prohibited.

Any student who believes that they have not received fair treatment regarding the Reasonable Accommodation process is encouraged to first meet with their campus Director of Retention or Academic Advisor. An earnest attempt will be made to find a valid solution, within the limits of the law.

If a student is experiencing problems receiving their assigned accommodation(s), they are encouraged to contact their faculty first to attempt to resolve the issue. If the student does not find a resolution after communicating with their faculty, they should contact their campus Director of Retention or Academic Advisor.

A student may file a complaint with the University in accordance with the campus-based grievance process outlined in the AGMU Academic Catalog.

Complaints may also be filed with the U.S. Department of Education's Office for Civil Rights at any time at 400 Maryland Avenue, SW, Washington DC 20202 or (800) 421-3481, <https://www2.ed.gov/about/offices/list/ocr/index.html>.

Student Complaint Policy

The University reaffirms its commitment to the well-being, equity, and respect of all members of its student community. Consistent with the University's institutional values and fair-treatment policies, the Office of the Dean of Student Affairs is the primary administrative unit responsible for addressing student concerns promptly, professionally, and sensitively.

Because situations may arise within the University that affect a Student's academic or personal experience, the Office of the Dean of Student Affairs maintains an open-door approach that encourages dialogue, guidance, and informal resolution whenever appropriate. When formal intervention is necessary, the University provides a structured process designed to promote fairness, confidentiality, due process, and compliance with institutional policies and regulations.

The purpose of the Student Complaint Policy is to establish the University's process for filing and resolving formal Complaints when a matter cannot be resolved immediately or through informal means such as advising or mediation.

The Student Complaint Procedures ("Complaint Procedures") are intended to ensure that each Complaint is reviewed fairly, confidentially, and objectively, in accordance with applicable institutional policies, procedures, and regulations.

For purposes of this Policy, "Student" means an individual enrolled at the University, and "Complaint" means a formal written expression of dissatisfaction about a University program, process, or service, including administrative actions, billing and financial matters, operational issues, or treatment by staff. Students may also raise informal concerns, which may be addressed through informal resolution but are not Complaints under this Policy.

The Policy applies to all Students enrolled at the University, including all campuses and academic units. They do not apply to the following matters (which are governed by other University policies and procedures):

- a. Matters governed by the Student Code of Conduct;
- b. Academic complaints or policies, including grade grievances; or

- c. Complaints governed by Title IX, which are handled under the University's Title IX policies and procedures.

Student Complaint Procedures

Step 1: Informal Resolution

Before filing a formal Complaint, a Student should, when appropriate, attempt to resolve the concern informally with the department or office where it arose. This may include speaking with relevant personnel or seeking guidance from the Office of the Dean of Student Affairs.

Step 2: Filing a Formal Complaint

If informal resolution does not produce a satisfactory result, or is not appropriate, the Student may submit a Complaint to the Office of the Dean of Student Affairs using the **Student Complaint Form**.

Step 3: Contents of the Complaint

A formal Complaint must be submitted in writing and include:

- The Student's full name and contact information;
- A detailed description of the concern or incident;
- The name(s) of any individual(s) involved in the incident or concern;
- The date(s) and location(s) of the incident;
- Any supporting documentation or evidence.

Step 4: Review and Investigation

Upon receipt of a Complaint, the Dean of Student Affairs shall designate a "Complaint Administrator." The Complaint Administrator shall acknowledge receipt of the Complaint in writing to the Student within three (3) business days.

If the Complaint lacks sufficient information for investigation, the Complaint Administrator may request additional information from the Student before proceeding with the investigation.

If sufficient information is provided, the Complaint Administrator shall initiate an investigation. The Complaint Administrator may also appoint a three-person Complaint Review Committee consisting of the Complaint Administrator (or designee), one faculty representative, and one administrative representative.

The investigation may include, as appropriate:

- Evaluating the Complaint and submitted documentation;
- Gathering additional documentation; or
- Identifying and interviewing witnesses.

The Complaint Administrator shall ensure that both parties have an equal opportunity to present statements, identify witnesses, and submit relevant evidence.

The investigation shall aim to be completed within forty-five (45) calendar days from the date the formal Complaint was filed. If additional time is necessary because of the complexity of the case or other

extenuating circumstances, the Complaint Administrator shall notify the parties in writing and state the reason for the extension.

Step 5: Investigation Report

Upon completion of the investigation, the Complaint Administrator or Complaint Review Committee shall submit a written report to the Dean of Student Affairs that includes, as applicable:

- A summary of the Complaint;
- A description of the investigation conducted;
- Findings of fact;
- An assessment of credibility of witnesses, where applicable;
- Conclusions and recommendations; and
- Any recommended corrective action or resolution.

Step 6: Determination

Based on the investigation report, the Dean of Student Affairs shall issue a determination. The Dean may accept, reject, or modify the recommendation of the Complaint Administrator or Complaint Review Committee. The Dean shall provide the determination in writing to the Student and include a summary of the findings and any actions to be taken.

General Provisions

1. **Confidentiality.** The University shall maintain Complaint records and related information in accordance with the Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. § 1232g, and other applicable law and institutional policy. Information related to a Complaint shall be shared only with individuals who have a legitimate need to know.
2. **Non-Participation.** If a Student declines to participate in or withdraws from an investigation, the University may continue and complete the investigation. The Student's decision may be noted in the record, and the investigation may proceed based on the available evidence.
3. **Advisors.** A Student may select an advisor of their choice to assist during the proceedings. The advisor may consult privately with the Student but may not speak for or represent the Student during proceedings. An advisor who interferes with or disrupts the proceedings may be excused at the discretion of the Complaint Administrator.
4. **Retaliation.** The University prohibits retaliation against any individual who files a Complaint, participates in an investigation, or otherwise exercises rights under these Procedures. Retaliation includes intimidation, threats, coercion, discrimination, or any other adverse action taken because of that individual's participation or exercise of rights. Any person who believes they have experienced retaliation may report it to the Dean of Student Affairs, who shall treat the retaliation report as a new Complaint under these Procedures. Retaliation may result in disciplinary action.
5. **No Contact Directives.** The Complaint Administrator may issue no-contact directives or other interim measures as deemed necessary during the investigation.

6. **Interim Measures.** The University may implement interim measures or accommodations at any point during the Complaint process to protect the safety and well-being of the parties or the integrity of the investigation.
7. **Timelines.** The Complaint Administrator may extend any timeline in these Procedures for good cause. The Complaint Administrator shall notify the parties in writing of the extension and the reason for it.
8. **Records Retention.** The Office of the Dean of Student Affairs shall maintain all records related to Complaints filed under these Procedures for seven (7) years from the date of the final determination or resolution. Records shall be maintained in a secure manner consistent with FERPA and the University's records management policies.
9. **Disability Accommodations.** The University will provide reasonable accommodations for Students with disabilities participating in the Complaint process, consistent with University policies and applicable law.

Title IX

Alleged violations of the University's Title IX – Sexual Misconduct policy will be governed and resolved in accordance with that University policy.

Student Regulations and Code of Conduct

The AGMU Student Regulations Manual outlines the rights and responsibilities of students, as well as the policies that promote order, safety, and respectful coexistence within the AGMU student community.

AGMU is committed to creating a vibrant University community and fostering a learning environment that is conducive to academic inquiry and discourse, free from fear or intimidation. We are committed to an educational and developmental process that balances the interests of individual students with the interests of the University community. The student conduct process described in this Regulations Manual is not intended to punish, but rather to uphold community standards and to address behaviors that conflict with University policies. Sanctions serve as an opportunity for students to reflect on their actions, strengthening their moral and ethical decision-making, and helping them re-align their behavior with our community expectations.

Each student is responsible for understanding and complying with this Manual. The University reserves the right to amend this Manual as necessary. Once changes are posted online, they become effective immediately. Students will be informed in writing of substantive updates through the University's established communication channels.

The Manual applies to conduct occurring on campus, in study abroad programs, or at University-sponsored events, programs, or activities, including at clinical and internship sites. It also extends to conduct that has a continuing impact on campus or has a continuing effect on an off-campus education program, activity, or event sponsored by the University.

In addition, this Manual may apply to behavior online, via email, or other electronic means. While online speech that does not involve AGMU networks or technology generally falls outside the scope of this Manual, there are two important exceptions: 1) A threat, defined as a threat a reasonable person would interpret as a serious expression of intent to inflict bodily harm upon a specific individual(s); or 2) Online or electronic speech that causes significant disruption to University operations or the educational mission.

This Student Code of Conduct (the “Code”) is adopted for the appropriate discipline of any student who acts to impair, interfere with, or obstruct the orderly conduct, processes, and functions of the University.

While the Code may have some similarities with the legal system, it is educational in nature and are not governed by restrictions found in criminal or civil proceedings. The Code should be read broadly and are not designed to define misconduct in exhaustive terms. Nothing in this Code shall be construed as preventing University officials from taking any immediate action when deemed necessary.

Authority

The authority for student discipline ultimately rests with the Vice President of Academic Affairs and Student Success/Provost. The Vice President of Academic Affairs and Student Success/Provost delegates this authority to the Dean of Student Affairs. The Dean of Student Affairs may further delegate student discipline authority to designated campus staff, as appropriate.

Definitions

“Assigned Conduct Official” is defined as:

1. For ground campus students, the Director of Student Affairs, or their designee.
2. For Main campus students (Online Spanish and Online English), the Director of Retention, or their designee

“Preponderance of Evidence” is defined as: the standard of proof that applies to student conduct proceedings or determinations. In order to find that a student or organization has engaged in prohibited conduct, the standard of proof required is a preponderance of the information contained in the record. The information must demonstrate that it is more likely than not that the violation occurred.

“Student” is defined as:

1. All persons registered for University courses on campus or online;
2. All persons who are not officially enrolled for a particular term but have a continuing relationship with the University or intend to enroll in the next term. This provision is intended to include within the definition of students, those persons enrolled in the spring and fall semesters who engage in misconduct during the summer, and students who are first-time enrollees who engage in misconduct prior to the time of enrollment, or who are not enrolled in that particular part of the term; and/or
3. All persons who are attending classes on campus or online, although they may be enrolled students in other higher education institutions as transient students.

“Campus” is defined as: all areas, owned, leased, or under the control of AGMU.

Violations of Local, State, & Federal Law

A student may be accountable to both law enforcement authorities and to the University for acts which constitute violations of the law and this Code. Student conduct allegedly constituting a felony or misdemeanor offense may be referred to the appropriate law enforcement agencies. University disciplinary proceedings will not be subject to challenge on the grounds that criminal charges involving the same incident have been filed, prosecuted, dismissed, reduced, or otherwise resolved or that such proceedings constitute double jeopardy. AGMU will comply with Personal Protection Orders issued by local law enforcement that apply to the University and are submitted to the AGMU Director of Operations, Compliance, and Safety.

Students have the right to file a complaint with the Attorney General if the institution has failed to meet the minimum requirements for restrooms and changing facilities under Sections 553.865(4) and (5), F.S.

Disciplinary Proceedings & Standard of Proof

The University will conduct disciplinary proceedings pursuant to the Code in a fair and expeditious way. Procedures governing criminal or civil courts, including formal rules of evidence, are not applicable. Students will be informed of all steps and outcomes of the disciplinary process in writing. Deviations from the procedures in this Code shall not invalidate a proceeding or decision, except where such deviation has clearly resulted in significant prejudice to a student or to the University. "Preponderance of Evidence" is the standard of proof that applies to student conduct proceedings or determinations.

Academic Integrity

Allegations under the Academic Integrity Policy will be processed in accordance with student conduct procedures set forth in this Academic Catalog and Student Handbook. Any student determined by the professor to have been responsible for engaging in an act of academic dishonesty shall be subject to a range of academic penalties (apart from any sanctions that may be imposed pursuant to the Code) as determined by the professor which may include, but not be limited to, one or more of the following: loss of credit for an assignment, examination, or project; a reduction in the course grade; or a grade of "F" in the course, a re-take, or other options deemed appropriate by the faculty.

Prohibited Conduct

The University may impose discipline for a violation of, or an attempt to violate, any University policies or regulations by a student or guest of a student. The guest's host will be held accountable for their guest's misconduct or violation(s).

Violations or attempted violations include, but are not limited to, the following types of misconduct:

- a. Forms of dishonesty not covered under the Academic Integrity Policy, including but not limited to, fabricating information, inappropriate use of Artificial Intelligence (AI), or knowingly furnishing false information or reporting a false emergency to University officials acting in the performance of their duties;
- b. Theft of, damage to or destruction of, any University property or property of others while on University premises;
- c. Unauthorized possession of University property;
- d. Dressing in a manner that is not conducive to health, welfare, and safety;
- e. Publicly exposing one's intimate body parts, public urination, defecation, and public sex acts;
- f. Possession, use, sale, barter, exchange, gift, distribution, or other transaction involving illegal drugs;
- g. Possession or use of explosives, fireworks, chemical agents, or deadly weapons;
- h. Illegal gambling;
- i. Use of offensive language, disrespectful language, insults, threats of aggression, or attempted assault to University officials, students, or guests;
- j. Failure to comply when given reasonable directives by a University official or law enforcement officer during the performance of their duties;
- k. Unauthorized use of the University name, logo, or other branded insignia;
- l. Unauthorized entry or occupancy of University facilities;
- m. Distributing or publishing informational material without the written authorization of the appropriate University official;
- n. Conduct that interferes with the University's teaching activities and operations;

- o. Forgery, alteration, or misuse of any University document, record, key, electronic device, identification, or authorized signature;
- p. Theft or other abuse of computing facilities or computer time, including but not limited to: 1) unauthorized entry into a file to use, read, or change the contents or any other purpose; 2) unauthorized transfer of a file; 3) unauthorized use of another individual's identification or password; 4) use of computing facilities to interfere with the work of another student, faculty member, or University official; 5) use of computing facilities to interfere with a University computing system, or other violations of Information Technology policies and related policies; or 6) use of University technology, including, but not limited to, computers, network, and wireless internet, to access materials disruptive to the learning environment, including and without limitation sexually explicit or violent content;
- q. Disorderly or lewd conduct;
- r. Participation in a disturbance of the peace or unlawful assembly;
- s. Disobedience or violation of the conditions of probation and/or sanctions imposed in accordance with the procedures established by this Code;
- t. Misuse of University information technology resources;
- u. Unauthorized commercial solicitation on University property;
- v. Failure to respect the privacy of any member of the University community;
- w. Intentional or unintentional acts that cause or can be reasonably expected to cause harm to an individual or group that could or does result in injury to an individual or group;
- x. Discrimination: Any act that is in conflict with the University's established non-discrimination policies or that limits or denies the ability of any person or persons to participate in or benefit from educational programs or activities based upon an individual or group's actual or perceived status;
- y. Harassment: Subjecting another person or group to uninvited or unwelcome behaviors that are abusive, threatening, intimidating, or humiliating;
- z. Sexual Misconduct is conduct of a sexual nature or conduct based on sex or gender that is nonconsensual or has the effect of threatening, intimidating, or coercing a person (provided that alleged violations of the University's Title IX- Sexual Misconduct policy will be governed and resolved in accordance with that University policy). AGMU prohibits the following specific conduct:
 - i. "Dating Violence" includes violence by a person who has been in a social relationship of a romantic or intimate nature with the victim. Whether there was such a relationship will be gauged by its length, type, and frequency of interaction.
 - ii. "Domestic Violence" is violence committed by: (1) a current or former spouse or intimate partner of the victim; (2) a person with whom the victim shares a child in common; (3) a person who is cohabiting with, or has cohabitated with, the victim as a spouse or intimate partner; (4) a person similarly situated to a spouse of the victim under the domestic or family violence laws of the jurisdiction in which the crime of violence occurred; or (5) any other person against an adult or youth victim who is protected from that person's acts under the domestic or family violence laws of the jurisdiction in which the crime of violence has occurred.
 - iii. "Sexual Assault" is defined as having or attempting to have sexual contact with another individual without consent. Sexual contact includes:

- a. Sexual intercourse (anal, oral, or vaginal), including penetration with a body part or an object, or requiring another to penetrate himself or herself with a body part or an object, however slight; or
 - b. Sexual touching, including, but not limited to, intentional contact with the breasts, buttocks, groin, genitals, or other intimate part of an individual's body.
- iv. "Sexual Harassment" is defined as unwelcome sexual advances, and other visual, verbal, or physical conduct of a sexual nature when the conduct has the purpose or effect of unreasonably interfering with an individual's academic performance or creating an intimidating or hostile academic or student living environment.
- v. "Stalking" occurs when a person engages in a course of conduct directed at a specific person that would cause a reasonable person to fear for their safety or the safety of others or suffer substantial emotional distress.
- vi. "Sexual Exploitation" occurs when an individual takes non-consensual or abusive sexual advantage of another for one's own advantage or benefit, or to benefit or advantage anyone other than the one being exploited. ;
- aa. Hazing. Any intentional, knowing, or reckless act committed by a person (whether individually or in concert with other persons) against another person or persons regardless of the willingness of such other person or persons to participate, that
 - i. is committed in the course of an initiation into, an affiliation with, or the maintenance of membership in, a student organization; and
 - ii. causes or creates a risk, above the reasonable risk encountered in the course of participation in the institution of higher education or the organization (such as the physical preparation necessary for participation in an athletic team), of physical or psychological injury including
 - a. whipping, beating, striking, electronic shocking, placing of a harmful substance on someone's body, or similar activity;
 - b. causing, coercing, or otherwise inducing sleep deprivation, exposure to the elements, confinement in a small space, extreme calisthenics, or other similar activity;
 - c. causing, coercing, or otherwise inducing another person to consume food, liquid, alcohol, drugs, or other substances;
 - d. causing, coercing, or otherwise inducing another person to perform sexual acts;
 - e. any activity that places another person in reasonable fear of bodily harm through the use of threatening words or conduct;
 - f. any activity against another person that includes a criminal violation of local, State, Tribal, or Federal law; and any activity that induces, causes, or requires another person to perform a duty or task that involves a criminal violation of local, State, Tribal, or Federal law.
- bb. Bullying or cyber-bullying. Bullying behavior is defined as sustained physical or mental violence guided by one individual or group and directed against another person or other individuals who are unable to defend themselves. It includes verbal violence (insults, threats, intimidation, disqualifications). Cyberbullying is defined as the use of electronic information, interactive technologies, and any means of communication used to harass an individual or group through personal attacks or other means;
- cc. Expressive activities that are unlawful and/or that materially and substantially disrupt the functioning of the University and/or that infringe upon the rights of others to engage in expressive activities;

- dd. Encouraging, aiding, or abetting another in the commission of any offense prohibited by this Code;
- ee. Violation of other University policies, including the Student Regulations Manual;
- ff. Violation of local, state, or federal laws, regulations, or ordinances;
- gg. Abuse or interference, or failure, to comply with the University's conduct process, including:
 - i. Failure to participate in conduct hearings
 - ii. Falsification, distortion, or misrepresentation of information
 - iii. Failure to provide, destroying, or concealing information during an investigation.
 - iv. Attempt to discourage an individual's proper participation in the conduct process.
 - v. Retaliation, harassment, or intimidation of members involved in a conduct proceeding.
- hh. Willfully entering a restroom or changing facility designated for the opposite sex and refusing to depart when asked by any administrative personnel, faculty member, security personnel, or law enforcement personnel, in violation of Section 553.865, Florida Statutes.

Disciplinary Procedure

Any person may refer a student suspected of violating University policy to the Dean of Student Affairs or designee (collectively referred to in this Procedure as the "Dean of Student Affairs") Alleged violations of University policy (except for allegations covered under the Academic Integrity policy or Title IX – Sexual Misconduct policy, will be addressed in accordance with the following procedures:

Initial Investigation

Upon receipt of a report or information that a student has violated University policy, the Dean of Student Affairs will conduct a preliminary inquiry into the nature of the incident, the evidence available, and the parties involved, to determine if there is sufficient evidence to show a violation of university policy. If there is not sufficient information or evidence, the matter will be closed. When appropriate, a letter may also be sent to advise students about the importance of complying with university policies.

If there is sufficient information or evidence available to support a potential violation of university policy and formal action is warranted, the Dean of Student Affairs will initiate the Student Conduct process by providing written notice (including e-mail) to the student alleged to have violated University policy (the "respondent"). The notice shall include a link to these procedures, the specific charges alleged, and potential sanctions. The Dean of Student Affairs shall also provide the respondent with the date, time, and location (including an online meeting) of the Student Conduct Proceeding.

Student Conduct Proceedings

A respondent subject to sanctions other than suspension or expulsion is entitled to a Student Conduct Conference. A respondent subject to suspension or expulsion is entitled to a Disciplinary Committee Hearing. Each is outlined in more detail below.

For all Student Conduct Proceedings, the following procedures apply:

1. The respondent shall be afforded reasonable access to the case file at least three (3) working days prior to the conduct proceeding and during the proceeding, redacted consistent with the Family Educational Rights and Privacy Act (FERPA).
2. The respondent shall have the opportunity to provide additional and relevant information or the names of witnesses. Any such additional information or witness names must be submitted in

writing at least five (5) working days prior to the proceeding for consideration. Witnesses with relevant information may be invited at the discretion of the Conduct Official or Disciplinary Committee, as appropriate, to serve as a witness during a proceeding. The University will not require participation of a witness in a conduct proceeding.

3. Conduct proceedings will be closed to non-participants and to the public.
4. A respondent or complainant may be accompanied by one advisor at any time during the conduct process. The role of the advisor shall be limited to support and consultation; the advisor may not speak during any student conduct proceeding except privately to the respondent, nor shall the advisor question or address witnesses. Violation of this expectation will result in the advisor being removed from a proceeding at the discretion of the student conduct administrator. In consideration of the limited role of an advisor, and of the interest of the University to expeditiously conclude the matter, a proceeding will not normally be delayed if an advisor is unavailable.
5. Information that does not directly relate to the facts at issue should not be presented and, if offered, may be excluded. Character witnesses are not allowed and will not be taken into consideration when determining responsibility or sanction(s). The relevancy of information will be evaluated by the Conduct Official or Disciplinary Committee, as appropriate.
6. Effort will be made for proceedings to be scheduled within fifteen (15) working days following notification to the respondent, but may be scheduled later, in the discretion of the Dean of Student Affairs. The respondent may request a reasonable extension of time to prepare for the proceeding. Requests for an extension will not be granted for a period to exceed two (2) business days except in unusual circumstances where the respondent can demonstrate the necessity for a longer delay. All requests for extension of time should be made in writing at least one (1) business day prior to the scheduled proceeding, except in cases of documented serious illness or emergency.
7. A respondent who fails to appear at a scheduled proceeding without good cause (e.g. documented serious illness), after proper notice of such a proceeding, may be adjudicated in absentia, and forfeits all rights to an appeal unless it is for lack of proper notice. In such cases, decisions will be based solely on information or evidence available or information presented during the proceeding.
8. Proceeding outcomes must be supported by a preponderance of evidence. Preponderance of evidence means that a greater weight of evidence supports the conclusion that a fact is true, or to establish that an event occurred. A preponderance of the evidence does not necessarily mean the greater amount of evidence, but rather the greater quality of evidence - making it more likely than not the matter in question is true.
9. A respondent may be found responsible for violating other University policies for which they were not originally charged when behavior that was previously unknown is discovered during the conduct proceeding or if it is determined that a different policy more appropriately addresses the conduct in question.
10. Formal rules of process, procedure, and technical rules of evidence, such as applied in criminal or civil court, are not used in these proceedings.
11. Recidivism of violations of university policy resulting in suspension of one or more terms or an academic year constitutes sufficient grounds for permanent expulsion.
12. An audio or audiovisual recording may be made by the Dean of Student Affairs Office. No other individuals present at the proceeding are permitted to make a recording.

A respondent may accept responsibility for violations of university policy prior to the student conduct proceeding. This acceptance must be in writing, affirming acceptance of responsibility for the charge(s) and acknowledging that the full range of sanctions may be imposed. A student who accepts responsibility in writing forfeits all rights to an appeal process.

Student Conduct Conferences

A respondent subject to sanctions other than suspension or expulsion is entitled to a Student Conduct Conference. The Dean of Student Affairs shall assign a single Conduct Official to conduct a Student Conduct Conference.

At the Conference, the Conduct Official may hear from the respondent, complainant (if any), and any witnesses invited by the Conduct Official. The respondent shall have the opportunity to respond to information or evidence related to the alleged violation of university policy, and may present and explain all written materials, evidence, and statements.

The Conduct Official shall consider all relevant information and evidence and determine whether, based on the preponderance of the evidence, a violation of university policy occurred. If the Conduct Official finds the respondent responsible for a violation of university policy, the Conduct Official shall determine the sanction. The outcome of the proceeding shall be conveyed to the respondent in writing, normally within ten (10) working days following the Conference. The decision of a Conduct Official becomes final if the time for requesting an appeal has passed without an appeal being submitted.

Disciplinary Committee Hearings

A respondent subject to suspension or expulsion is entitled to a Disciplinary Committee Hearing.

A. Appointment of Disciplinary Committee Members and Structure

The Dean of Student shall appoint at least two (2) administrative personnel and at least two (2) faculty members to serve as Disciplinary Committee members at the beginning of each academic year. Appointed Disciplinary Committee members may be removed or replaced at the discretion of the Dean of Student Affairs.

Disciplinary Committee members shall choose a Committee President and a Committee Secretary of Records.

1. The Committee President (or designee) is responsible for presiding over all meetings of the Disciplinary Committee and the Disciplinary Committee Hearing and referring the written outcome of the Disciplinary Committee Hearing to the Dean of Student Affairs.
2. The Committee Secretary of Records (or designee) is responsible for calling and coordinating all meetings of the Disciplinary Committee and the Disciplinary Committee Hearing, recording attendance, preparing minutes, and preparing the written outcome of the Disciplinary Committee Hearing.

A Disciplinary Committee shall consist of any three Disciplinary Committee members. All decisions of the Disciplinary Committee shall be by majority vote.

B. Disciplinary Committee Hearings

1. The Secretary of Records will convene a Disciplinary Committee, typically, no later than the fifth (5th) working day after notification to the respondent. Prior to the Hearing, the Disciplinary Committee shall review information provided by the Dean of Student Affairs and the respondent and decide whether to invite any witnesses to participate.
2. At the Disciplinary Committee Hearing, the Committee may hear from the respondent, complainant (if any), and any witnesses invited by the Committee. The respondent shall have the opportunity to respond to information or evidence related to the alleged violation of university policy, and may present and explain all written materials, evidence, and statements.
3. Disciplinary Committee members can ask questions of the respondent, complainant, and any witnesses. The respondent and complainant may pose written questions to the Disciplinary Committee President, who may ask such questions in their discretion and if relevant.

4. The Disciplinary Committee shall consider all relevant information and evidence and determine whether, based on the preponderance of the evidence, a violation of university policy occurred. If the Committee finds the respondent responsible for a violation of university policy, the Disciplinary Committee shall determine the sanction.
5. The outcome of the proceeding shall be conveyed to the respondent in writing, normally within ten (10) working days following the Hearing.
6. The decision of the Disciplinary Committee becomes final if the time for requesting an appeal has passed without an appeal being submitted.

Appeals

The decision of the Conduct Office or Disciplinary Committee may be appealed in writing by the respondent to the Dean of Student Affairs within ten (10) working days of the notification of the resolution.

The written appeal must be based on at least one of the following criteria:

1. Significant procedural error that affected the outcome of the process.
2. New evidence that significantly alters the outcome of the process, which was previously unknown to the respondent, has been discovered and is available during the appeal process.
3. The sanction(s) was(were) clearly inappropriate and/or disproportionate to the prohibited conduct for which the respondent was found in violation.

General dissatisfaction with the outcome of the proceeding or an appeal for mercy are not appropriate grounds for appeal.

For sanctions other than suspension or expulsion, the appeal will be reviewed and determined by the Vice President of Academic Affairs and Student Success/Provost. For sanctions of suspension or expulsion, the appeal will be reviewed and determined by the President of AGMU.

The Vice President of Academic Affairs and Student Success/Provost or President of AGMU may:

1. Alter, amend, and/or overturn disciplinary sanction.
2. Schedule a rehearing; or
3. Uphold the assigned Conduct Official's determination and sanction.

One appeal is permitted. The decision on the appeal is final and shall be conveyed in writing to the respondent, normally within fifteen (15) working days after the submission of the appeal.

Sanctions will not be imposed while an appeal is pending unless the Dean of Student Affairs determines that the continued presence of the respondent in the community poses a threat to any person, or to the stability and continuance of normal university functions.

Temporary or Immediate Suspension

Whenever there is evidence that the continued presence of the respondent poses a threat to any person or to the stability and continuation of normal university functions, the university may temporarily exclude a respondent from campus or suspend a respondent from the university, pending the student conduct proceeding. The Dean of Student Affairs will make this decision following appropriate consultation.

Disciplinary Sanctions

A student found in violation of this Code may be subject to one or more of the following sanctions by the assigned Conduct Official:

Written Warning - official reprimand to the student addressing the conduct violation and informing the student that prohibited conduct may be cause for additional disciplinary action if repeated in the future. A copy of the written warning is kept on file as part of the student disciplinary file system.

Restrictions or Loss of Privileges - Limitations on campus usage or University-sponsored events, including facilities, courses, labs, or other campus activities related to a specific violation for a specified period of time.

Disciplinary Probation – A period of time in which a student is expected to demonstrate a positive behavioral change and may be excluded from participation in privileged or extracurricular institutional activities. This warning includes a written reprimand along with the possibility of more severe disciplinary sanctions should the student be found in further violation of any University policies or regulations during the established probation time frame. At the end of the probationary period, the University will review the student's conduct and decide whether or not to reinstate the student to good conduct standing.

Community or Educational Service – An assignment of an appropriate project that will benefit the student, the institution, and/or the parties offended. Such assignments may include, but are not limited to, community service, letters of apology, educational assignments, and educational programs.

Restitution – Reimbursement to the University or affected party for damage or misappropriation of property. Restitution may take the form of appropriate services, fines, repair, or other compensation for damages, and it may be applied, where appropriate, in conjunction with another sanction.

Disciplinary Suspension - Termination of student status, including participation and attendance at all campus activities as set forth in the notice of suspension for a specific period of time. When circumstances warrant, the sanction of exclusion from the campus and University services may also be imposed. Being convicted in a court of law for a criminal offense involving personal misconduct may constitute sufficient grounds for suspension or expulsion from the University. A student on disciplinary suspension will be administratively withdrawn from their current courses. The student will be ineligible to receive a tuition and fees refund. Disciplinary suspensions are determined by the Dean of Student Affairs, with the approval of the Vice President of Academic Affairs and Student Success/Provost.

Expulsion - A permanent separation from the University. When circumstances warrant expulsion, the student is banned from the University property and the student's presence at any University-sponsored activity or event is prohibited. This action may be enforced with a no-trespass notice as necessary. Being convicted in a court of law for a criminal offense involving personal misconduct may constitute sufficient grounds for suspension or expulsion from the University. A student with a finding of Expulsion will be administratively withdrawn from their current courses. This administrative withdrawal will be noted on their transcript, and the student will be ineligible to receive a tuition and fees refund. Disciplinary expulsions are determined by the Dean of Student Affairs, under the approval of the President of AGMU.

Loss of Employment - Permanent severance of the student's employment with the University.

Behavioral Requirement - This includes required activities including but not limited to, seeking academic counseling or substance abuse screening, writing a letter of apology, etc.

No-trespass Notice - The University may utilize a no-trespass notice on a temporary or permanent basis to protect the safety of the University community.

Discretionary Sanctions - Other sanctions that bear a reasonable relation to the violation for which the student has been sanctioned may be imposed instead of or in addition to those specified above.

Appealing a University Decision

The purpose of this Policy is to establish the University's process for appealing a University Decision. A "University Decision" means the final decision of a University department regarding a Student. Examples of a "University Decision" include a decision by the financial aid or student accounts department, but does not include the following (which are governed by other University policies and procedures):

- a. Matters governed by the Student Code of Conduct;
- b. Academic complaints or policies, including grade grievances; or
- c. Complaints governed by Title IX, which are handled under the University's Title IX policies and procedures.

Procedures

1. A Student may appeal a University Decision only after exhausting all relevant campus-based administrative channels. These channels are outlined in the Academic Catalog and Student Handbook under the Student Complaints Policy.
2. A Student may appeal a University Decision on the following limited grounds:
 - a. Procedural irregularity that materially affected the decision-making process (for example, failure to follow the University's published procedures);
 - b. The outcome of the University Decision is disproportionate to the alleged violation of University policy or standards; or
 - c. New evidence that was not reasonably available or known to exist during the decision-making process.
3. A Student must follow the process below to file an appeal:
 - A. The written appeal must be a plain, concise, and complete statement containing at least the following:
 - Documentation that all campus-based administrative channels were exhausted before the appeal;
 - A description of the specific University Decision being appealed;
 - A statement describing the background of the case, the basis for the appeal, and all pertinent facts and documentation the Student wants considered;
 - An explanation of the grounds for the appeal; and
 - An explanation of the resolution sought by the Student.
 - B. A written appeal must be submitted to the Vice President for Academic Affairs and Provost within ten (10) business days after receipt of a final University Decision. The Vice President for Academic Affairs and Provost, or designee, shall serve as the Appellate Officer.
 - C. The Appellate Officer shall review the written appeal and may, but need not, hold a virtual or in-person informational meeting with the Student.
 - D. The Appellate Officer shall review the evidence and, based on a preponderance of the evidence, determine whether to accept, modify, or reject the University Decision, or return the matter to the relevant University department for reconsideration. The Appellate Officer's decision is final and not subject to further appeal.
 - E. The Appellate Officer shall prepare a written determination and provide it to the Student within fifteen (15) calendar days of receipt of the written appeal.
 - F. The Appellate Officer may seek legal advice at any time during the appeal process.
 - G. If the Student fails to comply with this process, the Appellate Officer may dismiss the appeal and uphold the University Decision.

- H. All documentation shall be retained in accordance with University policy and applicable law.
- I. Retaliation against a Student for appealing a University Decision is prohibited.

Students who have exhausted the University's internal procedures and remain dissatisfied may contact the Florida Commission for Independent Education at (888) 224-6684 or 325 W. Gaines St., Suite 1414, Tallahassee, FL 32399. Website: www.fldoe.org/cie.

Student Council

The Student Council of AGMU serves as the official representative body of the student community. Its primary mission is to act as an effective channel of communication between students, faculty, and university administration. The Council is dedicated to advocating for the academic, social, and cultural interests of the student body, while promoting an accessible, participatory, and student-centered academic environment. Through initiatives that foster leadership, civic responsibility, and institutional engagement, the Student Council organizes and supports activities that enrich campus life and contribute to the holistic development of future professionals. Furthermore, it plays an active role in decision-making processes that impact the student experience, ensuring that the voice of the student body is both heard and respected at all levels of the university structure.

During the first semester of each academic year, the Dean of Student Affairs shall convene and administer a general election for the purpose of electing the Ana G. Méndez University Student Council, which shall represent the students of all Academic Units, university centers, and the online division. All students who satisfy the eligibility requirements established in the AGMU Student Council Manual shall be entitled to participate in the election.

Nominations for Student Council positions shall be submitted and evaluated prior to the election in accordance with the procedures and eligibility requirements established in the AGMU Student Council Manual. The election shall be conducted by secret ballot, through an electronic, in-person, or combined voting process authorized by the institution. The candidates receiving the highest number of valid votes cast for their respective positions shall be elected. No minimum voter turnout shall be required for the election to be valid, unless otherwise established in the AGMU Student Council Manual.

Student Council Composition

The Student Council is composed of the following positions: a President, a Vice President, a Secretary, and a Treasurer. Additionally, there will be one (1) representative for each school, elected by vote. The quorum for meetings will be constituted by the presence of half plus one (1) of the council members. The functions and responsibilities of the Student Council will be defined in the AGMU Student Council Manual, to be established by the institution.

The Student Council will be in effect from the date of its election until the next Student Council is constituted. The President or Vice President of the Student Council officially represents the student body before the University Council and the Academic Senate. Additionally, they represent the student body in other institutional initiatives and projects. The Student Council will have a mentor who may be a member of the administration or faculty, appointed by the Dean of Student Affairs.

Student Associations

Student associations are an integral component of the AGMU campus community. These organizations contribute substantially to students' integral development by promoting their leadership, direction, planning, civic sense, and social skills. The specific functions and responsibilities of the Student Association will be defined in the AGMU Procedures Manual for the Approval and Operations of Student Associations Manual, to be established by the institution.

Student Identification

A student identification (“ID”) card is issued to every officially enrolled student at AGMU onsite locations. The identification card may be required for access to campus facilities, including the use of laboratories, classrooms, corridors, cafeterias, libraries, activities, and other areas. Students are always required to carry their ID card while on campus and may be required to display it. Failure to display an ID card or the use of an ID card of another person may result in disciplinary action.

Students who take online courses are required to use their AGMU email address and identification credentials, such as their student number, username, and password, to access the available virtual services. Online students may also be required to validate their identity through the tools provided by the platform and the technology available for these purposes.

Students enrolled in the online division who require an official AGMU identification for participation in internships, practicums, exchange programs, or other academic or student activities must submit a request and comply with the corresponding institutional process.

Students may be required to return their ID cards upon the termination of enrollment or affiliation with the University. At that time, the student’s access and identity authentication on the institution's platforms and systems will be terminated.

The Student Regulations Manual is available through the institutional website or at any of the onsite locations.

General Provisions

Course Numbering System

The following course numbering system is used by AGMU:

- 050, 100 and 200 coded courses are lower division courses
- 300 and 400 coded courses are upper division courses
- 500, 600 coded courses are Master Degree level courses
- 700 coded courses are Master and Doctoral Degree level courses.
- 800 and 900 coded courses are Doctoral Degree level courses

The Course Prefix

The course prefix is a four-letter designator for a major division of an academic discipline, subject-matter, or sub-category of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

False information

Any candidate who submits false information to attain admission to the Institution will be immediately disqualified for admission.

If, after admission, it is discovered that a student furnished false information, they will be subject to the appropriate disciplinary measures, including canceling their enrollment and losing the credits completed satisfactorily.

Student’s Responsibility

It will be the responsibility of the students to know and comply with all the academic and institutional norms or policies. The Institution will not accept a declaration of ignorance of a norm or policy to avoid complying with it.

Institution's Responsibility

This Institution does not exclude participation, does not deny benefits, nor does it discriminate against any person by race, sex, color, birth, social origin or condition, physically disabled, or for political, religious, social or syndicate ideology.

Reserved Rights

The Institution, to safeguard its goals and objectives, reserves the right to admit, readmit or enroll any student in any semester or class. For the same reason, it reserves the right to temporarily, partially, totally or permanently suspend any student before a hearing, in accordance with the Student Regulations Manual.

FERPA

The Institution faithfully complies with the dispositions of the Family Educational Rights and Privacy Act of 1974, known as FERPA. This act is designed to protect the privacy of academic records and to establish student's rights to inspect and review their records.

Law 186 (Only for US citizens and residents)

The institution lawfully complies with the dispositions of Law 186 of September 1, 2006. Better known as the Law that Prohibits the Use of the Social Security Number. AGMU does not use any student's social security number as Identification in public and private educational records or documents.

Anti-Hazing Policy

The University prohibits hazing, which is defined in the Student Regulations Manual as any action which endangers the mental or physical health of a member of the University community, or which encourages the student to engage in illegal or inappropriate conduct for the purpose of initiation, admission into, affiliation with, or as a condition of continued membership in a recognized group or organization. Hazing is considered prohibited conduct and will be adjudicated through the established student conduct process.

Change of Name and/or Address

It will be the responsibility of the student to notify the Registrar's Office of any change of name or Social Security information. The student is responsible for updating their address (postal and physical) through the Student Portal. Students must present documentation to update any information related to the Social Security card.

Rule 6E-7.001, FAC, and the Safety in Private Spaces Act, Florida Statute Sec. 553.865

Any student who willfully enters a restroom designated for the opposite sex on the premises of AGMU and refuses to depart when asked by any administrative personnel, faculty member, security personnel, or law enforcement personnel may result in exclusion from use of the restrooms, suspension, or withdrawal as a student from AGMU.

A person may only enter a restroom or changing facility designated for the opposite sex under one or more of the following circumstances:

- a) To accompany a person of the opposite sex for the purpose of assisting or chaperoning a child under the age of 12, an elderly person, as defined in s. 825.101, or a person with a disability as defined in s. 760.22 or a developmental disability as defined in s. 393.063;
- b) For law enforcement or governmental regulatory purposes;
- c) For the purpose of rendering emergency medical assistance or to intervene in any other emergency situation where the health or safety of another person is at risk;

- d) For custodial, maintenance, or inspection purposes, provided that the restroom or changing facility is not in use; or
- e) If the appropriate designated restroom or changing facility is out of order or under repair and the restroom or changing facility designated for the opposite sex contains no person of the opposite sex.

In the event any student believes that the institution has failed to meet the minimum requirements for restrooms and changing facilities under Rule 6E-7.001, FAC, or Sections 553.865(4) and (5), F.S., students have the right to file a complaint with the Attorney General. Complaints can be filed with the Attorney General's office over the phone, by mail, or electronically at one of the following sites:

<https://www.myfloridalegal.com/sites/default/files/consumercomplaint.pdf>

<https://www.myfloridalegal.com/consumer-protection/consumer-complaint-form>

Clery Act

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (commonly known as "The Clery Act") is a federal law (20 U.S. Code § 1092(f)) that requires colleges and universities to report and disclose information regarding campus crimes, emergencies, security policies, and related issues. AGMU follows the Clery Act guidelines to provide current and prospective campus community members with essential information for making informed decisions about their personal safety and college selection. For more information please visit: [Student Consumer Information/Health and Safety](#).

Distance Education

Distance Education is defined as means planned learning that normally occurs in a different place from teaching and as a result requires special techniques in course design, special instructional techniques, special methods of communication by electronic and other technology, and special organizational and administrative arrangements. (Florida Commission for Independent Education, 6E-1.003, F.A.C.) AGMU offers Distance Education or Online Education through a Learning Management System. The University provides an interactive, and dynamic learning environment, available 24 hours, that is aimed at a student population that is diverse and dispersed.

Distance Education at AGMU is a study and learning modality process assisted by technology, with the purpose of promoting learning without limitations of location, occupation, and schedules. The educational modality is mediated by information and telecommunication technologies, through traditional and innovative, synchronous, and asynchronous teaching-learning methodologies that contribute to the construction and exchange of knowledge. AGMU has a broad academic offering available through online education. Assurance on educational quality to the student and the provision of administrative services that go beyond geographic barriers and facilitate communication for students is of utmost importance.

Student Orientation

Prior to the beginning of the course, students who enroll in online programs or courses must attend a mandatory student orientation.

The orientation provides training on the use of the Learning Management System (LMS). The training includes basic use of the LMS to access and complete modules, lessons and activities. It also includes the use of communication tools within the LMS such as discussion forums, email and chat. The training is a series of tutorials available 24/7 on the student portal. The tutorials incorporate short video clips and other tools that can be accessed at any time for quick reference.

The training sessions cover the following topics:

1. Course login access/navigation: access to the LMS, content modules, and supplementary files.
2. Course tools: how to participate in a discussion forum, how to submit assignments, send and receive email, chat, whiteboard and how to see grades.
3. Academic resources: access to the online library, online tutoring (NetTutor), and Academic Integrity Norms.

Technology Requirements

In order to maximize the learning experience of the technology supported courses, students are required to own or have access to a computer and internet connection. The university does not provide students with personal computers. However, each campus library has a limited number of computers available for student use on a first-come basis.

Supported Browsers

Operating System requirements: Windows 7 (minimum) / OSX 10.6 (minimum)

Browser requirements:

Chrome 102 and 103

Firefox 100 and 101

Edge 101 and 102 / Safari 14 and 15 (Macintosh only) will work but are not recommended.

Device requirements: Laptop or Desktop computer. Please do not rely only on a Tablet (iPad) or Mobile Device (iPhone, Android) as your only access to Canvas.

Student Services, Attendance, Participation, and Monitoring Online Courses

Student Services

Student services are available to Distance Education students in two ways: electronically or via phone. Distance education students receive the same services as face-to-face students.

Student Attendance and Participation

Academic Attendance

- Students are expected to actively participate in each online course through various scheduled academic activities and through regular and substantive student-to-instructor and student-to-student interaction. Logging into an online course without completing one or more academically related activities does not constitute academic attendance.
- For students enrolled in any academic program, acceptable evidence of academic attendance and attendance at an academically related activity in a distance education course/program include, but are not limited to:
 - Submission of an academic assignment or exam within the first 7 days of the start of classes.
 - Recorded or registered participation in an interactive activity such as group study, discussion forum about academic matters, interactive tutorial, or computer-assisted instruction.

- Email communication from the student initiating contact with a faculty member to ask a question about the academic subject studied in the course.
- There are several synchronous activities in which academic attendance is of utmost importance. The following examples highlight the significance of student participation:
 - Attendance is mandatory for presentations in the virtual room, where students are expected to present an assignment/task individually or as part of a group presentation.
 - Participation in chats or virtual class meetings is not compulsory unless explicitly stated by the course facilitator. Nonetheless, for non-mandatory sessions, students are strongly encouraged to make every effort to attend the scheduled activity for the course(s).

Assignment Submissions

- Students must submit assignments or projects exclusively through the LMS administered by AGMU and by the specified due date and time published within each course's guidelines. Assignments submitted via personal email, educational platform messaging systems, assignment comments sections within the educational platform, institutional email, or any other means will not be accepted. In cases where a particular situation exists and alternative arrangements have been made, students must adhere to the submission date established accordingly.
- Submitting assignments or projects after the specified due date and time for the course without justification will result in penalty of the total value of the assignment at the faculty discretion or as stipulated in the course grading rubric
- If the assignment is submitted more than two weeks late, the instructor for the course may reject or accept the work. If the work is accepted, the grade for the assignment will be subject to the appropriate penalty percentage.
- If students encounter circumstances that prevent their on-time completion of an academic assignment/project, they must promptly inform their instructor to determine the necessary course of action. If the circumstance is beyond the student's control, such as hospitalization, the death of an immediate family member, childbirth, accidents, or other events of the same nature, the student should communicate these circumstances with the faculty member to arrange for an extension or alternate assignment submission date. It is advisable to provide relevant documentation, such as a medical certificate or official notification.
- Assignment submissions are not allowed after the last day of class, except for students granted an "I" (Incomplete) for the course(s).

Participation

- Participation in academic discussion forums is required and will be graded. Discussion forums do not allow for makeup sessions after the end of the week for which they were due. Therefore, students are expected to actively engage in online discussion sessions throughout the course. To actively participate in a discussion forum, students must:
 - Submit their initial discussion post (new thread) in the forum by Wednesday of the current week.
 - Actively participate through substantive interaction to ensure comprehension of the academic topic through a collaborative, collective, and interactive conversation. Substantive interaction involves sustained, interactive communication of at least three (3) discussion posts from fellow classmates (will depend on course enrollment). This should be done before the assignment's completion date.

- Participation in group work on special projects (Groups, Blogs, Wikis, etc.) is mandatory. These meetings should preferably take place on the educational platform. Alternatively, if students choose to use a different online platform for their meetings, they must ensure that evidence of the meetings or educational exchange of information is available should it become necessary to present them as evidence of the assignment.

Student Authentication Policy

AGMU has established the following mechanisms to verify and demonstrate the identity of the student enrolled in the institution's courses, programs, or online certifications:

- 1) Platforms Access and Secure Password - Each student has a unique user ID (username) created by the institution's Student Information Systems/Enterprise Resource Planner (SIS/ERP). The student sets the password, guided by the security parameters of the AGMU. In addition, the IT Security Unit has created digital mechanisms and procedures for users to protect their accounts with authentication with two-step verification.
- 2) Supervised exams - AGMU has digital tools that monitor the exams offered remotely through two (2) services:
 - a. Monitor the environment in which the student is taking an exam and verify identity by requesting photo identification; using a regular webcam, you can identify movements, interruptions, or any suspicious situation during the active time of the exam.
 - b. Screen locks and some computer functions, once the exam is activated, to prevent the user from surfing the Internet or accessing other areas of the computer. Another option is taking the exam in an institutional laboratory, identified by the faculty member offering the course. In this environment, the student identifies itself with the lab technician (Proctor), who will assign one of the computers available to the student and will provide any technical support that the student may need.
- 3) Teaching-learning practices - The faculty is the main agent in the use of these mechanisms. Through the synchronous and asynchronous interactions of the course and the possible recording of the same, the faculty establishes academic relationships with its students to facilitate knowledge and motivate participation in the teaching and learning process. This allows them to identify a profile of each student, not only of their physique but also of how they think, analyze, apply knowledge, and behave.

Responsibilities

All students shall maintain the security of usernames, passwords, and any other access credentials that they are assigned. Access credentials must not be shared or given to anyone other than the user to whom they were assigned, for any reason. Users shall be responsible for any and all uses of their account. Users shall be responsible for changing passwords periodically to maintain security. Students must provide complete and true information about themselves in any identity verification process, in accordance with AGMU policies.

Census Taking for Online and Hybrid Courses

Please refer to the Add/Drop and Census Taking Policy located on page XX.

Monitoring Attendance

In order to support students in the completion of their course, and as part of the institution's retention efforts, faculty and Retention staff monitor and report student participation throughout the course.

Evaluation of Student's Academic Achievement

AGMU calculates engagement time based on the Carnegie Model.

One semester credit is defined as:

1. One semester credit hour is equivalent to a minimum of fifteen (15) hours of planned learning experiences composed of hours of instruction and individual or group activities as indicated in the course outline under the guidance of a qualified faculty. In addition, students are expected to engage in a minimum of two hours of out of class student work or 3 hours of lab. per each course credit hour, per semester.
2. The equivalent amount of work as required in paragraph 1 of this definition of other academic activities including but not limited to laboratory work, internships, practicums, studio work, and other academic work leading to the award of a semester credit.
3. Please note that some programs require additional time for hands-on learning.

General Education Component

The General Education Component at Ana G. Méndez University (AGMU) provides students with the foundational knowledge, skills, and values necessary for academic, professional, and personal success. Through an interdisciplinary curriculum and a bilingual learning environment, students engage in diverse fields of study that promote academic excellence, innovation, collaboration, and community engagement while preparing them to participate responsibly in their communities. In alignment with AGMU's mission, the component equips students with the knowledge, skills, and perspectives needed to respond to the challenges of an increasingly diverse, complex, and interconnected world.

Consistent with AGMU's mission and the expectations of the Middle States Commission on Higher Education (MSCHE), the General Education Program promotes the development of essential competencies in communication, critical thinking and logical reasoning, scientific and quantitative reasoning, information literacy, technological competencies, ethical-moral responsibility, and respect for diversity and global awareness. These competencies provide the foundation for advanced study, informed citizenship, professional achievement, and lifelong learning.

AGMU undergraduate programs include a General Education component designed to integrate these institutional competencies throughout the curriculum. Table 1 presents the institutional competencies and their corresponding student learning outcomes, illustrating how each competency is translated into observable and measurable learning.

Table 1 *Institutional Competencies and General Education Outcomes*

Institutional Competencies	General Education Outcomes
Communication	Students will demonstrate fluency and correctness in oral and written expression when presenting their ideas, making demonstrations, presentations, or defending arguments in their professional and personal lives.
Critical thinking and logical reasoning	Students will apply complex analysis, synthesis, and evaluation skills in an organized and logical way when researching, searching for, and managing information, solving problems, making decisions, and being creative in performing their professional and personal functions.
Scientific and mathematical quantitative reasoning	Students will acquire scientific and mathematical knowledge by applying quantitative analysis and evaluation methods and processes.
Information literacy	Students will responsibly use available technology to research, access information, and document their contributions to the world of work and personnel, respecting copyright and the rules on access and disclosure of information.
Technological competency	Students will demonstrate the ability to use technology to understand and solve problems effectively.
Ethical-moral attitude	Students will know and respect the laws and social and professional norms that allow them to assume an ethical-moral attitude in the execution in the professional and personal field.
Respect for diversity and global awareness	Students will develop global awareness by appreciating and respecting human diversity, expressed through different cultures, values, traditions, and lifestyles that contribute to our uniqueness while encouraging inclusion and equity across all global contexts.

General Education credit-hour requirements vary by degree level and academic program. According to AGMU, one semester credit hour represents at least 15 hours of instruction and guided learning activities, in addition to a minimum of two hours of independent student work per credit hour. (AGMU, 2025). Table 2 presents the degree levels by academic school and the corresponding General Education credit hour requirements.

Table 2 *Academic Schools, Degree Level and the General Education Credit Hours Requirements*

School	Degree Level	General Education Credit Hours Requirements
Liberal Arts	Associate of Science	15 credits. These credits are distributed among three (3) credits of Spanish, three (3) credits of English, three (3) credits of Mathematics, three (3) credits of Social Science, and three (3) credits in Computer.
Liberal Arts	Associate of Science	17 credits. These credits are distributed among four (4) credits of Spanish, four (4) credits of English, three (3) credits of Mathematics, three (3) credits of Social Science, and three (3) credits in Psychology.
Liberal Arts	Bachelor of Arts	51 credits. These credits are distributed among nine (9) credits of Spanish, twelve (12) credits of English, six (6) credits of science, three (3) credits of Mathematics, six (6) credits of Social Science, six (6) credits of Humanities, three (3) credits of computer, three (3) credits in History, and three (3) credits of Philosophy.
Science and Technology	Associate of Science	15 credits. These credits are distributed among in three (3) credits in English, three (3) credits of Mathematics, three (3) credits of Science, three (3) credits of Humanities and three (3) credits of Spanish.
Science and Technology	Associate of Science	21 credits. These credits are distributed among six (6) credits of English, three (3) credits of Mathematics, three (3) credits in Social Science, three (3) credits of Humanities, three (3) credits of Science, three (3) approved General Education electives.
Health Sciences	Associate of Applied Science	11 credits. These credits are distributed in three (3) credits of Mathematics, four (4) credits of English and four (4) credits of Spanish.
Health Sciences	Associate of Science	15 credits. These credits are distributed in three (3) credits of English, three (3) credits of Mathematics, three (3) credits of Computers, three (3) credits of Social Science and three (3) credits of Spanish.
Health Sciences	Associate of Science in Nursing	17 credits. These credits are distributed in three (3) credits in English, three (3) credits in Mathematics, three (3) credits in Psychology, and eight (8) credits in Biology.
Business and Entrepreneurship	Bachelor of Business Administration	48 credits. These credits are distributed among nine (9) credits of Spanish, twelve (12) credits of English, six (6) credits of Science, three (3) credits of Mathematics, six (6) credits of Social Science, six (6) credits of Humanities, three (3) credits of Computer, and three (3) credits in History.
Health Sciences	Bachelor of Science in Health Services Management	48 credits. These credits are distributed among nine (9) credits of Spanish, twelve (12) credits of English, six (6) credits of Science, three (3) credits of Mathematics, six (6) credits of Social Science, six (6) credits of Humanities,

School	Degree Level	General Education Credit Hours Requirements
		three (3) credits of Computer, and three (3) credits in History.
Liberal Arts	Bachelor of Arts in Criminal Justice	45 credits. These credits are distributed in twelve (12) credits of Spanish, twelve (12) credits of English, three (3) credits of Computer, six (6) credits of Humanities, three (3) credits of Mathematics, three (3) credits of Science, and six (6) credits of Social Science.
Science and Technology	Bachelor of Arts	51 credits. These credits are distributed among nine (9) credits of Spanish, twelve (12) credits of English, six (6) credits of Science, three (3) credits of Mathematics, six (6) credits of Social Science, six (6) credits of Humanities, three (3) credits of Computer, three (3) credits in History, and three (3) credits of Philosophy.
Science and Technology	Bachelor of Science	30 credits. These credits are distributed among nine (9) credits of Spanish, six (6) credits of English, three (3) credits of Mathematics, three (3) credits of Social Science, three (3) credits of Science, three (3) credits of Humanities and three (3) credits of History.

AGMU's General Education component is designed to promote the development of institutional competencies across multiple disciplines. Table 3 presents the institutional competencies, their associated student learning outcomes, and the curricular areas through which they are developed and assessed.

Table 3 Institutional Competencies, Student Learning Outcomes, and Curricular Areas Supporting Their Development

Institutional Competency	Student Learning Outcome	Associated Curricular Areas
Communication	Students will demonstrate fluency and correctness in oral and written expressions when presenting their ideas, making demonstrations, presentations, or defending arguments in their professional and personal lives.	English, Spanish, Communications, Humanities, Social Sciences, First-Year Experience, Sciences.
Critical Thinking and Logical Reasoning	Students will apply complex analysis, synthesis, and evaluation skills in an organized and logical way when researching, searching for, and managing information, solving problems, making decisions, and being creative in performing their professional and personal functions.	English, Spanish, Communications, Mathematics, Social Sciences, History, Psychology.
Scientific and Mathematical Quantitative Reasoning	Students will acquire scientific and mathematical knowledge by applying quantitative analysis and evaluation methods and processes.	Mathematics, Sciences, Biology, Chemistry, First-Year Experience.
Information Literacy	Students will responsibly use available technology to research, access information, and document their contributions to the world of	Information Systems, Computer Applications, English, Humanities, Social Sciences,

Institutional Competency	Student Learning Outcome	Associated Curricular Areas
	work and personnel, respecting copyright and the rules on access and disclosure of information.	History, Psychology, First-Year Experience.
Technological Competency	Students will demonstrate the ability to use technology to understand and solve problems effectively.	Information Systems, Computer Applications, Mathematics, Sciences, English, Communications.
Ethical-Moral Attitude	Students will know and respect the laws and social and professional norms that allow them to assume an ethical-moral attitude in the professional and personal spheres.	Philosophy, Social Sciences, Communications, English, Biology.
Respect for Diversity and Global Awareness	Students will develop global awareness by appreciating and respecting human diversity, expressed through different cultures, values, traditions, and lifestyles that contribute to our uniqueness while encouraging inclusion and equity across all global contexts.	Humanities, History, Social Sciences, Psychology, Spanish, Communications, Philosophy.

The General Education Component is founded on the intentional, integrated, and continuous development of AGMU's institutional competencies. Each General Education course contributes to strengthening these competencies, while a systematic assessment process enables AGMU to collect meaningful evidence of students' achievement of the established learning outcomes. This evidence is used to evaluate the effectiveness of the curriculum, support continuous improvement efforts, and ensure that graduates develop the knowledge, skills, and competencies necessary for academic success, professional excellence, and responsible citizenship, in alignment with AGMU's mission and the expectations of the MSCHE.

Academic Programs

School of Business and Entrepreneurship

Academic Programs

- Diploma in Small Business Entrepreneurship **(This program is not admitting new students.)**
- Bachelor of Business Administration in Accounting
- Bachelor of Business Administration in Digital Marketing
- Bachelor of Business Administration in Finance and Economics
- Bachelor of Business Administration in Human Resources Management
- Bachelor of Business Administration in Information Systems
- Bachelor of Business Administration in Management
- Bachelor of Business Administration in Organizational Development
- Master of Accountancy
- Master of Business Administration with specialization in Accounting
- Master of Business Administration with specialization in Agribusiness **(This program is not admitting new students.)**
- Master of Business Administration with specialization in Finance
- Master of Business Administration with specialization in Human Resources
- Master of Business Administration with specialization in International Business with focus on Latin America
- Master of Business Administration with specialization in Management
- Master of Business Administration with specialization in Management and Strategic Leadership
- Master of Business Administration with specialization in Marketing and Sales Management
- Master of Business Administration with specialization in Project Management
- Master of Business Administration with specialization in Supply Chain Management and Logistics
- College Credit Certificate in Accounting
- College Credit Certificate in Finance
- College Credit Certificate in Human Resources
- College Credit Certificate in Management
- College Credit Certificate in Management and Strategic Leadership
- College Credit Certificate in Management and Sales Management
- College Credit Certificate in Project Management
- College Credit Certificate in Supply Chain Management and Logistics
- Doctor of Business Administration with specialization in Information Management Systems
- Doctor of Business Administration with specialization in Management

Notes:

1. The language of instruction and program delivery modality are subject to availability and may vary between locations.
2. COMPLETING A COURSE OR PROGRAM IN A LANGUAGE OTHER THAN ENGLISH MAY REDUCE EMPLOYABILITY WHERE ENGLISH IS REQUIRED.

Candidacy Statement

ACBSP Candidacy Status

The following undergraduate and graduate business programs offered by Ana G. Méndez University are Candidates for Accreditation by the Accreditation Council for Business Schools and Programs (ACBSP):

Programs in Candidacy Status

Undergraduate Programs	Graduate Programs
• BBA in Accounting • BBA in Digital Marketing • BBA in Finance and Economics • BBA in Human Resources Management • BBA in Management • BBA in Information Systems • BBA in Organizational Development	• Master of Accountancy • MBA in Accounting • MBA in Finance • MBA in Human Resources • MBA International Business with Focus on Latin America • MBA in Management • MBA in Management and Strategic Leadership • MBA in Marketing and Sales Management • MBA in Project Management • MBA in Supply Chain Management and Logistics • DBA in Information Systems Management • DBA in Management

Candidacy status indicates that these programs are progressing through the ACBSP accreditation process. Candidacy is not accreditation and does not ensure eventual accreditation.

ACBSP accreditation applies specifically to the business programs identified above.

Diploma in Small Business Entrepreneurship

Credits: 36

(This program is not admitting new students.)

Program Description

The Small Business Entrepreneurship diploma is designed to prepare students to perform marketing and management functions associated to owning and operating a small business.

Program Objectives

1. Develop an understanding of working with diverse teams.
2. Demonstrate proficiency in the use of word processing, spreadsheet, and other office software commonly used in business.
3. Use interpersonal communication skills to facilitate effective interactions to work collaboratively.
4. Develop the ability to manage and resolve conflict.
5. Apply effective decision-making process to business situations.
6. Identify the function of marketing in the business development.
7. Apply knowledge of the concepts of supply and demand.
8. Utilizes technology to access, research, analyze, and interpret business information.
9. Prepare business plan, budgets, and forecasts to support the management process.
10. Use ethical reasoning and judgment and act in accordance with legal responsibilities.
11. Demonstrate an understanding of principles of small business management concerning business entities, planning and ethics.
12. Demonstrate an understanding of principles of financing and cash management in the small business.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Diploma in Small Business Entrepreneurship

Notes:

1. This program may be offered in English or Spanish according to demand. COMPLETING A COURSE OR PROGRAM IN A LANGUAGE OTHER THAN ENGLISH MAY REDUCE EMPLOYABILITY WHERE ENGLISH IS REQUIRED.
2. Students must abide with the minimum required hours and policies set by the state and local education agencies for practicum experiences, as applicable.
3. Students must comply with state and local education certification requirements for the diploma program, as applicable.
4. Graduation GPA: 2.00

Bachelor of Business Administration in Accounting

Credits: 124

Program Description

The Bachelor of Business Administration in Accounting exposes students to vital knowledge and skills used in accounting positions. Students will identify various aspects of accounting, such as: accounting principles and theories, elements of intermediate accounting, advanced accounting, cost accounting, tax accounting, auditing, reporting procedures, state analysis, professional standards and ethics, accounting research and specific applications to for-profit companies, government and nonprofit public, among others.

Program Outcomes

1. Register transactions or other events, applying generally accepted accounting principles.
2. Generate financial statements, projections, and other documentation to inform stakeholders of current conditions and future trends.
3. Evaluate functional areas of the business to propose informed solutions to organizational needs.
4. Analyze information from accounting systems to support documented decision-making..
5. Identify, analyze, and synthesize information provided by accounting systems to facilitate decision-making in a documented manner.
6. Apply legal, ethical, cultural, and general accounting principles and IFRS standards of business within a global environment.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Business Administration in Digital Marketing

Credits: 120

Program Description

The Bachelor of Business Administration in Digital Marketing covers the latest trends in online marketing applied to the business world and to the digital transformation of companies. The student will be trained to be able to achieve company objectives by executing a digital marketing plan, in addition to obtaining information about the audience and the industry through market research, maximizing the use of search engines. The historical evolution of the digital world and its different components are studied, including the integration of the most influential social networks today. The student will be able to integrate digital marketing tools as part of the marketing strategies, seeking to learn how to create profitable strategies, from planning, execution, analysis and optimization.

Program Outcomes

1. Demonstrate ethical and moral behavior in the development and creation of a project.
2. Demonstrate a solid understanding of core business principles in the primary areas of digital marketing, web technologies, new media, and management to contribute to the growth of any organization effectively.
3. Apply their knowledge in marketing theories, frameworks, and concepts to research local and global markets to address issues in the digital marketing practice.
4. Demonstrate best practices in the profession by defining and evaluating potential solutions for decision-making using their skills in various tools and resources of digital marketing.
5. Create effective marketing strategies and digital solutions services to meet market needs, sales projections, and consumer expectations based on their behavior in the market.
6. Implement and assess strategies for social media, design tools, evaluate interactive websites' effectiveness, and analyze digital marketing strategies.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Business Administration in Organizational Development

Credits: 120

Program Description

The Bachelor of Business Administration in Organizational Development prepares professionals with the necessary skills to promote the development of public and private organizations from the perspective of the development of human talent. The emphasis is on organizational design integrating internal and external elements that influence the productivity and motivation of the individual and that can impact the operation of the company.

Program Outcomes

1. Analyze the impacts of individual and group behavior on organizational processes and outcomes.
2. Develop a culture of teamwork, respect for others, and promote communication in the organization.
3. Consider functional areas of the business to make informed decisions in future organizational developments or to reach solutions to business needs.
4. Identify the key steps of an organizational development and change process regarding organization, groups, and individuals.
5. Apply legal, ethical, cultural, and economic standards of business within a global environment.
6. Utilize flexible and appropriate learning approaches to enhance, supplement, and evaluate professional development and training for diverse contexts.

Program sequence will be available at the time of enrollment.

Master of Accountancy

Credits: 30

Specific Program Admission Requirements

1. Successfully completed a bachelor's degree in the same area of specialization or completed six (6) college-level credits in financial accounting from an accredited school.
2. If this prerequisite is not met the student must enroll in the course ACCO 500. ACCO 500 will not count for the student's cumulative grade point average.

Program Description

The Master of Accountancy aims to advance knowledge around new accounting and contributions practices, business performance evaluation, tax planning, forensic accounting techniques and procedures, including fraud investigation and analysis of financial statements of companies prepared based on international accounting standards. It also aims to advance knowledge about studying the ethical and legal considerations of the accounting profession, professional judgement, and the independent attitude necessary to exercise and apply the managerial skills necessary to succeed in a competitive business environment.

Program Outcomes

1. Evaluate the accounting implications of an economic event by applying the principles, standards, and practices of financial accounting.
2. Identify and diagnose accounting, auditing, and tax issues using various national and international accounting standards and U.S. tax federal income law.
3. Apply professional accounting regulations and codes of conduct to resolve ethical accounting dilemmas.
4. Evaluate information technology and internal control processes and their role in financial and managerial reporting.
5. Evaluate legal principles and issues within the investigation of accounting fraud.
6. Demonstrate application of information security strategy and cyber forensic investigations.
7. Produce scholarly reports using appropriate academic and research resources.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Master of Business Administration with specialization in Agribusiness

Credits: 42

(This program is not admitting new students.)

Specific Program Admission Requirements

1. Successfully completed a bachelor's degree in the same area of specialization or completed six (6) college-level credits in financial accounting from an accredited school.
2. If this prerequisite is not met the student must enroll in the course ACCO 500. ACCO 500 will not count for the student's cumulative grade point average.

Program Description

This specialization prepares students for the decision making and planning process in the agribusiness industry. It presents theoretical and practical concepts related to the production and consumption of goods. It also provides the strategies to achieve organizational goals according to the global economy standards.

Program Outcomes

1. Develop an understanding for quantitative methods used in managerial decision making.
2. Understand the main forces related to production, distribution and consumption of food and agribusiness products.
3. Apply financial principles to guide the solution of complex decisions.
4. Understand current issues in the environment, food safety, market regulations, international trade and other relevant topics and how they affect the food value chain.
5. Develop skills in human resource management to maintain an effective labor force.
6. Study real world problems and viable solutions in order to develop a method for decision making.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Master of Business Administration with specialization in Finance

Credits: 39

Specific Program Admission Requirements

1. Successfully completed a bachelor's degree in the same area of specialization or completed six (6) college-level credits in financial accounting from an accredited school.
2. If this prerequisite is not met the student must enroll in the course ACCO 500. ACCO 500 will not count for the student's cumulative grade point average.

Program Description

The Master of Business Administration with specialization in Finance will provide students with theoretical and practical concepts of management and in particular entrepreneurial management with a strong emphasis on finance based on global and regional case studies and contexts. This MBA in Finance, in general orientation, will prepare students for roles in financial risk management and in addition provides a choice of corporate finance study, all with a global perspective. Emphasis is given on developing a sound working knowledge of core disciplines and the analytical financial skills necessary to understand and direct the work of other functional and operational specialists in cross commercial or entrepreneurial settings.

Program Outcomes

1. Formulate financial management strategies for business operations in global markets.
2. Evaluate capital investments to minimize risks and maximize rewards for an organization.
3. Apply analytical techniques and models to inform investment decisions.
4. Lead and motivate staff to enhance productivity and overcome obstacles to achieve business objectives.
5. Apply legal, ethical, cultural, and economic standards of business within a global environment.

Program sequence will be available at the time of enrollment.

1. This academic program requires IRB certification. For more information about the process and requirements, please contact the School Dean or refer to the Student Manual of your program, if applicable.
2. *Enrollment in the research seminars requires advisor's approval.
3. **Dissertation courses are one semester courses.
4. *** RESM 873 and RESM 875 are optional courses for those students requiring more time for the dissertation.
5. Graduation GPA: 3.00

Doctor of Business Administration with specialization in Management

Credits: 60

Program Description

The doctoral program in Management is designed to provide a theoretical basis applied to enhance managerial decision making. The program encourages theoretical and applied research on the fundamental aspects of business management. It is designed to prepare students for careers in performance management, teaching and research and consulting. It encourages research and publication of articles focused on solving organizational problems. The student has the opportunity to be exposed to a variety of international management models allowing them an overview of management.

Program Outcomes

1. Employ core management competencies in high-level visioning: planning, organizing, leading, controlling, teamwork, and informed decision-making.
2. Equip leaders to effectively oversee and manage day-to-day operations.
3. Collaborate with key stakeholders, i.e., board of directors, and senior leadership for visioning and strategic planning.
4. Monitor business-based research trends and market conditions to make informed business decisions.
5. Complete a dissertation to contribute to the body of knowledge as part of the research community for its application in the global business environment.
6. Apply legal, ethical, cultural, and economic standards of business within a global environment.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Note: Upon granting of initial accreditation by the ACEN Board of Commissioners, the effective date of initial accreditation is the date on which the nursing program was approved by the ACEN as a candidate program that concluded in the Board of Commissioners granting initial accreditation.

Diploma in Massage Therapy

Credits: 36

Program Description

The Massage Therapy program is designed to prepare students to appropriately evaluate and document clients' conditions and health information, and to identify the therapeutic massage treatments indicated according to the condition presented by the client. In addition, the program teaches general wellness through touch and professional handling of patients, applying manipulation techniques, such as compression, energy touch and friction. Students will develop competency in different types of massage techniques such as aesthetic-spa, medical-spa, energy- holistic, sports, clinical chair massage, among others.

Program Outcomes

1. Apply effective communication techniques for health care professionals in both written and oral formats.
2. Demonstrate an understanding of human anatomy and physiology, kinesiology and pathology as related to the practice of massage therapy.
3. Exhibit an understanding of the principles of the theories of therapeutic massage and demonstrate the proper techniques of massage manipulations.
4. Practice the recommended safety, hygiene and health practices for the massage therapist.
5. Employ the use of hydrotherapy and other allied modalities in use related to massage therapy.
6. Apply ethical practice standards in accordance with the statutes and rules of the Florida Board of Massage Therapy and applicable Florida laws, while demonstrating readiness for the MBLEx (Massage & Bodywork Licensing Examination), and integrating foundational business practices and professional standards into massage therapy practice.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Diploma in Massage Therapy

36 credits

Total Credits		36	

Notes:

1. This program may be offered in English or Spanish according to demand. COMPLETING A COURSE OR PROGRAM IN A LANGUAGE OTHER THAN ENGLISH MAY REDUCE EMPLOYABILITY WHERE ENGLISH IS REQUIRED. AGMU confirms that the information being provided in Spanish is an exact translation of the content offered in courses conducted in English.
2. Students must abide with the minimum required hours and policies set by the state and local education agencies for practicum experiences, as applicable.
3. All courses must be passed with a grade of C or better. Failure to meet this requirement will require you to retake the course of the class, and students will be unable to progress in the course sequence.
4. Students must comply with state and local education certification requirements for the diploma program, as applicable.
5. Students must comply with professional board licensing state and/or national certification requirements, including an exam, a background screening, and/or a drug test to obtain a license and practice the profession.
6. The Massage Therapy Diploma program consists of a didactic component and a lab component. It is mandatory to perform a massage on a classmate; on the other hand, it is voluntary to receive a massage.
7. Graduation GPA: 2.0

Diploma in Medical Assistant

Credits: 36

Program Description

This program is designed to provide students with the knowledge and necessary skills, administrative and clinical, to assist doctors in daily routine with the patients and be a connection between doctor and patient. Prepare the student with the knowledge to provide medical office administrative services and perform clinical duties, including patient intake and care. Includes instruction in basic anatomy, medical terminology and medical office procedures, examination testing and treatment procedures.

Program Outcomes

1. Manage and care for patients as individuals, recognizing and attending to their needs and demonstrating professional characteristics.
2. Perform a variety of clinical procedures in conjunction with and under the order of other clinical staff.
3. Execute administrative duties within the medical practice or other health care setting.
4. Demonstrate fluency with medical terminology in clinical and business settings.
5. Apply ethical, legal, and regulatory knowledge in all settings.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

5. Graduation GPA: 2.00

Diploma in Medical Billing and Coding

Credits: 36

Program Description

The Medical Billing and Coding program is designed to introduce students to the diversity of health care. Students in this program will learn about privacy, confidentiality, electronic medical records, quality management, medical coding and billing. Students will work in a variety of health care settings and be able to perform coding, billing and medical record maintenance.

Program Outcomes

1. Interact effectively and professionally in oral and written communications.
2. Demonstrate positive interpersonal interactions and model professional and ethical behaviors as a part of the health care team.
3. Utilize technology proficiently for administrative tasks in the health care environment, such as patient and practice financial systems, electronic health records, and general office technology.
4. Apply knowledge of medical billing and reimbursement tasks, medical coding criteria, and medical transcription pertinent to the physician practice
5. Exhibit respect openness for diverse perspectives found in the health care industry and demonstrate understanding of cultural differences in both patients and colleagues.
6. Demonstrate fluency with medical terminology in clinical and business settings.
7. Apply ethical, legal, and regulatory knowledge in all settings.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Diploma in Patient Care Technician

Credits: 36

(This program is not admitting new students.)

Program Description

The Patient Care Technician program prepares the student, among other things, patient assistance, geriatric care, and nursing assistance. The content includes but is not limited to taking vital signs, collecting specimens, 12-lead EKG, basic phlebotomy techniques, safety and security procedures, and personal patient care procedures. The curriculum integration of theory and practice prepares the student with the necessary skills and knowledge to pursue an entry-level employment in Health Industry.

Program Outcomes

1. Demonstrate effective therapeutic communication and interaction with residents and their families, addressing their physical, social, and mental needs while providing biological, psychological, and social support.
2. Support residents in achieving and maintaining their maximum level of functional independence.
3. Implement physical comfort and safety measures to ensure resident well-being.
4. Deliver personal patient care and accurately perform essential patient care procedures.
5. Provide comprehensive care tailored to the needs of geriatric patients.
6. Apply infection control principles to maintain a safe and hygienic environment.
7. Assist with rehabilitative and restorative activities to enhance patient recovery and mobility.
8. Perform patient care procedures following established guidelines and best practices.
9. Demonstrate legal and ethical responsibilities specific to the role of a home health aide.
10. Exhibit strong organizational skills and teamwork abilities in a clinical setting to optimize patient care.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Diploma in Pharmacy Technician

Credits: 40

Program Description

The Non-Degree Program in Pharmacy Technician enables the student to assist the pharmacist in the dispatch of medication and become a valuable asset of a team. The program aspires to develop and prepare the student with the knowledge and skills to perform at a high level of competence. The student will be able to perform in various pharmacy environments such as retail, hospital, specialty, infusion, compounding, or home healthcare settings.

Program Outcomes

1. Accurately implement physician orders by preparing, labeling and packaging medications while working under the supervision of a licensed pharmacist.
2. Demonstrate proficiency in assisting pharmacists in preparing, storing, and distributing medication products appropriate to a variety of pharmacy settings.
3. Perform accurate pharmacy calculations and proficiently apply computer skills, record keeping and billing in adherence to applicable industry regulations.
4. Apply verbal, nonverbal, and written communication principles and skills effectively and compassionately within a team setting within the pharmacy environment.
5. Uphold legal and ethical standards and adhere to principles of patient confidentiality within the health care and community environment as defined by HIPAA and appropriate state law and regulation.
6. Distinguish the anatomy and physiology of the different systems and prescriptions to treat common conditions.
7. Maintain industry standards of quality control and safety principles in the workplace.
8. Demonstrate professionalism through acceptable attitude, organization and time management skills, and attire.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Diploma in Phlebotomy Technician

Credits: 30

Program Description

The Phlebotomy Technician diploma prepares the student, under the supervision of physicians and other health care professionals, to draw blood samples from patients using a variety of intrusive procedures. Includes instruction in basic vascular anatomy and physiology, blood physiology, skin puncture techniques, venipuncture, venous specimen collection and handling, safety and sanitation procedures, and applicable standards and regulations. Also, includes instruction in medical ethics, medical terminology anatomy and physiology, EKG and professional conduct in a health care setting.

Program Outcomes

1. Demonstrate safe and effective use of equipment and supplies used for blood collection, specimen transport, and ECG.
2. Demonstrate proficiency in all areas of phlebotomy related to pre-analytical processes of laboratory testing, skill with ECGs, recognizing and adhering to infection control, and safety policies and procedures in health care.
3. Apply verbal, nonverbal, and written communication principles and skills effectively and compassionately within a team setting.
4. Uphold legal and ethical standards and adhere to principles of patient confidentiality within the health care and community environment as defined by HIPAA and appropriate state law and regulation.
5. Maintain industry standards of quality control and safety principles in the workplace.
6. Demonstrate professionalism through acceptable attitude, organization and time management skills, and attire.

Associate of Science in Health Services Management

Credits: 60

Program Description

The Associate of Science in Health Services Management prepares students in the administrative aspects of healthcare. The program will deliver knowledge along with core courses in health services management, accounting, and human resources, and an introduction to public health education.

Program Outcomes

The student will:

1. Demonstrate foundational knowledge of core health services concepts.
2. Apply principles of health services management, service planning, and public health to support effective healthcare delivery.
3. Communicate clearly and professionally with patients, families, and healthcare professionals across diverse settings.
4. Employ critical thinking and problem-solving skills to address challenges in healthcare environments.
5. Identify and integrate ethical, legal, and cultural considerations into the delivery of health services.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability.

Associate of Applied Science in Pharmacy Technician

Credits: 64

Program Description

The Program of Associate Applied Science (AAS) in Pharmacy Technician aspires to develop students with the knowledge and skills to perform as an important component of the teamwork of a pharmacy. The students will have the opportunity to acquire knowledge through didactic courses directed to know the most important aspects of this field. The program will also provide the opportunity to develop the techniques and skills that will enable the student to work with a high level of competence. The Pharmacy Technician is the professional that helps the Pharmacist to dispatch medication prescribed by the doctor, under the supervision of the authorized Pharmacist. The auxiliary is qualified to work in the hospital pharmacy, community pharmacy, as well as any other licensed distributor of pharmaceutical products. The dispatch of meds implies a series of activities in sequence that consists among others in taking care of the patient; receive and interpret the received prescription; select the product; as well as the appropriate delivery package; to verify dose; to prepare simple solutions, ointments and other pharmaceutical preparations; to carry out suitable labeling using computerized systems and computation of prices.

Program Outcomes

1. Accurately implement physician orders by preparing, labeling and packaging medications while working under the supervision of a licensed pharmacist.
2. Demonstrate proficiency in assisting pharmacists in preparing, storing, and distributing medication products appropriate to a variety of pharmacy settings.
3. Perform accurate pharmacy calculations and proficiently apply computer skills, record keeping and billing in adherence to applicable industry regulations.
4. Apply verbal, nonverbal, and written communication principles and skills effectively and compassionately within a team setting.
5. Uphold legal and ethical standards and adhere to principles of patient confidentiality within the health care and community environment as defined by HIPAA and appropriate state law and regulation.
6. Distinguish the anatomy and physiology of the different systems and prescriptions to treat common conditions.
7. Maintain industry standards of quality control and safety principles in the workplace.
8. Demonstrate professionalism through acceptable attitude, organization and time management skills, and attire.
9. Students will also be prepared for the national pharmacy technician certification exam as well as licensure required by state of Florida regulations.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. This program may be offered in English or Bilingual mode (English-Spanish), according to demand. COMPLETING A COURSE OR PROGRAM IN A LANGUAGE OTHER THAN ENGLISH MAY REDUCE EMPLOYABILITY WHERE ENGLISH IS REQUIRED.
2. Students must abide with the minimum required hours and policies set by the state and local education agencies for practicum experiences.
3. Students must comply with state and local education certification requirements for the degree program, as applicable.
4. All courses must be passed with a grade of C or better. Failure to meet this requirement will require you to retake the course of the class, and students will be unable to progress in the course sequence.
5. ** The term before enrolling in this course, the student shall receive academic counseling from the facilitator in charge of the field experience process to identify a pharmacy to complete the field experience.
6. Graduation GPA: 2.00

Associate of Science in Nursing

72 credits

Specific Program Admission Requirements

The ASN program is a competitive program. The nursing program employs a holistic evaluation process that includes GPA, Pre-Screening Questionnaire, Interview and Writing Sample.

1. Students must first meet all admission requirements of Ana G. Méndez University.
2. Hold a high school diploma or an equivalent.
3. Submit an official high school transcript with the application for admission.
4. Minimum GPA of 3.0
5. Interview to include a writing sample (in person)

Program Description

The Associate of Science in Nursing degree prepares the students to meet the requirements for the NCLEX-RN examination by the National Council of State Board of Nursing (NCSBN) and meets the standards of the Florida Board of Nursing. This program's mission is to contribute to the health and quality of life of a multicultural society, through academic excellence and offerings that meet the needs of society in general, thus expanding students' personal, professional, ethical, and social growth. Its commitment is to excellence in education, integration of technology, development of specific skills, and the use of information systems and teamwork, through an interdisciplinary health teamwork approach. It promotes the development of the teaching-learning process through critical thinking, clinical judgement, decision making, problem-solving, and collaborative teamwork. These skills are practiced within the context of the ethical/legal aspects of professional relations, and the value of life, health, and dignity of the whole person. The curriculum provides 765 hands-on laboratory, clinical, and simulation hours.

Program Outcomes

The student will:

1. Apply the Nursing Process and clinical reasoning to prioritize patient care.
2. Promote a safe and effective care environment.
3. Collaborate in interprofessional teams to promote, maintain, and restore patient health.
4. Provide holistic, culturally competent, nursing care that supports the emotional, mental, and social well-being of the patient.
5. Use evidence-based practice to manage physiological integrity of the patient across the lifespan.
6. Use healthcare technology to promote patient health and healing.
7. Demonstrate professional and ethical behavior.

Programmatic Academic Achievement Requirements

1. Students must maintain a cumulative GPA of 3.00 in prerequisite courses to progress to nursing courses.
2. Graduation GPA: 2.00

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

TOTAL CREDITS		72	

Notes:

1. The ASN (also commonly known as ADN) program has 72 credits and leads to an Associate of Science in Nursing degree. This program is approved by the Florida Board of Nursing.
2. To be eligible for licensure as a Registered Nurse, graduates must successfully pass the National Council Licensure Examination (NCLEX-RN).
3. Students in the ADN program are required to participate in clinical rotations in external health care facilities. Before placement in a clinical rotation, all students must submit to a criminal background check and drug testing and be in compliance with School of Nursing background check and drug testing policies. Clinical sites may have their own policies to which students must also comply.
4. The HESI Admission Assessment is administered in FYNE 100. Students have two attempts to pass the exam. Students who do not achieve the minimum score of 75% may not progress to any NRSE course. Students must achieve a minimum GPA of 3.0 in prerequisite courses to progress to any NRSE course.
5. Graduation GPA: 2.0

Associate of Science in Office Systems with Medical Billing

Credits: 64

Program Description

The Associate Degree in Office Systems with Medical Billing will enable students to acquire the knowledge and skills to work in an environment of automated medical office. It will specialize in the use of medical terminology, procedures and medical office management and processes to perform medical billing transactions efficiently.

Program Outcomes

1. Interact effectively and professionally in oral and written communications.
2. Demonstrate positive interpersonal interactions and model professional and ethical behaviors as a part of the health care team.
3. Utilize technology proficiently for administrative tasks in the health care environment, such as patient and practice financial systems, electronic health records, and general office technology.
4. Apply knowledge of health care finance, medical billing and reimbursement, medical coding criteria, and medical transcription pertinent to the outpatient health care setting
5. Exhibit respect and openness for diverse perspectives found in the health care industry and demonstrate understanding of cultural differences in both patients and colleagues.
6. Demonstrate fluency with medical terminology in clinical and business settings.
7. Apply ethical, legal, and regulatory knowledge in all settings.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Science in Community Health

Credits: 120

(This program is not admitting new students.)

Program Description

The Community Health Bachelor's program will prepare students for careers in a variety of community and public health settings, including governmental and non-profit health agencies, health care facilities, worksite wellness programs, program research and development, and schools. Graduates will be able to promote healthy lifestyles and wellness through informing and educating individuals and communities about behaviors that promote healthy living and prevent injury, disease, and illness; plan, implement and evaluate health programs; develop effective and culturally competent health promotion and disease prevention strategies; apply statistics and research methods to population health and community health program evaluations, and advocate for community health initiatives at local, state and federal levels.

The curriculum includes coursework addressing the seven CHES competencies as identified by the National Commission for Health Education Credentialing (NCHEC) and the five core areas of public health as identified by Council on Education for Public Health (CEPH).

Knowledge and skills in the BSCH program include comprehension of basic community health content related to health care systems; public health; health disparities; health education resources; communications and instructional methods; health and wellness promotion; disease and injury prevention; behavioral health education; epidemiology; trauma; community health research; strategic management of health programs, cultural competency, and community health issues and advocacy.

Program Outcomes

Outcomes based on current program.

1. Develop Community Health professionals for successful employment and future graduate studies.
2. Employ a high degree of professionalism as a supporting member of the health interdisciplinary team.
3. Apply practical knowledge in the workplace and are willing to develop skills continuously throughout their health careers.
4. Utilize critical thinking and problem-solving skills to respond to society's demand for human resources with skills in community health.
5. Prepare the student's integral development by providing learning experiences oriented towards developing cognitive, affective, and psychomotor skills, according to the description of the program of study.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Science in Health Services Management

Credits: 120

Program Description

The Bachelor of Science in Health Services Management prepares the students to perform successfully in primary and intermediate management in health service organizations. What distinguishes these professionals are their knowledge in the field of public health, in the field of management and integration of both fields. In this way, it will ensure the balance between the provision of public health services and an effective administration.

Program Outcomes

This program is focused on business and public health knowledge and is missing much specific health care business acumen. It needs serious revision – inclusion of more health care specific business content and less general business and public health focused courses.

1. Describe nature of healthcare services, including the demographic, social, political, economic, technological, legal, ethical, professional, and historic factors that influence the present and future direction of healthcare.
2. Exhibit appropriate professional behaviors and leadership skills for careers in health care.
3. Apply ethical, legal, and regulatory knowledge in all settings.
4. Monitor trends in public health as well as the traditional health care industry at both the local and national levels to effectively respond in their organization.
5. Utilize basic skills in healthcare financial management, computer literacy, operations analysis, management information systems, statistics, and research methods.
6. Demonstrate fluency with medical terminology in clinical and business settings.
7. Apply knowledge of operations and skill in healthcare organization change, design, performance, strategic planning, marketing, problem-solving, decision-making, and leadership.
8. Use data and evidence-based management practices to improve decision-making and organizational performance to provide the highest quality of patient care and equitable access to services.
9. Apply and evaluate the efficacy of information technology in improving patient care, patient outcomes and creating a safe patient care environment.
10. Provide effective financial management for healthcare organizations.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Science in Nursing (RN to BSN)

Credits: 120

Specific Program Admission Requirements

1. Students must provide a conferred Associate of Science in Nursing degree from an Accredited College with a GPA of 2.75 on a scale of 4.0 and the official transcripts.
2. Students must provide documentation of a current, unencumbered Registered Nurse license from Florida, Puerto Rico or a Nursing Compact License state. The license must be verified.
3. Students must provide a CV/resume.
4. Students must be interviewed by the Director of Nursing or their designated person.
5. Students will receive 30 credits once their RN license is verified.

Program Description

The Bachelor of Science in Nursing (RN to BSN) aims to offer students with an Associate Degree in Nursing the opportunity to meet and obtain the requirements for a bachelor's degree. The courses are distributed between general education, professional core, and major.

End-of-Program Student Learning Outcomes

1. Demonstrate critical thinking and problem-solving skills as applied to client care.
2. Integrate an understanding of healthcare organizational systems and leadership to improve client care.
3. Demonstrate application of evidence-based practice to manage physiological integrity of the client across the lifespan.
4. Use healthcare technology to promote client health and healing.
5. Apply knowledge of healthcare and regulatory policies to improve healthcare quality and client outcomes.
6. Communicate effectively and collaboratively within inter-disciplinary teams to promote high quality and safe client care.
7. Promote health and disease prevention for clients and communities, with sensitivity to individual and cultural influences.
8. Demonstrate professional values that promote human dignity, social justice, and client autonomy.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Master of Health Administration with specialization in Health Services Management and Evaluation

Credits: 42

Program Description

The Master of Health Administration with specialization in Health Services Management and Evaluation provides the integrated development of a diverse student population through critical and creative thinking, the construction of knowledge and its application. The graduate of the MHA Program is a professional academically prepared to perform successfully in middle management in health care organizations. What distinguishes this program, and these professionals are their knowledge and holistic vision in the field, management, evaluation of services, quality of service and their ability to make healthy choices in the organization. In this way, it will ensure to maintain the proper balance between the provision of services, the management and the fiscal side.

Program Outcomes

1. Develop strategies and align organizational design to support and achieve an organization's mission and vision.
2. Manage and lead diverse people, teams, and organizations and communicate effectively with diverse stakeholders to build inclusive healthcare institutions.
3. Use data and evidence-based management practices to improve decision-making and organizational performance to provide the highest quality of patient care and equitable access to services.
4. Develop and manage innovative solutions to improve organizational performance and population health.
5. Influence and respond to policies that promote optimal performance of the US healthcare system and healthcare organizations, based on understanding and analysis of the system's history, organization, and financing.
6. Provide effective financial management for healthcare organizations.
7. Manage and behave legally and ethically in a complex, highly regulated healthcare environment.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

TOTAL CREDITS		42	

Notes:

1. Graduation GPA: 3.00
2. The Master of Health Administration with specialization in Health Services Management and Evaluation program is designed to provide students with advanced knowledge and skills in healthcare administration and evaluation. This program does not lead to professional licensure and is not intended to prepare students for any state or national licensure or certification.
3. Career opportunities may vary depending on prior professional experience, education, and the specific employer's requirements.

Master of Science in Nursing in Family Nurse Practitioner

Credits: 51

Specific Program Admission Requirements

Admissions to the Family Nurse Practitioner is holistic including work and life experience as well as academic performance.

1. Bachelor of Science in Nursing from an accredited institution
2. Preferential admissions consideration is given to applicants with a 3.0 or higher.
3. Basic statistics course at the baccalaureate level or higher (3 credits).
4. Active, unencumbered license to practice as a registered nurse in the state of Florida.
5. Current Resume or CV
6. Complete an Interview process with the Director of Nursing or their representative.

Program Description

The Family Nurse Practitioner (FNP) track prepares registered nurses for leadership in primary care to families and individuals of all ages. With a focus on delivering high-quality, patient-centered primary care, the program offers both didactic and clinical experiences that prepare nurse practitioners to care for the physical, mental, emotional, social, and spiritual health of patients, families, and communities. This program prepares students to sit for national certification as family nurse practitioners.

End-of-Program Student Learning Outcomes

1. Synthesize theoretical and empirical knowledge from sciences, technology, and nursing, as a basis for nursing scholarship.
2. Develop personal, professional, and leadership skills that support interprofessional practice.
3. Apply evidence-based practice and clinical reasoning to provide individualized, culturally competent patient-centered care.
4. Integrate technology to promote population health.
5. Apply quality and safety strategies to systems to promote health outcomes.

Programmatic Academic Achievement Requirements

1. Students must maintain a cumulative GPA of 3.0.
2. A minimum grade of B is required to pass courses with the NRSE prefix.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. Students must complete a minimum of 750 supervised direct patient care hours.
2. To obtain an APRN license, graduates must pass a national certification exam. Graduates of the program are eligible to sit for the Family Nurse Practitioner Certification Exam.
3. Graduation GPA: 3.00

Doctor of Nursing Practice

Credits: 39

Specific Program Admission Requirements

Prospective D.N.P. students are selected for admission based on application content, academic record, curriculum of completed required courses, professional nursing licensure, and evaluation forms. Individual student transcripts and writing samples are evaluated by select faculty members, the program director, and the associate director of nursing.

Admission to the DNP program requires:

1. A master's degree in nursing from a regionally, nationally or internationally accredited school.
2. A minimum master's degree GPA of 3.30 on a 4.0 scale.
3. A current, active and unencumbered RN License issued by the United States or territories.
4. Two reference forms from individuals other than relatives (suggested sources include professors, academic advisers, and professional nursing references).
5. Submit a writing sample (use APA 7th edition formatting, including headings for each section). Include the following information in your statement: a. Problem/Issue Discuss a problem or issue in your professional practice setting that needs to be addressed from a DNP perspective. (250 words minimum). b. Applicant's Goals Discuss your personal and professional goals related to the D.N.P. (250 words minimum).
6. An interview with a faculty member in the department as designated by the Director of Nursing.
7. A curriculum vitae (CV) or resume.
8. Official documentation of all supervised, postbaccalaureate practice hours.

Program Description

A Doctor of Nursing Practice (DNP) program is designed to prepare experts in nursing practice. It is the pinnacle of practice-focused nursing degrees, building upon master's programs by providing an educational foundation in quality improvement, evidence-based practice, and systems leadership, among others. According to the American Association of Colleges of Nursing (AACN), DNP nurses possess a blend of clinical, leadership, economic, and organizational skills that puts them in a unique position to deftly critique nursing practice and design programs of care delivery that are economically feasible, locally acceptable, and that significantly impact healthcare outcomes. The DNP nurses are prepared to perform nursing interventions that influence healthcare outcomes for individuals or populations by providing direct patient care, managing the care of patients and patient populations, administrating in nursing and healthcare organizations and developing and implementing health policy. The program consists of a 1,000-hour clinical component for students with an advanced practice license and 750 hour clinical component for students with a basic RN license. At least 500 hours must be completed during the program. A GAP analysis will be performed for all students to determine how many hours from the master's level may be carried over to the DNP program.

End-of-Program Student Learning Outcomes

1. Use science-based theories and concepts and national practice guidelines and standards to provide high quality health care.
2. Lead change and promote innovation in organizational and health systems for quality improvement.

3. Apply clinical scholarship in the generation, application and dissemination of research findings to support evidence-based practice.
4. Use information technology to improve and transform health care.
5. Develop and implement health care policies for advocacy in health care.
6. Demonstrate leadership and interprofessional collaboration to improve nursing practice and patient outcomes.
7. Utilize the advanced nursing practice knowledge for clinical prevention and population health to improve the Nation's health.
8. Demonstrate advanced levels of clinical judgement, systems thinking and accountability in the delivery of health care.

Programmatic Academic Achievement Requirements

1. Students must maintain a cumulative GPA of 3.0.
2. A minimum grade of B is required to pass all courses.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Associate of Science in Forensic Investigation

Credits: 63

Program Description

The Associate Degree in Forensic Investigation introduces forensic investigation from a theoretical and practical perspective. Students will be prepared to apply techniques, methods, procedures, basic knowledge to perform necessary skills as a forensic investigator.

Program Outcomes

1. Demonstrate moral and ethical professional behavior in issues surrounding crime and forensic investigation.
2. Apply the principles and processes of criminal and constitutional law, criminology theory and concepts, knowledge of the functions and components of the criminal justice system, and current issues to criminal justice operations and the forensic studies.
3. Apply knowledge of criminal statutes, rules of criminal procedure and rules of evidence, which all can impact one's capacity to serve as an expert witness in a court of law.
4. Demonstrate proficiency in communicating effectively in a variety of formats, including verbal, written, and symbolic channels, relevant to forensic investigation, such as interviews and expressing opinion on the evidence to peers, and presentations in the judicial system.
5. Demonstrate mastery in concepts and evidence collection techniques used in subfields of forensic studies based on their ability to read, analyze, interpret, and critically evaluate primary literature; design experiments or conduct independent investigation to test ideas and hypotheses; and interpret data through statistical and graphical packages.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Associate of Science in Paralegal Studies

Credits: 65

Program Description

This program is designed to prepare students to work in the legal field for law firms, banks, corporations, and government agencies in the performance of delegated, substantive legal services under the supervision of a licensed attorney. Students receive instruction in the substantive and procedural law necessary to function in the legal environment under the direction and supervision of attorneys in areas such as civil litigation, real property, legal research and writing, business organizations, and legal technology. Students will understand the ethical framework within which they will work and will be able to analyze and communicate effectively in these areas. Instruction stresses practical applications. Note: Paralegals cannot give legal advice, represent a client, or provide legal services directly to the public, except as permitted by law.

Program Outcomes

1. Demonstrate a solid knowledge and understanding of the paralegal profession and the basic substantive areas of the law as well as its role within the legal community.
2. Demonstrate knowledge of the ethical rules and professional standards applied to various situations typically encountered by a paralegal.
3. Demonstrate oral and interpersonal skills when interacting with clients, fellow employees, members of the legal community and the public.
4. Demonstrate effective oral and written communication skills for transactions with clients, attorneys, other paralegal professionals, court personnel, and third parties.
5. Apply knowledge and comprehension of all phases of trial practices and procedures by researching and competently draft legal documents applying legal research and computer and writing skills.
6. Conduct basic legal research and analysis, including identifying and applying key facts, identifying, and describing the legal issue/issues of a case, finding the law that applies to a client's problem, and determining how the law applies to a problem depending on the legal scenario presented.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Arts in Criminal Justice

Credits: 120

Program Description

This program usher students to academic and professional environments related to the Criminal Justice field. The Bachelor of Arts in Criminal Justice provides students a detailed view of the field with specific emphasis on the legal, forensic, and academic aspects of the discipline. Students who graduate from this program can pursue professional positions in the public or private sector or pursue a graduate degree in law or in the social sciences. The program is structured to address current topics in the field such as multiculturalism, alternate sentencing methods, rehabilitation processes, and cybercrimes, among others.

Program Outcomes

1. Demonstrate critical thinking, ethical decision making, and an understanding of diversity as it pertains to crime, offenders, victims, and the criminal justice system.
2. Apply criminological theory, research methods, and appropriate technology to assess, evaluate, and address issues in the practice of criminology and criminal justice.
3. Apply critical thinking to analyze and comprehend the cause of crime and the different alternatives to tackle these causes.
4. Demonstrate a critical understanding of diversity and inequality as manifested in the criminal justice system locally, nationally, and globally.
5. Develop a fundamental commitment to ethical analysis, research, and practice and will demonstrate the ability to apply these principles to work within criminology, criminal justice, and related fields.
6. Demonstrate essential qualifications and skills for employment in criminology, criminal justice, and related occupations that include the mastery of core criminology and justice principles and techniques and the ability to think critically and to speak and write effectively within the field.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Arts in Elementary Education

Credits: 126

(This program is not admitting new students.)

Specific Program Admission Requirements

1. Minimum GPA 2.50

Program Description

The B.A. in Elementary Education prepares elementary teachers as generalists with knowledge in literacy, math, science, and social studies. The program provides foundational training in educational theory, practice and techniques to build safe and productive learning environments. The program aims to prepare reflective, ethical and responsive teachers who are committed to ensure every student has access to opportunities to learn. Every course, field-based observation and internship is intended to build the student's skills and competencies to be an effective teacher.

This degree offers a path to a bachelor's degree with a track to certification or non-certification track.

Program Outcomes

1. Apply developmentally appropriate instruction, strategies and assessment understanding and recognizing that learning and development vary individually with and across cognitive, linguistic, social, emotion and physical areas.
2. Create an inclusive learning environment that enables each learner to meet high standards, understanding individual differences and diverse cultures and communities.
3. Support individual and collaborative learning, positive social interactions, active engagement, and self-motivation for each learner.
4. Apply deep understanding of their content areas and draw upon content knowledge to lead students to access information and apply knowledge in real world settings to assure student mastery of content.
5. Integrate assessment, planning and instructional strategies to gain access to data information that can be used to provide immediate feedback to reinforce student learning and/or modify instruction.
6. Engage in meaningful and intensive professional learning regularly to examine their practice through ongoing development, self-reflection, and collaboration.
7. Demonstrate leadership by modeling ethical behavior and positive change in practice and profession.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. The program requires clinical field observations that are integrated throughout the program for a cumulative of hours prior to Internship I and II. The program includes two semesters, Internship I and II, in an elementary school setting, full-time providing students a supervised field experience in which they can demonstrate their skills, knowledge and pedagogical practices. The student must refer to the Internship Handbook available from the academic director for specific requirements and procedures.
2. If the student is interested in opportunities for employment in state public schools, state certification is required. Students are required to demonstrate mastery of the necessary basic skills, content, and pedagogical knowledge by obtaining qualifying scores on all state examinations required for professional (standard) certification.
3. **If student is seeking professional (standard) level certification upon graduation, all certification examinations must be passed, practicum and program degree must be completed to apply to the designated state certification agency prior to practicum or graduation. If any of the aforementioned requirements are not met prior to practicum or graduation, student will acknowledge professional (standard) certification will not be met and may have to pursue a conditional/temporary or alternative certification to meet professional (standard) certification requirements.
4. The Elementary Education program meets the educational eligibility criteria for certification in the state in which the program is offered. Graduates of the program who wish to teach in another U.S. state or country may require additional eligibility criteria to qualify for licensure and/or certification in those locations. We are unable to confirm the licensure and/or certification requirements of other states or countries. Therefore, if you intend to pursue such credentialing in another state or elsewhere, it is advised that you to contact the applicable state or country credentialing authority to familiarize yourself with its specific requirements and determine if this program meets the applicable eligibility criteria.
5. Graduation GPA: 2.00

Bachelor of Arts in Liberal Arts

Credits: 120

Specific Program Admission Requirements

1. Satisfactory completion of 30 or more transferable credits.
2. A minimum GPA of 2.00 on a scale of 4.00.
3. Submit official transcript of credits from the institutions attended.

Program Description

The Bachelor of Arts in Liberal Arts is designed for students with previous learning experience at undergraduate level at other Institutions. This program provides students with the opportunity to complete a bachelor's degree and prepare them to compete for entry level positions in a specific area or discipline or apply for a graduate program. The students must choose one of the five major tracks: Psychology, Communications, Business Administration, Education, Biology or Religion. This program is not designed to meet licensure requirements.

Program Outcomes

1. Complete a traditional bachelor's degree.
2. Compete for entry level positions in a specific area or discipline or apply for a graduate program.
3. Identify global issues from the social, psychological, humanistic, economic and political perspectives.
4. Analyze the biological, behavioral and social aspects of human beings.
5. Explain the multi-disciplinary nature of learning and problem solving.
6. Explain the relationship and contribution of the arts and the humanities in the development of society.
7. Apply ethical values and principles as a responsible citizen.
8. Discuss the importance of the conservation of nature and the environment.
9. Value human rights, tolerance, diversity, and individual and cultural differences.
10. Develop critical thinking skills to solve problems.
11. Communicate effectively in oral and written English and functionally in a second language as language learners.
12. Apply mathematical, reasoning skills and scientific inquiry methods.
13. Achieve basic literacy in technology.

Programmatic Academic Achievement Requirements

1. A minimum of 120 credits will be required for graduation.
2. To earn a B.A. major in Liberal Arts degree, the student must obtain a minimum grade of C.
3. Approve the General Education capstone course.
4. Approve the Program capstone course.
5. The overall GPA graduation required is 2.00 on a scale of 4.00.
6. The maximum credits to transfer are subject to the evaluation of an official academic record, except for the two capstone courses, that must be taken in the institution.

Bachelor of Arts in Pre-Kindergarten/Primary Education

Credits: 130

(This program is not admitting new students.)

Specific Program Admission Requirements

1. Minimum GPA 2.50

Program Description

The Bachelor of Arts in Pre-Kindergarten/Primary Education prepares students to meet the standard knowledge and skills that are specified for teacher preparation, including content specific standards, teacher standards and pedagogical standards of effective teaching in Pre-K through 3rd grade and impact on student achievement.

Courses and experiences include instruction, observation, and practice to demonstrate competency in the following areas:

1. Content knowledge and expertise
2. Instructional design, planning, and delivery
3. Learning environment and management
4. Knowledge of students and student learning for instructional delivery and facilitation
5. Assessment to engage, monitor and inform instructional decision-making
6. Professional practices, responsibilities and conduct

Program Outcomes

1. Use developmentally, culturally and linguistically appropriate and effective instruction, strategies and assessment approaches to enhance each learner's learning and development across all content areas.
2. Create inclusive, safe and secure environments that enables each learner thrive physically, cognitively, linguistically, socially, and emotionally.
3. Implement a curriculum and personalized goals that promote learning and development for each learner in each of the following areas: social, emotional, physical, language and cognitive.
4. Apply deep understanding of their content areas and draw upon content knowledge to lead students to access information and apply knowledge in real world settings to assure student mastery of content.
5. Use systematic, formal and informal assessment approaches to inform and tailor instruction that responds to each learner's learning and development strengths and needs.
6. Engage in meaningful professional learning and reflection on practice that supports to promote learner's learning and development and to support families' diverse needs and interests.
7. Demonstrate leadership by modeling ethical behavior and positive change in practice and profession.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. The program requires clinical field observations that are integrated throughout the program for a cumulative of hours prior to Internship I and II. The program includes two semesters, Internship I and II, in Pre-K-3 grade setting, full-time providing students a supervised field experience in which they can demonstrate their skills, knowledge and pedagogical practices. The student must refer to the Internship Handbook available from the academic director for specific requirements and procedures.
2. If student is seeking professional (standard) level certification upon graduation, all certification examinations must be passed, practicum and program degree must be completed to apply to the designated state certification agency prior to practicum or graduation. If any of the aforementioned requirements are not met prior to practicum or graduation, student will acknowledge professional (standard) certification will not be met and may have to pursue a conditional or temporary certification while completing certification professional requirements.
3. The Pre-Kindergarten/Primary Education program meets the educational eligibility criteria for certification in the state in which the program is offered. Graduates of the program who wish to teach in another U.S. state or country may require additional eligibility criteria to qualify for licensure and/or certification in those locations. We are unable to confirm the licensure and/or certification requirements of other states or countries. Therefore, if you intend to pursue such credentialing in another state or elsewhere, it is advised that you to contact the applicable state or country credentialing authority to familiarize yourself with its specific requirements and determine if this program meets the applicable eligibility criteria.
4. Graduation GPA: 2.00

Bachelor of Arts in Public Relations and Advertising

Credits: 126

Program Description

This program prepares students to work in the field of public relations and advertising, both in public and private agencies and / or in their own companies. Students can work on developing and executing strategies in these fields.

Program Outcomes

1. Demonstrate understanding of the theories, history, and role of professionals and institutions in shaping communications, public relations, and advertising, as well as mastery of the principles and laws of freedom of expression and of the press.
2. Demonstrate understanding and knowledge on the main concepts of gender, race, ethnic origin, sexual orientation, and other forms of diversity of people and cultures, and the impact of public relations and advertising in an increasingly diverse society and global.
3. Apply critical thinking in a creative, independent, and ethical way on the search of truth accuracy, fairness, and diversity, using professional, ethical principles, investigating, and evaluating information, and using appropriate public relations and advertising methods.
4. Communicate effectively, correctly, and clearly, in oral and writing, in forms and styles appropriate to public relations and advertising, the institutions, audiences, and purposes they serve.
5. Demonstrate critical skills in evaluating their own work and that of others, ensuring accuracy, fairness, clarity, appropriate style, and grammatical correctness for proper delivery to the targeted audience.
6. Apply creativity and appropriate technical skills, and knowledge in concepts, theories, resources, tools, and a variety of technologies in using and presenting images, sounds and information within a communication, public relations, and advertising.
7. Evaluate information by using appropriate communication methods, and the use of research, basic numerical and statistical concepts, in the communication fields and its related professions.
8. Apply advertising concepts and public relations tactical materials in a Public Relations campaign using variety of traditional media resources and innovative digital tools.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Science in Criminology

Credits: 120

Program Description

The Bachelor of Science in Criminology allows students to understand the causes of criminality, how society reacts to it and the interrelations between law and society. It includes learning from a humanistic and interdisciplinary approach, theories of crime and methods used to study crime, law and society. This program provides students with a broad perspective on the complex relationships between legal, social, political, historical and psychological influences that affect criminality, justice and legal processes.

Program Outcomes

1. Demonstrate a critical understanding of diversity and inequality as manifested in the criminal justice system.
2. Apply criminological theory, research methods, and appropriate technology to assess, evaluate, and address issues in the practice of criminology and criminal justice.
3. Develop a fundamental commitment to ethical analysis, research, and practice and will demonstrate the ability to apply these principles to work within criminology, criminal justice, and related fields.
4. Apply knowledge in the scientific method applied to criminal investigation and in the use of techniques of locating and interpreting information.
5. Analyze and differentiate the rules of evidence included in principles of criminal law and their application in the decision process of the criminal cases.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Science in Psychology

Credits: 120

Program Description

The Bachelor of Science in Psychology prepares graduates to continue graduate studies in all areas of professional practice in psychology (e.g., counseling psychology, clinical psychology, school psychology, industrial /organizational psychology, international psychology). In addition, students will acquire knowledge and skills that will allow them to perform research, prevention, and the provision of basic services in mental health care.

Program Outcomes

Upon completion of a Bachelor of Science in Psychology, students will be able to:

1. Describe major concepts, principles, theoretical perspectives, empirical findings, and applications of psychology.
2. Describe and apply basic research methods in psychology, including research design, data analysis, and interpretation, with consideration for sociocultural factors.
3. Engage in critical and innovative thinking and scientific reasoning to interpret psychological phenomena and solve problems.
4. Apply psychological principles and ethics to personal, social, and organizational issues in practice and research.
5. Demonstrate the values of psychology through behaviors that build community at local, national, and global levels.
6. Understand and respect individual and group differences both domestically and globally and communicate effectively with diverse individuals and groups in multiple formats.
7. Engage in self-reflection and self-regulation to continuously refine professional behavior and practice.
8. Demonstrate information literacy in psychology and the ability to use technology for many purposes.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Master of Education with specialization in Instructional Design and Technological Integration with E-Learning

Credits: 39

Program Description

The Master of Education with specialization in Instructional Design and Technological Integration with E-Learning is designed for students to learn the various models of instructional design and apply them in their work scenario, integrating technology, multimedia, e-learning and distance education.

Program Outcomes

1. Conduct needs assessment to design appropriate and targeted instructional design solutions and content.
2. Use an appropriate instructional design methodology to plan and develop instruction, interventions and assessment.
3. Leverage appropriate tools to develop instruction, interventions and assessment.
4. Design an evaluation process to provide data to inform revision of instructional design.
5. Apply leadership and organizational skills to manage instructional design functions, projects, partnerships and collaborative relationships.
6. Apply research and theory, data collection, analysis skills and ethical and legal practices to instructional design projects.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Master of Education with specialization in Social and Community Services

Credits: 36

Program Description

The program provides preparation and development for professionals to advise individuals in post-secondary institutions, businesses, and community organizations in the advancement of their education, professional development and career planning. The program provides graduates with the background in principles, theories, and practice of advising and general counseling. Graduates from this program will be able to interact and establish relationships, allowing them to work in situations that require skills in effective communication, career development, conflict management, problem solving and decision-making. Graduates will have the opportunity to apply interdisciplinary knowledge about human needs and social, economic, and cultural impacts to advise individuals in their life transitions in educational, profit, non-profit, and government settings. The graduates will be prepared to collaborate with diverse stakeholders; manage programs to best meet needs of individuals, and communicate recommendations regarding care, resources, and services.

This program is not designed to meet licensure requirements for the social work and counseling professions.

Program Outcomes

1. Assess and analyze clients' needs to provide guidance in the development of academic, career and life planning goals.
2. Design, implement and evaluate services and/or programs to leverage developmentally appropriate and culturally responsive services.
3. Develop effective service delivery that includes input from culturally diverse communities and individuals.
4. Use conflict management, problem solving and decision-making skills to support and guide clients through life transitions to promote self-efficacy.
5. Apply ethical, legal and professional practices in all aspects of services and/or programs.
6. Plan, execute and evaluate communication strategies to raise awareness about services, initiatives, programs and any purposes the organization may need.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

- Supervised field-based experience is required as part of ESCS 652. Students will document a minimum of 100 hours of activities that demonstrate proficiency in the domains of the field. Practicum locations will be based on student's area of interest and must be approved. All hours are during hours of operations of the placement center. Students should plan accordingly to meet requirements of this course.
- This degree does not lead to teacher licensure or certification in any state. Students seeking to become a classroom teacher must contact the state's department of education to determine what state-specific requirements are needed for teacher certification. Graduates seeking teacher licensure or certification may be subject to additional requirements on a state-by-state basis that could include student teaching or practicum experience, additional coursework, additional testing, or, if the state requires a specific type of degree to seek alternative certification, earning an additional degree.
- This academic program requires IRB certification. For more information about the process and requirements, please contact the School Dean or refer to the Student Manual of your program, if applicable.
- Graduation GPA: 3.00

Master of Education with specialization in Teaching of English as a Second Language

Credits: 39

Specific Program Admission Requirements

1. Successfully completed a bachelor's degree in Education from an accredited university with a GPA of 2.75.
2. A video conference interview in English.
3. Write an essay in English.
4. Students who do not have a bachelor's degree in Education must meet the following additional requirements.
 - a. Successfully completed a bachelor's degree in any other discipline from an accredited university with a GPA of 2.75, with at least 12 credits in English and 12 credits in Education.
5. It is strongly recommended that students review and become familiar with the teacher certification requirements established by the State of Florida, the Commonwealth of Puerto Rico, or any other state in which they intend to seek employment as teachers. Students must abide with the minimum required hours and policies set by the state and local education agencies for practicum experiences. Students must comply with state and local education certification requirements for the degree, as applicable.
6. Students are responsible of verifying the requisites or test required by the state or country of origin.
7. Students that reside in the State of Florida must provide evidence of a passing score on the Florida Basic General Knowledge Test prior to registering for EDUC 617.

Program Description

This specialization is designed to provide candidates with a background in the principles, theories and practice of second language acquisition, learning and teaching. It seeks to prepare educators who can assume positions of leadership in ESL education, as teachers or English supervisors in public or private schools, and as professors in institutions of higher education.

Program Outcomes

1. Apply English language structures in different discourse contexts and language domains to facilitate and support language learning for English Learners to acquire academic language and literacies specific to various content areas.
2. Implement methods to gather information of English Learners' academic, personal, cultural and social contexts to develop effective, individualized instruction and assessment for English Learners.
3. Create culturally, linguistically relevant and supportive environments to promote English Learners' learning.
4. Design, implement and adapt instruction and assessment to promote English Learners' learning using evidence-based and developmentally appropriate approaches.
5. Analyze and interpret multiple and varied assessments for English Learners to make informed decisions that promote language and content learning.
6. Use effective collaboration strategies and professional development to plan ways to serve as a resource for English Learner instruction, support for school community and advocate for English Learners.

Program sequence will be available at the time of enrollment.

Master of Science in Counseling with specialization in Clinical Mental Health

Credits: 63

Specific Program Admission Requirements

1. A bachelor's degree from an institution accredited by an agency recognized by the U.S. Department of Education, or from an internationally recognized institution with a grade point average of 3.0 or higher on a 4.0 scale. Graduate-level credit earned may be used to demonstrate aptitude for graduate education in counseling when an applicant's undergraduate grade point average is below a 3.0.
2. Official transcripts from all previous undergraduate educational institutions where a degree was earned. Transcripts from all institutions where credit was earned may enhance the application.
3. Two letters of recommendation completed by professionals who can assess the applicant's aptitude for graduate education in counseling.
4. A 2–4-page personal essay
5. A resume or curriculum vitae (CV).
6. An interview with the program's admission committee.

Program Description

The Master of Science in Counseling with a specialization in Clinical Mental Health is designed to prepare candidates with the knowledge and skills necessary to work with individuals, groups, and families presenting with a variety of mental and emotional disorders, as well as to promote mental health and wellness. The program prepares students to be capable and responsive licensed professional counselors in a variety of settings, as well as to engage in consultation and collaboration with other professionals.

Program Outcomes

Upon successful completion of the program students will be able to:

PLO 1: Explain professional practices, ethical and legal standards, historical foundations, and professional roles.

PLO 2: Employ cultural, social justice, advocacy, theoretical approaches, and strategies to counseling relationships with diverse populations.

PLO 3: Apply human growth and development theories and principles to counseling practices, promoting development and wellness across the lifespan.

PLO 4: Apply theories, strategies, and models of career development, counseling, and decision-making with culturally diverse populations.

PLO 5: Apply theories, skills, and approaches to counseling practice integrating ethics, consultation, and crisis intervention.

PLO 6: Apply theoretical, ethical, cultural, and social justice skills, methods, and principles to group counseling practice.

PLO 7: Administer testing and measurement instruments using ethical standards, cultural sensitivity, and appropriate statistical concepts for individual and group assessment.

PLO 8: Analyze research and statistical methods and strategies in evidence-based practice, supervision, and program evaluation, considering the ethical and cultural implications in the counseling profession.

PLO 9: Apply skills and practices to address a variety of issues in clinical mental health counseling practice, integrating ethical, cultural, diversity, and advocacy perspectives.

Programmatic Academic Achievement Requirements

1. Students enrolled in COUN 502, COUN 506, COUN 507, COUN 508, COUN 510, and CMHC 601 are required to participate in synchronous Skill Development and Clinical Simulation Laboratory activities as part of the program's competency-based training requirements.
2. Students must maintain a cumulative GPA of 3.0 or higher to enter the practicum and internship courses and to graduate.
3. Students must complete the Co-Curricular Counseling Skills and Application Program prior to enrolling in CMHC 607 Practicum in Clinical Mental Health Counseling.
4. This Practicum and Internship courses consists of three semester-length courses and a field experience. Students must earn a grade of "B" or better in CMHC 607 Practicum in Clinical Mental Health Counseling, CMHC 608 Internship I in Clinical Mental Health Counseling, and CMHC 609 Internship II in Clinical Mental Health Counseling. The Practicum and Internship courses has various evaluations that must be passed to earn credit for the sequence. Repeating any of these courses requires approval from the Program Director.
5. Students must pass courses CMHC 607, CMHC 608, and CMHC 609 with a minimum grade of B. In all other program courses, a minimum grade of C or better is required for the credits to count toward graduation requirements.
6. The student must pass the Comprehensive Exam, as it is a degree requirement. Students are allowed three attempts to pass the Comprehensive Exam. Failure to pass the exam after three attempts will result in program dismissal.
7. The student must participate in designated faculty advising sessions and professional dispositions assessment sessions as part of the academic requirements throughout the master's program.
8. Students must complete all degree requirements within a period not to exceed 150% of the normal time required to complete the program. Students must refer to the Program Student Handbook and institutional policies for additional information regarding time limits, leave of absence, and continuous enrollment requirements.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

2. **COUN 509, CMHC 607, CMCH 608 and CMHC 609 require compulsory synchronic sessions.
3. ***The semester will include a Practicum with 16 weeks over two partial terms (100 hours total) and two additional courses of eight weeks for a total of nine credits.
4. ****The semester will include Internship at 16 weeks over two partial terms (300 hours total).
5. *****The exam will be offered two times per academic year. If the student does not pass the exam, they must enroll again in the CMCH 610 course in PT 82 for the next semester. Students must refer to the Program Student Handbook to follow the process.
6. + State/Territory licensure requirements differ. It is the responsibility of the student to understand all current requirements for licensure in the state/territory where they plan to seek initial licensure.
7. ++ Students must abide by the required hours, procedures, and policies set by state and local agencies for practicum and internship experiences. Also, students must comply with state and local certification requirements for the academic program, as applicable. Furthermore, students must comply with all requirements established by the practicum and internship sites where they are practicing.
8. +++ Students are required to participate in designated faculty advising sessions and professional dispositions assessment sessions as part of the academic requirements throughout the master' s program. Students must refer to the Program Student Handbook to follow the process.
9. ++++ This program is currently not accredited by CACREP.
10. Graduation GPA: 3.00.

Master of Science with specialization in Educational Leadership

Credits: 42

Specific Program Admission Requirements

1. An earned a Bachelor of Arts in Education.
2. Work experience in the public or private educational system.

Program Description

The Educational Leadership program is designed to prepare future school administrators with the skills and competencies needed to become outstanding bilingual leaders in public education K-12 institutions.

Program Outcomes

1. Develop, articulate, implement, and achieve a shared vision and mission of high quality education using methods of continuous improvement to promote student's academic success and well-being.
2. Ensure each student has equitable access to learning and resources by instilling a sense of equity, cultural competence and responsiveness throughout the system.
3. Lead in development and implementation of curriculum, instruction, and assessment across grade levels to promote high expectations for learning for each student in alignment to content standards and effective pedagogy.
4. Access and analyze systems of curriculum, instruction, and assessment to monitor and plan for continuous improvement to promote academic success of students.
5. Develop professional capacity of school personnel to promote effective practice and student learning and to foster a professional community of continuous individual and organizational learning and improvement.
6. Create and execute plans for recruiting, hiring, support, evaluation and retention of personnel.
7. Engage families and community to support student learning and development and to participate in ongoing process for continuous improvement.
8. Manage and monitor school operations, resources and administrative systems to comply with law, rights, policies and regulations.
9. Act ethically and according to professional norms to promote integrity, fairness, transparency, collaboration and continuous improvement.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. Specific licensure and certification requirements can and often do vary by state and require teaching experience and/or certification for principalship. It is the student's responsibility to evaluate whether the Master of Science in Educational Leadership meets the particular requirements for certification in the state in which they plan to practice.
2. A field-based supervised experience is required as part of EDAG 670 (fall or spring semesters only). Students will document a minimum of 110 hours of activities that demonstrate proficiency aligned to the Educational Leadership Competencies. All hours are during hours of operations of the placement center. Students should plan accordingly to meet requirements of this course.
3. This academic program requires IRB certification. For more information about the process and requirements, please contact the School Dean or refer to the Student Manual of your program, if applicable.
4. Graduation GPA: 3.00

Master of Social Work

Credits: 54

Specific Program Admission Requirements

1. An earned bachelor's degree from an accredited institution.
2. An undergraduate cumulative GPA of at least 2.75.
3. An interview.
4. An essay.

Advanced Standing Program in the Master of Social Work- Additional Admission requirements

The Advanced Standing Program in the Master of Social Work has additional requirements. Students admitted are given, in all program options, up to 27 credit hours of advanced standing to BSW graduates that meet the following conditions:

1. Degree granted from a CSWE BSW accredited program.
2. A graduation GPA (Grade Point Average) of at least 3.00.
3. Social Work major courses passed with grade A or B.
4. Field Practice courses passed with a grade of A.
5. Having completed the baccalaureate degree within five years or less of requested admission.

If all five conditions are met, an evaluation of transfer credits will be conducted by the MSW Program director. The advanced standing could be awarded only to graduates holding degrees from baccalaureate social work programs accredited by CSWE, those recognized through its International Social Work Degree Recognition and Evaluation Services or covered under a memorandum of understanding with international social work accreditors across all program options. Courses will not be validated to students from programs not accredited by the CSWE.

For the MSW advanced standing program, 21 credits will be granted for the foundation courses of Social Work major, approved with A or B. Another 6 credits will be granted for generalist practice only if the candidate had a grade of A in the supervised practice at the bachelor's level, for a maximum of 27 credits.

Program Description

The program prepares students for Social Work practice with a clinical specialization, able to contribute with their leadership and guidance to programs and services for vulnerable populations in the United States of America, and other societies across the World. The context and geographical location of the program offers students the opportunity to meet the needs of a variety of vulnerable populations.

Program Outcomes

1. Demonstrate Ethical and Professional Behavior Competency.
2. Engage Diversity and Difference in Practice.
3. Advance Human Rights and Social, Economic, and Environmental Justice Competency.
4. Engage in Practice-informed Research and Research-informed Practice.
5. Engage in Policy Practice.

6. Engage with Individuals, Families, Groups, Organizations, and Communities.
7. Assess Individuals, Families, Groups, Organizations, and Communities.
8. Intervene with Individuals, Families, Groups, Organizations, and Communities.
9. Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities.

Programmatic Academic Achievement Requirements

1. To graduate from the program, a general grade point average of 3.00 is required as well as a comprehensive grade examination of Pass.
2. The seminar and supervised practice are approved with A or B; a C requires that the course be repeated.
3. With D or F the student is suspended and a committee of three faculty members must examine the case to determine if a second opportunity is granted to repeat the seminar and practice. The Director of the Social Work Master's Program will appoint the Committee.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. Students must abide by the minimum required hours and policies the state and local education agencies set for practicum experiences.
2. Students must comply with state and local education certification requirements for the degree, as applicable.
3. Graduates of Social Work must seek professional licensing from the Board of Examiners at the State and local requirements or limitations to practice the profession.
4. This academic program requires IRB certification. For more information about the process and requirements, please contact the Dean of the Academic School or refer to the Student Handbook of the program, if applicable.
5. Credit will not be granted for life experience, volunteering, or work experience as a social worker.
6. Graduation GPA: 3.00

The Master of Social Work at Ana G. Méndez University is accredited by the Council on Social Work Education's (CSWE) Board of Accreditation (BOA).

Accreditation of a social work program by the BOA indicates that it meets or exceeds standards of program quality evaluated through a peer review accreditation process. An accredited program has sufficient resources to meet its mission and goals, and the BOA has verified that it demonstrates compliance with all accreditation standards. Accreditation applies to all program options, which include locations and delivery methods. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

Review our program's accredited status at the Directory of Accredited Programs <https://www.cswe.org/accreditation/directory/?CSWE's>. For more information about social work accreditation, contact CSWE's Department of Social Work Accreditation at accreditation@cswe.org.

College Credit Certificate in Public Relations

Credits: 18

Program Description

The certificate is designed to prepare students in comprehensive public relations, able to build and maintain relationships between organizations and their audiences, with the knowledge about the new digital platforms existing in the field of communications. Doctor of Education with specialization in Curriculum, Teaching and Learning Environments

Credits: 60

Program Description

The Doctoral program in Education with specialization in Curriculum, Teaching and Learning Environments has the purpose to prepare a professional with the theoretical and practical knowledge that will allow students to apply the principles and foundations of the curriculum in the design, implementation and evaluation of educational programs. The learning environments in this doctoral program provide an approach to the curricular aspects that affect the training of the curriculum specialist in the selected study environment.

Program Outcomes

1. Analyze the historical, philosophical, social, cultural, and political context of educational organizations and their influence on curriculum planning, development, and evaluation.
2. Explore current empirical research on teaching, learning, assessment, evaluation, and curriculum development.
3. Examine the foundational principles and theoretical assumptions that underlie curriculum and instructional practices.
4. Explore the emerging theories and applications for the evaluation of curriculum.
5. Utilize theory and applications of curriculum development.
6. Analyze leadership theories and their implications to develop strategies that influence teaching, learning, assessment, and curricular change for diverse environments.
7. Conceptualize, initiate, develop, and carry out research to address educational situations within an organization.
8. Use statistics and methods of data collection for the analysis of information.
9. Develop the disposition to respect and address individual differences and diverse learning environments as integral parts of the educational experience.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Doctor of Philosophy in Communications with specialization in Strategic Communication

Credits: 60

Specific Program Admission Requirements

1. The applicant must submit an official transcript of credits providing evidence of an earned master's degree with a minimum cumulative grade point average (CGPA) of 3.00.
2. Present an essay.
3. Present and updated curriculum vitae (CV) or resume.
4. An interview with the program admission committee.

Program Description

The doctoral program in Communications, with a specialization in Strategic Communication, offers advanced knowledge about new trends in the field of strategic communication, focused on globalization and changing technology. Using the contributions derived from various epistemological, theoretical, and methodological perspectives, the program constitutes an opportunity for interdisciplinary study and research to become a high-level professional capable of generating knowledge, understanding, and solving problems in the field of strategic communication.

This program does not lead to professional licenses in Communications. It is recommended that prospective students investigate the licensing requirements in their state or location.

Program Outcomes

1. Analyze in a critical, creative, independent and ethical way, the contemporary theoretical trends of strategic communication, seeking truth, accuracy, equity and diversity.
2. Distinguish the interrelationship between strategic communication and theories, history, and the role of professionals and institutions in shaping communications, as well as the mastery of the principles and laws of freedom of expression and of the press.
3. Design, execute and evaluate communication strategies that provide solutions to problems of local, national and international organizations, using the main concepts of gender, race, ethnicity, sexual orientation and other forms of diversity of peoples and cultures and applying technological developments and digital convergence, in the design and implementation of communication strategies and products, for any type of organization.
4. Research, applying the methodology of scientific research, theories, tools and appropriate technologies, in the use of information; as well as numerical and statistical concepts in the field of strategic communication.
5. Elaborate documents with complete correctness and clarity, in forms and styles appropriate to the communication professions, audiences, and the purposes they serve, critically evaluating their own work and that of others, to determine their accuracy, fairness, appropriate style, and grammatical correctness.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. SWGR 830 is required for students with master's degree in another discipline.
2. This academic program requires IRB certification. For more information related to the process and requirements, please contact the Program Coordinator, School Dean of Liberal Arts or refer to the Student Manual of your program.
3. *SWGR 843 is an optional course for those students requiring more time for the dissertation.
4. Students must comply with state and local education certification requirements for the degree, as applicable.
5. This program will not award transfer credits to students who have partially completed their degrees in other institutions.
6. Doctoral students admitted prior to spring 2023, who did not complete a statistics course at the graduate level, are required to enroll in an approved graduate statistics course prior to enrolling in doctoral research courses.
7. Graduation GPA: 3.00

School of Science and Technology

Academic Programs

- Diploma in Cybersecurity
- Diploma in Graphic Design and Digital Production
- Diploma in Refrigeration and Air Conditioning
- Associate in Science in Cybersecurity
- Associate of Science in Technical Studies
- Associate of Science in Web Design
- Bachelor of Arts in Graphic Design
- Bachelor of Science in Cybersecurity
- Master of Science with specialization in Environmental Planning
- Master of Science with specialization in Telecommunications and Network Systems Administration

Notes:

1. The language of instruction and program delivery modality are subject to availability and may vary between locations.
2. COMPLETING A COURSE OR PROGRAM IN A LANGUAGE OTHER THAN ENGLISH MAY REDUCE EMPLOYABILITY WHERE ENGLISH IS REQUIRED.

Diploma in Cybersecurity

Credits: 30

Program Description

A program that focuses on the technological and operational aspects of information warfare, including cyber-attack and cyber defense. Students will learn the role of an information technology security specialist, demonstrate compliance and operational security, the use of ethical hacking, how to prevent IT attacks, the use of physical security, and the proficiency in network device security and access control models, legal and ethical issues, and cyber warfare systems development and acquisition.

Program Outcomes

1. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
2. Apply knowledge in the digital and networks tools and resources to communicate effectively in a variety of professional contexts.
3. Apply knowledge of different components of modern operating systems by performing general computer and system operations such as installation, setup, and configuration, as well as accounts and application management.
4. Analyze a complex computing problem and apply computing principles and other relevant disciplines to identify solutions.
5. Function effectively as a member or leader of a team engaged in activities appropriate to cybersecurity.
6. Identify, assess risk, and apply security principles and practices to maintain operations in the presence of risks and threats in computers and networks.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

5. Graduation GPA: 2.00

Diploma in Graphic Design & Digital Production

Credits: 39

Program Description

The Diploma in Graphic Design and Digital Production prepares students for entry-level careers in graphic design, multimedia, and digital content creation. The program combines creative theory with practical training in color, typography, photography, drawing, and digital design using industry-standard tools. Students develop skills in web and print production, video and multimedia communication, and professional presentation, while gaining knowledge of ethics and legal issues in design. Graduates are equipped to produce effective visual solutions across print, digital, and interactive media or continue advanced studies in design and communication fields.

Program Outcomes

- Conceptualize, design, and produce visual solutions for print, digital, and interactive media.
- Apply design and color theories, typography, and digital imaging techniques to create effective communication materials.
- Demonstrate proficiency with industry-standard software, hardware, and production workflows.
- Produce and manage multimedia projects, including video, photography, and web content tailored to diverse audiences.
- Interpret and apply current industry standards, ethical principles, and legal considerations in design practice.
- Present and communicate design concepts effectively in professional contexts.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability.

Diploma in Refrigeration and Air Conditioning Technician

Credits: 45

Program Description

The Diploma in Refrigeration and Air Conditioning Technician is designed to prepare students for entry-level employment in one of Florida's most in-demand technical fields. The program provides students with the knowledge and hands-on skills necessary to install, maintain, and repair residential and commercial ventilation, air conditioning, and refrigeration systems.

The curriculum integrates classroom instruction, laboratory practice, and work-based learning to ensure students develop technical expertise, safety awareness, and professional competencies. Coursework covers occupational safety and environmental practices, applied mathematics, electrical systems, refrigeration principles, and cooling systems, ductwork and air distribution, piping and brazing techniques, troubleshooting, and system start-up procedures.

In addition, students receive specialized training in automotive refrigeration and air conditioning systems. This component equips graduates with the skills to service and repair automobile climate control systems, expanding their career opportunities beyond traditional residential and commercial refrigeration fields.

Students gain practical experience in state-of-the-art labs, using industry-standard equipment and tools. The program emphasizes compliance with federal, state, and local regulations, including EPA Section 608 requirements for refrigerant handling, OSHA safety standards, and relevant building and energy codes. In addition, students develop employability skills such as teamwork, communication, customer service, and professional ethics that are essential to success in the refrigeration and air conditioning industry.

Graduates of the program will be prepared to sit for industry-recognized certifications, including:

- EPA Section 608 Universal Certification (mandatory)
- OSHA 10 Safety Certification

Program Outcomes

Students will be able to:

- Apply Health, Safety, and Environmental Standards
- Demonstrate Technical Knowledge of refrigeration and air conditioning systems
- Utilize Diagnostic and Troubleshooting Skills
- Integrate Emerging Technologies and Energy Efficiency Practices
- Exhibit Professionalism and Employability Skills

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability.

Associate in Science in Cybersecurity

Credits: 66

Program Description

The Associate in Science in Cybersecurity program gives students the necessary knowledge, skill, and abilities to address today's organizational cybersecurity challenges. Given the substantial number of risks, threats, and challenges facing organizations, graduates of this program will be prepared to identify and analyze cybersecurity-related issues and implement and maintain technical security-based solutions that address these risks and threats. Students will be able to implement technical methods to address an organization's security needs.

Program Outcomes

1. Analyze a broadly defined security problem and apply principles of cybersecurity to the design and implementation of solutions.
2. Apply security principles and practices to maintain operations in the presence of risks and threats.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to cybersecurity.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Associate in Science in Technical Studies

Credits: 62

Specific Program Admission Requirements

1. Satisfactory completion of a minimum of 27 credits at the post-secondary level with a GPA of 2.00.

Program Description

Upon the completion of the program, the student will earn an Associate in Science in Technical Studies. By completing this program, graduates will have enhanced their professional skills and abilities with a specialized path in technology, health administration, or business.

Program Objectives

The objective of the AS in Technical Studies program is to integrate approved credits from licensed and/or accredited post-secondary entities, at the non-degree and up to the equivalent of two years in a degree-seeking program, with a selected concentration package complementary to the occupation. The students will:

1. Demonstrate knowledge of the fundamental concepts and theories from a selected career path.
2. Demonstrate proficient technical skills required to be productive in a career.
3. Apply creative, critical thinking, and problem-solving skills to analyze and solve discipline specific problems.
4. Demonstrate appropriate oral and written communication skills and professional behavior in the workplace.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Associate of Science in Web Design

Credits: 60

Program Description

The Associate Degree in Web Design prepares the student to become a Web Designer, an expert capable of dealing with the Internet's continuous string of advances, with the training and skills to define, create, and design them. A web designer configures telecommunications systems to ease people's access to content and audiovisual information.

Program Outcomes

1. Demonstrate understanding of arts and design principles by applying design theory and creative technical and composition skills to a creative web design solution.
2. Adhere to industry accepted professional, legal, safety and ethical practices.
3. Collaborate and communicate professionally, orally and in writing, with a diverse audience to address web design challenges.
4. Research and utilize best practices in user interface, user experience, accessibility, and search engine optimization to build websites with different levels of complexity.
5. Utilize effectively coding and software tools to analyze and present data in a professional manner that could be translated to web-based or app-based media.
6. Develop, plan, design and publish websites using knowledge of computer information systems, including security, computer concepts, web delivery system architecture, and file management.
7. Apply project management skills to prioritize projects and meet deadlines.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Arts in Graphic Design

Credits: 123

Program Description

The Bachelor of Arts in Graphic Design prepares the student to work as a graphic designer, who will master the language of design, both in its visual and non-visual dimensions and will face new physical, technological, social and cultural worlds. Graduates of the Graphic Design bachelor's program will be trained to properly judge the quality and effectiveness of design projects through rigorous use of current thinking in the field of design. As a graphic designer, you can be: Creative Director, Package Designer, Textile Designer, Corporate Identity Designer, Brand Designer, Advertising Designer, Art Director, and Print Director.

Program Outcomes

1. Demonstrate understanding of design principles by applying design theory and process from an artistic perspective.
2. Analyze, synthesize, and utilize design processes and strategy from concept to delivery to creatively solve communication problems.
3. Utilize relevant applications of tools and technology in the strategy, creation, reproduction, and distribution of visual messages in the profession.
4. Apply creative problem solving and technical skills in the creation of effective design solutions for social media and website design.
5. Apply the design process, including research and analysis, search for alternatives, prototyping and evaluation of results.
6. Employ best practices and management in the design profession and within a collaborative work environment.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Bachelor of Science in Cybersecurity

Credits: 120

Program Description

The Bachelor of Science in Cybersecurity provides students with the technical, analytical, and strategic competencies needed to protect digital assets and ensure the confidentiality, integrity, and availability of information systems. This program combines hands-on experience, applied research, and theoretical foundations to prepare students for today's cybersecurity environment. Students will explore critical areas including secure software development, systems and network defense, cyber risk management, ethical hacking, data analytics, cloud and mobile security, legal and regulatory compliance, and emerging threats such as those related to artificial intelligence and the Internet of Things (IoT). Through a curriculum grounded in both computing and security science, graduates will be prepared to design, implement, and manage robust security architectures, respond to incidents, and support strategic decision-making to mitigate cyber risks in enterprise and public sector environments.

Program Outcomes

1. Identify, evaluate, and mitigate cybersecurity risks to organizational systems, networks, and data using a variety of security frameworks and tools.
2. Design, implement, and assess secure computing systems using industry best practices in software, hardware, and network configurations.
3. Conduct digital forensics and ethical hacking investigations to uncover vulnerabilities and analyze threats in complex computing environments.
4. Apply data science and analytic methods to cybersecurity contexts, including intrusion detection, behavior analysis, and threat intelligence.
5. Evaluate legal, ethical, and regulatory requirements related to cybersecurity, privacy, and intellectual property in national and global scenarios.
6. Develop and implement security policies, awareness training, and incident response plans that support an organization's security operation and compliance.
7. Collaborate effectively within interdisciplinary teams and communicate technical concepts to diverse audiences including technical, managerial, and non-technical stakeholders.
8. Engage in lifelong learning and professional development to adapt to emerging cybersecurity challenges, technologies, and roles.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

2. Graduation GPA: 2.00

Master of Science with specialization in Environmental Planning

Credits: 42

Specific Program Admission Requirements

1. Have obtained a Bachelor in Natural Science degree from an accredited university with a minimum cumulative GPA of 2.50.
2. Have obtained a bachelor's degree in any other discipline at an accredited university with a minimum cumulative GPA of 2.50, provided that the student successfully completed the following courses: Algebra, Precalculus, Calculus or Basic Statistics (6 – 8 credits), General Biology (6-8 credits), General Chemistry (6-8 credits).

Program Description

This specialization prepares students to assume management responsibilities required by today's environmental field. The academic experience of the School allow students to develop the competencies in the area of environmental management which will enable them to assume leadership positions in the public and private sectors. The main goal of the program is to prepare an educated and skilled professional who contributes to solving the environmental problems of the world to achieve a sustainable development.

Program Outcomes

The goal of this study program is to train professionals to research and plan strategies that respond to and solve environmental situations that may affect the coexistence and quality of life of the human being. It trains professionals to work the environmental problem rigorously and in an interdisciplinary way that considers the rest of the social and economic problems of society.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Notes:

1. ENMP 670 and ENMP 671 are full semester courses.
2. Graduation GPA: 3.00

Master of Science with specialization in Telecommunications and Networks Systems Administration

Credits: 30

Specific Program Admission Requirements

1. Successfully completed a bachelor's degree in Engineering, Information Systems or Computer Sciences from an accredited university with a minimum GPA of 2.75.
2. Successfully completed an advanced mathematics course at the undergraduate level.

Program Description

The program provides students with an in-depth knowledge of the principles of a Converged Networks including design, implementation, security and management with a strong hands-on approach.

Program Outcomes

1. Analyze theories, methods, and interpretations, and apply research and technical skills in the discipline to develop projects within the field of Telecommunication and System Administrator.
2. Apply professional standards and ethical behavior in the analysis of legal information and procedures for the decision making of the organization.
3. Demonstrate a broad technical expertise in communications, data networks, and other relevant components in the profession throughout the creation, development, and management of assign projects related to the profession.
4. Demonstrate ability to administer and participate in the decision-making process and business strategic management in the telecommunications and system administration area.
5. Submit plans and produce strategic analyzes in the area of convergence of technologies that contribute to the effective positioning of the company.
6. Assist the company in the preparation of the strategic plans associated with the establishment of the telecommunications and network infrastructure.
7. Apply security principles and best practices in the field of system administration in order to evaluate and assess quality in the profession.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability and may vary between locations.

Course Descriptions

ACCO 111 Introduction to Accounting I

Credits – 4

This course introduces the basic principles of accounting theory and practice, emphasizing the sole-proprietorship form of business. Primary areas of study include nature of a business, the accounting equation, the theory of debit and credit, preparation of financial statements, adjusting process, the accounting cycle, special journals, accounting for merchandise business, inventory, internal control for cash procedures, and receivables. May be offered face to face or up to 100% online. Contact Hours: 60

ACCO 112 Introduction to Accounting II

Credits – 4

Study the accounting for fixed assets and intangible assets, current liabilities, with an emphasis in payroll accounting system. The course discusses how partnerships and corporations are structured and formed. Describe the cash flow activities reported in the statement of cash flows. May be offered face to face or up to 100% online. Contact Hours: 60

ACCO 113 Introduction to Accounting I

Credits – 3

Fundamentals of accounting. Analyzing and recording business transactions, the accounting cycle and preparation of Financial Statements. Includes accounting for cash, accounts receivable and inventories. May be offered face to face or up to 100% online.

ACCO 114 Introduction to Accounting II

Credits – 3

Tangible and intangible assets, current liabilities and the payroll system, application of accounting principles to partnerships and corporations, investments and bonds. May be offered face to face or up to 100% online.

ACCO 201 Intermediate Accounting I

Credits – 4

The accounting process and a review of the accounting cycle. Development of accounting theory and practice, preparation of financial statements including Statement of Cash Flows. Problems related to the control, valuation, presentation, and recording of cash; accounts receivable; Cost flow and special valuation methods of inventories. May be offered face to face or up to 100% online.

ACCO 202 Intermediate Accounting II

Credits – 4

Control methods, valuation, income determination, record and presentation of assets classified as property, physical plant, equipment, intangible assets, short and long-term investments and short and long-term debt. The course includes the study of the characteristics of a corporation, record, presentation and analysis of shareholders' equity, paid capital and retained earnings. May be offered face to face or up to 100% online.

ACCO 203 Cost Accounting

Credits – 4

Fundamentals and basic concepts of cost accounting systems for the accumulation of costs, job costing, procedural cost, joint costs and standard cost. It includes the discussion of the nature of quantitative aspects of indirect costs of the departmental overhead, and the relationship of the accounting systems with the decision-making process. May be offered face to face or up to 100% online.

ACCO 205 Taxes of Puerto Rico

Credits – 3

The history and the purpose of income tax; concepts and methods to determine the net taxable income of individuals and corporations, and the preparation of income tax returns according to the Internal Revenue Code of Puerto Rico as amended. May be offered face to face or up to 100% online.

ACCO 250 Computerized Accounting

Credits – 3

The use of accounting software to record business transactions and operational data to generate accounting records, financial statements and other reports. It includes the generally accepted accounting principles and emphasis on the use of electronic sheets is reinforced. May be offered face to face or up to 100% online. Contact Hours: 45

ACCO 295 Managerial Accounting

Credits – 3

Use of accounting information in the managerial functions of planning, control and decision-making. Includes funds analysis, cost ratio, volume, budget preparation and standard costs, analysis of short-term decisions and capital budget. May be offered face to face or up to 100% online. Contact Hours: 45

ACCO 297 Funds and Government Accounting

Credits – 3

The accounting principles applicable to the control, registration, and presentation of the financial information of the government and non-profit institutions, as well as preparation of the required financial statements. The principles that apply to the accounting of the different government funds, universities, and voluntary health and charity entities. May be offered face to face or up to 100% online.

ACCO 304 Auditing

Credits – 3

Generally Accepted Auditing Standards (GAAS). Includes the external auditor's reports, internal controls, ethical and legal responsibility, evidence, planning and audit documentation, audit program, sampling techniques and internal controls of the accounting systems. May be offered face to face or up to 100% online.

ACCO 306 Accounting Information Systems

Credits – 3

This course covers the most recent updates in Accounting Information Systems (AIS). It includes how developments in IT affect business processes and control and the effect of recent regulatory developments on the design and operation of accounting systems. AIS concepts consist of the knowledge that accountants need for understanding and using information technologies and for knowing how an accounting information system gathers and transforms data into useful decision-making information. May be offered face to face or up to 100% online.

ACCO 308 Contemporary Accounting

Credits – 3

Analysis and interpretation of generally accepted accounting principles (GAAP). The conceptual framework that provides the basis for the preparation and presentation of financial statements. Develop and review current status of financial accounting theories and analysis of the Financial Accounting Standards Board (FASB) Statements and Accounting Principles Board (APB) opinions. May be offered face to face or up to 100% online.

ACCO 320 Federal Income Tax**Credits – 3**

Study of the historical development and purpose of the federal tax system, basic tax concepts, types of income, determination of taxable income, and preparation of the federal income tax return for individuals, partnerships, and corporations. May be offered face to face or up to 100% online.

Contact Hours: 45

ACCO 402 Advanced Cost Accounting**Credits – 3**

The course includes the importance of costs and the decision-making process in a manufacturing company. Also, it covers different strategies to measure the cost-benefit of an operation. May be offered face to face or up to 100% online.

ACCO 450 Advanced Accounting**Credits – 4**

Generally accepted accounting principles as applied to business combinations, Investment in Common Stock, partnerships, and consolidated financial statements. Overview of the accounting principles that apply to government funds. Control, recording process, and reporting of financial information of government units. May be offered face to face or up to 100% online.

ACCO 500 Financial Accounting**Credits – 3**

This course is an introduction to financial and managerial accounting for non-business graduate students. It gives the student an overview of transaction analysis and basic elements of the accounting cycle for service and merchandising business. It also covers the preparation of financial elements: income statement, balance sheet, cost of manufacturing and cash flows, and inventory costing methods. May be offered face to face or up to 100% online.

ACCO 503 Managerial and Financial Accounting**Credits – 3**

This course covers accounting concepts and techniques. The course focuses on the use of accounting in the preparation and analysis of financial statements, management decision-making with an emphasis on planning, and performance evaluation. It includes the following topics: accounting as an information system, fundamentals of financial accounting and analysis of financial information, costing methods for products and services, budget control and analysis, inventory control and valuation. It also covers the study of cost behavior, cost-volume-profit relationships, job order, process and activity-based costing, short-run and long-run decisions, budget, and variance analysis. This course includes the use of electronic spreadsheets. May be offered face to face or up to 100% online.

ACCO 504 Accounting for Decision Making**Credits – 3**

The course studies the accounting of the managerial processes of planning, control, and decision making, financial requirements in businesses and the analysis of financial statements and decisions related to investments. Special topics in cost accounting, capital investments, budget formulation, benefit controls, taxes, and inventory will be examined. May be offered face to face or up to 100% online.

ACCO 505 Accounting Information Systems

Credits – 3

This course is designed to present an understanding of accounting information systems and their role in the accounting environment. Topics to be covered include the software development life cycle, contemporary technology and applications, control concepts and procedures, auditing of information systems, internets, intranets, electronic commerce, and the role of information systems in a business enterprise. This course will cover accounting information systems—both computerized and non-computerized—with particular emphasis on internal controls. May be offered face to face or up to 100% online.

ACCO 602 Taxation

Credits – 3

Students will be exposed to the various types of federal taxes and learn the basics of federal income taxation as it applies to businesses and individuals. Emphasis is placed on the study of the basic income tax formula, including income inclusions, exclusions, deductions, and the tax consequences of property transactions. May be offered face to face or up to 100% online.

ACCO 612 Fraud and Forensic Accounting

Credits – 3

Students will identify the resources for detecting fraud, evaluate the conditions that encourage fraud, and design effective fraud detection and prevention plans. Focus is on the perspectives of public, internal, and private accountants. Discussion covers the principles and standards for proactive and reactive investigation, as well as detection and control of fraud. May be offered face to face or up to 100% online.

ACCO 613 International Accounting

Credits – 3

This course deals with a comparative analysis of accounting concepts and practices in different countries and the convergence of international accounting standards. It focuses on the problems associated with accounting in multinational corporations, including the transfer of funds and income measurements, consolidation problems, issues in transfer pricing, and policies appropriate for international mergers and company valuation for acquisitions. May be offered face to face or up to 100% online.

ACCO 615 Corporate Financial Reporting: Operations

Credits – 3

This course focuses on financial accounting rules for corporations. It includes application and use of financial accounting in a decision-making framework and emphasizes corporate financial reporting strategies, preparation of financial statements, and interpretation of financial statements by external users. The course examines issues related to the environment and theoretical structure of accounting, the accounting cycle, financial statements and disclosures, income determination, valuation and accounting for current and non-current assets, and current liabilities and contingencies. Within these content areas, the course also explores the differences between financial statements prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP), and those prepared in accordance with International Financial Reporting Standards (IFRS). May be offered face to face or up to 100% online.

ACCO 616 Corporate Financial Reporting: Financial Transactions**Credits – 3**

This course focuses on financial accounting rules for corporations. It includes application and use of financial accounting in a decision-making framework and emphasizes corporate financial reporting strategies, preparation of financial statements, and interpretation of financial statements by external users. The course examines issues related to investments, non-current liabilities, equities, the statements of cash flows, and the accounting for changes and error corrections. Within these content areas, the course also explores the differences between financial statements prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP), and those prepared in accordance with International Financial Reporting Standards (IFRS). May be offered face to face or up to 100% online.

ACCO 702 Financial Accounting and Reporting I**Credits – 3**

The content of the course will cover the basic theory of accounting and practice, as well as the discussion of standard procedures established in the accounting profession. Study of the bodies that produce the generally accepted accounting principles (GAAP), the regulations of the Securities and Exchange Commission (SEC), the Public Company Accounting Oversight Board (PCAOB) and other governmental entities that establish procedures and reports. The course will emphasize the understanding and preparation of financial statements. In addition, it will include a detailed analysis of assets, liabilities, income, expense and capital accounts; as well as: cash and cash equivalents, accounts receivable, inventory, property, plant and equipment, investments, intangible assets, goodwill, current liabilities, long-term debt, capital accounts, income and expense recognition, compensation and benefits and accounting for income taxes. May be offered face to face or up to 100% online.

ACCO 703 Financial Accounting and Reporting II**Credits – 3**

The course will cover complex accounting transactions, the difference between accounting principles generally accepted in the United States and international financial reporting standards. The rules and principles of government accounting and non-profit institutions will be discussed. On the other hand, complex accounting transactions will be studied like accounting changes and error corrections, business combinations, contingencies, derivatives and hedge accounting, international monetary exchanges, leases, research and development, programming costs, subsequent events and fair market value. May be offered face to face or up to 100% online.

ACCO 706 Auditing and Attestation**Credits – 3**

In the course, the processes of planning and risk assessment will be discussed. It will include the study and evaluation of the internal control structure, how the audit will be conducted, and how the auditor obtains and documents the evidence. The formation of the auditor's opinion will be analyzed, according to the different types of reports required. The aspects of professional ethics will be discussed. May be offered face to face or up to 100% online.

ACCO 707 Federal Income Tax**Credits – 3**

Discussion and analysis of the federal income tax law and the practices of the federal Internal Revenue Service and its procedures. Discussion of income tax principles for individuals and business entities.

Application of legal provisions to prepare tax returns and how to represent clients before the Federal Internal Revenue System. May be offered face to face or up to 100% online.

ACCO 711 Forensic Accounting and Fraud Examination

Credits – 3

Includes the study of investigative accounting procedures and techniques used in litigation support. Covers the basic theories and principles of forensic accounting and their application. Topics to be covered include financial reporting fraud, employee fraud, income reconstruction methods, testifying as an expert witness, evidence management, cybercrime, and business valuations. Forensic accountants help prevent and investigate corporate fraud. From tracking terrorist funding, to helping organizations stay compliant with Sarbanes-Oxley, to exposing money laundering, tax evasion and embezzlement. May be offered face to face or up to 100% online.

ACCO 711-O Contemporary Assurances and Audit Services

Credits – 3

This course defines and discusses the role of the audit and assurance services in financial markets. It focuses on the ethical and legal obligations of audit professionals, practice standards, risk assessment and the evaluation of internal controls, audit evidence, levels of assurance, attestation requirements, and the impact of information technology on audit practice. May be offered face to face or up to 100% online.

ACCO 712 IFRS and Governmental Non-profit Entities

Credits – 3

This course introduces core concepts and tools of IFRS and accounting and financial reporting including governmental and nonprofit organizations. Topics include transaction analysis, financial statement analysis and interpretation, compliance issues, and operational and cash budgeting. In addition, the impact of standards such as those promulgated by the IASB, GASB, and the Federal Accounting Standards Advisory Board (FASAB) are investigated and evaluated. May be offered face to face or up to 100% online.

ACCO 720 Accounting Capstone

Credits – 2

This content area capstone course applies advanced accounting concepts to improve organizational effectiveness within the framework of financial and accounting regulations. Students apply existing professional standards and theories to an applied topic. May be offered face to face or up to 100% online.

ACCO 724 Accounting Research and Communication

Credits – 3

Discussion and analysis of the techniques, strategies and basic tools of investigation in the area of accounting, auditing and taxes. Development of oral and written communication skills in the business environment. May be offered face to face or up to 100% online.

ACCO 728 Business Environment and Concepts

Credits – 3

This course provides an overview of all the knowledge and skill that professional accountants and auditors must demonstrate when performing professional services. This course will present five diverse subject areas. These content areas are corporate governance, economic concepts and analysis, financial management, information technology, operations, and cost management. May be offered face to face or up to 100% online.

ACCO 730 Business Law and Regulations**Credits – 3**

Discussion of legal aspects of the business including the effect and implications of the principal and agent, contracts, relationship of debtor and creditor, business regulations and the different legal alternatives of the business structure. In addition, the principles of ethics and the duties of the accountant will be discussed. May be offered face to face or up to 100% online.

ACCO 731 Internal Auditing**Credits – 3**

The course will introduce students to the field of internal auditing. They will be able to understand the internal auditor's role as a trusted advisor to management as well as a compliance professional. The course will discuss in detail the International Professional Practice Framework (IPPF) of the Institute of Internal Auditors, the Internal Control Integrated Framework and the Enterprise Risk Management Integrated Framework of the Committee of Sponsoring Organizations of the Treadway Commission (COSO). May be offered face to face or up to 100% online.

ACCO 733 Information Systems Auditing**Credits – 3**

The course covers management's role in controlling information technology and addressing the major risks related to technology. Topics include information security, contingency planning, desktop computer controls, systems development controls, computer center operation controls, assurance of information related to on-line, client-server, web-based, internet, and other advanced computer systems. Students will learn approaches to evaluating and addressing technology risk throughout the organization from the perspective of internal and external auditing in addition to the view of every end user. May be offered face to face or up to 100% online.

ADMI 500 Managing Organizations**Credits – 3**

This course studies the evolution of diverse perspectives on management and introduces the student to basic philosophies, techniques, policies, structures and operations of businesses. The course emphasizes the dynamics and complexity of establishing, handling and developing a competitive business. May be offered face to face or up to 100% online.

ADMI 506 Business Ethics**Credits – 3**

The course Ethics in Business Administration discusses the ethical values that should guide management. It explains how ethics impacts the planning, organization and management processes of a company, and in turn the environment in which it is located. It presents management cases with the purpose of developing the student's analysis and decision-making skills. May be offered face to face or up to 100% online.

ADMI 595 Knowledge Integration in Business Administration**Credits – 3**

This course is designed to provide students the opportunity to review the approaches, practices, and trends used in the formulation, establishment, evaluation and control of the actions needed to develop and sustain the competitive advantage of an organization. Practical, interdisciplinary and integrated application of business concepts using case studies and other research methods that allow the integration of knowledge of functional areas of the company. The student will have the opportunity to develop

leadership, decision making, and teamwork skills in a multidisciplinary and multicultural environment with a strategic vision. Will use research techniques developed through the program to analyze complex situations that enable the organization to maintain a competitive stance. May be offered face to face or up to 100% online.

BIOL 103 Biology for Health Sciences

Credits – 3

This course prepares the student with the fundamental concepts of Biological Sciences. The characteristics of matter, cell, tissues, Human Anatomy and Physiology and the fundamental concepts of genetics are discussed. The student is made aware of ethical behavior in relation to respect for physical and psychological integrity of the human being. This course is offered to students as a general introduction of sciences for multiple careers. May be offered face to face or up to 100% online.

BIOL 116 Anatomy and Physiology I

Credits – 3

This course is an in-depth study of the structures, functions and interrelationships of human systems. Course content will include discussion of the biological levels of cellular organization of the human body, and the structures and functions of the systems involved in support and movement, and integration and coordination. In the inquiry-based laboratory portion of this course, students will investigate, through hands on and simulated laboratory experiences, the histology, structures and functions of these systems. Offered on-site only.

BIOL 116L Anatomy and Physiology I Lab

Credits – 1

In the inquiry-based laboratory portion of Anatomy and Physiology I course, students will investigate, through hands on and simulated laboratory experiences, the histology, structures and functions of these systems. Offered on-site only.

BIOL 117 Anatomy and Physiology II

Credits – 3

This course is a continuation of the study of the structure, functions and interrelationships of human body systems. Course content will include discussion of the digestive, respiratory and genitourinary systems as well as the transport function of the cardiovascular and lymphatic systems. Concepts related to human growth and development will also be addressed. Offered on-site only.

BIOL 117L Anatomy and Physiology II Lab

Credits – 1

In the inquiry-based laboratory course, students will investigate, through hands on and simulated laboratory experiences, the histology, structures and functions of the digestive, respiratory and genitourinary systems as well as the transport function of the cardiovascular and lymphatic systems. Offered on-site only.

BIOL 150 General Biology I

Credits – 3

An introductory survey of current biological concepts for undergraduate students. Emphasis will be placed on topics which include characteristics of living things, scientific method, biologically important

compounds and molecules, cells, energy and metabolism, genetics, evolution and ethical aspects related to technology and scientific research. May be offered face to face or up to 100% online.

BIOL 151 General Biology II

Credits – 3

This course includes the following topics: biodiversity, basic concepts of anatomy and physiology of plants and animals, ecology and ethical aspects related to technology and scientific research. May be offered face to face or up to 100% online.

BIOL 153 General Biology I

Credits – 4

An introductory survey of current biological concepts for undergraduate students. Emphasis will be placed on topics which include characteristics of living things, scientific method, biologically important compounds and molecules, cells, energy and metabolism, genetics, evolution and ethical aspects related to technology and scientific research. Includes a documentary research lab component. May be offered face to face or up to 100% online.

BIOL 154 General Biology II

Credits – 4

This course includes the following topics: biodiversity, basic concepts of anatomy and physiology of plants and animals, ecology and ethical aspects related to technology and scientific research. Includes a documentary research lab component. May be offered face to face or up to 100% online.

BIOL 191 General Biology I

Credits – 3

An introductory survey of current biological concepts for students majoring in the sciences. Emphasis will be placed on topics which include characteristics of living things, scientific method, biologically important compounds and molecules, cells, energy and metabolism, genetics, evolution and ethical aspects related to technology and scientific research. May be offered face to face or up to 100% online.

BIOL 192 General Biology II

Credits – 3

General biology course for natural sciences students. Include the following topics: biodiversity, basic concepts of anatomy and physiology of plants and animals, ecology and ethical aspects related to technology and scientific research. May be offered face to face or up to 100% online.

BIOL 300 Microbiology

Credits – 3

Fundamental concepts of microbiology such as: bacteriology, mycology, virology, parasitology and immunology. Emphasis in pathogenic microorganisms and diagnosis of infectious disorders. May be offered face to face or up to 100% online.

BIOL 303 Human Biology I

Credits – 3

The course integrates the study of the structure of the human organism, its development and histology, with the function of organs and systems. Also, issues related to health are discussed. Study of the cellular concepts, histological structures, and of osteoarticular, muscle and nerve systems, emphasizing

the value of life, human dignity, respect, integrity, justice and responsibility of every human being. May be offered face to face or up to 100% online.

BIOL 303L Human Biology Laboratory I

Credit – 1

The laboratory experiments were design to enable students to learn human anatomy and physiology in a whole manner. Each laboratory experience and other activities were chosen to encourage students to think for themselves, take initiative and be responsible in their work. Focus on the ethics principles involved in the study of human biology. Offered on-site only.

BIOL 320 Microbiology

Credits – 3

In this introductory course students will study the morphology, taxonomy, ecology and the fundamental characteristics of microorganisms (e.g., bacteria, fungi, algae, protozoa and viruses) physiology. It also explores the basic techniques of enrichment, selection, isolation, enumeration and identification of microorganisms. Also, ethical issues will be discussed and analyzed regarding the management, handling of microorganisms and the application of modern techniques and their impact on health, the environment and the economy. May be offered face to face or up to 100% online.

BIOL 340 Genetics

Credits – 3

Study the principles of genetics at the molecular, cytological, organismal and population level. Study of the structure, function and composition of the genetic material and how it is expressed. Also, the study of the factors responsible for genetic variability and how this promotes evolution. Emphasis in the ethical aspects related to the Human Genome Project, clonation, transgenic research and genetic engineering. May be offered face to face or up to 100% online.

BIOL 350 Biochemistry

Credits – 3

Systematic discussion of biological molecules, such as amino acids, proteins, nucleic acids, carbohydrates, and lipid structures. Characterization, physical properties, and method of isolation of these molecules are studied. The pathways for the degradation and biosynthesis of the major class of biological molecules will be discussed. The bioenergetics aspects of metabolism will be discussed first within the context of the whole catabolism and anabolism, individual pathways and enzymatic reactions. May be offered face to face or up to 100% online.

BIOT 106 Anatomy and Physiology

Credits – 4

This course enables students to acquire the fundamentals of the Biological Sciences focused on the characteristics of matter, the cell, the introduction to human anatomy and physiology and genetics. May be offered face to face or up to 100% online. Contact Hours: 60

BUSI 204 Business Law

Credits – 4

Introduction to legal system. History of law. The Constitution of USA. Origin and development of business law. Sources of legal obligations between parties. Civil, business, and criminal cases. Includes the study of civil and business contracts, their formation and validity. Guarantee contracts, such as: mortgages, bonds, guarantees, pound shops contracts, and conditional sales. Business organizations, such as sole

proprietorships, partnerships, and corporations. Introduction to negotiable instruments', bankruptcy, patents, and copy rights laws. Applicable laws on contracts performed via Internet, the long arm statutes, the digital signature and obligations between parties. Proceedings of federal cases to sue of citizens of other states. May be offered face to face or up to 100% online. Contact Hours: 60

CHEM 191 General Chemistry I

Credits – 3

Emphasis in this course is aimed to the study of the states of the matter, atomic and molecular structures, nomenclature of inorganic compounds, classification of elements in the periodic table, chemical bond, chemical equations and reactions, stoichiometry. The students will learn the basic knowledge of how to maintain safety procedures. May be offered face to face or up to 100% online.

CHEM 192 General Chemistry II

Credits – 3

Emphasis in this course is aimed to the study of intermolecular forces, properties of solids and liquids, solutions: types and properties, way to express concentration of solutions, chemical kinetics, chemical equilibrium, acid-base reactions, thermodynamics and electrochemistry including discussion of oxidation-reduction reactions. May be offered face to face or up to 100% online.

CHEM 224 Fundamentals of General Chemistry

Credits – 3

The course promotes the study of the principles of General Chemistry, designed for students of health-related professions. It includes topics about measurement systems, matter and energy, chemical reactions, atomic and molecular structure, chemical bonds, radioactivity, stoichiometry, solutions, liquid and gas states, chemical equilibrium, chemical kinetics, acids, and bases, organic chemistry, biochemistry, and their application to physiological functions. May be offered face to face or up to 100% online.

CMHC 600 Introduction to Clinical Mental Health Counseling

Credits – 3

This course is an introduction to current practices and trends in the clinical mental health counseling profession. Students will analyze the effects of current issues and public policy on the practice of clinical mental health counseling and examine professional counselors' roles in a variety of health service delivery modalities within the continuum of care. May be offered face to face or up to 100% online.

CMHC 601 Psychopathology and Diagnosis

Credits – 3

This course is a study of abnormal psychological processes across the lifespan including behavior, etiology, symptomology, diagnosis, assessment, and treatment planning. The students are prepared to use the DSM-5 TR and other appraisal measures and tools for understanding and responding to client needs in varying settings. May be offered face to face or up to 100% online.

CMHC 602 Advanced Mental Health Counseling Approaches and Interventions

Credits – 3

This course provides advanced study in the use of empirically supported counseling techniques and interventions used in the treatment of diverse pathologies. Students will learn how to synthesize

diagnostic, case conceptualization, and treatment planning skills while also becoming familiar with best practices for measuring client outcomes. May be offered face to face or up to 100% online.

CMHC 603-A Applied Neuroscience and Psychopharmacology for Counselors

Credits – 3

This course offers a comprehensive introduction to the role and function of the central nervous system in the development and manifestation of psychopathology, with a focused exploration of pharmacological treatment approaches. Designed for mental health professionals, it provides foundational knowledge in psychopharmacology to support informed clinical practice. Students will develop the skills necessary to collaborate effectively with prescribing healthcare providers, enhance treatment outcomes through interdisciplinary coordination, and identify potential adverse drug reactions promptly. Emphasis is placed on integrating biological, psychological, and pharmacological perspectives to support holistic, evidence-based care. May be offered face to face or up to 100% online.

CMHC 603-B Human Sexuality

Credits – 3

This course study sexuality within the broad context of human experience. The student examines a systemic psychosexual approach to development across the lifespan and evaluate the functionality of sexual behavior in individuals, couples, and families. In addition, student explores theory, assessment, treatments, and interventions for various issues associated with sexuality, as well as sexuality-related concerns of diverse populations. Throughout the course, the student is challenged to expand personal awareness of limitations and biases that could impact the therapeutic relationship. May be offered face to face or up to 100% online.

CMHC 604 Counseling Children and Adolescents

Credits – 3

This course provides an in-depth exploration of both theoretical foundations and practical applications in counseling children and adolescents. Students will examine evidence-based approaches for addressing developmental, social, and behavioral challenges commonly encountered in clinical settings. Through the integration of research and practice, the course emphasizes current methodologies for supporting young clients across diverse contexts. Students will develop culturally responsive and developmentally appropriate strategies to foster resilience and promote mental health in children and adolescents. May be offered face to face or up to 100% online.

CMHC 605 Couples and Family Counseling

Credits – 3

This course provides a foundational overview of family systems theory and its practical applications in couples and family therapy. Emphasis is placed on culturally responsive and ethically sound intervention techniques, equipping students with specific tools for conducting effective marriage and family counseling. Through case studies and theoretical integration, students will develop competencies to support diverse family structures and relational challenges in clinical practice. May be offered face to face or up to 100% online.

CMHC 606 Addictions Counseling**Credits – 3**

The course provides an overview of the strategies, methods, and knowledge necessary for the effective identification and treatment of a broad range of addictive behaviors. The course will examine the biological, psychological, sociological, and behavioral components of addiction. As such, the course will focus on such issues as drug effects, assessment and diagnosis, counseling interventions, effects on family functioning and family interventions, relapse prevention, change maintenance strategies, primary prevention programming, and the related research. May be offered face to face or up to 100% online.

CMHC 607 Practicum in Clinical Mental Health Counseling**Credits – 3 (100 hours)**

The Practicum in Clinical Mental Health Counseling is designed to function as the student's first clinical skills-building experience with particular emphasis on helping each student develop his/her therapeutic skills with a range of client presenting concerns within a clinical mental health setting. Candidates are required to complete a supervised clinical experience that totals a minimum of 200 clock hours, including 80 hours of direct client contact. At Clinical/Practicum site.

CMHC 608 Internship I in Clinical Mental Health Counseling**Credits – 3 (300 hours)**

Internship I in Clinical Mental Health Counseling provides a structured and supervised field experience within an approved clinical mental health counseling setting. Designed to bridge academic learning with professional practice, the internship offers students the opportunity to engage in a broad range of counseling responsibilities reflective of those performed by licensed practitioners. Under the guidance of clinical supervisors, students will apply theoretical knowledge, develop clinical competencies, and gain firsthand experience in client assessment, intervention planning, and therapeutic service delivery. The internship requires the successful completion of 300 hours of clinically supervised internship. At Clinical/Practicum site.

CMHC 609 Internship II in Clinical Mental Health Counseling**Credits – 3 (300 hours)**

Internship II in Clinical Mental Health Counseling provides a structured and supervised field experience within an approved clinical mental health counseling setting. Designed to bridge academic learning with professional practice, the internship offers students the opportunity to engage in a broad range of counseling responsibilities reflective of those performed by licensed practitioners. Under the guidance of clinical supervisors, students will apply theoretical knowledge, develop clinical competencies, and gain firsthand experience in client assessment, intervention planning, and therapeutic service delivery. The internship requires the successful completion of 300 hours of clinically supervised internship. At Clinical/Practicum site.

CMHC 610 Comprehensive Exam**Credits - 0**

The exam comprises an evaluation of the theoretical and practical learning the student has acquired through coursework and clinical experiences within the Program. The exam assesses the application of

core components of professional counseling preparation and the mental health specialty. May be offered face to face or up to 100% online.

COHE 201 Healthcare Systems, Policy, & Politics

Credits – 3

In this course, students study U.S. health care systems, health policies, health reforms and implications to infrastructure and in the delivery of health care services. Emphasis is placed on the Affordable Care Act, access to health care, health advocacy, and child health policy. May be offered face to face or up to 100% online.

COHE 202 Health Law and Ethics

Credits – 3

This course explores ethical and legal issues in health care and emphasizes frameworks for conducting ethical analysis (on what basis can you say that a course of action is or is not ethical), the analysis of ethical dilemmas (how do you think about situations in which different ethical precepts collide), and how to deal on a day-to-day basis with the practical issues of ethical behavior. Students will explore compliance, confidentiality, and best practices in health care services; HIPAA and protected health information (PHI); an introduction to electronic medical records, and reporting child abuse and human trafficking. May be offered face to face or up to 100% online.

COHE 203 Introduction to Public and Community Health

Credits – 3

This course covers the foundations of public health and education, including factors associated to health and disease. Emphasis includes the current technical issues and practical obstacles facing community health practitioners and policymakers; surveillance systems and their contribution to disease control; the continuum of individual and community health prevention to intervention in controlling disease, and the role and interactions of biological, psychological, social, and systems factors that affect public health. May be offered face to face or up to 100% online.

COHE 204 Infectious Disease Epidemiology and Prevention

Credits – 3

In this course, students will explore infectious disease epidemiology and its relation to health prevention for control and eradication of diseases from a public health framework. Emphasis is on terminology and application of epidemiology and demography; sources and usage of population data; types of epidemiologic studies; risk assessment; sources of bias in population studies; screening; classification of disease; methods of disease control; outbreak investigation; immunization, and reportable diseases. May be offered face to face or up to 100% online.

COHE 205 Health Disparities

Credits – 3

This course explores health care disparities and related topics such as minority health; access to health services; health disparities research; strategies for Hispanic health engagement and empowerment; community-based participatory research; educational efforts and health equity, and methods for benchmarking progress in minority health. May be offered face to face or up to 100% online.

COHE 206 Community Health Work, Education, and Communications

Credits – 3

In this course, students will review major health education campaigns and develop professional health education skills and frameworks for addressing community assets; patient referrals and resources; community health advocacy; health communication barriers with Hispanic clients; adolescent health programs; best practices for talking with children and teens about health and sexuality; work with children and families with special needs; community outreach; communication techniques; social marketing, and culturally sensitive health issues. May be offered face to face or up to 100% online.

COHE 207 Community Health Education

Credits - 3

This course introduces students to public health and education theories that are applied in health promotion activities, including culturally relevant techniques and strategies. Emphasis is placed on education design; effective health communications; identification and evaluation of local, state, and national resources; community health field methods such as group facilitation; organizing and conducting peer-to-peer dialogues and Spanish language "Platicas"; computer applications in health education, and Hispanic health literacy and strategies for behavioral change at group and community level. May be offered face to face or up to 100% online.

COHE 301 Community Health Leadership

Credits – 3

This course will prepare students for the management and communication challenges of the health education workplace and development of future leadership styles. Emphasis includes creative problem solving; emotional intelligence; diversity; customer service; negotiation; interpersonal communication; conflict resolution; leadership, and influence. May be offered face to face or up to 100% online.

COHE 302 Behavioral Health Education

Credits – 3

This course is designed to introduce students to behavioral health as a foundation for program work and development. Emphasis spans mental health; depression, substance abuse, including drugs, alcohol, and tobacco; the role of culture and mental health; relapse prevention programs; domestic and other types of violence; mandatory domestic violence reporting; psychosocial, environmental, and biological influences on violent behaviors; youth gangs and intervention programs; interactions among drugs, alcohol, and violence; family violence; violence prevention and intervention strategies; infant and early childhood mental health issues, and human stress management. May be offered face to face or up to 100% online.

COHE 303 Trauma and Psychological Perspectives

Credits – 4

In this course, students examine the fundamentals of trauma and psychological perspectives in the field of public health, health education and wellness promotion. Emphasis is placed on epidemiology; Post-Traumatic Stress Disorder (PTSD) and other anxiety disorders; emotional and psychological trauma; eating disorders; Dissociative Disorders (DD), as well as the interrelationship between culture and victims of violence. May be offered face to face or up to 100% online.

COHE 304 Instructional Methods and Culturally Competent Community Health Work

Credits – 3

This course will offer students an overview of different types of instructional methods and cultural values, beliefs, and issues that enhance and affect diverse group communications. Emphasis is placed on culturally competent client-centered health education communications; assessment of needs, assets,

and available resources for effective interventions and health program design; the relationship that culture plays in the health and wellness of individuals and the community in which they live; fundamentals for developing linguistically and culturally relevant health education and prevention information and programs, and identification and evaluation of Internet resources that intersect with culture and health. May be offered face to face or up to 100% online.

COHE 305 Assessment, Planning, and Evaluation of Health Programs

Credits – 3

In this course, students are exposed to the substantive and procedural aspects of assessment, planning, and evaluation for health program management. Emphasis is placed on community needs assessment; barriers, beliefs, and values impacting health programs in specific populations; development, coordination, and evaluation of health programs; collection and analysis of data for research, reporting, and continuous learning; PDCA; adaptation of health education programs for specific populations, and evaluation of program outcomes in minority communities. May be offered face to face or up to 100% online.

COHE 306 Human Sexuality and Reproductive Health

Credits – 4

In this course, students will examine the fundamentals of sexuality and reproductive health within the context of public health as a key area in the protection of individual health status as well as society. The course will focus on basic aspects of human sexuality, reproductive health, teen pregnancy, violence and abuse in humans, maternal mortality related to pregnancy and childbirth, contraception and abortion, sexually transmitted infections (STI), cancer associated with STI, and prostitution and pornography. The course also highlights the role of the community specialist and his value as a leader in the search, together with communities, of solutions on important aspects of sexuality and reproductive health. May be offered face to face or up to 100% online.

COHE 401 Health Promotion and Disease Prevention I

Credits – 3

This course exposes students to the contributions of health promotion to a healthy life; the different models and approaches to health promotion; the relationship between health promotion and health education; explore the Ethical and political values in health promotion; strategies and interventions to promote health and different settings in which health promotion interventions take place towards positive health and well-being. May be offered face to face or up to 100% online.

COHE 402 Health Promotion and Disease Prevention II

Credits – 3

This course is the continuation of the Health Promotion and Disease Prevention I course. In this course, we will study the process of diseases and chronic diseases that prevail in communities. We will also use the different models, approaches to health promotion as well as the strategies and interventions learned previously, and we will use them as tools in health education activities for the prevention of diseases in communities. May be offered face to face or up to 100% online.

COHE 403 Community Health Research Design

Credits – 3

Community health professionals require a sophisticated understanding of research design in public health. The Community Health Research Design course is focused on integration knowledge through the

development of an individual student research project proposal spanning design, data collection, analysis, and reporting components. May be offered face to face or up to 100% online.

COHE 404 Field Experience Community Health Services

Credits – 6 Credits

This is an integrative field experience course, which helps to fulfill the student's academic performance as a Community Health professional; it also provides a combination of work experience and an opportunity for the application of classroom theories based on health education core competencies. The student is required to work as an intern for 160 hours at a health care organization directed by an approved site supervisor, who as a capable practitioner, will engage the student in preventive health activities and health management in order to gain experience and exposure in the community health field. This experience is designed so that the student can be able to put into practice application of core health education skills, tools, knowledge to the workplace and to test their understanding of core community health program competencies. The field experience hours may be earned in a number of ways, including substantive contributions to projects, community health interventions, observations of the practice, group initiatives and off-site planning and preparation as approved by the site supervisor, field experience facilitator and coordinator. The student is expected to be trained in core competencies during this field experience. At Clinical/Practicum site.

COHE 405 Certified Health Education Specialist (CHES) Certification Preparation

Credits – 3

The Certified Health Education Specialist Certification Preparation course offers students a general review the NCHCE Framework: Seven Areas of Responsibility to guide them in preparing for the CHES certification examination. May be offered face to face or up to 100% online.

COIS 101 Introduction to Computers

Credits – 3

In this course, the student will gain knowledge of computer uses, concepts and terminology. Students will explore the role of computers in different settings, professional ethics, hardware, software and fields. The course will cover computer applications such as file management, Microsoft Office Suite, Internet research and email. May be offered face to face or up to 100% online. Contact hours: 45

COIS 110 Introduction to Information Systems

Credits – 4

Introduction to system concepts, information technology and DBMS software. It covers how information is used in organizations and how information technology improves the operations of the organization. Students are provided with solid grounding in business uses of information technology in a rapidly changing environment, and discussion about critical issues surrounding the use of IT in organizations is provided. May be offered face to face or up to 100% online.

COIS 111 Software Applications for Business Administration

Credits – 3

Study of the fundamental concepts and applications of information systems relating to business. Integration of application programs for business productivity such as: database management system (DBMS), statistical and graphical functions in spreadsheets. May be offered face to face or up to 100% online.

COIS 112 Information System Concepts

Credits – 3

Introduction to system, information technology and DMNS software. It covers how information is used in organizations and how information technology improves the operations of the organization. May be offered face to face or up to 100% online.

COIS 120 Principles of Computing**Credits – 3**

This course teaches the basic principles of computing. The course focuses on learning the key concepts of programming and terminology used throughout all the computing disciplines including information technology, computer science, software engineering, computer engineering, and cybersecurity. Students engage in discussions and assignments that cover a broad range of topics in computing, including career options, professionalism, and personal cybersecurity safety. A scripting language will be utilized to provide students with hands on experience on basic programming concepts. Contact hours: 45. May be offered face to face or up to 100% online.

COIS 121 Introduction to Programming**Credits – 3**

This course introduces students to fundamental programming concepts using the Python programming language. Topics include syntax, variables, data types, dictionaries, lists, input/output, logic and flow, loops, data structures, and functions. The focus is on developing clean, logical, maintainable, and reusable code. Contact hours: 45. May be offered face to face or up to 100% online.

COIS 201 Data Processing Principles**Credits – 3**

Introduction to computerized systems, its uses, and benefits in Business Administration. Study of the basic concepts and technical terms in the field of information systems. The course also provides the opportunity for using applications in word processing, spreadsheets and graphics. May be offered face to face or up to 100% online. Contact Hours: 45

COIS 205 Programming II**Credits – 3**

This course introduces intermediate programming skills and focuses on object-oriented programming. The course will cover topics such as classes, objects, abstraction, methods, method overloading, inheritance and polymorphism, managing exceptions, and using templates. The course includes programming and debugging. Contact hours: 45. May be offered face to face or up to 100% online.

COIS 215 Introduction to Application Development**Credits – 3**

This course develops the skills necessary to create software. It includes software design and the use of a programming language. May be offered face to face or up to 100% online.

COIS 216 Design and Implementation of Desktop Applications**Credits – 4**

Teaches Microsoft Visual Basic programmers, the skills to successfully create and deploy applications and components. May be offered face to face or up to 100% online.

COIS 221 Data Analysis Tools**Credits – 3**

The course facilitates the development of skills to transform data into knowledge and address scientific and cybersecurity challenges. Students will learn to apply data analysis techniques to identify patterns and establish relationships between variables, thereby extracting valuable information using tools such as Excel Pivot Tables and data visualization platforms like Power BI or Tableau. They will gain practical experience with databases and SQL, understanding how to store, retrieve, and query data using relational models. Additionally, the course introduces machine learning within artificial intelligence through hands-on work with tools like RapidMiner, exploring models such as decision trees, association rules, and k-nearest neighbors. May be offered face to face or up to 100% online.

COIS 230 Computer Networks and Architecture

Credits-3

Students investigate the construction and configuration of computer networks and their components. Common architecture models, the OSI model, TCP/IP, the Internet as a distributed network, network protocols, network architecture, and distributed systems architecture. Next students will also evaluate and analyze the essential aspects of hardware and component security including component design, procurement, testing, and reverse engineering. Contact hours: 45. May be offered face to face or up to 100% online.

COIS 242 Operating Systems

Credits-3

Introduction to operating systems. Topics include, device drivers, virtual memory and memory management, file systems, process management, security, current operating systems (Windows, Unix/Linux). Contact hours: 45. May be offered face to face or up to 100% online.

COIS 250- System Analysis & Design

Credits-3

An in-depth exploration and analysis of systems and software design methodologies. Topics will include agile, scrum, DevOps, waterfall, SDLC, and others. The focus is on gathering and documenting system and application requirements through visual and narrative means. Students will use various software applications to model and document system requirements. May be offered face to face or up to 100% online.

COIS 304 Concepts of Hardware and Software

Credits – 3

A survey of technical topics related to computer systems with emphasis on the relationships between hardware architecture, system software and applications software. Explores the architecture of processors and storage systems and its implications for systems software design are covered including their impact on the development of application programs in the business environment. May be offered face to face or up to 100% online.

COIS 312 Design and Implementation of Distributed Applications

Credits – 3

Basic principles of how to build three-tier client/server solutions. Designed for Microsoft Visual Basic programmers, who currently build distributed applications that access corporate databases. May be offered face to face or up to 100% online.

COIS 320 Architecture Solutions

Credits – 3

This course provides the student with the basic skills necessary for the analysis, design and development of information systems. The students will learn how to develop logical and physical database models. It includes database modeling, Structured Query Language (SQL), and database administration. It also includes basic concepts on project management. May be offered face to face or up to 100% online.

COIS 330 - Database Management System

Credits – 3

Provides a solid foundation in the design, development, and use of modern database systems and servers. Databases form the foundation of data-based applications, and their design directly impacts application performance. The course emphasizes developing schemas for relational databases, database theory and architecture, data modeling, normalization, and storing and retrieving data through an in-depth exploration of SQL. Students also explore the differences between database types such as relational, data warehousing, data marts, and cloud-based database systems. Students also explore advanced database topics including transaction processing, storage, indexing, and database configuration. May be offered face to face or up to 100% online.

COIS 334 - Legal and Ethical Issues in Computing

Credits – 3

This course explores the legal, ethical, and social responsibilities related to computing technologies, including systems, networks, AI, and automation. It examines the interplay between technological innovation, regulatory frameworks, and ethical decision-making. Key topics include intellectual property, software licensing, professional ethics, system failures, AI governance, algorithmic bias, and ethical hacking. Through case studies, professional codes of ethics (ACM, IEEE, ISACA), and landmark legal rulings, students analyze issues like digital surveillance, data ethics, misinformation, and the impact of AI in the workplace, emphasizing responsible and ethical innovation. May be offered face to face or up to 100% online.

COIS 408 Topics in Information Systems

Credits – 3

This course provides students with previous programming language knowledge, tools to develop desktop applications in C++ language with an emphasis on programs that solve problems in the business world. May be offered face to face or up to 100% online.

COIS 411 Database Development

Credits – 3

It provides basic skills relating to the design and development of database systems. Students will learn about database system analysis, modeling techniques and database development strategies. May be offered face to face or up to 100% online.

COIS 412 Networking

Credits – 3

Provides the background necessary to understand technology for local area networks (LANs), wide area networks (WANs), and the Internet. May be offered face to face or up to 100% online.

COIS 421 - Advanced SQL Programming

Credits – 3

This course provides an in-depth exploration of advanced SQL programming using Microsoft SQL Server and Transact-SQL (T-SQL). Students develop expertise in creating and managing complex database objects

such as stored procedures, user-defined functions, views, triggers, and indexes. Topics include dynamic SQL, transaction control, error handling, and performance tuning. Emphasis is placed on secure database design and implementation, including access controls, input validation, and mitigation of SQL injection vulnerabilities. Students also use SQL Server Management Studio (SSMS), SQL Server Profiler, and other Microsoft tools to work with real-world data and simulate enterprise-level database operations. Practical, hands-on projects reinforce concepts of data integrity, security, and auditability in modern database systems. May be offered face to face or up to 100% online.

COIS 424 Web pages and E-Commerce

Credits – 3

This course develops the skills necessary to design, create, implement and maintain electronic web pages. Include experiences with web page designing tools, database management, and transactions processing. May be offered face to face or up to 100% online.

COMM 140 Effective Communication

Credits – 3

Effective Communication is designed to help students develop communication skills necessary for the workforce. Through case studies, students will analyze and discuss the appropriate methods of communicating based on the situation. Students will be required to utilize presentation software to communicate a topic to the class. May be offered face to face or up to 100% online.

COMM 141 Effective Communication

Credit – 4

Effective Communication is designed to help students develop communication skills necessary for the workforce. Through case studies, students will analyze and discuss the appropriate methods of communicating based on the situation. Students will be required to utilize presentation software to communicate a topic to the class. Include a presentation lab. May be offered face to face or up to 100% online.

COMM 205 Communication Theory

Credits – 3

Study of the communication concept, paradigms of human communication and functions of so-called media. Study and analysis of media effects theories and mass communication theories. In addition, analysis of organizational communication, its features, functions and key components, as well as contemporary theories of the New Technologies of Information and Communication (NTIC). May be offered face to face or up to 100% online.

COMM 206 Communication Theory

Credits – 4

Study of the communication concept, paradigms of human communication and functions of so-called media. Study and analysis of media effects theories and mass communication theories. In addition, analysis of organizational communication, its features, functions and key components, as well as contemporary theories of the New Technologies of Information and Communication (NTIC). 15 hours of research lab are required. May be offered face to face or up to 100% online.

COMM 210 Legal and Ethical Aspects of Communications

Credits – 3

This course places emphasis on the analysis of the legislation, regulation and jurisprudence applicable to the communications medium of the country. This course also focuses on the professional responsibility of communications. May be offered face to face or up to 100% online.

COMM 211 Legal and Ethical Aspects of Communications

Credits – 4

This course places emphasis on the analysis of the legislation, regulation and jurisprudence applicable to the communications medium of the country. This course also focuses on the professional responsibility of communications. 15 hours of research lab are required. May be offered face to face or up to 100% online.

COMM 212 Development and Management of Media Enterprises

Credits – 3

This course provides students basic skills in the development and management of a company in the field of communications. Historical and theoretical aspects are studied, and the development of strategies for the audiovisual industries. May be offered face to face or up to 100% online.

COMM 230 Fundamentals of Journalism

Credits – 3

The course studies the main theories about the origins of journalism, it's current concepts and purposes. The essential elements of codes of ethics, law and media, digital journalism, as well as different journalistic genres are also addressed. May be offered face to face or up to 100% online.

COMM 240 Interpersonal Communication

Credits – 3

Interpersonal communication examines perception, interactions and stereotypes found in daily business communications. Students will learn how to assess communication by separating fact and myth statements as well as how to communicate across gender, race, culture and modality. May be offered face to face or up to 100% online.

COMM 305 Writing and Style in Journalism

Credits – 3

The course studies the definition and structure of the news story, and its value and importance. The basic techniques for writing, interviewing and editing are also addressed. May be offered face to face or up to 100% online.

COMM 307 Writing for Communication's Media

Credits – 3

Study of the theoretical principles and the technique of scriptwriting for radio, television and cinema. Emphasis on television programs, television spots and dramatic scriptwriting by considering the structure and format of the script. Writing of scripts for short films, spots, documentaries and other communication devices. CELTX will be used for the correct script format for applications pertaining to the cinema and WORD for other media (as television, documentaries and spots). May be offered face to face or up to 100% online.

COMM 311 Photojournalism

Credits – 3

Study of the digital still photography camera and introduction to the digital moving image camera. Presentations of the technical aspects of photography. Technical consideration of depth of field, composition and perspective in the construction of the photograph. Introduction of the principles still photography and those of the moving image camera. Study of the main areas of photojournalism. Introduction of the technical aspects of data transference from the digital camera (of the still and moving image camera) to the computer. Presentation of basic skills of photographic retouching and study of the principles of a photographer's ethic in relation to photojournalism. May be offered face to face or up to 100% online.

COMM 320 Introduction to Public Relations

Credits – 3

The study of concepts, features, functions, and other components of the public relations as well as their interrelations with the media and other communication disciplines and / or marketing. Ethics and social responsibility and the main concepts of public relations in organizations are discussed, including crisis management and resolution and public relations planning. May be offered face to face or up to 100% online.

COMM 325 Introduction to Advertising

Credits – 3

The study of advertising concepts, functions and other components, ethics and social responsibility, and the relationship between advertising and other communication and/or marketing disciplines. Critical analysis, planning and creation for advertising is addressed including Internet advertising as well. May be offered face to face or up to 100% online.

COMM 330 Design and Publishing of Electronic Pages

Credits – 3

In this course, students will develop the appropriate skills and knowledge to design and publish web pages. The first part of the course will teach the nature of the cyber network and its interaction with the world of communications, especially journalism. The second part foresees an ample exercise of design and publishing web pages on the internet, and the discussion and analysis of the publications made by students and digital media. May be offered face to face or up to 100% online.

COMM 380 Principles of Radio

Credits – 3

This course will study the radio as a social communication medium: its social and historical context, and the theoretical and practical aspects. Radio programming, strategies for programming and the basic equipment for radio broadcasting are also addressed. May be offered face to face or up to 100% online.

COMM 385 Radio Production and Direction

Credits – 3

This course develops knowledge in the use of audio equipment. Concepts such as: recording and mixing music, multi-level recordings, the creation of scripts for educational, news, and variety programs; and the preparation of commercial and public service announcements and advertising- will be presented and analyzed in class. May be offered face to face or up to 100% online.

COMM 390 Strategic Media Planning

Credits – 3

Theoretical and methodological foundations of strategic media planning in advertising are studied as well as the market and its components. Students will elaborate, with the guidance of the professor, a strategic media plan for advertising presenting at least one of the methodologies used for design, implementation and evaluation. May be offered face to face or up to 100% online.

COMM 400 T.V. Principles

Credits – 3

Study of television as a means of communication. Study of the basic concepts of "Television Studies" as are the television text, the nature of televisual language, the televisual sign, television audiences and the history of television as a communication means. Introduction of television production basic concepts in and/or outside the studio. Basic study of the computer in the process of television production. Basic Study of television locution and speech. Study of the skills for the creation of televisual scripts and proposals. May be offered face to face or up to 100% online.

COMM 420 Writing for Public Relations

Credits – 3

The course studies the definition and structure of the most used texts in the field of public relations, including press releases, blogs, speeches, social networking, press kits and handbook for crisis management. The basic techniques for writing and editing are also addressed. May be offered face to face or up to 100% online.

COMM 430 Journalism Workshop

Credits – 3

This course comprises an advanced journalism workshop. At the end of the course, students will be able to understand the meaning and be able to write news articles, investigative reports, chronicles, and conduct interviews. May be offered face to face or up to 100% online.

COMM 435 Crisis Communication in Public Relations

Credits – 3

Study of fundamental theories of crisis communication as well as the essential elements and the relationship between organizational crisis and media and leadership in crisis management. They will also study historically relevant cases, the communication management of organizational crisis and crisis management of these different types of responses. A plan of prevention and crisis communication in organizations is developed. May be offered face to face or up to 100% online.

COMM 440 Public Relations Campaigns

Credits – 3

Analysis of cases of public relations in organizations. Diagnosis of public relations in organizations, and using this as a basis, students will undertake the design, implementation and evaluation of Public Relations campaigns, with the advice of the professor. May be offered face to face or up to 100% online.

COMM 445 Advertising Campaigns

Credits – 3

Analysis of cases of advertising in organizations. Diagnosis of advertising in organizations, and using this as a basis, students will undertake the design, implementation and evaluation of advertising campaigns, with the advice of the Professor. May be offered face to face or up to 100% online.

COMM 455 Integration Seminar May be offered face to face or up to 100% online.

Credits – 3

Comprehensive, theoretical, conceptual and communicational analysis approach from the perspective of public relations and advertising. This course allows application of knowledge, skills and abilities acquired in previous courses in order to improve the effectiveness and efficiency of communication plan or strategy. Emphasis is placed on research as an essential element, linked to new trends in the discipline of study. The course is based on the analysis of case studies and research. May be offered face to face or up to 100% online.

COMM 510 Contemporary Theories of Communication**Credits – 3**

Study of concepts, models and communication epistemology and the history of the theories of communication as foundations of contemporary communication. Application of contemporary paradigms of theories of communication to the communication disciplines. Study of the principal theories of communication in organizations and analysis of applications of the theories studied in multimedia journalism and / or public relations. May be offered face to face or up to 100% online.

COMM 511 Development and Management of Media Enterprise**Credits – 3**

The course provides students with the theoretical frameworks on management of mass media; organization and behavior of firms (newspapers, magazines, radio, television, film, music); industry analysis and market structure, and business challenges presented by the Internet and media convergence. May be offered face to face or up to 100% online.

COMM 512 Legal and Ethics Aspects of Communications**Credits – 3**

The course addresses the relationship between law, ethics and communications in the context of the Information Society. The course presents the theory about information rights, intellectual property and communication rights. May be offered face to face or up to 100% online.

COMM 515 Research Methods in Communication**Credits – 3**

Study of scientific knowledge and research and its applications to communication sciences. Analysis and application of different types of communication research. Development of the theoretical framework for communication research. Study of the quantitative and qualitative communication research, and the design and implementation of these techniques. Analysis of the concepts of universe, reliability and representativeness of the samples. Application of different methodologies to conduct communications research. Design of communication research projects, principally in multimedia journalism and public relations. May be offered face to face or up to 100% online.

COMM 517 Communications and New Media**Credits – 3**

Study of the concepts of globalization, the information society and that of the postindustrial society as the social context of the new media. Study of the INTERNET as a communication's new media and of postmodernism as the cultural logic of the information society, its postindustrial expression, globalization and the new media. Presentation of the history of the society of information and the turn of the XX Century as the catalytic of the new media and its cultural and social logics. May be offered face to face or up to 100% online.

COMM 520 Advanced Writing for the Media**Credits – 3**

The course studies the particularities of traditional and new media and its impact on writing for the media. The new demands in the digital era are also explored. The course studies the structures for news, press releases, speeches and messages for social networking. It also discusses the changes in the distribution and consumption of these products by the audience. May be offered face to face or up to 100% online.

COMM 530 Identity and Corporate Image**Credits – 3**

The course studies the components of identity and corporate image, as well as steps for the development of the brand that distinguishes the organization. The socio-historical development of the image, identity, and reputation is analyzed, as well as its evolution in the digital age. The interaction of the different disciplines that impact and collaborate in the process of building corporate identity and image is studied. May be offered face to face or up to 100% online.

COMM 531 Strategies for Public Relations**Credits – 3**

The course studies the strategies and techniques for public communication. Also analyzes the platforms that exist to disseminate and project messages and efforts of the organizations, their advantages and disadvantages. May be offered face to face or up to 100% online.

COMM 535 Crisis Communication**Credits – 3**

The course studies the public relations crisis experienced by organizations. Also, analyze the causes and steps to create a communication plan to run during crisis and how to learn from past crisis. The course also studies strategies to prevent crisis, including the use of digital platforms as part of the plan. May be offered face to face or up to 100% online.

COMM 537 Strategic Communication in Public Relations**Credits – 3**

The course studies the components for the development of a strategic communications plan for an organization, using research and selecting targets and precise tactics to various audiences, including the media. Also studies how to identify a spokesperson for the organization as well as the skills necessary to be an effective communicator for the entity. May be offered face to face or up to 100% online.

COMM 538 Strategic Management of Public Relations and Digital Convergence**Credits – 3**

Study of the components of public relations and digital convergence. Audits of public relations as a basis for conventional and digital strategic direction. Application of digital techniques and traditional communication in public relations. Design and development of a strategic public relations plan, with emphasis on digital convergence. May be offered face to face or up to 100% online.

COMM 543 Journalism and Public Affairs**Credits – 3**

This course studies the media coverage of public policies of the government. Also studies the Constitution and the political and democratic development. Explore the current challenges for the reporter who covers government sources. May be offered face to face or up to 100% online.

COMM 550 Project**Credits – 3**

In the course, students will conduct a research project according to their specialty area (Multimedia Journalism or Public Relations), integrating the knowledge, abilities and skills acquired at the University during their graduate studies. May be offered face to face or up to 100% online.

COMM 750 Communicology: Current Trends**Credits – 3**

New conceptions are addressed in the study of effects: long-term effects, cognitive and cumulative effects. Sociology of knowledge as a fundamental theoretical basis. The social construction of reality. The hypothesis of agenda-setting, thematization, the spiral of silence, the theory of cultivation and the knowledge gap. Relationship of effects with communicative production processes. Involuntary distortions and criticism of the concept of objectivity. Reflections on communication and culture, on the social impact of new technologies. From the digital divide to cyberculture studies. Applications for new communication practices: Internet uses and digital journalism, and main trends in the study of Internet uses. Analysis of changes in the status of the issuer and receiver. May be offered face to face or up to 100% online.

COMM 755 Educational and Community Communication**Credits – 3**

Debate around the field of communication-education relations. Fundamental trends that have generated areas of study for the interpretation of the relationship: Education for communication, Communication in education and education and new technologies. Education for communication. Trends: Reading or receiving criticism; Television Literacy (Total Language); Active reception. Elements of a Communication Education program: The subject of Communication Education programs. Education for communication and the challenge of new technologies. The search for "civil society" for alternatives of political and social participation. Displacement of the traditional teacher-student relationship as the axis of the educational process. The media. Community spaces. Communication and human development. Communication and education models. The community is a transformative workspace. Communication and community development. Culture in community transformation. Participation in community development. Educational communication strategy. May be offered face to face or up to 100% online.

COMM 760 Digital and Hypermedia Communication**Credits – 3**

Contemporary technological developments in communication and information. Technological convergence processes. Methods or procedures for writing, designing or composing content that integrates media such as text, image, video, audio, maps, and other emerging information media, so that the result obtained also has the possibility to interact with users. Socio-economic and cultural contexts that accompany these technological developments. Changes in the social use of information and the value of knowledge. Practical implications for the work of communicators. Interpretations of the cultural and social impact of new technologies. Uneven development of these technologies. Strategies to successfully address the challenges posed by the mode of information development. Digital platforms as mediators of contemporary communicative processes. May be offered face to face or up to 100% online.

COMM 765 Psychology of Communication**Credits – 3**

Advanced study of the psychological processes involved in human communication. The theories, models, and research methods that explain how people perceive, process, and transmit information in a variety of interpersonal, group, and media contexts are explored. Psychological theories of communication are analyzed and applied to real situations, evaluating the impact of different forms of communication on human behavior and proposing interventions that optimize communication in various environments. May be offered face to face or up to 100% online.

COMM 770 Ethics and Legislation in Communications

Credits – 3

The ethical principles and legal framework that regulate communication practices in various media contexts are examined. Critical analysis of the norms and laws that affect the production, distribution, and consumption of communication content is addressed, both in traditional and digital media. The course explores topics such as freedom of expression, privacy, intellectual property, censorship, and the social responsibility of communicators. In addition, contemporary ethical dilemmas and case studies that illustrate legal and moral challenges in the field of communication are discussed. Ethical and legal considerations are integrated into research and professional practice in communications. May be offered face to face or up to 100% online.

COMM 820 Strategic Communication Planning

Credits - 3

Strategic communication planning as a systematic, dynamic and continuous decision-making process for resource management and evaluation of results oriented to the achievement of organizational objectives and as a fundamental tool for the design, implementation and evaluation of projects. The Strategic Communication Plan is designed as a means of achieving organizational strategy and not as an end. Main stages of strategic communication planning, according to various authors: Training Research, Strategy, Tactics and Evaluation Research, including various steps: Situation Analysis and Communication Diagnostics; Communication objectives; Audiences associated with these communication objectives; Messages to be transmitted to identified audiences; channels, media, actions, activities or tactics to be implemented to transmit the established messages to the identified audiences, in order to achieve the proposed communication objectives, and timelines, budget and indicators. May be offered face to face or up to 100% online.

COMM 825 Organizational Communication Management

Credits – 3

Critical analysis of paradigms for communication management in companies and institutions. Diagnosis of Organizational communication. Study of communicative processes in organizations. Image Audit. Image and identity in organizations and their relationship with communication management. Towards a dynamic conception of corporate identity. Approach to the concept of corporate image as an integrative result of business management. Communication management for the strengthening of identity and corporate image. Theoretical and practical fundamentals for proper communication management for the image. Corporate communication programs. May be offered face to face or up to 100% online.

COMM 830 Strategic Communication and Journalism

Credits – 3

Difference between the exercise of the journalistic profession in the media and that which is done in the strategic institutional communication of large companies, governments, ministries and public and private institutions. Journalist's work as a communication stratum. Multi-discipline and interdisciplinarity: social communication, organizational communication, marketing, sociology and audiovisual techniques, among

other contemporary requirements of the relationship of strategic communication-journalism. What does the journalist contribute and what should the journalist learn, in strategic communication? Keys to journalism and strategic communication, in the convergent, contemporary communication scenario. May be offered face to face or up to 100% online.

COMM 835 Digital Communication Strategies

Credits – 3

The theoretical and practical bases of online communication and how these affect the perception of target audiences are analyzed. The knowledge and skills necessary to create, implement and manage effective communication strategies in the digital environment are provided. It includes the current tools, techniques and approaches used in digital marketing, social media, SEO, web analytics and other digital platforms for the promotion and communication of brands, products or services. Strategic plans are developed adapted to the characteristics of each digital platform and the needs of the audience. May be offered face to face or up to 100% online.

COMM 840 Advertising Creation Processes

Credits – 3

The creative strategy in advertising: the elaboration of the strategic concept and the definition of Insight as an element in which the creative phase is realized. Creativity: definition and features. Creativity in advertising. Empirical relationship intelligence-creativity. Essential concepts in the process of advertising creation: Innovation, ideas, ingenuity, originality, invention, research, art, inspiration, impact, talent, imagination, among others. Briefing as a starting point for planning an advertising action. The stages or phases of the advertising creation process and their implementation. Case study. Development of advertising campaigns. May be offered face to face or up to 100% online.

COMM 845 Crisis Communication and Negotiation

Credits – 3

Theoretical foundations of crisis communication and negotiation. Essential elements and relationship between organizational crisis and media. Leadership in crisis management and negotiation. Interpersonal skills necessary for negotiation. How to manage crisis and negotiate in organizations. Types of crisis responses. Study of methodologies for crisis management and negotiations. Study of historically relevant cases, on communication management of organizational crisis and/or negotiations. Crisis prevention and communication plan in organizations. May be offered face to face or up to 100% online.

COMM 850 Public Image and Brand Management

Credits – 3

Individual image and corporate image as perception processes. The public image as an added value of the company. Relationship between image and identity. Some principles for creating the image. The value of the public image as a cultural value judgment. Design of a public image. Interdisciplinarity: communication, semiotics, marketing and psychology, among other disciplines. Audit of the public image. Advantages of a good public image in the company. How to rebuild a deteriorated image. What is Branding? How to manage a brand? Brand promise. Brand attributes. Positioning. Image and brand management. May be offered face to face or up to 100% online.

COMM 855 Audiovisual Communication Management

Credits – 3

An in-depth study of the key aspects of planning, execution and control of communication projects in the audiovisual field is carried out. Through a combination of theory and practice, students will learn how to manage audiovisual production projects in different contexts, from content creation to its distribution and evaluation, with an emphasis on the use of current technologies and emerging trends in digital media. Audiovisual communication strategies will be developed and adapted to different types of audiences and platforms, for the management of communication projects. May be offered face to face or up to 100% online.

COMM 860 Communications Organizations Management

Credits – 3

The course focuses on advanced analysis of management principles and practices applied to communications organizations in a global and dynamic environment. Strategies for leadership, organizational development, financial management, among others, specific to the communications sector are explored. Innovative business models, digital transformation, and innovation management in traditional and digital communications organizations are examined. Through case studies and applied projects, participants will develop skills to lead and direct media and other communications organizations, address operational challenges, and formulate sustainable strategies that respond to changing market and societal demands. May be offered face to face or up to 100% online.

COMM 940 Statistical Methods in Social Sciences

Credits – 3

This course includes basic and advanced statistical techniques used in Social Sciences research in postgraduate studies. Attention is paid to the descriptive, correlative and inferential statistical methodology. Central trend measures, variability and hypothesis tests are discussed and applied. May be offered face to face or up to 100% online.

COMM 950 Communication Research Methodology

Credits – 3

Epistemological debate in Communication research, as an integrative/contiguous discipline of the Social Sciences. The relationship between the positivist, interpretative or phenomenological and critical paradigms. The correlation between paradigm, methodology, methods and research techniques. Communication research as a specific area of social research. Communication research modalities. Communicological research and research to produce communicative actions, strategies and messages. The theoretical-methodological aspects of quantitative and qualitative research will be reviewed and the application in Communication. The research process: structure and stages. Methods and techniques of research in communication. The processing and analysis of information. Preparation and presentation of the research report. May be offered face to face or up to 100% online.

COMM 960 Quantitative Research Methods in Communication

Credits – 3

Quantitative research in Communication. Design of communication studies using appropriate quantitative methods. Design of surveys, questionnaires and other types of quantitative techniques. Sampling and sample selection. Basic statistical methods for data analysis. Analysis and interpretation of quantitative results using statistical tools. Development of critical skills to conduct and evaluate quantitative research in the field of communication. May be offered face to face or up to 100% online.

COMM 970 Qualitative and Mixed Research Methods in Communication

Credits – 3

Qualitative research in Communication: Qualitative data collection techniques: interviews, focus groups, participant observation, among others. Content analysis and thematic analysis. Analysis and interpretation of qualitative results. Development of critical skills to conduct and evaluate qualitative research in the field of communication. Reflexivity and ethics in qualitative research. Mixed Methods: Combination of quantitative and qualitative approaches in research projects. Mixed research design. Advantages and challenges of mixed methods. Application of various research methodologies to analyze communicational phenomena and development of research projects that address questions of interest in the field of media, organizational communication, political communication, digital communication, among others. May be offered face to face or up to 100% online.

COMM 980 Dissertation I

Credits – 3

This course will help students to prepare a well-structured and critical literature review for their dissertation. Students will select the topic, analyze the previous research about the topic, and develop research questions and objectives for their own doctoral-level scholarly research. Students will review appropriate thematic literature related to the dissertation topic. May be offered face to face or up to 100% online.

COMM 985 Dissertation II

Credits – 3

Students on this course will develop a doctoral-level dissertation on a topic of interest. The dissertation is completed with the guidance of a chair and committee members, and weekly meetings with the chair and committee members are required. Students complete the Institutional Review Board approval if needed, collect and analyze data, and write the chapters of the dissertation. At the end of the course, students will conclude the dissertation process by presenting an oral defense of their dissertation. Students can enroll in this course until the successful completion of the dissertation for a maximum of 4 times. May be offered face to face or up to 100% online.

COMP 110 Computers and Software

Credits – 3

This course introduces students to the current technologies so that they become technologically competent and computer literate. Emphasis is placed on fundamentals and terminology to provide students with working knowledge of operating system use, file management, and security. Students will use the internet as a research and communication tool and apply software to demonstrate fundamental computer skills for personal, academic, and business use. May be offered face to face or up to 100% online.

COMU 203 Audiovisual Communications Media I

Credits – 3

Study of film language as the principal instrument of the communicative expression of cinema, video and multimedia. Study of the major film language categories as they are related to narrative, style, film form and meaning. Study of the history of film language in relation to the idea of film as art and those of poetic and prose expression in film, video and multimedia. Presentation of postmodernism as a context in which the nature of film language ought to be contemporarily thought. Understanding of the role of professional communications personnel within the history of the language of cinema. May be offered face to face or up to 100% online.

COUN 500 The Counseling Profession

Credits – 3

Overview of the philosophy, basic historical foundations, organization, administration, roles, and specific traits of counselors in various work settings. May be offered face to face or up to 100% online.

COUN 501 Ethical, Legal, and Professional Issues in Counseling**Credits – 3**

In this course, the student will examine the application of ethical standards and legal issues in the Mental Health Counseling profession as well as other counseling professional activities. May be offered face to face or up to 100% online.

COUN 502 Theories of Counseling and Psychotherapy**Credits – 3**

The purpose of the theories and psychotherapy course is to provide the student with a general perspective on the basic therapeutic differences. During the course, the essential theories of counseling practice will be analyzed with a focus in general, practical, and ethical areas. At the end of the course, the student will be able to apply a case based on the theories: Psychoanalytic, Adlerian, Existential, Person-Centered, Behavioral, Cognitive-Behavioral, Reality Therapy, Family Systems, Feminist, and Postmodern. The theoretical basis will help the student to develop different perspectives when choosing the best therapeutic decision according to the needs of their client. May be offered face to face or up to 100% online.

COUN 503 Research Methods and Statistics**Credits – 3**

This course introduces applied research methods including qualitative, quantitative, and mixed-methods research designs. Students will develop skills related to formulating research questions, program evaluation, and utilizing research professionally. This course addresses knowledge and skills for becoming critical consumers of research in educational and clinical mental health settings and clinical counseling settings. May be offered face to face or up to 100% online.

COUN 504 Human Growth and Development**Credits – 3**

The course is designed to broaden understanding of human growth and development across the life span with emphasis on the interwoven domains of development (biological, neurological, physical, cognitive, social, and emotional) and the contextual factors influencing each. Theoretical, practical, and research perspectives will be examined as they apply to the profession of counseling. May be offered face to face or up to 100% online.

COUN 505 Counseling and Advocacy with Diverse Populations**Credits – 3**

This course introduces the theory, research, and models that inform ethical and culturally competent counseling and social justice advocacy in various settings. The students assess how biopsychosocial characteristics and concerns of diverse populations impact access to and utilization of community-based resources, optimal development across the lifespan, and equity. The students also present strategies to address their heritage, attitudes, beliefs, and acculturative experiences in the counseling process. In

addition, students identify effective counseling and advocacy strategies with diverse individuals, couples, families, and groups and explore the role of the counselor and advocate in promoting social justice at multiple levels. May be offered face to face or up to 100% online.

COUN 506 Theories and Counseling in Career Development

Credits – 3

This course introduces theory, research, and models of career development, methods of developing a career information program; and procedures for providing personal, social, educational, and vocational information through career counseling. May be offered face to face or up to 100% online.

COUN 507 Comprehensive Assessment in Counseling

Credits – 3

This course will introduce the use of comprehensive assessment in counseling. Students will become familiar with various approaches used when conducting comprehensive assessments including, but not limited to standardized tests, projective methods, self-report, behavioral observation, and clinical interviews. Students will also learn how to select, administer, score, interpret, report, and utilize assessment data in a variety of counseling settings. May be offered face to face or up to 100% online.

COUN 508 Communication Skills, Consultation and Collaboration in Counseling

Credits – 3

This course study the core dimensions of counseling practice that include verbal and non-verbal skills aimed at establishing an empathic relationship that facilitates the client's exploration of developmental problems and assists the client's transition to awareness and initiating steps toward change. The theory and practice concerning consultation and management is covered to provide the skills needed for consultation to schools, community agencies, and organizations. May be offered face to face or up to 100% online.

COUN 509 Group Counseling: Dynamics and Practice

Credits – 3

Examines theories of small-group dynamics and membership, and the various roles counselors play in diverse group models, according to the makeup of the group, its setting, and its goals/purposes. Topics include group structure, development of norms, conflict resolution, roles, therapeutic factors and dimensions of group leadership. A significant aspect of this course is found in students' ongoing participation in a group experience. Additional experiential exercises in which students learn group leadership skills are conducted throughout the course. May be offered face to face or up to 100% online.

COUN 510 Crisis Intervention Counseling

Credits – 3

This course is designed to prepare students to respond effectively in critical situations, and to help individuals, groups, and/or families who are experiencing crisis or traumatic events in their lives. Students will learn that crises interventions are founded on theory and be able to apply that theory to crisis intervention techniques. Special attention will be paid to counseling approaches for use with circumstantial and developmental life crisis in the context of recovery orientation. May be offered face to face or up to 100% online.

CPST 400 General Education Capstone**Credits – 3**

This course allows application of competencies acquired in general education courses. Students apply concepts and theories into the construction of a research project as the culminating summative evaluation of General Education Learning Outcomes achievement. This course is based on the analysis of case studies and research. May be offered face to face or up to 100% online.

CPST 401 Program Capstone Course**Credits – 3**

Liberal Arts Capstone provides students with the opportunity to summarize, synthesize, and build upon course work in their undergraduate major area, resulting in a research project. Students in this course will demonstrate their achievement of learning outcomes associated with their major area of study as well as the general outcomes of the Bachelor of Arts degree. May be offered face to face or up to 100% online.

CRIM 100 Criminal Law**Credits – 3**

Students study and analyze the origin, concepts, source, and characteristics of Criminal Law. The course examines Criminal Law as a complex socio-legal phenomenon. The course specifically studies the relevant general principles in the application of current criminal law. May be offered face to face or up to 100% online.

CRIM 101 Constitutional Protections and Civil Rights**Credits – 3**

This course examines the legal, constitutional, and judicial protections and guarantees of citizens, in accordance with Supreme Court decisions. Emphasis will be given to civil rights, the Bill of Rights, and the origins and development of the Constitution of the United States and the corresponding state. May be offered face to face or up to 100% online.

CRIM 102 Criminal Procedures**Credits – 3**

The course is an introduction to the understanding and application of criminal procedures and case law, the beginning of judicial action and its development by stages. Emphasis is given on the rights of the accused. May be offered face to face or up to 100% online.

CRIM 103 Evidence, Case Preparation and Testimony**Credits – 3**

This course covers the rules of the law of evidence and the trial process and starts with a description of the basic elements of civil and criminal litigation. It includes an overview of the Federal Rules of Evidence and the Florida Evidence Code. It illustrates how the rules of evidence are applied in actual civil and criminal practice. The student of Criminal Justice will acquire the basic knowledge about the rules of evidence and how they are applied in the trial process. May be offered face to face or up to 100% online.

CRIM 104 Evidence**Credits – 3**

Study of the evidence rules and their application in criminal cases. Analysis of the evidence presentation techniques in criminal cases and court testimony. Study of judicial interpretations of the rules. May be offered face to face or up to 100% online.

CRIM 107 Introduction to Criminal Justice

Credits – 3

This is an introductory course to the field of criminal justice with an emphasis on studying the origins and the development of the schools of thought in the field of criminology throughout history. The course will provide ample discussion of the various theories that contributed to the development of the scientific field of criminology. The course also focuses on the structure, institutions, and basic functions of the criminal justice system. The course provides an opportunity for the study and analysis of crime in our society, identifying its causes and available options. May be offered face to face or up to 100% online.

CRIM 200 Constitutional Protections and Civil Rights

Credits – 3

This course examines the legal, constitutional, and judicial protections and guarantees of citizens, in accordance with Supreme Court decisions. Emphasis will be given to civil rights, the Bill of Rights, and the origins and development of the Constitution of the United States and the corresponding state. May be offered face to face or up to 100% online.

CRIM 205 Introduction to Criminology

Credits – 3

Study of the criminology field, its development, current status, and areas of specializations. Study of the crime, the offender, and the victims. Study and research of crime statistics. May be offered face to face or up to 100% online.

CRIM 300 Criminal Law

Credits – 3

The course deals with general practices of the criminal code. Topics include types of crimes, penalties, and security measures, as well as comparative study of cases to analyze the elements of crime. May be offered face to face or up to 100% online.

CRIM 300-O General Principles of Penal Law

Credits – 3

Students study and analyze the origin, concepts, source, and characteristics of Criminal Law. The course examines Criminal Law as a complex socio-legal phenomenon. The course specifically studies the relevant general principles in the application of current criminal law. May be offered face to face or up to 100% online.

CRIM 301 Special Laws in Criminal Legislation

Credits – 3

This course examines and analyzes special criminal laws, for example, legislation on minors, domestic violence, and legislation on controlled substances and others. The latter will focus on public health perspectives to the controlled substances abuse problems. Also, the course will review the general principles of criminal law. May be offered face to face or up to 100% online.

CRIM 302 Criminal Procedure

Credits – 3

The course provides an opportunity for the analysis of the various procedural laws that regulate the application of criminal law. Also, the course covers the criminal law judicial process and its stages. Finally, the student has an opportunity to study the constitutional rights available to the accused through criminal investigation and the judicial process. May be offered face to face or up to 100% online.

CRIM 305 Criminal Justice System**Credits – 3**

The course is an overview of the criminal justice system. Topics include a comparative approach to the legal framework, the system's structures, functions, procedures, relations to the other institutions, and its role in democracy. May be offered face to face or up to 100% online.

CRIM 306 Comparative Criminal Justice Systems**Credits – 3**

This course focuses on the comparative analysis of different legal traditions such as civil law and common law. It looks at similarities and differences of legal, correctional, and penal systems throughout the world. Different philosophies of justice, equality, punishment, crime, and crime prevention will be discussed in comparison to those of the United States. May be offered face to face or up to 100% online.

CRIM 310 Photography and Forensic Planimetry**Credits – 3**

Study and application of methods and photography techniques from a forensic perspective. The study of photography as a graphic objective of the condition in which the crime scene is developed. Study of the crime scene with the purpose of establishing conditions for the evidence found. Study of the diagram or sketch that is elaborated in the crime scene. The course also provides an establishment of specific crime motives where the results become favorable to solve criminal cases. May be offered face to face or up to 100% online.

CRIM 320 Criminal Investigation Techniques**Credits – 3**

The course centers on scientific methods of investigation within a legal framework. Case studies are thoroughly analyzed. Observation techniques and evaluation of relevant information will be discussed. Modern methods of locating, obtaining and interpreting information will be presented. May be offered face to face or up to 100% online.

CRIM 325 Juvenile Delinquency**Credits – 3**

The course centers on the definition of the problems of juvenile delinquency. Topics include social, cultural, psychological and legal aspects; causes and prevention; prosecution and treatment of the juvenile delinquent. May be offered face to face or up to 100% online.

CRIM 327 Correctional Programs: Administration Principles**Credits – 3**

The course deals with the principles of the correctional system: philosophy, legal framework and regulations. Topics include structures, functions and procedures in the administration of penal institutions, the parole program, the adult probation system, the classification program, the diagnosis and treatment of inmates. The area of custody programs and treatment of minors is also discussed. May be offered face to face or up to 100% online.

CRIM 335 Ethical Aspects of Justice**Credits – 3**

This course studies the principles and ethical theories that guide the individual decision-making process within the Criminal Justice System. The laws that regulate individual and professional ethical behavior are discussed. This course is carried out by use of conferences and research in jurisprudence. May be offered face to face or up to 100% online.

CRIM 350 The Correctional System**Credits – 3**

This course is aimed to study and analyze the Correctional System of Florida. The students will be exposed to the analysis of the philosophy of society protection and rehabilitation of law offenders. In addition, participants will review the legal foundations, the organization and management of the Correctional System. The study of the main components of the Correctional System will also include the analysis of the penal institutions of the state, and all programs related to the correctional system. May be offered face to face or up to 100% online.

CRIM 360 Criminal Investigation Techniques**Credits - 3**

This course consists of the study, description, and analysis of criminal investigation techniques, including the collection, identification and preservation of evidence at the crime scene, as well as crime solving methodology and procedures. Students will also explore a variety of prevention strategies through the application of the constitutional rights during the investigations. May be offered face to face or up to 100% online.

CRIM 370 Law of Evidence**Credits – 3**

This course covers the rules of the law of evidence and the trial process and starts with a description of the basic elements of civil and criminal litigation. It includes an overview of the Federal Rules of Evidence and the Florida Evidence Code. It illustrates how the rules of evidence are applied in actual civil and criminal practice. The student of Criminal Justice will acquire basic knowledge about the rules of evidence and how they are applied in the trial process. May be offered face to face or up to 100% online.

CRIM 380 Criminalistics**Credits – 3**

An introductory course to forensic science which consists of the study of the most recent scientific techniques for the collection, identification, treatment, and preservation of evidence used in a criminal investigation, as well as the constitutional principles that guarantee due process to an individual in the handling of the various types of evidence during a criminal investigation. Strong emphasis will be given to the importance and use of evidence in a judicial proceeding and in crime solving. May be offered face to face or up to 100% online.

CRIM 400 Criminal Procedure**Credits – 3**

Study of the criminal procedure rules and its application in the judicial process. Analysis of the criminal procedure rules and its relationship with the constitutional rights of the accused. Study of the judicial

interpretation of the rules by the Supreme Court of the United States of America. May be offered face to face or up to 100% online.

CRIM 400-O Human Rights in the Contemporary World

Credits – 3

This course emphasizes the study of the development of the Human Rights concept. It focuses on the knowledge of human rights and their relation to dignity of the human being. May be offered face to face or up to 100% online.

CRIM 405 Multiculturalism and Crime

Credits – 3

The primary focus of this course is the interrelation between diversity and crime. It focuses on the impact of culture on human behavior and the interpretation of right and wrong. In addition, the course analyzes how gender, race, nationality, ethnic origin, religion, and other factors that affects the criminal justice system and the distribution of justice in the United States. May be offered face to face or up to 100% online.

CRIM 415 Evidence

Credits – 3

Study of the evidence rules and their application in criminal cases. Analysis of the evidence presentation's techniques in criminal cases and court testimony. Study of judicial interpretations of the rules. May be offered face to face or up to 100% online.

CRIM 415-O Evidence, Case Preparation and Testimony

Credits – 3

A study of the rules of evidence relating to the judicial process, with emphasis on hearsay and its exception. Students will learn how to prepare an effective presentation of a case before a court, and how to present evidence. Special emphasis will be given to report writing, analysis of legal documents, presentation of testimony, and submission of documents as evidence. May be offered face to face or up to 100% online.

CRIM 427 Therapeutic Jurisprudence and Restorative Justice

Credits – 3

This course studies the impact that laws and legal processes have on the emotional, social, and psychological well-being of offenders and victims. It focuses on alternative methods that help solve legal problems creatively and effectively. Emphasis is given to alternative methods for dispute resolution, restorative justice, drug courts, specialized courts, among other topics. Readings draw from sociology, psychology, criminal justice, counseling, among other disciplines. May be offered face to face or up to 100% online.

CRIM 432 Criminal Technology, Fraud, and Cyber Crimes

Credits – 3

This course aims to familiarize students with the term fraud and its definition in the Penal Code, and offenses in which the term applies to fraud in our criminal justice system. Also, consider the terms for the inhabitants of Cyberspace. Students will learn to apply the form of search and tracking of evidence on computers and digital equipment. The students will learn how to properly identify, preserve, package and present such evidence in a legal setting in consideration of the "Chain of Evidence". It Includes the

study of Federal, State, and International law applied to digital computer fraud. May be offered face to face or up to 100% online.

CRIM 434 Forensic Psychology in the Criminal Justice System

Credits – 3

This course studies the application of psychology to legal proceedings. Integrates different types of psychological analyses to the evaluation of witnesses, evidence, and presentation of evidence in court. Students will learn to use modern techniques of interrogation and psychological interview. They will also apply theoretical knowledge to the evaluation of both victims and offenders. May be offered face to face or up to 100% online.

CRIM 435 Preparation of Cases and Testimonies before the Court

Credits – 3

Study and analysis of procedures stages in the evidence collection process for preparing cases, reports, and presentation of testimony in courts. May be offered face to face or up to 100% online.

CRIM 450 Legal Medicine

Credits – 3

Study of the legal and medical concepts of criminology in the criminal investigation process. Analysis of the forensic and criminological aspects in the legal medicine. Study of cases, theories, and techniques. May be offered face to face or up to 100% online.

CRIM 476 Seminar

Credits – 3

This course is an integration of theory and knowledge and provides an opportunity for students to integrate and apply, laws, methods, principles and procedures of criminal justice through research and analysis of case studies. May be offered face to face or up to 100% online.

CRJU 500 Foundations, Practice and Changes in the Administration of the Criminal Justice System

Credits – 3

Theoretical, judicial and practical principles inherent in the criminal justice system. Students will be involved in problem-solving situations which will permit them to analyze, evaluate and propose alternative solutions to practical administrative problems. May be offered face to face or up to 100% online.

CRJU 520 Philosophy of Punishment

Credits – 3

Meaning on punishment throughout history, theories on its origin, its cultural relativity and dominant philosophies. Students will view the different arguments proposed historically to defend or reject punishment, social protection, and rehabilitation, among others, and the alternative methods of punishment. May be offered face to face or up to 100% online.

CRJU 565 Seminar: Program Design and Evaluation in the Criminal Justice Systems

Credits – 3

Various aspects of administrative programming and evaluation will be examined. The course involves theoretical and research concepts and problems analysis related to programming and program evaluation in the criminal justice system. It also includes design and study of evaluation instruments for police, correctional and criminal justice administration programs. Students will engage in analysis and

management of strategies for operationalizing objectives, decision-making and problem-solving. May be offered face to face or up to 100% online.

CRJU 575 Criminal Treatment and Rehabilitation Programs

Credits – 3

Analysis of the corrective philosophy and existing public policy regarding the rehabilitation of criminals and the relevant legal and constitutional dispositions. It will also analyze the different treatment and rehabilitation programs currently in effects at the various penal institutions in response to public policy. Treatment and rehabilitation models proposed and or currently operating in the United States and other countries; their expectations, findings, and scientific groundings. Students will also look at trends and reforms in rehabilitation programs for inmates. May be offered face to face or up to 100% online.

CRJU 600 Seminar: Crime, Victims and Society

Credits – 3

Analysis of the responsibility of the state in protecting the life and property of its citizens. It will examine the possibility of the state compensating the victim of a crime for damages resulting from the criminal act. It will also look at the doctrine of restitution, compensation for damages by the offender, as part of a sentence intended to alleviate the impact of the damages and as part of the rehabilitation process of the criminal. Policies and practices regarding this issue in other jurisdictions will be comparatively analyzed. May be offered face to face or up to 100% online.

CRJU 630 Organization and Administrative Techniques of the Police System

Credits – 3

Study of the organization and administration of then police force. Emphasis is given to organizational theory, administrative techniques, procedures, and police administration and supervision programs. It analyzes the alternative objectives, strategies, programs, institutional approaches, roles, perspectives and interagency relations of the police. May be offered face to face or up to 100% online.

CRJU 640 Addiction: Legal and Psycho-Social Aspects

Credits – 3

Study of the medical-legal aspects of drug addiction and alcohol abuse. It includes an analysis of the legal structure, from the framework of state and federal laws in the use and abuse of drugs and alcohol. It also discusses legislation, treatment and prevention programs. May be offered face to face or up to 100% online.

CRJU 715 Seminar: Special Situations in the Administration of Correctional Programs

Credits – 3

The course focuses on an analysis of the correctional scenario including the psychological, administrative, and disciplinary perspectives. Students will explore the subculture of the penitentiary and how it is manifested. This course will focus on themes, situations, controversies, and problems inherent in this scenario, scientific findings, programs dynamics and decisions and legislation which impacts the correctional system. May be offered face to face or up to 100% online.

CRJU 730 Criminality, Crime Control and Criminal Justice

Credits – 3

Critical analysis of criminality from a sociological perspective. Emphasis is placed on the relationship of public policy, the criminal justice administration decision-making process, programs implementation, and evaluation of police participation. Students discuss different strategies and models to reduce crime as

well as the new tendencies toward privatization of criminal justice services. May be offered face to face or up to 100% online.

CTEC 210 Operating Systems, Installation & Configuration

Credits – 3

This course covers all software components comprising a PC. It provides an introduction to every component and analyses its functionalities and weaknesses. It analyses the role of each component in supporting an application and the user functional goal. It presents the PC as a package of matched components and dissects all of its internals individually and integrally. Some of the software components are the operating system and its sub-components, data communications software components, DOS components, peripheral administration components, Windows Systems architecture, disk operating software, essential user applications, memory management software, software upgrades management. It covers in detail software problems. May be offered face to face or up to 100% online.

CTEC 240 Programming for the Web

Credits – 3

This course provides the student with a basic understanding and skills to program for Web Sites. It covers the basics of Data Base manipulation techniques using MySQL and PHP. It covers matters such as configuration for DBA systems on the Web, PHP scripts, performance and error handling. Finally, the students are presented with a live example of a simple Web Based DBA control application. The course then focuses on one of the most important suite development suite/environments today. The Macromedia Dreamweaver. It covers the complete development cycle using these tools from plan to publish and maintenance. Matters such as DreamWeaver workflow, formatting for the Web, cascading style sheets, dimensional tables, forms, frames, templates, layers, animation and others are covered. It also covers Fireworks image and text manipulations, working with objects, effects, creating buttons, backgrounds, hotspots, sliced images, rollovers, integrating Fireworks images with HTML applications and finally auditing and publishing your website and the post-publishing practices. May be offered face to face or up to 100% online.

CYBR 501 Network Security I

Credits – 3

Introduces basic concepts of network security with a strong emphasis on cryptography and cryptographic techniques. Topics to be covered include classical encryption, data encryption standard, advanced encryption standard, symmetric key ciphers, public and private key cryptography and key management. Introduction to number theory concepts needed to understand public key cryptography. May be offered face to face or up to 100% online.

CYBR 502 Computer Security I

Credits – 3

The fundamental tools and techniques for computer security are discussed in the context of the pervasive role and impact that computer technology has over the individual, the enterprise and on society-at-large. Topics covered include computer viruses, operating systems, program security, database security, legal, privacy and ethical issues. May be offered face to face or up to 100% online.

CYBR 521 Network Security II

Credits – 3

Introduces advanced concepts of network security with an emphasis on hashing functions and algorithms and their applications to network security. Topics to be covered include message authentication, digital

signatures, kerberos, electronic mail security, pretty good privacy, s/mime, IP security (IPSEC), secure socket layer (SSL), transport layer security (TLS), wireless security (WEP,WPA,WPA2), intrusion detection systems (IDS), intrusion prevention systems (IPS) and firewalls. May be offered face to face or up to 100% online.

CYBR 522 Computer Security II

Credits – 3

Selected advanced topics in computer security are discussed in the context of the pervasive role and impact that computer technology has over the individual, the enterprise and on society-at-large. Core topics to be covered include penetration testing with Kali Linux which will take up the first half of the course. Other selected topics will vary from time to time and will typically include information assurance, data backup and redundancy, digital rights management, botnets, risk analysis and identity theft. May be offered face to face or up to 100% online.

CYBR 600 Cyber Security Forensics

Credits – 3

Introduction to computer forensics. Overview of evidence acquisition and archiving. Locard's Exchange Principle and the order of volatility (rfc 3227). Preservation of volatile and non-volatile data. Analysis of data files including graphics files, email, executable and non-executable files. Report writing, expert testimony and ethics. Case studies and forensic software tools. Overview of DOS File System. May be offered face to face or up to 100% online.

CYBS 110 Introduction to Cybersecurity

Credits – 3

Provides an introductory overview of the cybersecurity discipline and introduces students to some of the principles, practices, and methods used by cybersecurity professionals in securing systems and networks. This course will cover topics such as security and risk management, asset security, ethical considerations, security assessment, physical and operational security, and best practices. Contact hours: 45. May be offered face to face or up to 100% online.

CYBS 210 Network Security

Credits – 3

This course explores network security principles and management techniques essential for protecting an organization's data and infrastructure. Participants will learn to securely configure web services, file/print services, databases, and communication systems like email and voice services. The course provides hands-on experience in configuring and securing access channels, employing network management services, and understanding their impact on network operability. Event management techniques such as SNMP and Syslog to monitor network availability will be explored. Other areas of focus will be the development and analysis of network documentation, application of physical security methods, backup and recovery strategies, high availability and troubleshooting. The course will also delve into identifying and mitigating various types of cyber threats, employing network hardening techniques, and improving network performance through precise metrics. Contact hours: 45. May be offered face to face or up to 100% online.

CYBS 220- Cybercrime and Cyber Law

Credits – 3

The course is designed to provide students with an in-depth understanding of the legal and regulatory

landscape governing cybercrime and cybersecurity. The course covers a wide range of topics including the definition and types of cybercrime, international treaties, and legal frameworks, data privacy laws, cybercrime legislation, incident response, cybersecurity standards, and the challenges of international cyber law. Through the integration of well-respected resources such as GDPR, HIPAA, FISMA, and industry standards like NIST CSF and PCI DSS, students will gain the knowledge necessary to navigate the complex intersection of technology, law, and security. The course emphasizes practical case studies and current trends, preparing students to address emerging legal issues in cybersecurity. May be offered face to face or up to 100% online.

CYBS 230 Linux System Administration and Security

Credits – 3

Provides an in-depth examination of the core features and functions of the Linux operating systems. Students learn how to install, configure, and maintain Linux-based systems, with a deep focus on the security aspects of the system. The course also covers vulnerabilities, patching and patch management, configuring web servers, access and user management, and typical administration tasks associated with Linux. Contact hours: 45. May be offered face to face or up to 100% online.

CYBS 240-Cybersecurity Risk Management and Compliance

Credits – 3

This course provides students with the knowledge and skills necessary to manage and audit risk and compliance within an organization's cybersecurity framework. The course integrates industry-standard practices from CompTIA and ISACA, providing a robust understanding of risk assessment, data governance, business continuity, critical infrastructure protection, secure software development, and threat and vulnerability management. May be offered face to face or up to 100% online.

CYBS 250 Digital Forensics and Incident Response

Credits – 3

This course provides an overview of the principles and practices of digital forensics and incident response. Throughout the course, students will analyze and apply techniques for performing digital investigations, collecting digital evidence, and protecting the digital chain of custody. Topics also include the limitations of digital evidence, ethical considerations, key laws, policies, and procedures that impact digital investigations, the role of the forensic examiner, and best practices in collecting, preserving, and analyzing digital evidence. Contact hours: 45. May be offered face to face or up to 100% online.

CYBS 260- Applied Cryptography

Credits – 3

This course introduces students to cryptography and cryptographic systems. Topics will include symmetric vs. asymmetric encryption and associated algorithms including DES, Twofish, AES, RSA. Students explore minimum key strength needed to secure electronic communications and transactions, and contrast various trust models in PKI including hierarchical, distributed, bridge, and web of trust. May be offered face to face or up to 100% online.

CYBS 330 - Software and System Security

Credits – 3

This course covers a broad range of software and security topics. The focus is on systems thinking, systems management, and security across software development phases, including design, implementation, and deployment. Topics include software testing, error and exception handling,

patching, documentation, software validation, and ethical aspects of software development, including vulnerability disclosure. May be offered face to face or up to 100% online.

CYBS 350 - Cybersecurity Operations

Credits – 3

This course explores the essential principles and practices in cybersecurity operations, including governance, risk management, security controls, event monitoring, and implementing automated responses. Students will analyze recognized standards such as OWASP, CIS Benchmarks, and MITRE ATT&CK, as well as tools and techniques applied in security operations centers (SOCs). It integrates theory with practical exercises to develop operational skills in cyber threat detection, analysis, and mitigation. May be offered face to face or up to 100% online.

CYBS 370 - Cloud and Mobile Security

Credits – 3

This course trains the student in the fundamentals, operations, and best practices of security for cloud environments. Key concepts of networking, services, access management, security controls, scalability, monitoring, backup, and recovery are explored. The course combines theory with hands-on labs to develop skills applicable to multi-cloud environments and real-world work scenarios. May be offered face to face or up to 100% online.

CYBS 410 - Offensive Security and Ethical Hacking

Credits – 3

This course provides hands-on training in penetration testing techniques. Students will gain practical experience in reconnaissance, enumeration, vulnerability assessment, exploitation, and post-exploitation tactics. Topics include network, web, cloud, and host-based attacks, scripting automation, social engineering, persistence, lateral movement, and data exfiltration. Emphasis is placed on real-world tools, methodologies, and ethical practices used by professional penetration testers. May be offered face to face or up to 100% online.

CYBS 415 - Malware Threat Analysis

Credits – 3

This course provides comprehensive training in malware analysis from an applied technical perspective, combining specialized theory, practical exercises in controlled environments, case studies, and the use of free interactive labs. The student will explore the historical and technical evolution of malware, understand its propagation and evasion mechanisms, and apply professional tools for the static and dynamic analysis of malicious code. May be offered face to face or up to 100% online.

CYBS 420 Analytics & Data Science Methods for Cybersecurity

Credits – 3

This course introduces students to analytics and data science techniques applied to cybersecurity challenges. Using Python and libraries such as pandas, matplotlib, seaborn, and scikit-learn, students explore real-world cybersecurity datasets to uncover patterns, detect anomalies, and support incident response. Topics include feature engineering, time-series analysis, classification, and clustering for threat detection, and visualization of security events. The course emphasizes hands-on labs and projects that simulate threat intelligence, log analysis, and attack pattern recognition. May be offered face to face or up to 100% online.

CYBS 430 - Cybersecurity Seminar

Credits – 3

This course is designed as the final integration component of the program. Its approach prepares the student to assume leadership roles in managing security programs, regulatory compliance, and strategic information governance. The student is exposed to real challenges faced by modern organizations in hybrid and distributed environments. Emphasis is placed on risk-based decision-making, the application of models such as Zero Trust, identity management, critical data protection, and incident response from an organizational point of view. The course will develop skills focused on proposing policies, evaluating security architecture, leading compliance strategies, and communicating technical findings in terms that support executive decision-making. May be offered face to face or up to 100% online.

CYBS 440 - Cybersecurity Trends and Emerging Issues**Credits – 3**

Students examine recent and emerging trends across various areas of cybersecurity. Students examine current threats, explore a variety of new and emerging attack vectors, as well as the implications on people, devices, and domains. Additional topics include AI-driven security tools, ethical considerations, cyberpsychology, examining human behaviors in cybersecurity, social engineering tactics, and the psychological impact of cyber threats. May be offered face to face or up to 100% online.

DESI 121 Drawing I**Credits – 3**

In this studio course students will be introduced to the basic drawing skills required for the representation of objects, figures and spaces. The importance of sketching as a means of recording and demonstrating concepts and processes will be emphasized. Black and white media, in particular pencil pen and marker will be emphasized. The development of fundamental drawing skills and standard manual product illustration skills will be stressed. Contact hours: 45. May be offered face to face or up to 100% online.

DESI 285 Digital Photography**Credits – 3**

This course develops a creative vision of what is the necessary photography composition to apply in the design world. Beginning with the necessary basic knowledge in the photography field and ending in the digital world. The students will work with different digital images formats. They learn how to work with the most useful software in the digital images industry, as a tool for managing and manipulating digital images. Contact hours: 45. May be offered face to face or up to 100% online.

DESI 315 Ethic and Legislation in Design**Credits – 3**

This course introduces students to legal and ethical issues that affect the design. Topics of examination include intellectual property, freedom of expression and contract law. The basic legal issues of contract and property law, within the creative context, will be examined: agreements, copyright, trademark, and patents. Students will learn how to protect their rights, and as importantly, how to lead the legal debate with the identification of legal concepts and terms which applies to the practice of design. In addition, the course will approach other ethical issues: free speech, obscenity, pornography, libel, privacy and their damages. The course will introduce the student to the ability of distinguish poor or good ethical justifications. We will be seeing legacy, moral and ethics principles. Contact hours: 45. May be offered face to face or up to 100% online.

ECED 173 Introduction to Early Childhood /Primary Education**Credits – 3**

This course offers an overview of the field of early childhood and primary education. Aspects such as history, state and federal legislation, public policy, philosophy, programs, curricula and the early childhood profession are analyzed. A proper understanding of the rationale, importance, and objectives of early childhood and primary education in contemporary society and in the next decades are addressed. May be offered face to face or up to 100% online.

ECED 207 Theories of Child Development and Learning**Credits – 3**

The purpose of this course is to introduce the theories, which represent the main standpoints of progressive education. Implications of child development and learning processes on teaching approaches are examined. May be offered face to face or up to 100% online.

ECED 308 Management of the Early Childhood/Primary Education Environment**Credits – 3**

The purpose of this course is to provide a strong foundation on the design, management, and interpersonal relationships within the learning environment. The relationship between the classroom environment and significant learning is addressed. The course provides an overview of early childhood standards as they relate to the learning environment. May be offered face to face or up to 100% online.

ECED 310 Perceptual Motor- Development, Learning and the Brain**Credits – 3**

This course studies the theories on the development of the human brain. It covers current research related to this field. Educational implications of these theories on the processes of child development and learning, as well as their impact on modern pedagogy are analyzed. May be offered face to face or up to 100% online.

ECED 311 Cognitive and Logic – Mathematical Development**Credits – 3**

The purpose of this course is to provide the knowledge and tools to understand the cognitive development – structures and processes - of preschool and primary education children, including logic-mathematical development. This course also provides the knowledge and skills to plan developmentally appropriate instruction and activities in math for children in early childhood and primary grades. May be offered face to face or up to 100% online.

ECED 322 Health, Nutrition and Preventive Medicine**Credits – 3**

This course focuses on the standards related to health, nutrition and creating healthy habits for the well-being of students in early childhood and primary grades. May be offered face to face or up to 100% online.

ECED 329 Nature and Needs of the Exceptional Child**Credits – 3**

This course covers the psychological, social, historical and philosophical foundations of teaching children with disabilities in early childhood and primary education. May be offered face to face or up to 100% online.

ECED 332 Integration and Participation of Family in Pre-K Care Centers**Credits – 3**

This course is designed to develop awareness among future teachers on the importance of the family in the educational scenario of children. It also addresses diversity aspects of families (their beliefs acceptance degree, multiculturalism, gender, respect, socio-economical level, among others) to consider when engaging families to participate in the education of their child or children. May be offered face to face or up to 100% online.

ECED 402 Creative Expression in Early Childhood/Primary Education**Credits – 3**

In this course, students learn how to develop the creative expression of children in early childhood and primary grades. May be offered face to face or up to 100% online.

ECED 405 Language Development in the Context of Reading/Writing**Credits – 3**

This course covers the study of oral and written language development from birth to age eight. Theories and recent research are presented. Students will use planning and instructional delivery models that promote language development with emphasis on phonics, phonological awareness, shared reading and guided reading across different content areas. May be offered face to face or up to 100% online.

ECED 410 Teaching Reading to non-English Speakers in Pre-K-3**Credits – 3**

This course covers the fundamentals of teaching reading and writing to English language learners. It focuses on the development of a comprehensive, balanced literacy program integrating reading, writing, listening, and speaking skills for English language learner who have linguistically and culturally diverse backgrounds and/or other individual needs. May be offered face to face or up to 100% online.

ECED 442 Practice Seminar in Early Childhood and Primary Education**Credit – 1**

This course covers a discussion, analysis, and evaluation of the responsibilities and situations arising in Early Childhood Education and Primary Education Student/Teaching Practice. It is designed to enrich and complement the day-to-day practicum experience as required in the state. This course is taken concurrently with ECED 443 during the last semester of the program of study. May be offered face to face or up to 100% online.

ECED 443 Practicum in Early Childhood (Pre-K) and Primary Education (K-3)**Credits – 3**

This course is the final requirement in the early childhood and primary teacher education program. It is the field experience in which the candidate assumes the duties and responsibilities a teacher performs in a preschool and the primary education environment, as required in the state. It offers students the opportunity to promote physical, emotional, social and intellectual development of children. Students work under the supervision of a certified clinical educator from an accredited school and a college supervisor trained in clinical educator strategies during the last semester of program of study. At Clinical/Practicum site.

ECON 123 Introduction to Economics (Compendium)**Credits – 3**

It provides the student with theoretical and applied knowledge about the fundamentals of economics. The student will learn fundamental principles and theories for micro and macroeconomic analysis. Emphasis on developing application skills in situations and problems faced by public and private companies. May be offered face to face or up to 100% online.

ECON 207 New World Order Economy

Credits – 3

The course includes a diagnostic view of the contemporary economic forces and their social, environmental and political effects. It also includes the fundamental economic perspectives for future societies. May be offered face to face or up to 100% online.

ECON 253 Economic Development of Puerto Rico

Credits – 3

Characteristics and trends in Puerto Rico's economic history, economic structure, agriculture, banking, transportation, communications, industrial development, public policy toward business, and international trade. Emphasis on contemporary ideas, issues, and policies are addressed. May be offered face to face or up to 100% online.

ECON 325 Introduction to International Trade

Credits – 3

Introduction to International Business Systems and their effect on the commercial behavior of countries. Emphasizes the relationships between business enterprises, government, and the financial sectors and their involvement in international business activities. Corporate policies and strategies in global operations. May be offered face to face or up to 100% online.

ECON 363 Global Economic Trends

Credits – 3

Study of the economic, social, population, political, cultural and geographic environment that affects economic development of the nations and regions of the world. Special emphasis on modern economic trends amid diversity. May be offered face to face or up to 100% online.

ECON 400 Managerial Economics

Credits – 3

Analysis of modern theory of the firm and its applications: consumer behavior, price, production, costs, markets and economic efficiency. Allocation of the productive resources and the equilibrium theory. May be offered face to face or up to 100% online.

ECON 401 Macroeconomic Theory

Credits – 3

Determination of national income, price systems, employment, fiscal and monetary policies in economic growth, analysis of expenses, savings, investment and money. May be offered face to face or up to 100% online.

ECON 403 Environmental Economics

Credits – 3

Problems of the environment: pollution, government functions and market techniques to stop pollution. Economic analysis of cost and benefits of environmental quality. Analysis of government control

measures and international efforts to protect the environment. May be offered face to face or up to 100% online.

ECON 420 International Economics and Finance

Credits – 3

The economy and international trade, the international monetary system, balance of payments, trade barriers, commercial policies and international financial institutions. May be offered face to face or up to 100% online.

ECON 505 Business Economics

Credits – 3

Study of the application of microeconomic theory and the tools of analysis of decision sciences to achieve efficient solutions in an organization. In order to understand the dynamics of a business and to project its future operations, it is necessary to understand the nature and mechanisms of economic processes. Microeconomics theory provides tools for analysis that integrate the knowledge of statistics, mathematics, and economic theory. These tools are particularly useful in the decision-making process. May be offered face to face or up to 100% online.

ECON 519 Managerial Economics

Credits – 3

This course studies the use of economic tools in management decision-making to maximize the company's profit. It covers the analysis of demand, income, production, cost, markets, and the relationship between companies and the public sector. May be offered face to face or up to 100% online.

ECON 760 Economic Analysis

Credits – 3

In the first part, basic concepts of international macroeconomics will be discussed. Specifically, topics such as national accounts, balance of payments, exchange rate, capital mobility, monetary policy, and fiscal policy will be explained. The second part of the course will discuss the decision-making under Asymmetric Information and Uncertainty and discuss basic notions of Game Theory. The third part will discuss the Optimization Theory using the Linear Programming. Finally, the fourth part of the course will discuss The Gravity, Comparative Advantage, and Economies of Scale Models. May be offered face to face or up to 100% online.

EDAG 640 Development of Leadership in Education, Theories, and Application

Credits – 3

This course studies the origin and development of the theories and focal points of administrative and general supervision practices. Theories are applied to the complexity of education systems as learning communities. It also covers the general principles that define form and develop leaders and their influence on educational institutions. The course covers the differences between various leadership styles. It also covers the importance of vision, communication, motivation, teamwork, and partnerships with community and stakeholders. May be offered face to face or up to 100% online.

EDAG 641 The Leader and the Learning Communities

Credits – 3

This course analyzes the role of educational as an analysis of the formation and development of leaders in the development of learning communities of educators. It also covers a discussion of the theories and current models of leadership and supervision and includes a comparison and contrast of theoretic

framework. Emphasis on change, interpersonal relationships, collaborating with problem-solving and decision-making is incorporated and applied to real-life scenarios. Students will be involved in the development of a shared educational vision. May be offered face to face or up to 100% online.

EDAG 644 Technology for School Administrators

Credits – 3

This course prepares students to apply technology to the areas of administration, instruction, and educational institutions. May be offered face to face or up to 100% online.

EDAG 650 Human Relations, Organizational Climate and the Learning Environment in Educational Institutions

Credits – 3

This course studies the development and evolution of the framework and theories of human relations and organizational climate. It examines the challenges and trends that affect educational organizations as open systems. It also includes analysis of individual, interpersonal, group and organizational behavior and how this influences performance of effective academic leadership. It differentiates between organizational climate and culture. It covers importance of human resources in organizations and strategies for the development of positive organizational climates. May be offered face to face or up to 100% online.

EDAG 651 Public School Law, Labor Relations, and Ethical Leadership Education

Credits – 3

This course studies the legal aspects, regulations, and legislation developed and approved for education and public and private educational organizations, in the United States. Analysis of labor relations in education, their effects and influences on educational and administrative decision-making are incorporated in the course. Analysis of legal cases and corresponding jurisprudence in the United States are addressed. May be offered face to face or up to 100% online.

EDAG 652 Budget and Financial System Educational Organizations at the School Level

Credits – 3

This course studies the concept, methods, practices, and systems of financing and budget in public and private educational organizations. Analysis of the budget as a useful means to implement educational planning is studied. May be offered face to face or up to 100% online.

EDAG 657 Human Resources Management and Development in Educational Leadership

Credits – 3

This course is designed to introduce students to the area of school personnel administration. The course emphasizes in making ethical decisions the processes of planning recruitment, selection, retention evaluation and termination. May be offered face to face or up to 100% online.

EDAG 662 Multicultural Education for School Administrators

Credits – 3

This course explores multicultural education and its theoretical framework. Students will learn to lead transformation change of systems to meet the dimensions of multicultural educations. May be offered face to face or up to 100% online.

EDAG 663 Conflict Resolution for Educational Leaders

Credits – 3

This course assesses the issues involved with problem identification, problem-solving, change enabling, and accountability in relation to theoretical approaches to conflict resolution within the operation of a school. It also examines the systemic issues involved in interpersonal and organizational change. May be offered face to face or up to 100% online.

EDAG 670 Internship-Practice in Educational Administration Leadership

Credits – 3

In this course, the student will participate in a supervised field experience to gain experience and apply the competencies expected of educational leaders in an actual K-12 setting. At Clinical/Practicum site.

EDUC 104 Human Growth and Development

Credits – 3

The course centers on the study of psychological thought related to growth and development from birth through adolescence, and its implications for the teacher and the school. Changes that occur in human beings from the moment of conception and throughout the different stages of life, such as prenatal, infancy, childhood, adolescence and adulthood, are studied from the physical, psychomotor, social, psychological, and moral viewpoints. May be offered face to face or up to 100% online.

EDUC 110 Introduction to Teaching Profession: Theory and Practice

Credits – 3

Historical, philosophical, and sociological foundations of education, current programs, educational/care practices and legal and ethical issues. Includes the study schools and society, school and community/parent relationships, and school/classroom organizational patterns. May be offered face to face or up to 100% online.

EDUC 115 Learning Theories

Credits – 3

Application of learning theory and cognitive organization and process. An overview of the development of learning theory and cognitive models in the beginning of human learning and mental processes. The roles of educators and students in the learning process and the impact of the interactive classroom environment on learning are examined. May be offered face to face or up to 100% online.

EDUC 120 Curriculum, Planning and Assessment

Credits – 3

An introduction to the systematic process of planning for effective classroom instruction and assessment in context of standards-based education. Theories, methods, and procedures underlying the development and design of curriculum, instruction, assessment and their interrelatedness. Researched based practices designed to improve student learning; develop 21st Century Skills in the classroom; alignment of learning theory and learner variables; removal of barriers to student achievement; and inclusion to meet diverse student needs are discussed. Students will learn how data driven decision-making can lead to improved student achievement. May be offered face to face or up to 100% online.

EDUC 125 Classroom and Behavior Management

Credits – 3

Overview of basic principles of classroom organization and management of instruction, including theoretical knowledge about the art and science of classroom management. Behavior management from organizing time, materials, and classroom space to strategies for managing individual and large group student behaviors, transitions, lab activities, and other arrangements for classrooms in general

education. A broad range of techniques is presented with attention to social, cultural and gender differences and parent/teacher conferences as factors important to effective classroom management. Code of ethics and standard practices for educators including professional and ethical practices and conduct toward colleagues and students, social media, anti-bullying, suicide and mental health issues are also discussed. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 135 Philosophical, Sociological and Psychological Foundations in Education

Credits – 3

The course Philosophical Foundations of Education is an introductory course to the knowledge, skills and professional competencies required for the educational preparation of teachers at all levels. It is geared towards the study of the psychological, sociological and philosophical principles in the field of education. May be offered face to face or up to 100% online.

EDUC 171 Human Growth and Development

Credits – 3

A comprehensive introduction to human growth and development, covering theories, research, and real-world applications. Emphasis on the physical, cognitive, social/emotional, and personality development in the following periods of life: prenatal, infancy, toddlerhood, early childhood, middle childhood, and adolescence. An examination of varying environmental and cultural backgrounds on child/adolescent growth and development. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 172 Educational Psychology

Credits – 3

This course offers a wide overview of concepts related to learning and intelligence and their relationship with human development. Topics discussed are psychometric techniques, styles and theories of learning, emotional development, moral development and ethical conduct, as well as the development of personality, mental and physical health. The course examines the relationship of these theories to educational practice and the role of the teacher. May be offered face to face or up to 100% online.

EDUC 202 Teaching Materials and Learning Devices

Credits – 3

This course combines graphic and instructional media processes for education and training purposes. Techniques for integrating media into instruction are examined. Student will develop instructional material taking into consideration principles of communication, appropriate and effective design, and the use and evaluation of these materials. May be offered face to face or up to 100% online.

EDUC 202-O Technology and Materials for Teaching and Learning

Credits – 3

This course covers the application of the design of instruction applying instructional technology in the preparation of teaching materials, as well as the study of communication processes, perception and learning, and its relationship with the design of materials. The student will learn about the importance of planning and designing instruction, and in the selection, usage, and evaluation of resources. In addition, he/she will learn diverse techniques for making instructional materials, different technical sources and how to integrate them to the instructional experience. The concept of technological innovation and its importance in the development of effective educational experiences for students, will be discussed and analyzed. May be offered face to face or up to 100% online.

EDUC 205 Introduction to Assistive Technology**Credits – 3**

This course provides general knowledge about assistive technology for persons with disabilities. Analysis of legal foundations and theoretical considerations in which equipment availability and assistive technology services are the resources to promote the participation of independent living at home, school, or work or community. This course also covers the identification, description, and classification of assistive technology equipment with the purpose of improving the functional capacities in order to improve their quality of life. Field and laboratory experiences are required. May be offered face to face or up to 100% online.

EDUC 219 Teaching Strategies and Differentiated Learning Strategies**Credits – 3**

Examine the processes, methods, and techniques for teaching mathematics, social studies, and natural sciences in classrooms that serve diverse student populations. In addition, strategies to incorporate in learner centered curriculum for the diverse population in the elementary classroom. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 220 Technology Integration in the Classroom**Credits – 3**

Examination of ways in which newer technologies can be integrated effectively in educational settings for the enhancement of teaching and learning. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 225 Teaching Reading and Writing across Content Areas**Credits – 3**

This course focuses on the interrelationship of reading and writing in the academic content areas of math, social studies, and science. The development of reading comprehension is a major means by which ideas are understood, expressed, and shared, and this course prepares for the skills and strategies necessary to teach reading comprehension in all content areas. Students will develop an understanding of the benefits, challenges, and essential components of effective integrated reading comprehension instruction. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 230 Legal, Ethical and Safety in Schools**Credits – 3**

The role of education in children's lives through the analysis of legal, ethical and safety standards and practices that promote children's physical and mental well-being and maintenance of safe learning environments. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 320 Literacy Development and Instruction**Credits – 3**

Exploration of literacy development from the acquisition of language to critical thinking skills, including the science of teaching reading. Technique for teaching literacy and study strategies in a range of disciplines that help students construct meaning and become more effective readers in the content areas; using appropriate reading levels, adaptation of materials in content areas and assessment procedures including RTI. Emphasis on diversity, differentiation, and assessment tools and practices in effective literacy instruction includes English Language Learners, multicultural literature, dyslexia and other reading disorders. 20 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 323 Literature for Children**Credits – 3**

Criteria for analysis and evaluation of children's literature in terms of interests, needs, and abilities of children. 10 hours of Field Experience are required. May be offered face to face or up to 100% online.

EDUC 325 Literacy Assessment, Evaluation and Remediation**Credits – 3**

An investigation of the needs of individual learners in reading instruction. Survey of informal and standardized instruments for assessing and analyzing students' reading strengths, weaknesses, and disabilities with an emphasis on appropriate strategies to remediate individual student needs, including dyslexia, for promoting optimum reading growth. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 330 Cross-Curricular Literacy Materials and Resources**Credits – 3**

Examines plan for and implementation of literacy instruction across the content areas. Selecting, evaluating and using developmentally and culturally appropriate materials and resources will be a focus as well as using content literacy strategies, which support independent reading and writing in the content areas. May be offered face to face or up to 100% online.

EDUC 335 Social Studies in Elementary Education**Credits – 3**

Pedagogical approaches and methodology in social studies. Emphasis on effective instructional strategies and best practices in social studies to teach for students understanding using technology, manipulatives and aligning curriculum to state assessments. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 340 Mathematics in Elementary Education**Credits – 3**

This course will address pedagogical content knowledge for teaching whole number concepts and operations, integer concepts, rational number concepts, measurement, geometry and algebraic reasoning. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 345 Science in Elementary Education**Credits – 3**

Pedagogical approaches and methodology in science. Emphasis on effective instructional strategies and best practices in science to teach for students understanding using technology, manipulatives and aligning curriculum to state assessments. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 351 Art, Music and Movement: Pedagogy, Strategies and Management**Credits – 3**

Overview of techniques and pedagogy designed to foster development of creative expression in children and adolescents through integrating play, art, music, literature, and movement across the content areas. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

EDUC 363 Curriculum Planning and Design**Credits – 3**

The curriculum planning and design course prepare the future teacher to study curricular theories, types of curricula, their organization, models, curricular designs, and concepts. In addition, future teachers will have the opportunity to design and integrate study skills and clarify concepts of the topics discussed in the course to grasp and internalize their responsibilities and commitment to students. Lesson planning and classroom organization are also discussed. May be offered face to face or up to 100% online.

EDUC 403 Curriculum Design**Credits – 3**

This course focuses on the evaluation and practice of the methodologies, techniques, and approaches to curriculum design at the school level. It also discusses curriculum design models. The course covers the study and analysis of the curriculum guide, the expectations, and standards that make up the school curriculum. It reflects upon the skills of critical thinking and creative construction of knowledge in the domains of competencies, skills, and attitudes. May be offered face to face or up to 100% online.

EDUC 409 Learning Evaluation and Planning**Credits – 3**

This course introduces the principles and foundations of evaluation and measurement, means and techniques for quantitative, as well as qualitative evaluation. The course includes the application, interpretation, and analyses of results within the learning process. May be offered face to face or up to 100% online.

EDUC 410 Interdisciplinary Pedagogy and Methods: Construction**Credits – 3**

This course complements the field-based experience so that students can further explore standards-based curriculum design with the alignment of state curriculum and standards. Students will have opportunity to use of research-based teaching strategies, developmentally and culturally appropriate teaching methodologies and pedagogies and reflect on their practice. They will use curricular development models and instructional methods to integrate reading/writing across the curriculum and technology. They will develop lesson plans applying research-based methods and strategies for areas such as learning centers, stations, and formative assessments. May be offered face to face or up to 100% online.

EDUC 410-O Teaching Math at the Primary Level**Credits – 3**

This course focuses on the principles, foundation, and methods of teaching math at the primary level. It incorporates the analysis of required math standards. The course includes research-based practices to teach math effectively to impact student achievement. The course incorporates the requirements for math state assessment. May be offered face to face or up to 100% online.

EDUC 411 Teaching Sciences at the Primary Level**Credits – 3**

This course focuses on the principles, foundation, and methods of teaching science at the primary level. It incorporates the analysis of required science standards. The course includes research-based practices to teach science effectively to impact student achievement. The course incorporates the requirements for science state assessment. May be offered face to face or up to 100% online.

EDUC 414 Language Arts at the Primary Level**Credits – 3**

This course will study and analyze the curriculum guides and standards of language arts at the primary level (K-3). The course will give emphasis in grammar and oral practice, reading and writing skill for the primary levels. May be offered face to face or up to 100% online.

EDUC 415 Internship I**Credits – 3**

The Student Teacher will fulfill the state's requirement of a clinical, supervised student teaching experience by completing Internship I and Internship II in the last two semesters of the program of study. This course of study is designed for pre--service teachers to gain further understanding of the nature of teaching and the overall management of classrooms in a field experience. The primary focus is to prepare interns to become aware of the central concepts and structures of teaching through regular and frequent interaction with students, classroom teachers, parents, and with university faculty and supervisors in a public or accredited private school setting. At Clinical/Practicum site.

EDUC 421 Interdisciplinary Pedagogy and Methods: Differentiation**Credits – 3**

This course complements the field-based experience so that students can further explore curricular design to include alignment of state curriculum to state assessments with an emphasis on differentiated instruction. An emphasis on the use of differentiated activities such as in centers and stations to support instruction as well as activities for community engagement and field trips will be addressed as effective approaches to differentiation. Students will also address technology and the fine arts in creating learning activities that are developmentally appropriate. May be offered face to face or up to 100% online.

EDUC 425 Internship II**Credits – 3**

The Student Teacher will fulfill the state's requirement of a clinical, supervised student teaching experience by completing Internship I and Internship II in the last two semesters of the program of study. This course of study is designed for pre--service teachers to gain further understanding of the nature of teaching and the overall management of classrooms in a field experience. The primary focus is to prepare interns to become aware of the central concepts and structures of teaching through regular and frequent interaction with students, classroom teachers, parents, and with university faculty and supervisors in a public or accredited private school setting. At Clinical/Practicum site.

EDUC 435 Interdisciplinary Seminar**Credits – 3**

This course is a professional seminar blending socio-humanistic and scientific academic knowledge that students have developed during their teacher preparation courses. Discussion and analysis of trends, methods, and innovations related to fundamental knowledge and communication competencies of the future teacher in his/her local and global context as required in the state. Emphasis in case studies, problem-solving, themes discussion and application of technology are incorporated. May be offered face to face or up to 100% online.

EDUC 436 Pedagogical Integration Seminar**Credits – 3**

This course integrates academic and professional knowledge obtained throughout the course of study of future teachers. Innovations in education, methods, techniques, and strategies are discussed and

analyzed. A review of sociological, philosophical and psychological foundations of education will be included in this course as a preparation for the teacher's certification examination requirements in the state. May be offered face to face or up to 100% online.

EDUC 501 Principles and Development of Curriculum

Credits – 3

This course presents the theory, practice and the roles of the major participants in the design and development of curriculum for English learners. Students will use different models of curriculum development. May be offered face to face or up to 100% online.

EDUC 512 Educational Innovations and Strategies in ESL

Credits – 3

The graduate student will analyze and evaluate educational innovations and best practices in teaching and learning English as a second language that meets the needs of English learners in the 21st century. Students will explore innovative strategies and techniques in the areas of curriculum, assessment, evaluation, and teaching, including integrating technology. May be offered face to face or up to 100% online.

EDUC 550 Second Language Acquisition

Credits – 3

This course analyzes the theories related to the process of language development, language learning, language acquisition and the practice to impact student achievement. It also includes the methodologies, approaches and techniques for English language acquisition for learning and literacy. May be offered face to face or up to 100% online.

EDUC 551 Reading Processes in a Second Language Setting

Credits – 3

This course includes the study and analysis of current theories, approaches, and techniques to develop literacy for English learners. Students will explore literacy standards within ESL language program models (primary, secondary, adult). May be offered face to face or up to 100% online.

EDUC 553 ESOL Curriculum and Materials Development

Credits – 3

This course is designed for students to be able determine developmentally and linguistically appropriate resources and materials for the purpose of curricular planning, instruction, and assessment. Students will determine alignment to standard expectations so that English learners in ESL program meet language and content expectations on assessments. May be offered face to face or up to 100% online.

EDUC 555 Development of Communication Skills in English

Credits – 3

This course will focus on the identification of activities that promote second-language acquisition in each language domain of listening comprehension, speaking and writing. Students will explore developmentally and linguistically appropriate approaches and techniques to develop English language learners' level of proficiency in each domain. May be offered face to face or up to 100% online.

EDUC 564 Applied Linguistics for ESOL Teachers

Credits – 3

This course focuses on addressing the practical issues in the fields of language acquisition, language teaching and literacy as they relate to English learners. Students will determine the resources, training, practice methods and techniques to best solve the difficulties related to teaching English as a second language. Students will determine the practical application of linguistic theories to presenting solutions to address concerns in the teaching and learning of English learners. May be offered face to face or up to 100% online.

EDUC 566 Methods of Teaching English as a Second Language

Credits – 3

This course examines the various methods for teaching English as a second language, as well as its principles & foundations. It reviews the evaluation, design and adaptation of materials for teaching English as a second language. May be offered face to face or up to 100% online.

EDUC 567 Cross-Cultural Communication and Understanding

Credits – 3

In this course, students will examine their personal cultural and linguistic awareness to be able to evaluate what cultural and linguistic considerations need to be taken in the teaching and learning in the ESL classroom. Students will examine the existing language and content to be able to retool content, approaches, methods and techniques to better prepare English learners for the many environments that include cross-cultural interactions. May be offered face to face or up to 100% online.

EDUC 569 Testing and Evaluation of ESOL

Credits – 3

This course introduces future teachers to second language acquisition and learning classroom-based assessment methodologies to determine proficiency in listening speaking, reading and writing skills. Students will examine state or program language expectations to plan backwards so that English learners meet content and language proficiency standards and to determine if there are needed linguistic accommodations. May be offered face to face or up to 100% online.

EDUC 580 Education Psychology: Human Growth and Development

Credits – 3

This course covers the study of theories of human development as seen from different perspectives: biological, social, philosophical, historical, and psychological dimensions. It examines the physical, moral, sexual, social, and cognitive development of individuals from conception through the aging process. Human development is analyzed as a continuous process throughout a lifespan, given special attention to the social and cultural contents in which human development occurs. May be offered face to face or up to 100% online.

EDUC 582 Legal and Ethical Issues in Professional Counseling

Credits – 3

This course covers the study of the ethical and legal issues related to the guidance and counseling process. Emphasis is given to legal dispositions related to the services, procedures and the rights of individuals involved in the process. The course also provides the student with knowledge of ethical codes and standards for the counseling profession. May be offered face to face or up to 100% online.

EDUC 584 Individual Counseling Techniques

Credits – 3

Study and analysis of theories, techniques, and the process of counseling in different settings will be explored. This course includes the study and discussion on establishing effective counseling relationships with clients, interaction processes, ethical and professional issues. May be offered face to face or up to 100% online.

EDUC 585 Group Counseling Techniques

Credits – 3

This course includes the study and analysis of theories, techniques, and procedures used in group guidance and counseling. Discussion of topics such as purposes and goals of group guidance and counseling, advantages/disadvantages, selection of members, roles, and leadership as well as the different phases of the process. May be offered face to face or up to 100% online.

EDUC 586 Career Counseling

Credits – 3

This course examines studies and analyzes foundations, theories and principles of career counseling. May be offered face to face or up to 100% online.

EDUC 588 Instruments and Techniques for Measurement and Assessment

Credits – 3

This course includes the study of instruments and techniques used for assessment, measurement, and evaluation. The purpose, characteristics, types of standardized tests, scale observations, and records will be analyzed. Emphasis is placed on aptitude, achievement, intelligence, and personality tests. Ethical test use, diversity and inclusion issues are also addressed in serving student populations. May be offered face to face or up to 100% online.

EDUC 600 Educational Research Methods in ESOL

Credits – 3

This course is a study of educational research methodologies and theories in ESOL. It places emphasis on practical applications of research findings and teacher conducted research to classroom practice. May be offered face to face or up to 100% online.

EDUC 604 Knowledge Integration Seminar in ESOL

Credits – 3

In this course, students will continue to examine issues, public policy, trends and other factors related to the field of English language teaching. May be offered face to face or up to 100% online.

EDUC 617 Research Seminar

Credits – 3

Research course based on the development of a pedagogical intervention focused on the teaching and learning of English as a second language of English learners (ELs). The intervention will be a contribution to the field of teaching English as a second language as it applies to educational systems, classrooms, schools, districts, or the community in general. May be offered face to face or up to 100% online.

EDUC 635 Educational Research Methods

Credits – 3

This course covers the study of the nature of scientific investigation and its application to the educational research process. It also studies the different research methods and its investigative phases. Emphasis will be given to the proposal design: problem identification, hypothesis or guide questions, literature review

and the investigation methodology. The student will present a research proposal at the end of the course. May be offered face to face or up to 100% online.

EDUC 636 Development and Management of Counseling Programs

Credits – 3

This course focuses on the philosophy of counseling/advising in comprehensive models and their development and management. Students demonstrate professional knowledge, skills and competencies needed to promote academic excellence in addition, the personal, emotional, and social development of their target population. The course emphasizes the critical role of counselors or advisors in different settings such as K-12 school, higher education, business or community organizations. Students will analyze strategies to develop, plan, implement and assess programs in education, community, and businesses based on their major. Students will also examine different models and strategies of case management, with emphasis on basic interviewing and assessment strategies, case conceptualization, effective intervention strategies, and effective documentation. This course will familiarize students with content areas: terminology, process, leadership, assessment of culture and structure within a variety of systems. May be offered face to face or up to 100% online.

EDUC 714 Historical and Philosophical Perspectives in Education

Credits – 3

This course is an examination of the historical and philosophical bases of education in the context of the United States and other countries, and how they relate to the decisions taken by leaders in educational institutions. Students will examine their personal philosophy of education as they identify the philosophies that permeate in the different institutions represented by the participants in the class. May be offered face to face or up to 100% online.

EDUC 715 Social, Cultural and Political Dimensions of Educational Organization

Credits – 3

This course will examine the social, cultural, political and any other current factors that impact educational organizations. Students will have the opportunity to use inquiry and research skills to understand the influence of these factors on their leadership role and meeting expected outcomes. May be offered face to face or up to 100% online.

EDUC 716 Contemporary Problems and Issues

Credits – 3

Students will identify and examine the current and emerging issues and trends in the field of education. Students will explore topics based on current national trends to identify, describe, analyze and develop action plans to address issues and trends as an educational leader. May be offered face to face or up to 100% online.

EDUC 717 Legal Issue in Education

Credits – 3

This course examines educational governance, policy and legal issues that impact education environments and the role of the educational leader in addressing them strategically and effectively. May be offered face to face or up to 100% online.

EDUC 718 Ethics and Education

Credits – 3

This course examines current and emerging ethical issues and dilemmas in the educational environment. Students review their professional and ethical standards as educational leaders to address ethical dilemmas by building awareness of what is at stake, employing reasoning skills to examine cases and implementing strategies to solve them. May be offered face to face or up to 100% online.

EDUC 720 Contemporary Theories of Child Development

Credits – 3

The study of the complexity of child development through examining physical, and social theories, as well as empirical studies from conception to early years. The emphasis is on the development theories and the importance for the learning process in the child; there will be pertinent literature search, discussion and critique. May be offered face to face or up to 100% online.

EDUC 721 Teaching at the Pre-School/Primary Level 3: Trends and Innovations

Credits – 3

This course examines the mainstream and innovative thought in Child Education for the 21st Century. How are we thinking about teaching, how do we put it into action in order to prepare the students for the challenges to come and how can we translate all this into an efficient curriculum. There will be lectures in a seminar setting that will provide the doctoral candidate with a solid base to analyze the different and newer tendencies in the field. This setting will also allow the student to develop their own positions, to defend them as well as appreciate and utilize viewpoints different from their own. May be offered face to face or up to 100% online.

EDUC 722 Qualitative Research in Children's Education

Credits – 3

Students will explore trends, issues, strategies, methods and/or approaches leaders are addressing in today's early childhood classrooms to transform them into more equitable, inclusive and responsive environments to diversity and promote learning for all students. This course will reinforce academic writing, APA guidelines, topic selection strategies, research critique and advanced research skills necessary for the dissertation process. May be offered face to face or up to 100% online.

EDUC 723 Organization and Governance on Higher Education

Credits – 3

This course has been designed for doctoral students who work or intend to work in higher education institutions. Themes to be discussed and analyzed will be the organizational structure, and governance procedures used in higher education. To be discussed will be the duties and responsibilities of the different governing positions and bodies; and how the incumbents are appointed. The role of accrediting agencies will be examined Research activities related to both academic and administrative governance will be required. May be offered face to face or up to 100% online.

EDUC 724 Student Services in Higher Education Institutions

Credits – 3

The course focuses on the analysis of theories, origin and practices related to student services in higher education institutions. The theoretical background, roles and responsibilities of student services personnel, organizational structures and relevant issues of this field are some of the topics to be analyzed. May be offered face to face or up to 100% online.

EDUC 800 Higher Education Leadership and Administration

Credits – 3

This course, Higher Education Leadership and Administration, will explore leadership in higher education and considerations related to the future status of higher education. The primary focus of the course is the study of the complexity of governance and structures in Higher Education. Contemporary issues affecting Higher Education will also be addressed. The examination of characteristics of successful leaders will occur through readings and personal interactions. May be offered face to face or up to 100% online.

EDUC 801 Project Management in Education

Credits – 3

This course was developed to provide the students the group of knowledge, skills and techniques in the project management field. With this body of knowledge, the students can help educational organizations to meet their goals and expectations by the use of strategies to manage the process of planning, development and control of projects. May be offered face to face or up to 100% online.

EDUC 802 School Finance

Credits – 3

This course was designed to examine topics in areas of the school finance, strategic planning and budgeting processes in education and financial management. The student will have the opportunity to research topics to examine the current trends and issues in school finance as a process in which planning, budgeting and administration are integrated in order to achieve the organizational goals. May be offered face to face or up to 100% online.

EDUC 803 Evaluation of Instructional Programs: Theory and Application

Credits – 3

This course examines evaluation strategies, techniques and models applicable to the evaluation of instructional programs that educational leaders must plan, implement, monitor and evaluate to improve learning and teaching. The course allows students to analyze and design appropriate strategies for evaluating curriculum. May be offered face to face or up to 100% online.

EDUC 804 Leadership: Models and Strategies

Credits – 3

This course is a comprehensive study of the theory base for leadership, analysis of leadership and management processes, exploration of individual assets and liabilities of leaders, examination of leadership in groups. May be offered face to face or up to 100% online.

EDUC 805 Instructional Leadership

Credits – 3

This course focuses on leadership for the improvement of instruction. It covers current research on school and teaching effectiveness, instructional methodologies, staff development and school climate. May be offered face to face or up to 100% online.

EDUC 806 Leading Organizational Change

Credits – 3

Study and analysis of change theories and the role of the educational leader in initiating, developing, managing, and balancing change process in educational institutions. Emphasis will be placed on developing leadership skills for crafting a vision, mission, and strategic plans for change. May be offered face to face or up to 100% online.

EDUC 807 Leadership, Community Relations, and Partnerships**Credits – 3**

In this course, student explore how educational leaders leverage community, professional and family partnerships and collaborative efforts to share knowledge, experience and resources to promote the shared vision and goal of quality learning for all students. May be offered face to face or up to 100% online.

EDUC 808 Educational Technology**Credits – 3**

The course examines research, trends and challenges in educational technology to find solutions that make improvement in learning and instruction. Students will explore areas of leadership, curriculum and instruction and assessment or program evaluation to solve an advanced problem of practice, challenge or complex phenomenon in the field. May be offered face to face or up to 100% online.

EDUC 809 Instructional Systems Design**Credits – 3**

Students will explore and examine different models of instructional design for the purpose of analysis, design, development, implementation and evaluation of materials and activities to be able to effectively lead the development of effective and efficient instruction in schools/organizations. Students will explore trends, issues, strategies, methods and/or approaches leaders are addressing in today's classrooms to transform teaching and learning so that it is equitable, inclusive and responsive to diversity and promotes learning for all students through the process a systematic approach. This course will reinforce academic writing, APA guidelines, topic selection strategies, research critique and advanced research skills necessary for the dissertation process. May be offered face to face or up to 100% online.

EDUC 810 Technology and Media in Education and Training**Credits – 3**

In this course, students will examine how educational technology is integrated in meaningful and relevant ways into the learning environment to promote effective teaching and learning. Students will explore trends, issues, strategies, methods and/or approaches leaders are addressing in today's classrooms to transform technology plans into equitable, inclusive and responsive tools to diversity and promote learning for all students. This course will reinforce academic writing, APA guidelines, topic selection strategies, research critique and advanced research skills necessary for the dissertation process. May be offered face to face or up to 100% online.

EDUC 811 Theory and Practice of Distance Education**Credits – 3**

Study of the theory and practice of distance education and its application to the planning, development, utilization and evaluation of distance education systems in educational environments. May be offered face to face or up to 100% online.

EDUC 812 Teaching, Learning and Cognition**Credits – 3**

This course examines the theoretical and empirical research on human learning and information processing. It emphasizes current perspectives on the nature of mind, brain-based learning, academic learning, and implications for teaching. Analysis will center on processes underlying cognition. May be offered face to face or up to 100% online.

EDUC 813 Models and Styles of Teaching and Learning**Credits – 3**

This course examines research findings related to effective teaching practices. Students analyze the instructional models and strategies of teaching and probe the theories and research applicable to the different models. They also consider how students' diverse learning styles can be affected by the dichotomy between the research of teaching and the practice of teaching. May be offered face to face or up to 100% online.

EDUC 814 Curriculum Theory and Design**Credits – 3**

Discussion and analysis of theoretical assumptions underlying curriculum designs. To be discussed are decision making skills needed to determine a curriculum design, problems related to curriculum design, strategies for constructing, developing and implementing curriculum that is consistent with specific theoretical principles. May be offered face to face or up to 100% online.

EDUC 815 Curriculum Planning and Development**Credits – 3**

This course is designed to analyze the influence of contemporary society and government agencies on curriculum planning and development. The historical context in which curriculum is developed and modified is examined as well as theories related to the purposes of education and curricular expectations. Other themes to be discussed and analyzed are learning theories as related to curriculum development and evaluation, the environmental factors as they influence curriculum planning, and the impact of technological innovations on curriculum development. May be offered face to face or up to 100% online.

EDUC 816 Creating Learning Environments for Diverse Students**Credits – 3**

Examination and discussion of the complexities of teaching. Discussion of the powerful impact of classroom environment behavior and maturation upon learning. The course examines topics such as student perceptions about the classroom and their learning necessary for anticipated learning to occur, ways teachers use to learn about their students, approaches to student motivation, and the concept of effective classroom instruction. May be offered face to face or up to 100% online.

EDUC 817 Behavior Modification in the Classroom**Credits – 3**

Study and analysis of approaches management and motivational strategies that will enhance student behavior and performance. Topics to be discussed include applied behavior analysis, behavior analysis techniques, criteria and procedures for selecting, defining and measuring behavior, and behavior modification. Technology as a tool for behavior management is discussed and applied. May be offered face to face or up to 100% online.

EDUC 818 Early Identification of At-risk Students**Credits – 3**

This course delineates at-risk behaviors of youth of today, including substance abuse, teen pregnancy, delinquency, violence, and youth suicide. Data on the five at-risk categories, treatment approaches and prevention strategies that focus on the family, the school and the individuals are presented. Legal issues and concerns for human service professionals are also to be examined. May be offered face to face or up to 100% online.

EDUC 819 Language Development Issues in the Curriculum**Credits – 3**

This course will focus on a range of issues related to the teaching and learning in schools that host language programs. It will analytically examine education paradigms, language teaching methodologies, policies, and practices, as compared to bilingual education models in the United States and other parts of the world. The course will also examine language teacher education and teacher training in addition to the sociopolitical climate for language teaching. May be offered face to face or up to 100% online.

EDUC 820 Teaching in Multicultural Environments**Credits – 3**

The course focuses on issues related to cultural diversity and the implications for curriculum development within a multicultural dimension of culture, essential historical and sociopolitical backgrounds represented by the school populations and language. The appropriate use of instructional strategies for integrating language teaching within the content areas will also be emphasized. May be offered face to face or up to 100% online.

EDUC 821 Research on Second Language Acquisition and Bilingualism**Credits – 3**

Discussion and analysis of theoretical assumptions and research literature in the processes of ESL writing. The nature of writing, as well as the linguistic and cognitive problems faced by ESL writers, are examined in this course. Teaching implications and research issues in ESL writing are also discussed. May be offered face to face or up to 100% online.

EDUC 822 Electronic Databases and Information Systems**Credits – 3**

This course is designed to cover theoretical foundations of online searching, databases and search interfaces. Students may study available databases systems in different areas of education to analyze how essential these systems are to producing "business insight" that enhances the management of schools/organizations and improves the results of operations, learning and teaching. May be offered face to face or up to 100% online.

EDUC 823 Advance Organization of Bibliographical Resources**Credits – 3**

Study of information resources organization in automated environments. Different classifications system and cataloging processes will be studied and analyzed using automated library systems and electronics resources. May be offered face to face or up to 100% online.

EDUC 824 Seminar: Special topics in Library and Information Sciences**Credits – 3**

Discussion of advanced topics trends and problems in library and Information services. Students will be required to investigate selected topics related to their field and the education. May be offered face to face or up to 100% online.

EDUC 825 Anthropological and Cultural Concepts**Credits – 3**

Study and analysis of the most outstanding themes of cultural anthropology, folk arts and their relationship with the elementary and secondary school curriculum. Emphasis will be given to themes

related to culture, religion, religious beliefs, myths, time and space, and the occurrence of these themes in folk arts. May be offered face to face or up to 100% online.

EDUC 826 Research in Folk Arts and Fine Arts Education

Credits – 3

The course is designed to provide doctoral students tools to develop research projects in themes related to the use of folk and fine arts in teaching other subjects, such as ethnomusicology, new discoveries of the effects of teaching arts on cognitive learning, folk arts as teaching strategies, the aesthetic and educational quality of artistic expressions, implications of high technology for teaching arts, and others. The student will design and complete a research paper related to one of the areas discussed in the class. May be offered face to face or up to 100% online.

EDUC 827 Artistic and Cultural Expressions in Latin American and Caribbean Education

Credits – 3

Study of one or more cultures of the Caribbean and/ or Latin America from the perspective of popular arts and their effect on the education of each country studied. May be offered face to face or up to 100% online.

EDUC 828 Seminar and Practicum in University Curriculum and Teaching

Credits – 3

This course is designed to provide students the opportunity to demonstrate mastery of competencies and learning objectives through a field experience. Students will apply theory learned in a supervised Higher Education setting. May be offered face to face or up to 100% online.

EDUC 900 Research Seminar

Credits – 3

This course is designed to assist in the preparation of the concept paper before preparing the dissertation proposal for formal defense. The concept paper is an abbreviated version of Chapters 1, 2, 3, which will eventually form the dissertation proposal. It is also used to engage potential dissertation committee members. Students will develop their general ideas about their dissertation topic into a structure, research strategy and drafting the framing of the first three (3) chapters of the doctoral dissertation. Students will address feedback and revise the concept paper. To continue to Dissertation I, each part of the concept paper must score 80 or better on the concept paper rubric. May be offered face to face or up to 100% online.

EDUC 901 Research Methods in Education

Credits – 3

Concepts, methods, and problems in educational research are considered: discovering the periodicals in one's fields, steps in the research process, developing research questions, design of instruments, methods of data collection and analysis, interpreting results, and writing research reports. May be offered face to face or up to 100% online.

EDUC 902 Statistical Methods in Education

Credits – 3

The course is designed to equip doctoral students with the essential statistical concepts for developing statistical designs in their own research. In addition to the fundamental principles of descriptive and inferential statistics, students will learn to use computers to compute data and to interpret computer-generated results produced by statistical software (SPSS). Course topics include measurements of central

tendency, variability, relative position, and correlation; sampling and probability distributions; tests of significance; t-tests; analysis of variance; chi-square tests; and regression analysis. Analysis of data with SPSS. May be offered face to face or up to 100% online.

EDUC 903 Qualitative Research Methods

Credits – 3

This course focuses on the principles, theories, structure and processes of qualitative research. Different research methods such as focus groups, case studies, ethnographical and phenomenological studies are analyzed. In depth discussion of techniques for collecting and analyzing data for qualitative research is emphasized. May be offered face to face or up to 100% online.

EDUC 904 Quantitative Research Methods

Credits - 3

The course focuses on the structure and process of quantitative research in education. Concepts of probability, cause and effect, internal and external validity, sampling techniques, data gathering and analysis and methodology for quantitative research are discussed in this course. Topics related to computerized applications for data analysis and ethical considerations are also discussed. May be offered face to face or up to 100% online.

EDUC 905 Dissertation I

Credits – 3

This course is required as part of the doctoral dissertation process for doctoral students. The main objective of the course is the development and oral defense of a research proposal based on the review of recent scientific literature. The research proposal will consist of chapters I, II, and III of a dissertation in the discipline of Education. The dissertation committee will supervise the development of the proposal and will ensure the ethical conduct of the candidate and the academic rigor of the document to be prepared. May be offered face to face or up to 100% online.

EDUC 906 Dissertation II

Credits – 3

This course is designed to provide continuity to the student's doctoral dissertation. Doctoral students will submit the application to the University's Institutional Review Board (IRB). The doctoral students will then implement the approved research methodology. They will complete chapters IV and V of the dissertation by collecting, analyzing, and interpreting data. They will write up the results and develop conclusions, recommendations for future research, and implications for practice based on the results. Students will defend the dissertation in an oral defense, make all revisions required by the chair and committee, and submit the dissertation for publication. Students may continue to be enrolled in this course until successful completion. May be offered face to face or up to 100% online.

EDUG 535 Action Research Evaluation

Credits – 3

This course explores the concept of “Action Research” as a form of evaluation to help improve instruction and teaching practices. Students will be introduced to research methods for the purpose or aim to seek to solve a practical problem in the areas of teaching and learning of English learners. Students will explore the concepts and types of action research and learn the essentials of proposal writing to be able to identify and write an abbreviated proposal for an action research project. May be offered face to face or up to 100% online.

EDUG 605 Public School Curriculum and Instruction**Credits – 3**

This course explores the role of the educational leader in curriculum development, implementation, evaluation, and revision. May be offered face to face or up to 100% online.

EDUG 611 Evaluation, Measurement, and Assessment of the Teaching Learning Processes**Credits – 3**

A study of the processes of assessment, measurement, and evaluation applicable to the process within educational systems. The course examines the design and application of instruments aligned to the evaluation and assessment processes that impact classroom practices. May be offered face to face or up to 100% online.

ELEC 100 Fundamentals of Electricity**Credits – 1**

In this course, the basic concepts of electrical circuits and power are studied. In addition, it provides the student with the necessary tools to solve problems related to the field of electricity. It includes the application of electrical safety knowledge, Ohm's Law, Kirchhoff's Law of resistance, circuits and inductors, magnetism and electromagnetism. In addition, content related to the three-phase system, are discussed. Offered on-site only. Contact hours: 15.

ELEC 100L Fundamentals of Electricity Lab**Credits – 4**

This laboratory develops practical skills for handling electrical devices. It introduces the color code of resistance and the alphanumeric codes of capacitors and inductors. It includes techniques for the assembly of circuits in a project card as well as measurement techniques, fault finding, and the use of instruments such as digital and analogue multimeter. The concepts of voltage, currents, and resistances are analyzed. The principles of operation, selection and specifications of the different electrical devices such as resistors, capacitors and inductors are studied. Offered on-site only. Contact hours: 60.

ENGL 101 Introductory English Language Course Basic Level I**Credits – 3**

This course is a comprehensive based offering for first year students. It includes basic grammar structures, oral practice, reading, and writing activities. May be offered face to face or up to 100% online.

ENGL 103 Introductory English Language Course Basic Level II**Credits – 3**

The emphasis of this course is placed on the study of grammar and the strengthening of basic reading comprehension and composition skills. May be offered face to face or up to 100% online. Contact hours: 45

ENGL 101 – 102 Introduction to English Language - Basic Level**Credits – 6**

This course emphasizes the development of basic written communication and reading skills. Grammar instruction is provided for students who need to improve their proficiency in English. May be offered face to face or up to 100% online.

ENGL 103 – 104 Introduction to English Language - Intermediate Level**Credits – 6**

A thorough study of intermediate English grammar leading to the development of basic speaking, listening, reading and writing skills. May be offered face to face or up to 100% online.

ENGL 105 – 106 Introduction to English Language - Advanced Level**Credits – 6**

This course includes a review of grammar emphasizing written communication through the study of the content and form of the essay. May be offered face to face or up to 100% online.

ENGL 115 English Reading and Writing I**Credits – 4**

This course introduces students to the writing, reading and thinking skills necessary to compose university level essays that demonstrate proficiency developing and organizing ideas, using language effectively and writing in standard English. Students will develop critical reading skills to analyze writing techniques and strategies that can be used to improve their own writing. This course requires the use of E-Lab and/or the Language Lab guided by the course English faculty. May be offered face to face or up to 100% online.

ENGL 116 English Reading and Writing II**Credits – 4**

This course is a continuation of the first-year English course, ENGL 115 that is designed to build the writing and thinking skills of students to be able to analyze different texts, think critically about other perspectives, conduct research, and use evidence to support ideas. This course requires the use of E-Lab and/or the Language Lab guided by the course English faculty. May be offered face to face or up to 100% online.

ENGL 150 English Composition I**Credits – 3**

English Composition I provide students with an academic foundation in writing. Students will learn scholarly research methods and the process of writing. Special attention is given to the professional purpose and audience writing. May be offered face to face or up to 100% online.

ENGL 151 English Composition I**Credits – 4**

English Composition I provide students with an academic foundation in writing. Students will learn scholarly research methods and the process of writing. Special attention is given to the professional purpose and audience writing. Includes a writing lab component. May be offered face to face or up to 100% online.

ENGL 212 English Second Year Basic Level**Credits – 3**

Emphasizes vocabulary development and grammar structures for effective oral and written business communication. Required course for Business Administration students. May be offered face to face or up to 100% online.

ENGL 250- English Composition II**Credits – 3**

English Composition II is a continuation of ENGL150. This course expands on the style and methods of writing in the professional setting using critical thinking, advanced research strategies and appropriate methods of citing research. May be offered face to face or up to 100% online.

ENGL 251 English Composition II

Credits – 4

English Composition II is a continuation of ENGL151. This course expands on the style and methods of writing in the professional setting using critical thinking, advanced research strategies and appropriate methods of citing research. Includes a writing lab component. May be offered face to face or up to 100% online.

ENGL 331 Public Speaking

Credits – 4

This course is designed for English advanced level students (Level 5 – Bridging). An integrated language art (listening, speaking, reading, and writing) approach is used in the course. This course is divided in two required parts: intensive practice in writing different types of essays, monographs, reports, and conducting research in their degree program. The course also focuses in strengthening public speaking skills. English language and professional etiquette for public speaking is studied and practiced in weekly classes. All course assignments and activities are delivered in the context of topics from the degree programs the students represent. This course requires the use of E-Lab and/or the language lab guided by the course English faculty. May be offered face to face or up to 100% online.

ENGL 340 Research and Writing

Credits – 3

Research and Writing is an advanced course focused on developing a student's skills and knowledge when writing for a scholarly audience. Students will be required to explore a topic through literature and apply data collection and analysis methods to their research. Both quantitative and qualitative research will be explored. May be offered face to face or up to 100% online.

ENGL 341 Research and Writing

Credits – 4

Research and Writing is an advanced course focused on developing a student's skills and knowledge when writing for a scholarly audience. Students will be required to explore a topic through literature and apply data collection and analysis methods to their research. Both quantitative and qualitative research will be explored. 15 hours of research and writing lab is required. May be offered face to face or up to 100% online.

ENGL 350- Conversational English

Credits – 3

This course provides practice for the development of oral communication skills to be used in personal and professional settings. May be offered face to face or up to 100% online.

ENMA 101 Introduction to Business Development

Credits – 3

This course offers students a basic understanding and overview of the business world and entrepreneurial. This includes topics related to writing a business plan, business ethics, management, marketing, finance, accounting and the legal aspects of commercial operations. May be offered face to face or up to 100% online. Contact hours: 45

ENMA 200 Business Creativity**Credits – 3**

This course is designed to develop creativity and innovation in business ideas. Emphasis is given to the development of such ideas: their creation, form, and protection. The course stimulates and challenges the student to develop new business types, to know different existing business types, to make decisions, and risk taking. The course also looks for the development of entrepreneurial character, and how it can transform an idea into a real business. May be offered face to face or up to 100% online.

ENMA 301 Business Financial Planning**Credits – 3**

This course analyzes different financing alternatives available for public and private enterprises. The financial plan components for different business types are examined in accordance with the characteristics and development stages of the enterprises. Computer programs are integrated to facilitate the preparation of financial plans, statements, and forecasts. May be offered face to face or up to 100% online.

ENMA 310 Franchising, Strategic Alliances and Family Business**Credits – 3**

Definition, nature, and analysis of particular characteristics of family businesses, franchises, and strategic alliances. Analysis of the advantages and disadvantages of them. Manage business relationships, conflicts, and shared decision-making. May be offered face to face or up to 100% online.

ENMP 550 Environmental and Natural Resources Economy**Credits – 3**

This course evaluates the importance of scientific knowledge in the management and conservation of renewable and non-renewable natural resources as the basis for economic analysis and assessment to determine the added value of natural resources. The course deals with natural resources, environmental public policy, and the role of economic analysis in the development of that policy. The fundamental elements of economic theory will be analyzed, including cost-benefit analysis. Strategies to internalize externalities will be widely discussed. In addition, government actions and economic incentives for environmental control will be evaluated. May be offered face to face or up to 100% online.

ENMP 551 Principles of Environmental Technology**Credits – 3**

This course will discuss and evaluate the theoretical and technical aspects, the physical, chemical, and biological mechanisms and technology available to provide drinking water, purify wastewater, and dispose of solid and liquid waste. In addition, the available technologies for the control of water, soil, atmosphere, and noise pollution will be analyzed. May be offered face to face or up to 100% online.

ENMP 552 Environmental Communication and Writing**Credits – 3**

This course will study the application of communication principles in the environmental field. This course examines a variety of communication strategies and practices and the drafting of environmental documents that are essential for environmental managers to perform effectively their organizational, ethical and legal responsibilities. It identifies and analyze the diverse groups or audiences in which the environmental managers will communicate and relate; from internal audiences, such as online employees, supervisors and managers; to outside audiences, such as legislators, civic and environment

groups, syndicates, community, press and other media. The feasibility, need and functionality of different media types and strategies of outreach and public relations are studied, including the drafting of memos, press release, environmental impact statements, technical reports and audiovisual presentations. May be offered face to face or up to 100% online.

ENMP 553 Environmental Strategic Planning

Credits – 3

This course focused on the technical-scientific concepts related to the environment in a global way, that will allow the environmental manager to effectively address the decision-making process of strategic planning. The future environmental manager will obtain knowledge of the analysis of the internal institutional environment, the external environment and identify trends, changes and formulate strategic planning with focus in the organization. You will know the strategic planning fundamentals and the sustainable development of natural resources. The increasingly global nature of the environmental sustainability will be particularly noteworthy. May be offered face to face or up to 100% online.

ENMP 554 Environmental Quality Control Management

Credits – 3

The course presents a global e inclusive vision of environmental management. Its topics include environmental management and its functions, roles, responsibilities and environmental manager leadership. In addition, it discusses the importance of investigation for quality control of the environment. Application and description of all those principles related to quality control environmental management, its international regulations for administration (ISO) and management standards (EMS) of the Environmental Protection Agency. It will show the theoretical aspects; case discussion and environmental management simulations will be presented. May be offered face to face or up to 100% online.

ENMP 590 Environmental Risk Management

Credits – 3

The purpose of the Environmental Risk Management course is the development of learning that allows the student to identify, analyze, characterize, and interpret natural and anthropogenic environmental risks, as well as their effect on the environment and human health. It is expected that during the course, students will appropriate the concept of risk from a general and integrating perspective; acquire the basic concepts associated with environmental toxicology; evaluate environmental risks based on risk characterization and quantification; determine the routes of exposure and analyze the appropriate instruments to appropriately manage an environmental risk situation through the implementation of a risk management plan. Processes related to the restoration of contaminated environments and the cost-effective prevention of pollution are also addressed during the course. Finally, some current environmental regulations in the United States are analyzed. May be offered face to face or up to 100% online.

ENMP 591 Energy Sources and Environment

Credits – 3

The course will evaluate the local and international energy situation, specifically its economic, environmental, social, and geopolitical implications. Energy source strategies, their environmental impacts, and available control technologies will be examined. The energy policy, its design and implementation, as an essential element in the planning and management of resources, is widely covered by the course. May be offered face to face or up to 100% online.

ENMP 594 Climatology and Atmospheric Pollution

Credits – 3

In this course, the physical, chemical, climatological, economic, public policy, and legal variables that are most relevant for the control and management of atmospheric pollution are discussed and weighed. It also studies those concepts and scientific and technical foundations developed by meteorology for the evaluation, understanding, and analysis of the causes, effects, and control of pollutants in the air.

Pollution control strategies and measures are analyzed, as well as the applicable legal and regulatory framework. The basic components of the atmosphere and the way in which human activity is altering the basic cycles of the gases that compose it are considered, as well as the consequences or effects of these changes on human health and well-being, on other species, and on materials, and structures that make up the environment. May be offered face to face or up to 100% online.

ENMP 595 Tropical Ecosystems

Credits – 3

In this course, the physiological structure, classification, and distribution of the main tropical ecological formations will be studied. The plants and animals introduced to the different ecosystems, the environmental conditions and soil types that predominate in the different formations, the environmental conditions and soil types in the different life zones will be studied. The course will be complemented, fundamentally, with virtual investigative trips to different ecosystems in which data will be taken to reinforce the knowledge obtained from the studies published in scientific journals and other existing ones. This course will allow the student to know the fragility of the different tropical formations and will thus be able to exercise a critical judgment in the management of these resources. May be offered face to face or up to 100% online.

ENMP 596 Environmental Auditing

Credits – 3

This course is designed for the student to select the tools, skills, and knowledge to develop, structure, and conduct an audit of environmental compliance with applicable federal and state laws and regulations. The course also includes a comprehensive discussion of professional practices and guidelines for conducting a diligent environmental audit or assessment of a commercial or industrial property or establishment as part of the purchase-sale process in compliance with environmental protection laws. May be offered face to face or up to 100% online.

ENMP 597 Fundamentals of Hydrogeology

Credits – 3

The course will examine the technical and scientific fundamentals relevant to the availability, occurrence, and quality of surface and groundwater, including elements of control and management. Relevant aspects of the nature and behavior of water bodies, the physical, chemical, and biological characteristics of this vital resource will be studied and discussed. The framework of flow and characteristics of the medium or aquifer will be deepened. In general, the fundamental aspects associated with hydrogeology to be discussed are the hydrological cycle, geology, and hydrogeological systems, mass balance concepts, aquifer properties and applied finite-difference analytical, empirical and numerical methods. Groundwater quality problems and resource management will be examined. May be offered face to face or up to 100% online.

ENMP 670 Research Proposal

Credits – 3

This course will guide the student through the entire process and steps involved in writing a research proposal to address the problems that occur in the environment. Students will select a research topic, compose their thesis committee, develop, and write a proposal, which will be approved by the committee and submitted to the IRB. May be offered face to face or up to 100% online.

ENMP 671 Thesis

Credits – 3

This course will direct the student to complete the final requirements of their graduate studies at the AGMU. These are, deliver your thesis and approve the defense of the before the Thesis Committee. May be offered face to face or up to 100% online.

ENMT 101 Introduction to Entrepreneurial Development

Credits – 3

This course offers students a basic understanding and overview of the business world and the entrepreneurial field. This includes topics related to writing a business plan, business ethics, management, marketing, finance, accounting, and the legal aspects of commercial operations. May be offered face to face or up to 100% online.

ENTR 260 Entrepreneurship

Credits – 3

This course provides students the opportunity to apply the basic concepts of small business management using a teambuilding approach with participants from different disciplines. Different aspects for management of a small business will be studied, with emphasis on the formulation of solutions applicable to specific entrepreneurship problems. The preparation of a group project, including strategies and tactics for the development and administration of a small business will be required. May be offered face to face or up to 100% online.

ENTR 360 Entrepreneurship

Credits – 3

This course provides students the opportunity to apply the basic concepts of small business management using a teambuilding approach with participants from different disciplines. Different aspects for the small business management will be studied, emphasizing the formulation of solutions applicable to specific entrepreneurship problems. The preparation of a group project including strategies and tactics for the development and administration of a small business will be required. May be offered face to face or up to 100% online.

ENTR 842 Entrepreneurship Management

Credits – 3

Present and discuss current trends in entrepreneurship research and small business management. Analyze theories to assess the different components of venture creation and SME development including personal, process, environmental and organizational theories. Understanding the theories underlying the entrepreneurship phenomena will provide insights into the factors that stimulate entrepreneurship and regional development. May be offered face to face or up to 100% online.

ENVI 500 Fundamentals of Environmental Sciences

Credits – 3

This course presents an overview of the study of environmental science. The effects of pollution on living beings are exposed and discussed. Topics related to the problems of population dynamics and natural

resources are analyzed. Real environmental problems are discussed, and possible solutions are proposed. May be offered face to face or up to 100% online.

ENVI 501 Statistical Methods Applied to Environmental Research

Credits – 3

This course presents the descriptive and statistical methods that must be applied in the analysis of uncertainties and decision-making processes in environmental sciences. May be offered face to face or up to 100% online.

ENVI 502 Waste Management

Credits – 3

Study of the fundamental concepts necessary to adequately manage solid waste (domestic, industrial, and dangerous). Resource Conservation and Recovery Act (RCRA) will be discussed, its laws and regulations related to the generation, transportation, action and storage, and final disposal of solid waste. The law outlines the strategies necessary to implement, evaluate, and execute the tasks necessary to meet public health, environmental health, and natural resource objectives. May be offered face to face or up to 100% online.

ENVI 503 Environmental Legislation: Multilateral Environmental Agreements

Credits – 3

The course is aimed at providing a legal and regulatory point of view of the activities that may have an impact on natural resources and the environment. In addition, the course will analyze the local and federal legal framework relating to the use, administration, and conservation of important natural resources. The course emphasizes the most important legal instruments of organizations such as the Environmental Quality Board and the Department of Natural and Environmental Resources. The course will be approached by in-depth case studies and real-life situations. May be offered face to face or up to 100% online.

ENVI 504 Environmental Documents and Evaluation

Credits – 3

The course will study the importance of environmental documents in decision-making processes. Also include background, legal basis, format requirements, content, and procedure of environmental documents, which is used in the government determination and evaluation of the environmental impacts of projects, actions, and decisions (EA, EIS, etc.). The student will learn the procedure and process for environmental permits and consultations, including the different agencies involved. The student will also learn the preparation and analysis of mitigation plans, damage prevention (wet soils, control of erosion and sedimentation of land, water forests, organisms, etc.), and plans to respond to environmental emergencies. Also included the preparation of manifests, monitoring discharge information, and environmental justice. The course will be based on the Environmental Policy of the United States and in each jurisdiction in which the student resides. May be offered face to face or up to 100% online.

ESCS 578 Introduction to Social and Community Services

Credits – 3

This course is designed to introduce students to the theory, practice and research of guidance to enhance their knowledge and ability to work with adults in a collaborative partnership using a holistic and developmental approach in defining, clarifying and achieving academic, personal and career goals. This course's framework emphasizes development of professional skills and understanding of interpersonal

relations, needs of specific individuals, groups, or communities, learning principles, and multicultural aspects of advising. Students will be able to recognize the impact of varied institutional programs and services can exert upon learning and development. Students will also identify professional development resources to stay current, knowledgeable and well-trained to fulfill responsibilities and performance expectations of an advisor. May be offered face to face or up to 100% online.

ESCS 601 Service Delivery Systems and Access

Credits – 3

This course is designed to expose the student to the management and access of community resources within a human services approach. The purpose of the course is to provide students with knowledge of the effective use and access of community resources to advise individuals in their needs and life goals. Through the course, students will become familiar with current resources and intervention technologies. May be offered face to face or up to 100% online.

ESCS 602 Student Affairs

Credits – 3

This course is designed to familiarize students with student affairs. These course main topics are: nature and purpose of student affairs, its functions, and how they can be managed, coordinated, and integrated as part of the broad educational purposes of the institution. It also examines institutional strategies for organizing, staffing, and funding the extensive array of programs, services, and facilities designed to facilitate learning and development of students. This course takes a broad look at the essential work of student affairs and its administration, examining the work through historic, theoretical, research, resource, ethical, legal, and best practice perspectives. May be offered face to face or up to 100% online.

ESCS 652 Practicum in Social and Community Services

Credits – 3

This practicum is designed to expose students to their professional role by completing a minimum total of 100 hours in the field. Students will assume responsibilities in educational, profit, non-profit, and government settings; identifying community resources and services to assist adults advance in their education, professional development and career planning. The course instructor will conduct at least one visit for each student enrolled the Practicum course. At Clinical/Practicum site.

ETEG 500 Applied Instructional Design Models

Credits – 3

An introduction to Instructional Design (ID) theories and ID models will be studied, such as Gagne (1940), Mayer (1999) SOI model; Merrill (1983, 1994) CD Model; Jonnassen (1999) CLEs Model, ASSURE ISD model (1985). This course will also introduce the stages and key elements of instructional design. May be offered face to face or up to 100% online.

ETEG 501 Fundamentals of Educational Technology

Credits – 3

Educational technology fundamental theories, concepts, and trends will be studied in this course. Student will differentiate the purpose of instructional and educational technology within the instructional design process. May be offered face to face or up to 100% online.

ETEG 502 Fundamentals of Distance Education

Credits – 3

This course is an introduction to distance education's theories, philosophy, strategies and techniques in teaching in a setting that is not face-to-face. The evolution of distance teaching will be discussed along with development of innovative applications of technologies that help leverage teaching and learning that are aligned with standards of technology education. May be offered face to face or up to 100% online.

ETEG 503 Curriculum Design and Instructional Design for the Adult Learner

Credits – 3

Introduction to the principles of instructional design for the educational or professional development of adult learners. Students will apply the principles of effective curriculum design and instructional strategies within the instructional design process to addresses learning objectives identified that the adult learner needs to master in an educational or professional setting. May be offered face to face or up to 100% online.

ETEG 504 Technology Immersions

Credits – 3

Students will explore the latest technological trends that can enhance the teaching and learning process and integrated in development of the instructional design. May be offered face to face or up to 100% online.

ETEL 600 E-learning, Technology Integration and Multimedia

Credits – 3

Students will explore the use of instructional media and technology to facilitate planning, delivery and assessment of learning in an educational or professional setting. Students will also develop conceptual understanding, ability to adapt new technologies and knowledge and skills to manage the use of media and technology that is used to study, learn, communicate and work. May be offered face to face or up to 100% online.

ETEL 601 Development of Corporate Virtual Training

Credits – 3

In this course, students will apply the knowledge and skills to develop training module/course in an area identified that will assist in the professional development of adults in the workplace. Students will identify, plan, deliver and assess learning objectives using best practices in instructional and curricular design. May be offered face to face or up to 100% online.

ETEL 602 Distance Education Assessment

Credits – 3

In this course, student will explore purpose and methods of assessment of learning in a distance education program in educational and professional setting. Students will also identify and examine distance education program evaluations for the purposes such as accreditation, continuous improvement teaching and learning and overall effectiveness of program. May be offered face to face or up to 100% online.

ETEL 603 E-learning and Virtual Learning Communities

Credits – 3

Study of media and technology used in distance education, such as video clips, audio, blogs, wikis, and open source, among others. Classes will be conducted synchronized and asynchronous in order to promote the new virtual environment of the 21st Century. Critical analysis of the principles and theories of

e-learning, communication media research, and effective teaching techniques for implementing virtual learning communities will be covered. May be offered face to face or up to 100% online.

ETEL 604 Applied Instructional Designs for the Corporate World

Credits – 3

In this course, students will further explore theories and best practices of instructional design focused on the development of professionals in a workplace. Among the topics, the analysis of improving employee performance, through a systematic design of materials, learning experiences, assessment and integrating technologies for the adult learner. May be offered face to face or up to 100% online.

ETEL 605 Applied Instructional Designs for the Academy

Credits – 3

In this course, students will further explore theories and best practices of instructional design focused on learning in an academic setting. Among the topics, the analysis of improving learner performance, through a systematic design of materials, learning experiences, assessment and integrating technologies for the different age groups, including K-12, higher and adult education. May be offered face to face or up to 100% online.

ETRE 525 Applied Research

Credits – 3

Students will be introduced to research methods for the purpose or aim to seek to solve a practical problem in the areas of instructional design and distance education. Students will explore the concepts and types of applied research and learn the essentials of proposal writing to be able to identify and write an abbreviated proposal for applied research. May be offered face to face or up to 100% online.

FAES 550 Theory for Decision Making for Agribusiness

Credits – 3

This course applies the principles and concepts of Linear and Non-Linear Programming, to minimize risk and uncertainty during the decision-making process in agribusiness. It emphasizes the application of these techniques to solve problems of production, marketing, politics, and allocation of economic and natural resources in agricultural companies. May be offered face to face or up to 100% online.

FAES 551 Agribusiness Economics of Production and Consumption

Credits – 3

Theoretical principles of macroeconomics, microeconomics, and their application to the production, consumption, and commercial exchange of agricultural and environmental goods and services. Provide the student with skills for the analysis of economic problems and business decision making, especially applied to agriculture and natural resources, through the understanding of the conceptual foundations of production, price, costs, supply, demand, and exchange of products and services in the local and international market, in order to understand how and why economies and companies operate effectively, efficiently, competitively and sustainably. May be offered face to face or up to 100% online.

FAES 552 Agribusiness Finance and Risk Management

Credits – 3

Based on the three main columns of finance: value of money over time, asset evaluation, and risk management, the course will apply these aspects of macroeconomic theory to the problems of managing finances, investment analysis, and financial markets in agribusiness. May be offered face to face or up to 100% online.

FAES 553 Current Issues in Environment, Food Safety, Market Regulations and International Trade**Credits – 3**

This course will cover aspects of the food and environmental security policies of the countries and their effect on the development and operation of agribusiness. This course will cover these topics through the reading and analysis of articles from newspapers, professional journals, and agency and institutional publications in the United States and internationally. Also, information subtracted from various Internet sites will be used. The course will provide an analysis of trade agreements, international trade policies on imports and exports, trade barriers and will analyze the environment and its relationship with international trade and its effect on agribusiness. May be offered face to face or up to 100% online.

FAES 554 Case Studies in Agribusiness**Credits – 3**

This course will study real cases faced by agribusiness in making decisions to achieve greater efficiency, capture a larger market segment, expand its area of influence, develop expansion projects, and achieve greater profitability, among others. This course will cover these topics through the reading and analysis of articles from newspapers, professional journals, and agency and institutional publications in the United States and internationally. Also, information subtracted from various Internet sites will be used. May be offered face to face or up to 100% online.

FAES 560 Human Resources Management in Agribusiness**Credits – 3**

Study of the principles of human relations, applied to agro-commercial problems such as planning, work analysis, organizational structure, recruitment and selection, training, motivation, leadership, communication, compensation, and personnel evaluation. May be offered face to face or up to 100% online.

FAES 561 Managing of Strategies and Planning for the Agribusiness**Credits – 3**

This course is focused on discussing the challenges and strategic concepts that agribusinesses face in making decisions to achieve economic viability. The course is complemented with applications and illustrations of companies in the agricultural sector. The course also integrates aspects related to operations management, marketing, finance, and human resources. May be offered face to face or up to 100% online.

FINA 200 Personal Financial Planning**Credits – 3**

Process of developing and implementing an integrated comprehensive plan to meet the financial goals of the individual and his family. Achievement of financial stability during the productive years, prepare financially for retirement and estate planning. May be offered face to face or up to 100% online.

FINA 202 Business Finance**Credits – 3**

A study of fundamental principles of business finance and its analysis, planning, and control functions: effect of income tax, financial ratio analysis, forecasting, capital budgeting and cost of capital, and interest factor in financial decisions. May be offered face to face or up to 100% online.

FINA 204 Money and Banking

Credits – 3

The nature of money, development and functions of financial institutions, the structures of the operations of the Central Bank of the United States and its relationship with monetary policy and international money markets. Analysis of the impact and significance of the monetary, fiscal and income in our economy. May be offered face to face or up to 100% online.

FINA 240 Risk and Insurance**Credits – 3**

The course describes the risks to which individuals, and businesses are exposed, and the costs associated with such risks. Emphasis will be given to risks related to the liability of manufacturers for their products, and the responsibility for the operation of establishments, use of vehicles, professional liability, property losses and accidents at work. Various techniques used for risk management will be studied, including risk assumption, prevention, diversification and transfer of risks through insurance and other contractual mechanisms. Commercial policies related to the risk of ownership and public liability and the different types of companies operating in the insurance industry will be analyzed. May be offered face to face or up to 100% online.

FINA 301 Financial Statements Analysis**Credits – 3**

Study of the different methods and techniques used in the analysis of the basic financial statements. Analysis and comparison of different financial statements used in business. May be offered face to face or up to 100% online. Contact Hours: 45

FINA 305 Public Finance**Credits – 3**

Income sources and trends in government expenses, their effects on total consumption, savings and investment, fiscal policy, incidence and transfer of different types of taxes, and problems inherent in the different state and local taxes. May be offered face to face or up to 100% online.

FINA 308 Real Estate and Property Administration**Credits – 3**

This course presents the principles and practices for the acquisition, sale and administration of Real Estate. It includes issues related to the purchase and sale of real estate, mortgage cases and real rights, financing, and appraisal. May be offered face to face or up to 100% online.

FINA 312 Financing Institutions**Credits – 3**

Functions of the most important financing institutions in our economic system. Emphasis is on the management of banking institutions, savings and loan associations, insurance and investment companies, cooperatives and mutual funds. May be offered face to face or up to 100% online.

FINA 320 Banking Policies Administration**Credits – 3**

Analysis of the variables that affect commercial banking, structure, operations and profit included the balance sheet and its relation to other operational strategies to maximize profit and control risk, liquidity and evaluation of capital structure. May be offered face to face or up to 100% online.

FINA 401 Investment

Credits – 3

This course includes the study of business cycles and their effects on assets financial statements. We also look at the fundamentals of investment, uncertainty, speculation, risk, given value and diversification. Will include market knowledge, information sources, liquidity, portfolio investment, and interpretation of financial information. May be offered face to face or up to 100% online.

FINA 505 Managerial Finance**Credits – 3**

The course study's methodology and concepts relevant to the financial decision-making process. Within the framework of modern financial theory, this course examines how to manage the sources and uses of capital to achieve corporate goals. It specifically includes the study of financial analysis and financial planning techniques, long-run investment decisions, short-run liquidity needs, and long-run financial strategies and instruments. May be offered face to face or up to 100% online.

FINA 610 International Finance**Credits – 3**

This course deals with unstoppable globalization in that we are immersed, is affecting directly the change of the economy in the world and affecting all of the business activities and the contractual relationship, business and financial matters particularly bound obligatory to the business bank, in which its intervention in the international commerce is absolute and determinant. In this course will be discuss the different methods of payments and collections, the contracts banking-financiers of the foreign trade, loan, opening of credits, rules and regulations of this procedures and leasing, forfaiting and the different warranties linked to the international operations such as advance payments bond, maintenance bond, performance bond, retention bond, tender bond and bid bond. May be offered face to face or up to 100% online.

FINA 670 Risk and Insurance**Credits – 3**

This course offers an analysis of the risk management problems in the business enterprise. It emphasizes the methodology for risk analysis, techniques for risk, loss control, models for risk management decision making, and procedures for administering risk management policy relative to no speculative (insurable) risk. The course incorporates product liability, property damage, and bodily injury in the business environment. May be offered face to face or up to 100% online.

FINA 702 Corporate Finance**Credits – 3**

This course covers the theory and empirics of corporate finance. The starting point of the course is an introduction to the Modigliani-Miller irrelevance theorems, which describe a frictionless set-up in which capital structure is independent of the firms' characteristics or choices and is irrelevant for the valuation of the firm. A variety of deviations from this frictionless scenario are then studied. In different cases, we analyze optimal capital structure, payout policies, corporate taxation, financial distress, the use of capital structure as a signaling device, and control allocation, amongst others, and how these affect the firm's valuation and investment decisions. In addition, we will also cover topics related to corporate governance, initial public offerings, managerial compensation, financial constraints and mergers and acquisitions. May be offered face to face or up to 100% online.

FINA 704 Entrepreneurial Finance**Credits – 3**

This course covers the financial aspects of small business entrepreneurship for owners of sole proprietorships, partnerships, and small nonpublic corporations. We cover (in varying degree) the following topics: economic concepts of finance, management functions, business organizations and ownership, elements of a business plan, problems with financial statements, vertical analysis, horizontal analysis, ratio analysis, profitability, bankruptcy, break-even analysis, forecasting, pro forma financial statements, current working capital management, effective rate of return, time value of money, techniques of capital budgeting, risk management, investment strategies, pension planning, and estate planning. There will be a heavy use of cases for the application of entrepreneurial financial concepts. May be offered face to face or up to 100% online.

FINA 705 Financial Derivatives

Credits – 3

The purpose of this course is to help prospective financial managers, general managers and senior functional managers gain a thorough understanding of what financial derivatives are, how they work, how they are used, and how to measure the risks and rewards associated with them. The first part of the course deals with the structure of futures markets, pricing of futures contracts and hedging with such contracts. The second part of the course deals with options markets; strategies, pricing and position analysis and hedging with such contracts. The course will consist of lectures, discussions, problem solving, cases and market tracking. May be offered face to face or up to 100% online.

FINA 706 Investments and Financial Markets

Credits – 3

This course discusses Portfolio Theory with applications to the markets for equities, fixed income securities, and options. Risk analysis and investment strategies are discussed within the financial crisis context. The following question will be proposed to students: How can I increase the value of my firm by using investments? The answer to this question will be the object of study in this course. There will be a heavy use of cases and research papers for the application of Investment theory so that an answer to the “course question” may be developed. May be offered face to face or up to 100% online.

FINA 707 Risk Management in Financial Institutions

Credits – 3

A financial institution faces market and credit risk every day: Changes in foreign exchange rates, interest rates, stocks, and commodity prices make organizations vulnerable to financial loss. As a result, uncertainty surrounds an organization’s future and the fair market values of its assets and liabilities. This course offers insight on managing uncertainties and the successful use of hedging strategies and derivative instruments, demonstrating how to aggregate information from across an organization, combine different instrument types into one portfolio, perform scenario and stress tests, calculate at-risk measures, and deliver a customized report. Also presented is an overview of the most recent techniques used in credit-risk management, aimed at new models in this fast-developing area. Examples taken from well-known cases underline the importance of an adequate credit-risk management system. May be offered face to face or up to 100% online.

FINA 708 Financial Management in Public, SME's and Non-Profit Organizations

Credits – 3

This course studies the finances of public, SME's and nonprofit organizations from an integrated point of view. The finances in public organizations are guided by the Government’s fiscal, economic and monetary policies. These policies will have a direct impact on SME’s and nonprofit organizations. On the other hand, the Government needs to promote the creation and proliferation of SME’s and nonprofits to maximize

economic growth in a country. This course discusses financial statements, legal financial requirements, structure of cash flows, investments opportunities, and financing for each type of organization. The concept of entrepreneurship is applied to expand the financial possibilities of each type of organization. There will be a heavy use of cases for the application of financial concepts into each type of organization. May be offered face to face or up to 100% online.

FINA 709 Global Corporate Finance and Sustainability

Credits – 3

In this course the participants will be able to develop a body of knowledge, practices, attitudes, and skills needed to make financial decisions for global enterprises. The course is a continuation of Corporate Finance FINA 702. It takes on the topics where Corporate Finance leaves off. Its aim, precisely, is twofold: (a) to take the topics of Corporate Finance to a global platform, and (b) to further expand upon those topics in line with the most recent developments in financial strategies related to firm's sustainability and in business/economic practices that are global in nature. The course is a mix of about 70 percent finance and 30 percent economics. Both the finance and economics components are heavily cast in the framework of strategy and decision making in a global environment. May be offered face to face or up to 100% online.

FINA 715 International Finance

Credits – 3

This course is devoted to studying international monetary economics and finance both theoretically and empirically. We begin with a historical overview of the gold standard, the Bretton Woods system, and current international monetary regimes and currency systems. We then examine theoretically and empirically the balance-of-trade and balance-of-payment accounts and their adjustments. Exchange rate systems and exchange rate determination and adjustments are also studied, with particular attention to empirical studies on exchange rate dynamics and their impact on macroeconomics. Special emphasis is given to the study of international monetary and financial arrangements, the financial sector, and financial instability and monetary and fiscal policy issues. Topics include issues of exchange rate volatility and its impact on the real and financial sector, foreign debt, capital flows, currency runs, and international portfolio choice; World Bank and IMF policies and issues concerning financial market liberalization; international financial regulations; and international financial architecture. There will be a heavy use of cases for the application of international finance concepts. May be offered face to face or up to 100% online.

FINA 716 Money, Banking and Investment Markets

Credits – 3

Money and banking are an interesting and diverse field of study. It may be focused from an investments point of view. Financial news channels on cable provide a nearly 24-hour stream of reporting and analysis of the conditions in the Investment markets around the world. Websites are created to provide more analysis -some good, some bad - on global investment conditions. The host of financial crises in the emerging market economies have served to remind economists, bankers and investors of the importance of the banking system, and to reconsider appropriate risk taking. The recent debates over globalization as seen in documentaries and the mass of new books published on the subject have neglected one of the most prominent features of this process – the role of investments (financial) instruments and ethics. The study of money, banking and investment markets should help to make sense of these topics. To do so, it will require some background in investment theory, a means to organize one's thinking, and a basic knowledge of some of the technical details and institutions, therefore, this course will concentrate in the interactions of several key players as banks as the primary financial intermediaries, the federal reserve as

the executioner of monetary policy, the government as the initiator of fiscal policy and the private and institutional investors as the fuel of the economy through investment markets. This course presents a broad picture of the system to any prospective investor. The use of case study will enhance the integration of all parts of the system. May be offered face to face or up to 100% online.

FINA 717 Advance Investment Knowledge

Credits – 3

This course will provide the student with further immersion into the investment knowledge from a realistic and practical point of view: How is life being an investment broker? What does it take to become an investment broker? What is the practical difference between a broker and a dealer? The course discusses the microstructure of an investment market with emphasis in the role of an investment broker in the market inner workings. The use of case studies will be one of the main tools for discussion of different investment topics as well as the presence of real investment brokers in the class. May be offered face to face or up to 100% online.

FINA 721 Advance Finance Seminar

Credits – 3

Seminar style course in which they discuss cases, articles and lectures on contemporary issues in finance. Integrate concepts and skills acquired in major courses. The selection of cases, articles, and lectures to be studied is designed to encourage analytical discussion, generate ideas and application of concepts and models relevant to financial decision making in an environment that simulates the one where you play in your work area future. May be offered face to face or up to 100% online.

FYIS 101 Induction Seminar to University Life

Credits – 3

This course was designed to support students in the process of transition to online university life. Students will learn to access information, use technology to be able to meet course requirements and gain knowledge of the University's policies and procedures that impact completion of program of study. Must be taken the 1st part of term of enrollment. Offered 100% online.

FYNE 100 First Year Nursing Experience

Credits – 3

This course introduces prospective nursing students to elements required to successfully enter into and succeed in the pre-licensure nursing program. Emphasis will be placed on study skills and basic English, Math and Science concepts. Offered on-site only.

GEOG 205 Global Communities and Resources: Critical Perspective

Credits – 3

The course is an introduction to human problems in the contemporary world. Physical geography and different theories related to this phenomenon are considered. Implications of problems related to the economic and political development of society will also be discussed. May be offered face to face or up to 100% online.

GRAD 101 Color Theory

Credits – 3

This course introduces the fundamentals of color theory and its application in graphic design. Students will explore the color wheel, harmonies, contrast, and the emotional and cultural impact

of color. Emphasis is placed on using color effectively in layouts, branding, and digital/print media, while gaining hands-on experience with Adobe tools to create palettes, swatches, and mood boards. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 102 Printing Techniques

Credits – 3

This course provides students with a comprehensive understanding of traditional and contemporary printing techniques used in the graphic design industry. Students will explore various printing processes, substrates, inks, pre-press procedures, color separations, proofing, and layout methods, gaining the practical knowledge required to manage print production from concept to execution. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 103 Digital Graphic Design

Credits – 3

This course covers the basic elements and principles of digital graphic design. The main focus is on applying the fundamental elements of composition, color theory, typography, aesthetics, and hierarchy in design. Additionally, the course aims to encourage each student's creativity and critical thinking so that their work conveys a clear and high-quality message. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 104 Introduction to Typography

Credits – 3

This course explores the fundamentals of type as a design tool, including letterforms, spacing, hierarchy, and grid systems. Students will apply typographic principles and specifications using industry-standard software to create professional-quality layouts for print and digital media. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 105 Typography I

Credits – 3

The students will obtain knowledge in the history of typography, how to classify fonts and their anatomy. Students will study the different expressions of typography and analyze its optical effect. Will learn to work with the typographic measuring system and composition; They will start to design their own typography and study the process of converting analog to digital typography. The students will also learn about different international organizations that work in the development and study of typography. May be offered face to face or up to 100% online.

GRAD 106 Digital Video Production and Direction

Credits – 3

This course provides students with foundational knowledge and practical skills in audiovisual production, with a focus on content creation for social media platforms. Students will explore the full production process—from concept development and scripting to camera operation, lighting, sound recording, and post-production editing. Emphasis is placed on audience analysis, programming strategies, and adapting content for digital formats. Through lectures, hands-on labs, and collaborative projects, students will learn to produce engaging, high-quality multimedia content

optimized for online distribution. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 107 Multimedia Studio

Credits – 3

This course provides a comprehensive introduction to the principles and practices of multimedia communication. Students will explore the essential characteristics of multimedia, ethical considerations in digital environments, and foundational design concepts. Through hands-on projects, learners will develop skills in visual communication, user interface design, and usability. The course also covers sound recording, scripting, and podcast production, as well as photography, video, and live media coverage. By integrating graphic elements and multimedia visualization techniques, students will gain the tools necessary to create compelling and effective digital content across a variety of platforms. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 130 Image Studio – Black and White

Credits – 3

The objective of this course includes the introduction of digital image making and graphic design software; the development of image research skills; the development of narrative presentation skills; and a cross-cultural introduction of information organization systems. These skills will be applied in various forms required of industrial designers including, simple instruction manuals, research documents, user scenarios, and various forms of presentation boards. Particular attention will be placed on typography and photographic imagery. May be offered face to face or up to 100% online.

GRAD 131 Image Studio – Color

Credits – 3

This course builds upon the curriculum of Image Studio - Black & White and introduces color into rendering and representation skills. Digital color imaging and printing skills are introduced, and students will be taught basic digital and film photographic documentation skills. In addition will learn traditional product illustration techniques including marker and colored pencil techniques. May be offered face to face or up to 100% online.

GRAD 135 Design Presentation and Communication

Credits – 3

This course introduces students to professional design presentation skills, including logo development, document production, and live presentations. Students will learn research-driven design techniques, sketching, moodboarding, and typographic principles, while also mastering mounting, matting, and industry-standard presentation procedures. Emphasis is placed on creating polished design materials and delivering confident, professional presentations. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 145 Communication Studio

Credits – 3

This course introduces information design and live presentation skills to designers. Desktop publishing and graphic design skills employed in the development of documents and presentation materials ranging from business cards and announcements to booklets, research documents, concept presentations and

exhibition materials will be focused upon. In addition, significant attention will be paid to students live presentation skills. These presentations will be coached, scripted, videotaped and critiqued. May be offered face to face or up to 100% online.

GRAD 200 Introduction to Media Enterprises

Credits – 3

This course introduces students to professional practices, technical skills, and collaborative workflows in media production. Students will learn to work effectively in teams, meet deadlines, care for equipment, apply industry standards and terminology, and produce creative advertising layouts across print, digital, and other media formats. May be offered face to face or up to 100% online. Contact hours: 45.

GRAD 202 Graphic Design Studio 1

Credits – 3

This course will give the student a basic knowledge of the history of graphic design and its evolution into the Digital Era. The student learns to work with the elements of design, image and typography. The student will begin to differentiate a vector image and raster image and use software to manage both. The student will design simple publications: stationary, brochures, posters, shoppers, creative resumé and newspaper advertisings; as well as learn to select the appropriate typography and suitable image format for the importation and exportation images between software in use. May be offered face to face or up to 100% online.

GRAD 210 Graphic Design Studio 2

Credits – 3

This course offers a study of the entire component of a publication, in books, magazines, newspapers, shoppers and brochures. The students will learn to diagram a publication of multiple pages, as well as import and manage digital images to all types of publication. Students will design master pages, layers, typographic styles, columns and other elements for a digital publication. Students will also study and create a grid. May be offered face to face or up to 100% online.

GRAD 215 Typography II

Credits – 3

In this course the student will learn how to manage the fonts in different platforms. The student will start to recognize the different existing digital fonts and how they are developed. The student will also learn how to manage the fonts on the different available media and will integrate the typography as a design element, and as an image. They will transport the text to the different software knowing all the specifications considered necessary to complete the work. The students will start to create their own font library/database and will use the internet as a searching tool to select the suitable fonts for the design. May be offered face to face or up to 100% online.

GRAD 310 Graphic Design Studio 3

Credits – 3

In this course the student will obtain knowledge in the area of interface design. Beginning with the creation of a non-linear conceptualization in the graphic design area, students will work with the principles of dynamism and interaction in the design. Students start to work with the design of buttons, menus, bars, links and graphics in movements applying the basic knowledge of design to a multimedia project. May be offered face to face or up to 100% online.

GRAD 320 Packaging Design**Credits – 3**

This course approaches the component and principles of packaging design. Students will learn about the history of the package in order to understand the importance of the design elements (image and typography) on the packaging design. The students will recognize the importance of the art as a design element as it is the color, the space, shape, texture and lines. They will manage the different materials available for the creation of a package. The student will study some of the rules and regulations established for the package design and will learn the different classifications that conditions for the transportation and storage of the packages. May be offered face to face or up to 100% online.

GRAD 325 Video Editing**Credits – 3**

This course offers an introduction to linear and non-linear video edition. The students will learn about the RGB color mode used on computer monitors and commercial television. They will learn the logistics and techniques for video recording and the appropriate techniques for video editing. The students will know how to integrate text on the video screen and how to work with the programs for digital video editing. The student will know how to select from different system memories, storage systems and the appropriate format for the project. May be offered face to face or up to 100% online.

GRAD 410 Senior Design Project I**Credits – 3**

Students begin in a process, based upon professional practices, that will result in the development and complete a graphic design proposal. Design processes employed in earlier courses will be applied in the ideation, research, design documentation, and prototyping of the new product. Investigation of design trends and market research will be undertaken as students work toward innovation in their designs. May be offered face to face or up to 100% online.

GRAD 420 Senior Design Project II**Credits – 3**

This course is a continuation of the work begun in GRAD 410. Students continue the process, based upon professional practices, that will result in the development and complete a graphic design proposal. Design processes employed in earlier courses will be applied in the ideation, research, design documentation, and complete a graphic design proposal. Investigation of design trends and market research will be undertaken as students work toward innovation in their designs. May be offered face to face or up to 100% online.

GRAD 430 Portfolio Studio**Credits - 3**

This studio will focus on the preparation and refinement of a portfolio that encompasses the student's work within the program and any other distinguishing activity. The goal will be the production of a refined, multifaceted presentation of the student goals and creative vision and his or her ability to engage in professional practice. May be offered face to face or up to 100% online.

HADM 101 Communication Skills for Health Care Professionals**Credits – 3**

The course brings the basic knowledge and skills to communicate in a variety of Health Service workplace settings. The students will learn on writing correspondence, communication technology and

effective communication strategies and skills for the health care industry. May be offered face to face or up to 100% online.

HADM 110 Health Care Management

Credits – 3

Explore the concepts of management theory as applied to health care. The student will learn the organizational structure of Health May be offered face to face or up to 100% online. Care Organizations and their making decisions process, planning and problem-solving procedure.

HADM 130 Ethics and Social Responsibility in the Health Care Services

Credits – 3

The student will identify ethical issues in the health industry. The course will encourage the student to clarify their personal ethics and align them to the health care issues. This will involve an understanding of diverse populations whose actions and decisions are based on their personal ethics. May be offered face to face or up to 100% online.

HADM 140 Accounting for Health Care Services and Administration

Credits – 3

This course provides an understanding of the fundamental concepts of accounting applied to the health care environment. Students will examine accounting practices and procedures to support managerial decision making within the health care organizations. May be offered face to face or up to 100% online.

HEMG 600 Fundamentals in the Evaluation of Health Services

Credits – 3

Discussion of the development of the discipline, the scope, effectiveness and efficiency of the evaluation of health services. After completing the course, the student will demonstrate the added value of the discipline, the importance of the specialty and the models of greater relevance in health services. We will study the components of planning, institutional goals, budget development, strategic thinking and continuous qualitative and quantitative monitoring mechanism in the healthcare scenario. May be offered face to face or up to 100% online.

HEMG 610 Legal and Ethical Issues in the Evaluation of Health Services

Credits – 3

The course will train students in the knowledge related to the legal and ethical issues in research and evaluation in the health sector in the United States. Will prepare the student to exercise control in matters relating to patient rights, risk management, ethics and compliance, and meet requirements for specific regulations, such as Patients' Rights HIPAA Law, Federal Law 45 CFR 46 Parts A, B, C and D and biosafety principles. As an educational resource, case studies will be included. May be offered face to face or up to 100% online.

HEMG 620 Quality Management in Health Services

Credits – 3

After completing the course, the student will integrate essential concepts and processes of Quality Management in the evaluation of health services. Students will explore trends in health services and compliance with state regulations of the Department of Health and the federal Center for Medicare and Medicaid Services (CMS). It will reinforce the skills to examine and identify solutions to existing problems in the evaluation of health services from the perspective of Total Quality Management. There will be a compilation of the most important historical events of the quality movement, discussion of how quality

has impacted organizations, success factors, teamwork, and customer satisfaction. Also presented will be quality initiatives taken at local and international levels to ensure the quality of services. May be offered face to face or up to 100% online.

HEMG 630 Evaluation Models Analysis

Credits – 3

Analysis of the different models of program evaluation, including needs assessment, formative research, process evaluation, monitoring outcomes, impact assessment and cost analysis. The students will be taught to develop indicators, statistical analysis, and development of an evaluation plan to measure the impact on the organization. May be offered face to face or up to 100% online.

HEMG 640 Effective Strategies for the Evaluation of Health Services

Credits – 3

Students will learn to strategically plan and develop models aimed at identifying effective and efficient solutions related to many aspects of health care organizations, including tax, resource conservation and green energy, workers, computer support services, queuing system, medications, case mix, institutional certification and accreditation, and compliance, among others. The course will encourage a proactive approach to analysis and evaluation with the primary objective of maximizing the competitiveness of the company they work for. May be offered face to face or up to 100% online.

HEMG 650 Final Project: Development of an Evaluation Model for Health Services

Credits – 3

This course involves practical application of the principles and methods of assessment in the management of health services, programs and policies. Students will consider the distinction between the advantages and disadvantages of different research methods, understanding the concepts of cost-benefit and cost-effectiveness. This final course of the program is aimed at the development and application of a model for program evaluation. May be offered face to face or up to 100% online.

HESC 109 Nutrition Essentials for Health Sciences

Credits – 3

This course is designed to introduce the health sciences student to human dietary and nutritional principles and their role for proper growth and development, as well as maintenance of health across the lifespan. The course includes nutritional fundamentals, including nutritional assessment, identifying risk factors, determining nutrient requirements, and selecting appropriate interventions to include health teaching and therapeutic communication/counseling. Life cycle nutrition, functional elements of nutrition support, nutritional care trends, and nutritional considerations in specific disease states and the impact of cultural, lifestyle, and economic influences are integrated throughout the course. May be offered face to face or up to 100% online.

HESC 201 Statistics for Health Sciences

Credits – 3

This course is an introduction to the concepts, procedures, and technology used in the statistical analysis of data in health services. Emphasis is placed on statistical terminology; bio-statistical methods and applications; descriptive statistics; evaluating confidence and probability; and inferential techniques for analysis and interpretation of health sciences data. May be offered face to face or up to 100% online.

HESC 365 Health Sciences Research

Credits – 3

This core course is aimed to students to acquire the skills required in the research process, based on ethical and legal principles. Emphasis will be on critical analysis of research articles, discussion of different theoretical frameworks and the importance of health research to implement changes. As part of the course, students will complete the certifications "Information Privacy and Security" (IPS) and "Responsible Conduct of Research" (RCR) to develop a research proposal. May be offered face to face or up to 100% online.

HESC 500 Statistics Applied to Clinical Research

Credits – 3

The student has the opportunity to study and apply statistical methods useful in quantitative and qualitative analysis of clinical research. Review of descriptive and inferential statistics with simple uni-variable procedures. Statistical analyses of multi-variables and complex hypotheses testing procedures are also discussed. The material is presented to facilitate students' application of the concepts learned in research courses and focused on research utilization. May be offered face to face or up to 100% online.

HESC 700 Applied Biostatistics

Credits – 3

This course provides students with the knowledge of quantitative techniques, hypothesis testing, common distributions, statistical methods, and data analysis. It will prepare the student to use information technology and research methods to collect and analyze appropriate and accurate data to generate evidence for nursing practice. This course is cohort-based, which means that there is an established start and end date, and that the student will interact with other students throughout the course. May be offered face to face or up to 100% online.

HESM 110 Health Services Management

Credits – 3

Introduction to the fundamental concepts of management of health services facilities. Application of the administrative processes: organization, direction, control and evaluation. Emphasis is placed on public policies, health services management status, trends, organization, practices and issues relative to the delivery of health services in the United States. May be offered face to face or up to 100% online.

HESM 210 Health Systems Models

Credits – 3

A study of the systems, models, health policies and the infrastructure of health services in the United States. Emphasis is placed on health reforms and the implication in the delivery of health services to the general population. Includes a review of the historical development and the future of health services. May be offered face to face or up to 100% online.

HESM 220 Services Planning and Evaluation of Health Services

Credits – 3

A study of the historical development of planning and evaluation of health services in the United States with emphasis in its impact in organizations and in communities. Includes the theoretical foundations of planning strategies. Discusses and applies the techniques of evaluation to the health sector. May be offered face to face or up to 100% online.

HESM 230 Basic Accounting for the Health Industry

Credits – 3

A study of the social, economic, and political developments that have influenced and determined the accounting practices in the health services industry. Reviews accounting procedures and discusses their applications in the health services industry. Actual and hypothetical health services accounting problems will be discussed. May be offered face to face or up to 100% online.

HESM 310 Economics of the Health Industry

Credits – 3

A study of the modern micro and macro economy applied to health services in the public and private sectors. Emphasis is placed in the situations and issues of health economics. Discusses the relationship between the market forces of need and demand of health services. May be offered face to face or up to 100% online.

HESM 320 Basic Finance for the Health Industry

Credits – 3

A study of the financial practices of health services organizations. Also, includes the fundamental methods and techniques for financial administration in the health services industry, including fund distribution, capital management, determination, and assignment of costs service rates. Case studies and applications are provided. May be offered face to face or up to 100% online.

HESM 330 Legal Aspects in the Health Industry

Credits – 3

A study of the existing legislation in health services in the United States. Emphasis is placed in the norms that have a bearing in the health services industry. Application experiences through case studies in aspects such as: malpractice, patient rights, informed consent, doctor-patient relationship, accidents, collective bargaining, and ethical and legal issues. May be offered face to face or up to 100% online.

HESM 340 Budgeting for the Health Industry

Credits – 3

A study of budget models, including the corresponding programmatic plans, and budget distribution. Emphasis is placed in goals, objectives and measurable results. The course provides for the application of budget models and techniques to health services settings. May be offered face to face or up to 100% online.

HESM 410 Health Information Systems

Credits – 3

A general introduction to the theory of information systems. The course provides for the application and use of software packages specifically designed for the health services industry for use in microcomputers and in mainframes, and for data collection, services utilization, billing, census, and others. May be offered face to face or up to 100% online.

HESM 420 Special Topics in Health Services

Credits – 3

Analysis and discussion of current issues and trends in the health services industry. Emphasis is placed in critical reading and analysis of case studies. May be offered face to face or up to 100% online.

HESM 431 Seminar in the Health Services Management

Credits – 3

The course is designed to provide the students the opportunity to integrate and apply the knowledge, methods, and techniques to perform successfully in a primary and intermediate management process throughout the different environments in the healthcare field. The student will use the concepts of Health Services Management oriented to strategic planning to ensure a balance between the provision of health services and an effective administration. May be offered face to face or up to 100% online.

HESM 500 Leadership and Organizational Behavior in Health Services

Credits – 3

The course will present how organizational behavior is involved in the role, performance, and leadership of the manager in health services. It will present the concepts of leadership, differences between leaders and managers, attitudes, personality traits, emotional intelligence and its importance in the environment of health services, in addition to developing successful teams and delegation of authority. The student will identify how individuals learn and how personality is involved in the process of learning and decision-making. There will be case studies to provide application of learning. May be offered face to face or up to 100% online.

HESM 510 Strategic Planning in Health Services Organizations

Credits – 3

This course focuses on the study of the components of planning, institutional goals, budget development, strategic thinking, and qualitative and quantitative mechanisms for continuous monitoring in a health setting. Assessment methodologies are discussed to compare different situations and to develop and establish work plans. May be offered face to face or up to 100% online.

HESM 520 Fundamentals of Accounting and Finance in Health Services

Credits – 3

This course explores the essential practices of accounting and finance applied to the health sector. The student will apply the concepts learned from the environment of healthcare settings, including costs, forecast, future costs, direct and indirect costs, "ratios", patient's day's costs, case mix, productivity, inventory analysis, balance sheet, EBITDA, among others. It will focus on the development and interpretation of daily and monthly financial reports as a measure of risk prevention and institutional stability. May be offered face to face or up to 100% online.

HESM 530 Economy in the Healthcare Market

Credits – 3

The course will provide students with the theories and economic principles that guide the health market related to the production of goods, distribution of resources, supply and demand. Economic analysis of the health market will be performed including case studies. It will assess the micro and macro environment that explain economic processes. May be offered face to face or up to 100% online.

HESM 540 Health Services Information Systems

Credits – 3

Students will learn the basics of design, requirements, applications, operation, control and regulation of computer systems in the health services. Be trained in the use and benefits of electronic medical records, disclosure protocols and operation, as well as to use information management systems to enter data, analyze them and obtain information for research and evaluation purposes. Students will review requirements for various applications such as Laboratory Information System (LIS), Picture Archiving and Communications System (PACS), Billing and Collection (Billing and Collection), and others. May be offered face to face or up to 100% online.

HESM 550 Research Methods in Health Services Management

Credits – 3

The course includes the analysis of various research designs and methodologies and quantitative and qualitative research studies that apply to the management of health services. The course is designed to strengthen students' knowledge in the process of drafting and preparing applied research reports that help management in the decision-making process. May be offered face to face or up to 100% online.

HESM 560 Applied Biostatistics

Credits – 3

Study of the principles and basic concepts of applied statistics and inferential analysis principles in health services. Emphasis is placed on the assessment and analysis of descriptive statistics, hypothesis testing and estimation. It covers the basics of inferential statistics applied to hypothesis testing, mean proportions and variances in the process of health management and evaluation. Identify and recognize the importance of regression and correlation analysis. May be offered face to face or up to 100% online.

HESM 570 Fundamentals of Epidemiology

Credits – 3

It emphasizes the importance of the manager and evaluator of health services and its importance as a leader in creating solutions that meet the needs of communities. Application of the epidemiological method in the management of health services. It will consider the principles of epidemiology as a control and eradication of diseases to solve the health problems of the population. The course describes the natural history of the disease and the inclusion of statistical strategies for health promotion and disease prevention. It also discusses the advantages and limitations of various epidemiological designs. May be offered face to face or up to 100% online.

HEST 100 Health, Safety and Medical Law and Ethics

Credits – 3

This course discusses legal and ethical responsibilities related to the concepts of wellbeing and sickness. Other components of this course include the awareness and practice of safety procedures as well as the recognition and response to emergencies. The student will learn and discuss all the OSHA standard precautions/ consciousness of pathogens transmitted in blood, infection control/ hand clean procedures. May be offered face to face or up to 100% online. Contact hours: 45

HEST 101 Medical Terminology

Credits – 3

This course introduces the student in the knowledge and use of the vocabulary, concepts and terms frequently used in medical offices and other places where health services are offered. It is divided into four basic sections: 1) Etymology of the medical terms (prefix, root, and suffix) 2) Common abbreviations 3) Systems of the human body (function, organs, conditions or related diseases) 4) Medical specialties and sub-specialties' and their functions. May be offered face to face or up to 100% online. Contact hours:45

HIDE 100 History of Art

Credits – 3

This course surveys the history of artistic representation as a record of the social, technological, environmental, and political circumstances of a period. The goal of this course is to establish an understanding of art as an expression of the desires, aspirations, needs, esthetics, and available

resources of subjects/users throughout history. Human behavior and artistic representations will be examined, from the earliest representations to current film and digital media that envision the future. May be offered face to face or up to 100% online.

HIDE 101 History of Art

Credits – 4

This course surveys the history of artistic representation as a record of the social, technological, environmental, and political circumstances of a period. The goal of this course is to establish an understanding of art as an expression of the desires, aspirations, needs, esthetics, and available resources of subjects/users throughout history. Human behavior and artistic representations will be examined, from the earliest representations to current film and digital media that envision the future. Includes a documentary research lab component. May be offered face to face or up to 100% online.

HIDE 110 Representing Culture: Art & Artifact 1500-1850

Credits – 3

This course will study the history of art and objects in the contexts of one another, and framed within the context of the economy, industry and technology, culture, politics and sociology in which they were produced. Approaching the period between 1500-1850, the migration of ideas around the globe will be explored in relationship to the evolution of design and art, paying particular attention to moments when cultures intersect and the impact on the course of ideas and material culture. May be offered face to face or up to 100% online.

HIDE 111 Representing Culture: Art & Artifact 1500-1850

Credits – 4

This course will study the history of art and objects in the contexts of one another, and framed within the context of the economy, industry and technology, culture, politics and sociology in which they were produced. Approaching the period between 1500-1850, the migration of ideas around the globe will be explored in relationship to the evolution of design and art, paying particular attention to moments when cultures intersect and the impact on the course of ideas and material culture. 15 hours of research lab. May be offered face to face or up to 100% online.

HIDE 200 History of Design 1800-Today

Credits – 3

Through lectures, tutorials and research projects students will be introduced to the history of design from the industrial revolution to the present. Relationships between design, art, industry, environment, and culture will be discussed as factors in the design development. Urbanism, history, politics and technological advances will also be examined as pivotal influence in design. May be offered face to face or up to 100% online.

HIST 101 Introduction to the Study of History

Credits – 3

The course is an introduction to the study of historical and cultural activities. It promotes the understanding of the importance, meaning, and pleasure of the study of History and the knowledge about the process of its writing. It trains the university student to learn the many lessons that we can learn from History. Answer the question: why the story? May be offered face to face or up to 100% online.

HIST 273 History of the United States of America

Credits – 3

This course is a survey of the political, economic, and socio-cultural development of the United States of America through its history. It covers the hominization process in the continent, its geographical surroundings, and the development of the Amerindian settlements. It also includes a chronological analysis of the major historical processes that contributed to the development of the U.S. from its origins to present. May be offered face to face or up to 100% online.

HIST 274 History of the United States of America**Credits – 4**

This course is a survey of the political, economic, and socio-cultural development of the United States of America through its history. It covers the hominization process in the continent, its geographical surroundings, and the development of the Amerindian settlements. It also includes a chronological analysis of the major historical processes that contributed to the development of the U.S. from its origins to present. 15 hours for research lab are required. May be offered face to face or up to 100% online.

HUMA 101 World Cultures I**Credits – 3**

This course is a critical study of the evolution of humanity from its beginnings to the development of cities and urban life. The course focuses on the impact of old civilizations at the world-wide level. It promotes the understanding of the moral, social, and cultural values in general at diverse times. May be offered face to face or up to 100% online.

HUMA 102 World Cultures II**Credits – 3**

Critical study of the humanity cultural evolution from the origin of the cities and the urban life until the modern society. Attention to the most important cultural events. Promotes understanding of the moral, social and cultural aspects of society in the global context. May be offered face to face or up to 100% online.

HURE 501 Human Capital Management**Credits – 3**

This course prepares students to address the concepts of personnel development as managers. Students learn criteria for developing effective job analysis, appraisal systems, and appropriate career development plans for employees. Other topics include personnel selection, employee compensation, benefits, training, workplace diversity, discipline, employee rights, unions, and management behaviors. May be offered face to face or up to 100% online.

HURM 201 Recruitment, Selection and Talent Management**Credits – 3**

The course covers the theories, research and legal aspects that shape the practices and trends of recruitment, selection and retention of personnel in modern organizations from a strategic perspective. Emphasis on applied learning, students will develop and apply processes and methods of recruitment and selection to meet the needs of the organization and the challenges of a diverse workforce. May be offered face to face or up to 100% online.

HURM 210 Policy Making, Evaluation, and Reward System**Credits – 3**

Study of different compensation systems to attract, motivate and retain employees. Include the analysis of theories of motivation and reward, legal aspects of remuneration, classification and compensation systems, benefits and incentives, non-monetary rewards, wage structures, competency-based pay and performance evaluation. May be offered face to face or up to 100% online.

HURM 215 Human Resources Information System

Credits – 3

Discussion of management and functional foundations of information systems programs for managing human resources in the organization. Analysis of the main characteristics related to applications and programs, research and evaluation needs of information systems in the human resources function. Applications and comparison of major programs, such as PeopleSoft, SAP or BAAN. The course includes the fundamental characteristics related to databases, information systems and strategic management process for the success of the organization. May be offered face to face or up to 100% online.

HURM 240 Employment and Labor Law

Credits – 3

Study of labor law from the perspective of federal and local laws in the employer-employee relationship, emphasizing the historical development and future trends in the labor market. Includes the discussion and analysis of economic, political and social impact in the workforce and work organization, the evolution of labor laws, contracts and human resources policies, human rights and anti-discriminatory laws. At the end of the course, the student will apply the knowledge acquired in the case evaluation and analysis, research and practical exercises, which entails compliance with laws, rules and procedures in the management of human resources in private companies, both local and national. May be offered face to face or up to 100% online.

HURM 250 Training, Development and Career Management

Credits – 3

Study and analysis of the theoretical, conceptual and practical framework of the training and career development of human resources, and its main role in organizational strategic management. Emphasis on the needs analysis, design, development, implementation and evaluation of training programs that facilitate continuous learning in human resources and that lead to the achievement of organizational goals. Throughout the course, students will apply the processes, techniques and methods for accountability and financial return on investment (ROI) in training and development programs. May be offered face to face or up to 100% online.

HURM 304 Human Resources Evaluation and Performance Measurement

Credits – 3

The course emphasizes the role of human resources management strategic planning, performance evaluation and development of human resources. Discussion on the theories, strategies and techniques in the evaluation and performance measurement, interpretation of results and the identification of trends in the development of the organization. Through practical exercises, students will develop plans and effective tools to evaluate, analyze and report results, in quantitative terms, on the activities of human resources that contribute to the operation and success of the company. May be offered face to face or up to 100% online.

HURM 320 Negotiation and Conflict Management

Credits – 3

Principles, theories and basic practices for the effective management of negotiation, management and conflicts resolution in the business organization. Development of skills, techniques, methods and basic processes of negotiation, communication, persuasion and emotional intelligence, and the intervention of a third party to manage and resolve conflicts. At the end of the course, the student will recognize and value the role of the negotiator as a key element in resolving conflicts. Emphasis on the development of skills and conflict analysis skills, ways of tackling problems, types of negotiation, emotional intelligence, and communication strategies. May be offered face to face or up to 100% online.

HURM 330 Safety and Health Management in Workplace

Credits – 3

Introduction to the concepts and fundamentals laws of employees' safety and health at the workplace. It includes the study and analysis of the factors, risks and dangers of accidents and work-related diseases. Developing policies and practices for implementing effective security programs and occupational health. Evaluation and analysis of training programs for the development of preventive maintenance behaviors associated with occupational safety and health. Through case studies, students will apply the knowledge, skills, legal and managerial aspects to recognize, evaluate and control the risks of safety and health of workers in the company. May be offered face to face or up to 100% online.

HURM 550 International Human Resources Management

Credits – 3

This course was designed to focus on the critical analysis of the foundations, processes, and policies inherent to the management of human resources in an international environment. The analysis of the fundamental vision of the dynamics of changes in the economic, political, socio-cultural, and technological environment in the contemporary world. The evaluation of the impact of these transformations in the organizational structural models to obtain competitiveness in the globalized economy. Presents a discussion of the characteristics of the recruitment, selection and development functions and the legal and financial responsibilities of personnel administration at the international level. May be offered face to face or up to 100% online.

HURM 551 Compensation and Benefits

Credits – 3

This course addresses the ways that tangible and intangible forms of compensation can be used to motivate and reward employee performance. The course also deals with job analysis, job description, and job evaluation based on pay factors, as well as designing an equitable pay structure. In this course, students will learn how these systems work to attract, retain, and motivate a competent workforce. May be offered face to face or up to 100% online.

HURM 552 Quality Safety and Health in the Workplace

Credits – 3

The course is designed so that the student focuses on aspects related to studying the set of basic elements related to the health and quality of life of the worker as a Bio-psychosocial being. The objective factors of the work environment that influence their quality of life are addressed. To achieve the quality of life at work, changes aimed at achieving a healthy workplace are required. Prevention, risks, accidents at work, management, profitability, and protection of people. Strategies are exposed for the improvement of the quality of life in general, which is structured in 6 steps: preparation, planning, dissemination, deployment, implementation, and constant improvement of quality. Finally, international organizations for health protection and management and prevention of risks and accidents are discussed. May be offered face to face or up to 100% online.

HURM 553 International Economics Labor**Credits – 3**

This course provides a general background of international labor economics. It presents the main aspects of economic and labor issues that influence the contemporary global environment. The course explores the fundamental elements of topics such as trade, currency funds, and the market that influence economic policy decisions and actions. In addition, it examines the impact of global economic policy on the movements, relations, and evolution of labor issues in the global context of business in the 21st century. May be offered face to face or up to 100% online.

HURM 554 Conflict Management and Organizational Dynamics**Credits – 3**

This course recognizes the interaction between the individual and the organization, states that human resources are decisive for the success or failure of any organization. An educational tool, aimed at improving the attitudes, values, behaviors, and structure of the organization, so that it can better adapt to new situations, markets, technologies, problems, and challenges that constantly arise, helping to understand what it should be the appropriate behavior in personal relationships that guarantees results of a good organizational climate that favors everyone. May be offered face to face or up to 100% online.

HURM 560 Employment in the Global Economy**Credits – 3**

The effects of globalization and the need to understand the importance of cultural understanding in international management practice are emphasized. Analysis of the growing international economic integration. Effects of Globalization as the dominant driving force in the world economy, creating new employment opportunities for societies. Understanding of the integration of cultures and the need for leaders trained to interact with employees and clients of different nationalities. The emergence of global standards and regulations for trade and human resource management, as a result of the expansion of trade and the growth of the labor market and labor relations in the new order of the globalized economy. May be offered face to face or up to 100% online.

HURM 561 Labor and Industrial Relations in Human Resources**Credits – 3**

This course includes the basic elements of the field of labor relations. Students will learn about the history of Labor Relations and unions. In addition, the course reviews the way the labor relations system works, as well as specific areas of it such as the future of unions, industrial systems around the world, relationships with human resource management models, various models of conflict resolution, labor-management problems, the differences, and similarities between labor relations in the public and private sectors. May be offered face to face or up to 100% online.

HURM 562 Management Negotiation and Conflict Resolutions**Credits – 3**

The course is designed for the student to focus on aspects related to critical analysis and understanding of the fundamentals, processes, and components of negotiation and the dynamics for conflict resolution in organizations. Understanding the importance of negotiation for peaceful coexistence through recognition of common interests. The need to develop interpersonal skills to face and resolve conflicts is also presented. May be offered face to face or up to 100% online.

IFOR 205 Basic Criminal Investigation

Credits – 3

Introductory study of the basic techniques in criminal investigation, types of investigation, processes, investigation structure, collection and interpretation of information and facts reconstruction. May be offered face to face or up to 100% online.

IFOR 210 Forensic Photography and Crime Scene Planimetry**Credits – 3**

The course will provide method analysis and photography techniques from a legal perspective. The study of photography as a graphic objective of the condition in which the crime scene is developed. Study of the crime scene with the purpose of establishing conditions for the evidence found. Study of the diagram or sketch that is elaborated in the crime scene. The course also provides an establishment of specific crime motives where the results become favorable to solve criminal cases. May be offered face to face or up to 100% online.

IFOR 215 Fundamental Principles of Collection and Processing of Evidence at the Scene of the Crime**Credits – 3**

Study of the fundamental principles, processes and techniques used to lift the evidence at the scene of the crime. Study of information related to blood stains, fluid, other parts of the body, as well as another kind of evidence found at the scene of the crime and its interpretation. Study of reconstruction of the crime scene and search patterns. May be offered face to face or up to 100% online.

IFOR 220 Forensic Investigation of Traffic Accident**Credits – 3**

Forensic investigation of the determinants in the scene of a traffic accident, damage of vehicles, manual measurement systems and dynamics of vehicle engines for administrative and legal purposes. May be offered face to face or up to 100% online.

IFOR 225 Interview Techniques and Testimony in Court**Credits – 3**

Study and analysis of interview and interrogation as a scientific methods technique of forensic investigation for preparing and presenting testimony in court cases as a forensic expert in court. May be offered face to face or up to 100% online.

IFOR 230 Introduction to Forensic Dactyloscopy**Credits – 3**

Study of the development of fingerprinting in the field of forensic science and its purpose in criminal investigation, using the fingerprint as infallible means of identification of a suspect in the crime scene. The course prepares students with the knowledge and skills necessary for the recognition, development, identification and fingerprint processing at the crime scene, in full compliance with the provisions of due process of law in our legal system. May be offered face to face or up to 100% online.

IFOR 235 Investigation of Cyber Crimes**Credits – 3**

Introductory study to prepare students in the identification and investigations of cybercrimes using a scientific research methodology, by emphasizing the protection, acquisition, and management of digital evidence. Discussion of the ethical basic hackers and social engineering principles. May be offered face to face or up to 100% online.

IFOR 240 Scientific Study of the Crime Scene**Credits – 3**

Scientific study of the methodology in collecting and processing all those signs (evidence) generated in and out of the crime scene. Scientific practical and theoretical study of the crime scene for reconstructing it and collecting information and evidence that will be used to establish, based on the forensic methodology, who, how, where, when and why of a crime. May be offered face to face or up to 100% online.

IFOR 245 Introduction of Fraud Investigation**Credits – 3**

Introductory study of the basic techniques to identify and investigate the different types of fraud. Discussion of the phases or stages of the fraud investigation, types of fraud: financial and informatic, indicators, collection and evaluation of documentary evidence, informants, and forensic investigation reports. May be offered face to face or up to 100% online.

IFOR 250 Introduction to Fire Investigation**Credits – 3**

Introductory study of the methods and procedures for the investigation and analysis of fire incidents. Investigation of accidental or intentional causes as: electrical causes, vehicles fire, explosions, wildfire, and pyromania. The course includes the drafting of technical reports and documentation. May be offered face to face or up to 100% online.

IFOR 255 Surveillance and Tracking: Technical and Ethical Aspects**Credits – 3**

Study of techniques, strategies, processes, and analysis groups to collect evidence from different crime scenes by surveillance when observing authors and events. Application of scientific techniques and discussion of ethical aspects in a forensic and legal investigation. May be offered face to face or up to 100% online.

IFOR 275 Integration Seminar in Forensic Investigation**Credits – 3**

The seminar provides an opportunity for students to integrate and apply knowledge, methods, principles, and techniques of forensic investigation through research and analysis of case studies. May be offered face to face or up to 100% online.

INBU 350 International Business**Credits – 3**

This course presents to the students the concepts and administrative implications in the international business practice in the products and services merchandising all around the world. The course will make emphasis on the pros and cons of the economic theories, the government policies, business strategies, and the organizational structure of the international business. May be offered face to face or up to 100% online.

INBU 610 International Business Environment**Credits – 3**

This is an introductory course in international business. The basic content of the course includes (1) an overview of the means of conducting international business, with an emphasis on what makes international different from domestic; (2) the effects of the social systems within countries on the conduct

of international business; (3) the major theories explaining international business transactions and the institutions influencing those activities; (4) the financial exchange systems and institutions that measure and facilitate international transactions; (5) the dynamic interface between countries and companies attempting to conduct foreign business activities; (6) corporate strategy alternatives for global operations; and (7) international activities that fall largely within functional disciplines. May be offered face to face or up to 100% online.

INBU 709 International Business in Latin America and the Caribbean

Credits – 3

This course is focused on the business activities carried out across Latin America and the Caribbean. The course reveals macro environment aspects: politic, economy, legal and regulatory, technology, cultural and other and how they impact the multinational enterprise that wishes to establish itself in the region. Furthermore, it analyzes the particularities of the region from the functional perspective of the business organization. May be offered face to face or up to 100% online.

INBU 710 Legal Environment of International Business

Credits – 3

A study of the international political, bureaucratic, and legal structures regulating and governing international trade, including multilateral and bilateral arrangements. Schemes for the removal of trade barriers, methods of international contracting, and doing business abroad in the context of the international legal environment will be a primary course focus. May be offered face to face or up to 100% online.

INBU 711 Exports and Imports

Credits – 3

Managing the export/import department; government regulations affecting imports; financing, insuring, transporting, and marketing of exported or imported raw materials and finished products; methods of purchasing foreign products and selling domestic goods abroad; joint marketing; licensing; distributor relations. May be offered face to face or up to 100% online.

INBU 712 Contemporary Issues in International Business

Credits – 3

This course is designed to provide students with the opportunity to examine and analyze topical issues in International Business. Such rapid changes in global environments may put potentially significant impact on the international business and the home and/or host nations associated. This subject assumes students to have fair degrees of understanding in the complexities of global cultural, political, economic, organizational, and financial forces of international business environments and recognize how they affect their firm. As contemporary issues around international business continues to evolve but many times unpredictably, challenges for firms to adjust, reshape and/or reconstruct their strategic directions and thereby organization and management structure become inevitable. This subject will introduce past, current, and emerging issues in international business environments and equip students to apply theories/concepts learned from firsthand international business subjects into more coherent and real-life practices. May be offered face to face or up to 100% online.

INBU 715 Managing Global Production

Credits – 3

This course explores the management of technology and its relationship to the dynamics of globalization in production in both the manufacturing and service industries. It focuses primarily on the management

of international supply chains and on the coordination of manufacturing and service activities across different geographies. In addition to analyses of corporate logistics, the course emphasizes international business process outsourcing and the modeling of international business problems. May be offered face to face or up to 100% online.

INBU 716 International Business Seminar

Credits – 3

Course designed to guide students to conduct research within International Business area under the direction and supervision of professor. The course is an individualized development. The course includes identification and discussion of problematic situations that can be investigated, analysis and events that relate to it. It also includes the recognition of independent and dependent variables of the problem, formulation of basic research questions, type of research, formulating hypotheses, and defining limitations of the study. It also discusses the aspect of the readings relevant to the research population and sample of the study, design of instruments to be used in data collection, identification and description of the operational procedures and statistics to be used in the analysis of data collected in the study. Then the student emphasizes the aspect of statistical presentation of the findings and their interpretation, summary, conclusions and recommendations. May be offered face to face or up to 100% online.

INBU 764 International Business Management

Credits – 3

This course provides an overview of the particular aspects of doing business in a global context. It includes a discussion of the importance of the global business, the selection of countries as markets, and the development of a coordinated international business strategy in the marketing, human resources, accounting, and financial functions of a business entity. May be offered face to face or up to 100% online.

INGS 101 Research Information Literacy

Credits – 3

This course analyzes the principles and processes comprised of information literacy skills. It promotes the application of these skills in a research project to generate new knowledge or improved understanding. Research methodologies, search, evaluation, and understanding of contents are emphasized. The use of information in an effective, legal, and ethical way is stressed. The course is competency-focused and encourages the responsible use of technology and information skills to generate new knowledge. May be offered face to face or up to 100% online.

ITAD 308 Family and Community: Bridges for the Infant and Toddler Formation

Credits – 3

The course examines the role of family and community in the physical, mental, emotional, and intellectual development of the infant and toddler from birth to age three. The strengths and weaknesses, resources and needs of the family and the community regarding the development of children of preschool and primary grades are identified. The course offers alternatives for the coordination and organization of social, cultural, and recreational activities that contribute to the formation of children in this age group, both in educational settings and in the community. May be offered face to face or up to 100% online.

ITAD 403 Creation and Management of Environment for Infants and Toddlers

Credits – 3

This course presents the policies and regulations governing the establishment and development of an educational center for infants and toddlers. It analyzes the knowledge and skills needed for planning, administration, and coordination of these programs. During the course the following issues will be discussed: factors to consider when opening a center for infants and toddlers, the laws governing the opening of a center for infants and toddlers, the spaces needed inside and outside the center, and the materials and suitable equipment; as well as administrative aspects to consider when evaluating the physical infrastructure and personnel of the center. May be offered face to face or up to 100% online.

ITMA 501 Technology and Information Management

Credits – 3

The course will enable students to attain a sound working knowledge of the technologies that govern the most relevant aspects of IT/IS. Students will acquire an overall view and technological foundation with a special focus on the field of management. May be offered face to face or up to 100% online.

MAIS 810 Information Systems Modeling

Credits – 3

The course provides an understanding of the complexity of establishing information requirements in enterprise-wide applications, and the process of translating these requirements into global design architecture. Students have the opportunity to compare different methodologies for requirements analysis. Database architecture modeling in the design process is emphasized. The students explore several approaches for completing design specifications that satisfy existing information requirements. May be offered face to face or up to 100% online.

MAIS 815 Telecommunications Management

Credits – 3

The course will help students to understand the fundamentals necessary for the effective management of organizations that develop, operate, and/or use telecommunications. Topics will include the underlying technical aspects of voice and data networks, the protocols and services, industry and regulatory structures and practices, and practical questions that arise from these issues. The management perspective is emphasized. May be offered face to face or up to 100% online.

MAIS 820 Decision Support Systems

Credits – 3

This course will explore and discuss the development, implementation, and application of Decision Support Systems (DSS), how these systems can be applied to current business problems, as well as organizational issues associated with the implementation and usage of these systems. The course will consist of four main components: decision making, data management for DSS, Modeling techniques for DSS, and Collaborative Computing. May be offered face to face or up to 100% online.

MAIS 825 Information Security Management

Credits – 3

The course centers on the analytical methods of assessing and improving systems security and survivability. Emphasis is on studying the theory, mechanism, and implementation of information security and data protection. Topics include fundamentals of system architecture, formal models for computer security, system survivability analysis, security threats, and security architecture strategies and implementation. May be offered face to face or up to 100% online.

MAIS 827 Data Warehousing Management

Credits – 3

This course will introduce the student to the major activities involved in a data warehousing project. The course includes what data warehousing is and how it differs from other database systems, creating a database model that is specifically optimized for data warehousing, moving data from a source database to a warehouse. It will use different tools to access the data in a warehouse. Will discuss organizational and management issues and look at the common applications in warehousing today. Finally, the course takes a specific look at the kinds of support the Oracle DBMS provides for data warehousing. May be offered face to face or up to 100% online.

MAIS 830 Web-Based Information Architectures**Credits – 3**

Study of the design, creation, and usage of web sites and related software. The course focuses on how to use search engines optimally, how to design e-business sites, how to analyze competition, and how to archive page access paths in service of successful e-commerce infrastructures. The course addresses issues related to the creation of search engines, and web-based information architectures. May be offered face to face or up to 100% online.

MAIS 832 Knowledge Management**Credits – 3**

This course is designed to gain knowledge and critical thinking to achieve success in modern business administration, help students become familiar with current theories, practices, tools and techniques in knowledge management (KM), and guide students. Students to pursue a career in the information systems sector within nonprofit organizations, as well as develop the analytical skills of the participants in Knowledge Management and Knowledge Management Systems. The revised technologies will include intranets, groupware, weblogs, instant messaging, content management systems and email in individual and organizational contexts. Students will use these technologies, review case studies, investigate knowledge organization methods and analyze and design Knowledge Management processes and systems. May be offered face to face or up to 100% online.

MAIS 835 IT Policy and Strategy**Credits – 3**

This course provides students the opportunity to develop an understanding of the strategic use of information technology from a business perspective at the enterprise level. It emphasizes the development and implementation of policies and plans to achieve organizational goals. Includes defining the systems that support the operational, administrative, and strategic needs of the organization, its business units, and individual employees. Study of the approaches to managing the information systems function and the dual challenges of effectively controlling the use of well-established information technologies, while experimenting with selected emerging technologies. May be offered face to face or up to 100% online.

MAIS 842 Web Services**Credits – 3**

In this course the students will explore, and construct web services designed for use in other servers over the Internet. Standing from a solid understanding of the state of the arts, and using relational databases, we will design and implement new services that facilitate collaboration and education. Participants will design, develop, and deploy web services. If appropriate, the web services created will be chained together to demonstrate the concept of web service supply chains. May be offered face to face or up to 100% online.

MAIS 847 Special Topics in Information Security**Credits – 3**

This course examines the characteristics of highly distributed applications, limitations of traditional security approaches, new alternatives now being developed, and implications for critical infrastructures. Topics of current interest include secure operating systems and networks, intrusion detection, cryptographic theory and applications, vulnerability analysis, and deceiving code detection. May be offered face to face or up to 100% online.

MAIS 852 Multimedia Systems**Credits – 3**

Study of theoretical and practical issues in designing multimedia systems. Topics include introduction to multimedia systems, compression techniques, synchronization, user interface, storage, and operating system support for digital audio and video, as well as network and transport protocols for multimedia. May be offered face to face or up to 100% online.

MAIS 857 Special Topics in Computer Information Systems**Credits – 3**

Major elective course that provides an advanced introduction to enterprise information systems, primarily covering the managerial issues related to investing in, implementing, and customizing enterprise systems, with a goal to develop perspectives in the students about leveraging enterprise systems for strategic intents of a firm. May be offered face to face or up to 100% online.

MAIS 858 Data Mining**Credits – 3**

This course introduces data mining as a tool for support to the decision-making process in base of the analysis of data obtained from informatic systems. During this process all the stages of the data mining process will be discussed: collection and aggregation of data for the creation of a data warehouse, warehouse cleaning and processing in order to create a minable data view; application of data mining techniques per se (association rule, Bayesian methods, support vector machines, artificial neural networks, fuzzy techniques, statistical modeling, etc.); evaluation of interpretability and the quality of the knowledge gained, and, finally, dissemination and the use of that knowledge. May be offered face to face or up to 100% online.

MAIS 859 Service Oriented Architecture**Credits – 3**

This course will explore and discuss the design principles and application of Service-Oriented Architecture (SOA), how these architectures can be applied within multiple business domains, current business problems, as well as organizational issues associated with the implementation of information systems through SOA. The course will cover three main aspects of this important trend in software engineering: design, modeling, and simulation. May be offered face to face or up to 100% online.

MAMC 551 Project Management**Credits – 3**

This course is designed to approach the field of project management from a managerial perspective rather than an engineering or mathematical perspective. Consequently, the project management methodology essentially contained in the Project Management Body of Knowledge of the Project Management Institute (PMI) will be addressed. The course focuses on the study and practice of the

project management life cycle to achieve a competitive advantage in today's business environment. It demonstrates how effective project management depends on the proper execution of activities such as estimating, planning, communicating, measuring, monitoring, reporting, and documentation. Throughout the course, the student will be able to acquire the required skills through the analysis of special topics, contemporary case studies, and the integration of software tools for the simulation of planning and execution processes. May be offered face to face or up to 100% online.

MAMC 552 Operations Management

Credits – 3

This course is designed to provide students of the Supply Chain and Logistics specialty of the Business Administration Graduate Program the opportunity to study the strategic, tactical, and operational concepts of company operations and performance management. This course deals with the design and management of products, processes, and services within the supply chain. This course explores the development of production schedules, inventory management, product and service quality, material management, and company policies, as well as the basics of project management and customer service. The course explores the concepts of plant location analysis, logistics and distribution, technology, and lean supply chain. May be offered face to face or up to 100% online.

MAMC 553 Enterprise Resources Planning

Credits – 3

This course is designed to provide students of the Supply Chain and Logistics specialty of the Business Administration Graduate Program the opportunity to integrate all the processes and data of an organization in a single system and study the corresponding multiple ERP platforms, according to its acronym in English. Contribute to creating competitive advantage through the coordination and flow of data through information systems. The central theme of the course is limited to the development and application of information systems for the total integration of managerial processes within the supply and logistics chain, relevant to the operational areas of an organization. May be offered face to face or up to 100% online.

MAMC 554 Supply Chain Design and Management

Credits – 3

This course is designed to provide students of the Supply Chain and Logistics specialty of the Business Administration Graduate Program the opportunity to study the concepts, fundamentals, and techniques of purchasing management that will allow them to perform effectively in this role. of vital importance in the operation of any organization. Topics such as the purchasing process; purchasing policies and procedures; the evaluation, selection, and means of suppliers; negotiation, contracts, costs, and the purchase of transportation services, among others. This course explains the responsibility of the purchasing department and how purchasing management responds to the structure of organizations, the importance of achieving efficiency, maintaining optimal inventory levels, working with suppliers, and evaluating the quality of products and services. May be offered face to face or up to 100% online.

MAMC 561 Logistics Management and Strategy

Credits – 3

This course is designed to provide students specializing in Supply Chain and Logistics of the Business Administration Graduate Program the opportunity to study the creation of competitive advantages using logistics according to the structure of three operational processes: the flow of materials, the flow of information and the response time to demand. In modern companies, the boundaries between functions, organizations, and geography are disappearing. Therefore, it is essential to examine the

opportunities and challenges presented by the integrated structures of the future. May be offered face to face or up to 100% online.

MAMC 562 International Logistics and Global Supply Chain Management

Credits – 3

International logistics is one of the most efficient tools for the global positioning of a company. This course is designed to provide students of the Supply Chain and Logistics specialty of the Business Administration Graduate Program the opportunity to examine, identify, discuss, and critically analyze the concepts and theories of International Logistics through profitable integration of cargo transportation and distribution in international markets. Explain and illustrate the elements necessary for the profitable integration of cargo transportation and distribution in international markets. May be offered face to face or up to 100% online.

MANA 101 Introduction to Business

Credits – 3

The course presents a study of business, its nature, its environment, and opportunities. It introduces students to the broad principles of business in the fields of marketing, finance, organization, and administration and teaches the application of behavioral science to management. It also applies the discussion of diverse case studies related to business to encourage analytical thinking and reasoning. May be offered face to face or up to 100% online.

MANA 125 Business Ethics

Credits – 3

Concepts related to moral aspects of human behavior within the whole social system, and particularly in business settings or in groups where the individual operates. May be offered face to face or up to 100% online.

MANA 126 Business Communication

Credits – 3

Application of business communication principles through the creation of effective business documents and oral presentations. Includes study and application of team communication and use of technology to facilitate the communication process. Students will learn techniques for writing information to attend any business situation. They will also learn how to analyze their audience effectively to communicate both inside and outside of their organization. May be offered face to face or up to 100% online.

MANA 131 Human Relations in Trade

Credits – 3

Concepts dealing with the interaction and interpersonal relations of individuals and groups within business organizations. It includes an analysis of leadership and group behavior. May be offered face to face or up to 100% online.

MANA 204 Business Law and Professional Ethics

Credits – 3

This course provides the study of the legal aspects of common business transactions. Special attention is given to contracts, sales and marketable securities, transfer of property, deeds, and mortgages. May be offered face to face or up to 100% online.

MANA 210 Management Theories

Credits – 3

Study of all administrative theories and the management process in the sequence of planning, organizing, directing, and controlling. May be offered face to face or up to 100% online. Contact Hours: 45

MANA 213 Human Resources Management**Credits – 3**

The theories, principles and processes of human resource management are studied. It includes the recruitment, training, supervision, motivation and direction of these resources and the related legislation. May be offered face to face or up to 100% online. Contact Hours: 45

MANA 230 Organizational Behavior**Credits – 3**

Study of human behavior both as individuals and as groups in the determination of organizational effectiveness. Special attention is given to formal and informal groups, the leader's role in conflict management, and concepts such as perception, learning, socialization, motivation, stress management, awareness and development of values. May be offered face to face or up to 100% online. Contact Hours: 45

MANA 340 Production and Operations Management**Credits – 3**

Principles of production management applied to problems such as product design, objectives, policies, work, methods and standards, plant location, layout, scheduling, maintenance, inventory, quality control, operations analysis, performance and cost control. May be offered face to face or up to 100% online.

MANA 350 Business, Government and Society**Credits – 3**

Study of the philosophies, interrelationships, and perspectives regarding the role of business in society. Selected issues in the context of social responsibility are included. The analysis of specific legislation related to the field is also examined. May be offered face to face or up to 100% online.

MANA 401 Seminar in Strategic Management**Credits – 3**

This is the capstone course of the management major and offers the student a hands-on overview of the strategic management process, focusing on the strategic analysis, strategy Formulation and strategy implementation phases. Students will deepen their analytical competencies while applying knowledge acquired in previous courses, skills and values to specific business issues. May be offered face to face or up to 100% online.

MANA 404 Labor Relations**Credits – 3**

Studies the worker-management relationships, development and operation of labor unions, public and private policies on labor relations, collective bargaining, job and union security, and labor laws. May be offered face to face or up to 100% online.

MANA 505 Management Information Systems**Credits – 3**

Information systems designed to support management in the areas of finance, manufacturing, marketing databases, and data communication are introduced. May be offered face to face or up to 100% online.

MANA 511 International Management

Credits – 3

This course deals primarily with the managerial practices and functions that characterize successful international corporations. It covers issues of organizational structure, planning and budgeting systems, management development and human resources, ethics, cross-cultural issues, the applicability and adaptation of culture-bound policies, communications, and the management of multi-cultural teams. Emphasis is placed on the processes by which multinational organizations are managed, including conflict management, multi-country integration mechanisms, and negotiation strategies. May be offered face to face or up to 100% online.

MANA 550 Advanced Strategy Management

Credits – 3

Analysis of the process of building strategies in organizations. Formal and informal strategic planning will be worked on. The strategic processes will be considered for the study and the way of raising the ideas within an organization. How they are pursued, how approval is found, and how it is incorporated into the strategy. Specific issues to consider are the nature and role of vision, the impact of organizational structure on the strategy-making process, value-based planning, and strategic decision-making. May be offered face to face or up to 100% online.

MANA 552 Industrial and Service Quality Management

Credits – 3

This course presents an overview of the key theory and current practice of quality monitoring and improvement. The content introduces fundamental management tools, techniques, and specialized skills. Recent changes in ISO 9000 quality management standards will be studied. The course will focus on the introduction to the subject of quality management rather than on specific tools. Also, how to develop future skills, using specific tools. Specific examples of successes and failures of quality management will be analyzed and a review of the technical tools necessary to implement a quality program will be made. May be offered face to face or up to 100% online.

MANA 553 Human Behavior in the Organization

Credits – 3

The course is oriented towards the study of the impact of organizational behavior and its effects on the development of a company. The main emphasis of this course is the application of the theories of human behavior, both individual and group, and the processes related to organizational effectiveness and efficiency. Consequently, the course focuses on aspects of the behavior of individuals and groups from the perspectives of learning styles, organizational culture, communication, personality, leadership, motivation, conflict, and management by objectives. May be offered face to face or up to 100% online.

MANA 554 International Management

Credits – 3

This course is designed as a framework for understanding the international aspects of management. The course examines the strategic aspects of managing a multinational or global company (cultural, linguistic, economic, political, and geographic). It also reviews the changing patterns of international business. It focuses on the decision to enter certain markets and the location of the main activities and regional headquarters. Topics include trade and foreign direct investment, levels of analysis, ways to enter

international markets, institutional environment, labor relations, relations with host governments, cultural issues, legal and political considerations, and competitive market forces. May be offered face to face or up to 100% online.

MANA 561 Sales Force and Key Account Management

Credits – 3

This course studies the various activities related to administration, responsible for serving sales representatives in a company. Planning functions, sales control, predictions, budgets, distributions by territories, and routes are included. Existing regulations and problems related to the hiring, selection, supervision, evaluation, motivation, and training of sales representatives are analyzed. The use and handling of the studied elements, related to contemporary problems of sales representatives, are studied. Ethical, legal, and international concepts related to sales representation are also studied. May be offered face to face or up to 100% online.

MANA 562 Pricing and Value Management

Credits – 3

The course introduces the discipline of strategic pricing management not only as an important part of marketing but also as an important area of the finance function and competitive strategy. Superior and sustainable company profitability can only be achieved by finding and exploiting synergies between customer needs and vendor capabilities. This is what is proposed by the study and application of the pricing strategy. May be offered face to face or up to 100% online.

MANA 600 Business Policy and Ethics

Credits – 3

This course covers the functional and support areas of business administration. The course approaches business policymaking and administration from the perspective of the general manager. Cases emphasizing economic, social, and moral problems having implications for corporate policy are examined. May be offered face to face or up to 100% online.

MANA 612 International Strategic Management

Credits – 3

This course focuses on the challenges to develop and implement corporate strategies in a global environment. It is structured to provide students with conceptual and practical understanding of the strategic challenges of multinational corporate management. Operating in a global rather than domestic arena presents the manager with many new opportunities. However, with these new opportunities come the challenges of managing strategy, organizations, and operations that are more complex, diverse, and uncertain. Unlike purely domestic competitors, companies that compete across borders must make choices about which product to offer around the globe; where to compete within the world; where to locate the various activities of the firm; and how to organize to effectively coordinate its worldwide activities. May be offered face to face or up to 100% online.

MANA 625 Total Quality Management

Credits – 3

Analysis and discussion of the elements of total quality management, change and its effects on organizational behavior. Also, the course examines the effects of changes in management of organizations in general, the responsibilities of the manager, and the behavior of the employees in the organization. May be offered face to face or up to 100% online.

MANA 720 Operations and Production Management**Credits – 3**

This course stresses managing the production, distribution, materials, and information functions of manufacturing and service systems. It includes capacity determination, operating procedures analysis, operating systems design, control systems development, and new technology evaluation. The course utilizes current case examples of management skills required in the operations environment. May be offered face to face or up to 100% online.

MANA 742 Simulation**Credits – 3**

The course is developed in a simulated environment of the companies and their managers to obtain the maximum performance of it. This course attempts to create a business reality using the same variables, relationships, and events that we find in the business world. It is made up of various decision cycles (Commercial, Production, R&D, Human Resources, and Finance). The simulator aims to offer a representation of business reality. Reproducing business complexity, and at the same time achieving the aforementioned educational objectives, entails limiting the game scenario and therefore establishing a series of rules that limit the participants' ability to act. Simulation seeks to maximize efficiency in decision making, and to obtain the maximum. By joining a team of students (managers) responsible for running a company that competes in a market simulated by the program. May be offered face to face or up to 100% online.

MANA 750 Advanced Statistical Methods**Credits – 3**

The course consists of four divisions: descriptive statistics, probability, statistical inference, and multivariate analysis. Include the study of probability distributions and hypothesis testing; regression analysis, lineal correlation, ANOVA, simultaneous equation models, quantile regression, binary regression models, time series analysis, and panel data analysis. May be offered face to face or up to 100% online.

MANA 754 Business Research Methods**Credits – 3**

The course promotes integration of scientific research and managerial decision-making. Students can note the variety of research in different areas of business, such as production, operations research, business policy and strategy, organizational behavior, human resources management, information systems, marketing, accounting, and finance. The course includes discussion of the research process, from the statement of the problem to the conclusions. Aspects of ethical considerations involved in conducting research, including cross-cultural research, will also be discussed. May be offered face to face or up to 100% online.

MANA 762 Management Science**Credits – 3**

The purpose of this course is to provide students with an inventory of theories to address key issues in Management and Organizational Research. The course includes discussions of the role of theories in the development of scientific research; the theories to analyze contemporary management and organizational issues; the underlying assumptions of management and organizational theories; and the application of deductive and inductive models in management and organizational research. May be offered face to face or up to 100% online.

MANA 800 Business Data Analysis

Credits – 3

The course includes the tools of managerial data analysis to transform raw business data regarding management processes and markets into organized information to identify meaningful patterns and relationship useful to interpret and perform analysis. This process provides useful knowledge for improved decision making. The course stresses the theoretical development and the practical application of each technique. The student may integrate the use of statistical analysis capabilities of pc-based computer software, summarize raw data and interpret patterns in those data, make and interpret statistical inferences, execute and interpret rudimentary regression analysis and recognize limitations of statistical analyses and identify pitfalls in their interpretations. May be offered face to face or up to 100% online.

MANA 801 Knowledge Management**Credits – 3**

This course studies the theory and practice of Knowledge Management and highlights its strategic importance in the current business environment. The course examines fundamental theories and practical approaches to the identification, management, and measurement of knowledge and intellectual capital in organizations. The course encourages students to critically analyze how innovation, technology, global trends, and others influence knowledge management within modern organizations. Additionally, an analytical and reflective approach to knowledge management policies in different sectors is encouraged. The course will develop students' critical thinking, scientific reasoning, information, and innovation skills to effectively address business challenges based on knowledge management. May be offered face to face or up to 100% online.

MANA 802 Corporate Finance**Credits – 3**

A comprehensive study of theoretical and empirical research on financial decisions; valuation of debt and assets; risk analysis and management; investment decisions; capital and cost of capital budget decisions; decisions of corporate finance and financial markets; policy dividends and capital structure decisions; interactions of investment and financial decisions; derived values, options, guarantees and convertible; consolidations, corporate governance, restructuring; international financial management. May be offered face to face or up to 100% online.

MANA 803 Micro Economic Business Studies**Credits – 3**

In the first part of the course the basic conceptual tools for the study of decision-making, in uncertain conditions, will be develop. We will study the preferences and risk attitude of the decision maker and the relations with these elements in the utility maximization effect. In the second part of the course the traditional techniques of linear programming to determine the solutions in maximization or minimization problems, will be considered. We will focus in the interpretation of solutions (basic and general) and the existence of both. The third part of the course will cover basic notions of game theory. We will develop equilibrium concepts and study its applicability. May be offered face to face or up to 100% online.

MANA 804 Strategic Management**Credits – 3**

Introduction to the theoretical perspectives and the analytical tools on complex case studies. Includes empirical findings in the strategic management process. The course will explore diagnosing the firm's current situation and the development of solutions to strategic and organizational problems. It will study

how the organization builds sustainable competitive advantage in their respective industries. May be offered face to face or up to 100% online.

MANA 806 Organizational Design

Credits – 3

This course is designed to train theorist/researchers, practitioners in the design, redesign and implementation of effective organizations. It will focus on the analysis, planning, implementation, and evaluation of both the social and technical systems of organizations with emphasis on the structural changes necessary to improve and maintain productivity and the quality of work life. The course will bring emphasis on the integration of diverse theoretical perspectives. May be offered face to face or up to 100% online.

MANA 808 Business Consulting

Credits – 3

This course provides an in-depth understanding of strategy consulting. Course explores dimensions of defining and understanding the strategy consulting assignment, client relationship management, work methodology, value creation, and presentation and follows up. It examines individual, interpersonal, and organizational theories of development and of intervention effectiveness. It will develop an understanding of how internal and external consultants add value to the organization. May be offered face to face or up to 100% online.

MANA 810 Negotiations Strategies

Credits – 3

This course includes the uses of the theory and research on effective negotiation strategies to build student understanding of, and skills for, managing differences and negotiation situations. The emphasis is on developing practical skills for effective negotiations that can be applied to concrete situations. Students should be prepared to learn from their own experiences and practice in this course. May be offered face to face or up to 100% online.

MANA 820 Management of Innovation and Technology

Credits – 3

This course recognizes the importance of technology in the organizations. It considers the issues associated with introducing new technology into organizations, also covers the management of various types of technology and its role in the organizations in the 21st century. May be offered face to face or up to 100% online.

MANA 822 Project Management in Business

Credits – 3

This course provides the theoretical knowledge and presents the best industry practices and techniques, for project management. The students can help business organizations to meet their goals and expectations using strategies to manage the process of planning, development, and control of projects. May be offered face to face or up to 100% online.

MANA 824 Risk Management

Credits – 3

This course includes a comprehensive study of methods available for controlling risk and limiting financial exposure. Topics include insurance, underwriting, self-insurance, loss control, insurance fraud, workers

compensation, government regulations and an examination of current issues in the insurance industry. May be offered face to face or up to 100% online.

MANA 830 Advanced Human Resource Management

Credits – 3

Advanced studies in Human Resources Management. Topics include employee selection, performance appraisal, compensation, training and development, human resources policy and strategy, and other areas of human resource management. May be offered face to face or up to 100% online.

MANA 832 Training & Human Resources Development

Credits – 3

This course explores the roles of training and organizational development in the growth, development, and success of organizations. Organizational development is examined in terms of its history, underlying assumptions, characteristics, components, and different types of interventions. Topics include effective training, need assessment, program development, instructional design, delivery, evaluation, and the determination of the return of investment (ROI). May be offered face to face or up to 100% online.

MANA 834 Seminar in Leadership

Credits – 3

This course will examine organizational leadership and its relationship to organizational development and change. This includes leadership and ethical behavior, inter and intra organizational leadership strategies, management theory and practice and organizational culture. May be offered face to face or up to 100% online.

MANA 840 Service Management

Credits – 3

This course provides an overview of management principles applied in the service industry. It includes the application of management theories, effective characteristics, problems, communications, leadership, and particular management problems in service industries. May be offered face to face or up to 100% online.

MANA 844 Managing Professional Services Organization

Credits – 3

This course addresses the critical needs of the professional services organizations. The course is valuable for those planning on entering the professional service in a management role, including such activities as consulting, financial advice, accounting, the law, and other aspects of service industries. May be offered face to face or up to 100% online.

MANA 850 Strategic Planning in Public Organizations

Credits – 3

In this course the students will explore the theory and practice of the Strategic Planning Paradigm. As a tool for public administration, the students can learn how to apply the strategic planning like mission and vision statements, environmental scanning, identification of strengths and weakness, strategic policies and others. May be offered face to face or up to 100% online.

MANA 852 Project Planning and Programming

Credits – 3

Most of the public work is developed by projects and using specific budgets. In this course the students will learn how to develop project planning and how to use different tools for the programming of the

projects like Precedence Diagram Method (PDM), Arrow Diagramming Method (ADM), Conditional Diagramming Method (ej. GERT), Expert Judgement and others. May be offered face to face or up to 100% online.

MANA 854 Management and Budgeting in Government

Credits – 3

This course addresses the theory of public management and budgeting spending and explores past and present applications in the federal and state government. The course also integrates experiences of management and budgeting in other countries in a way that the students can compare different scenarios. May be offered face to face or up to 100% online.

MANA 857 Special Topics in Entrepreneurship and Management

Credits – 3

This course is designed to promote the discussion of changing and emerging topics in the field that could not otherwise be effectively captured in the curriculum. Two alternatives are available: (1) lectures from visiting professors and (2) participation in international conferences or seminars. Visiting professors must prepare the course guidelines under the name Special Topics in Entrepreneurship and Management and a subtitle that refers to the topic. All proposed topics or participation in conferences must be approved by the DBA coordinator prior enrollment. May be offered face to face or up to 100% online.

MANC 101 Introduction to Business

Credits – 3

The course presents a study of business, its nature, its environment and opportunities. It introduces students to the broad principles of business in the fields of marketing, finance, organization and administration, and teaches the application of behavioral science by management. It also applies case studies to encourage analytical thinking. May be offered face to face or up to 100% online.

MANC 126 Business Communications

Credits – 3

Application of business communication principles through creation of effective business documents and oral presentations. Includes study and application of team communication and use of technology to facilitate the communication process. Students will learn techniques for writing information to attend any business situation. They will also learn how to analyze their audience effectively to communicate both inside and outside of their organization. May be offered face to face or up to 100% online.

MARK 133 Principles of Marketing

Credits – 3

Presents the basic concepts and applications most relevant to the marketing decision making process. Focuses on the universal concerns of managers who are responsible for marketing decisions. Includes the consumer's buying decisions process and types of consumer behavior as related to the basic marketing philosophies regarding products, price, promotion and distribution. May be offered face to face or up to 100% online.

MARK 206 Consumer Behavior

Credits – 3

This course studies consumer motivation, decision making in selection of goods or services, market definition, and site. It considers the role of anthropology, sociology, and social psychology in analyzing and understanding consumer behavior. It includes psychological principles that facilitate the

understanding of individual traits such as learning experience, perception, attitudes, motivation, and personality. May be offered face to face or up to 100% online.

MARK 240 Introduction to Search Engines Platforms

Credits – 3

Millions of people use search engines like Google, Yahoo Search or Bing every day to find the information they need on the internet. This means that millions of people could fix, even for a single moment, their gaze and attention on some product, brand or service of an advertiser. This course introduces all areas of search engine optimization. The student will be able to understand the search engine, its optimization and how to increase traffic to the website that is critical to the success of electronic commerce. May be offered face to face or up to 100% online.

MARK 241 Social Media Marketing

Credits – 3

This course introduces the key platforms for digital marketing and demonstrates how to set up a social media experience for a company. The student will be able to identify the benefits of social media marketing and differentiate between the most influential networks and their advantages. May be offered face to face or up to 100% online.

MARK 242 Digital Marketing

Credits – 3

This class introduces the basic principles of digital marketing and its purpose. It will allow participants to develop clear and practical business goals for a digital marketing plan, gain insight from the audience and the industry by conducting digital searches across all search engines and social media platforms. May be offered face to face or up to 100% online.

MARK 251 Advertising and Promotion

Credits – 3

History, social and economic aspects of advertising and promotion. Includes advertising plans and media, organization, background, planning of advertising strategy, and how to select the advertising agency. May be offered face to face or up to 100% online.

MARK 306 Sales

Credits – 3

The course centers on the study of the foundations of professional selling, such as creating, communicating and delivering value. Initiating, developing and enhancing customer relationships will also be discussed. May be offered face to face or up to 100% online.

MARK 311 Electronic Marketing

Credits – 3

This course examines how the evolution of marketing and the incorporation of the internet and other technologies have driven change by creating new business strategies and connections with the consumer. The course delves into how the application of e-marketing complies with its function to create, communicate, and deliver value to customers. The course will also discuss how proper management e-marketing succeeds in establishing relationships with the customers that produce end up with as a result profit for the organization. May be offered face to face or up to 100% online.

MARK 318 Content Marketing

Credits – 3

Today, it is imperative that every marketer makes sure that they deliver their brand content to the right people, at the right time, and through the right channels. This is a new mindset for most companies that are now beginning to develop strategies to establish an appropriate content strategy, manage an effective process, and achieve measurable results with content marketing. May be offered face to face or up to 100% online.

MARK 320 Marketing Research**Credits – 3**

This course examines the fundamentals of marketing research and the integration of statistical programs for gathering and analyzing information in order to support decision making. Students will gain theoretical knowledge and practical skills in research that will add value to the academy and will contribute to existing business solutions. The students will be ethical in their research. The knowledge gained in this discipline will be useful for finding solutions to problems and knowing the consumer behavior about preferences for a brand, product, service or business. Students will also learn about developing more effective promotions for a company in a digital world, creating a new product or modifying an existing product, identifying services that may have greater future demand and studying social networks to analyze the digital market. May be offered face to face or up to 100% online.

MARK 330 Retail**Credits – 3**

This course familiarizes students with the decisions involved in running a retail firm, as well as the concepts and principles for making those decisions. The student will gain an understanding of retailing trends, technology in the industry, merchandise planning and management, pricing, location, promotional strategies, human resource management, store design and layout, customer service, and the international movement of retailers. The course will give students an insight into the retailing environment and will allow them to make decisions for effective management. The course also provides a good foundation for those interested in owning or running a small retail business or those interested in pursuing a retail career as a merchandise buyer or store manager. May be offered face to face or up to 100% online.

MARK 400 Service Marketing**Credits – 3**

The course provides a perspective of Service Marketing focused on service as a product and service to support the product and the application of its principles to the marketing mix. The student will gain the knowledge and practical skills for creating effective strategies in marketing services to meet changing needs, expectations and understanding consumer behavior. May be offered face to face or up to 100% online.

MARK 410 International Marketing**Credits – 3**

Analysis of the characteristics of international marketing and the factors influencing the marketing program. Includes international policies that determine decisions about products, distribution channels, promotion strategies, and legal and financial aspects of international markets. May be offered face to face or up to 100% online.

MARK 420 Product and Brand Management**Credits – 3**

In this course, the marketing strategies are examined from the perspective of brand strategies and tactics leading to the development of strong brands and maximizing the value of existing brands. Specifically, brand management includes product management, brand positioning, development, and measurement of brand equity over time. May be offered face to face or up to 100% online.

MARK 425 Digital Marketing Forum

Credits – 3

This course will help students contextualize all their learning throughout the program, offering students a practical overview of digital marketing. Participants will deepen their analytical skills by applying the knowledge acquired in previous courses, skills, and values to specific business topics. May be offered face to face or up to 100% online.

MARK 502 Marketing Management

Credits – 3

This course studies the theoretical foundations of marketing management and emphasizes the decision-making process based on needs assessment and current market opportunities. It includes the study of strategic marketing, segmentation, positioning, target market, information systems, marketing research, psychographics and demographic characteristics of consumers. May be offered face to face or up to 100% online.

MARK 511 Marketing Management

Credits – 3

This course places emphasis on planning and decision-making procedures in areas such as: marketing measurements, product development, price adjustments, advertising and distribution. In this course, texts, case studies, readings and computer exercises are used to provide experience in managing the components of the marketing mix. May be offered face to face or up to 100% online.

MARK 550 Integrated Marketing Communications

Credits – 3

This course provides students with the knowledge and experiences necessary to develop and implement an integrated marketing communication strategy using tools such as advertising, sales promotions, public relations, sales, and direct marketing, including the use of digital media. May be offered face to face or up to 100% online.

MARK 551 Marketing Research

Credits – 3

Market research is the fundamental activity on which sales and marketing decisions are based, significantly reducing the risks of failure in the corporate world. This provides managers a critical view of the necessities and characteristics of a target audience, enabling a better understanding of them, providing information on the lifestyle and behavior that may alter and influence the act of purchase. Understanding consumer behavior as a decision maker and effectively acting upon it can offer companies a competitive advantage against the competition and a clear diagnosis in order to implement effective strategies. May be offered face to face or up to 100% online.

MARK 552 CRM Trust and Loyalty Management

Credits – 3

This course examines the strategic and tactical aspects of customer relationship management (CRM) to use customer databases to improve the value delivery process while reducing costs per customer. Also,

the course includes the identification and development of strategies for specific consumers. As a business strategy, CRM focuses on identifying, selecting, acquiring, developing, and maintaining profitable relationships with consumers. May be offered face to face or up to 100% online.

MARK 553 International Marketing

Credits – 3

This course focuses on the strategic marketing decisions necessary to operate as an exporting, international, multi-domestic, or global company. Special emphasis is placed on studying the global market environment and managing the global marketing mix. May be offered face to face or up to 100% online.

MARK 554 Services Marketing

Credits – 3

This course focuses on the study of the differentiating characteristics of services and the aspects of marketing strategies used to market services compared to those used to market tangible products. The intangible nature of services requires that consumers use different skills and strategies to decide to buy, and this, in turn, demands from marketing the need to develop strategies different from those used to market tangible products. In addition, the course emphasizes the interdisciplinary nature of service marketing. May be offered face to face or up to 100% online.

MARK 555 Sales Management

Credits – 3

This course focuses on examining sales management as a critical element within a company's marketing effort. Topics such as the relationship between sales and marketing, the ethical dilemma involved in the sales process, the sales process, the structure, the compensation plan, and the management of the sales force are included. Additionally, students will also develop skills related to how to plan and execute profitable sales strategies that create a competitive advantage. May be offered face to face or up to 100% online.

MARK 560 Consumer Behavior

Credits – 3

This course focuses on the study of consumer purchasing patterns, the purchasing decision processes they use, and the variables that influence that process. Emphasized is the use of consumer knowledge to develop effective marketing strategies. May be offered face to face or up to 100% online.

MARK 561 Brand Management

Credits – 3

Brand management refers to the process of creating, developing, and maintaining strong brands. Managing the brand is seen as an activity aimed at increasing the probability of purchase by differentiating the company's offer compared to that of competitors. In that sense, this course focuses on the process of creating and executing brand strategies with the purpose of developing strong brands. Special attention is given to the concept of brand equity and the process for creating that equity. May be offered face to face or up to 100% online.

MARK 562 Supply Chain Management for Marketing

Credits – 3

This course focuses on studying the management of the supply chain. This consists of value-creating processes that increase value and consumer satisfaction while reducing operating costs, making the link

between supply and demand more efficient and effective through the design and implementation of better inventory, location, and transportation systems and information. May be offered face to face or up to 100% online.

MARK 703-O Marketing Research

Credits – 3

This course examines the use of the scientific method in the acquisition, analysis, and interpretation of marketing information. Various research methods, such as exploratory, descriptive, and experimental approaches will be examined. The most recent studies in the systematic gathering of internal and external information needed for making marketing decisions will be considered. May be offered face to face or up to 100% online.

MARK 711 International Marketing

Credits – 3

Analysis and application of theory and problem solving for marketing management in the global environment. Emphasis is on the role of marketing in the multinational organization, planning and executing multi-country marketing strategies, managing, and controlling international marketing operations, and evaluating global customers. May be offered face to face or up to 100% online.

MARK 800 Marketing Theory

Credits – 3

This course aims to strengthen fundamental knowledge in marketing and its study. We will explore the history and development of marketing theory, as well as the conceptual and practical dimensions of this discipline and its strategy. Emphasis will be placed on a deep understanding of essential marketing theories, ensuring that students achieve intellectual mastery through critical analysis in the sciences of marketing. Additionally, students will be encouraged to engage in critical thinking, design, and theoretical construction through research. Throughout the course, students will have the opportunity to debate various theories and topics related to marketing. May be offered face to face or up to 100% online.

MATH 101 Mathematical Reasoning I

Credits – 3

In this course, students will learn to reason and make sense of mathematics so that they can use math in meaningful ways. Students will develop reasoning habits, such as analyzing a problem, implementing a strategy, seeking and using connections and reflecting on a solution to solve problems and think about mathematics. May be offered face to face or up to 100% online.

MATH 111-112 Intermediate Algebra I and II

Credits – 6

This course covers the study of rational exponents and radicals, linear graphs and quadratic equations, inequalities, systems of equations and their applications, as well as special products factoring and rational expressions. May be offered face to face or up to 100% online.

MATH 112ON College Algebra

Credits – 3

The College Algebra course includes the following topics: functions and graphs, polynomial and rational functions, exponential and logarithmic functions. Maybe offered face to face or up to 100% online.
Contact hours: 45

MATH 120 Introduction to Algebra**Credits – 3**

This course presents topics such as: the set of real numbers, percentage, algebraic expressions, linear equations, linear inequalities, polynomials, and its basic operations. It emphasizes application, problem solving, and comprehension skills. May be offered face to face or up to 100% online.

MATH 151 Pre-Calculus I**Credits – 4**

This course presents the concepts of functions: polynomials, rational, exponential, and logarithmic functions, systems of equations; applications, graphs, theory of equations, and analytic geometry. May be offered face to face or up to 100% online.

MATH 152 Pre-Calculus II**Credits – 4**

This course is a preparation for the differential and integral calculus in one variable. It is designed for students who plan to obtain a degree in science, mathematics, computer sciences, engineering, and mathematics education. The topics covered include trigonometric functions of real numbers and angles and their graphs, analytical trigonometry, applications of trigonometry, complex numbers and vectors, systems of linear equations, and analytic geometry. May be offered face to face or up to 100% online.

MATH 221 Calculus I**Credits – 4**

This course includes the study and analysis of limits, continuity, derivatives and integrals of polynomial, rational, logarithm, exponential and trigonometric functions. Applications of differentiation to sketch the graph of a function, the concept of maximum and minimum values, rate of change, velocity, acceleration, speed, and others. The indefinite and definite integral. Analysis and application of the Fundamental Theorem of Calculus. It is designed for students who plan to obtain a degree in science, mathematics, computer science or engineering. May be offered face to face or up to 100% online.

MATH 222 - Discrete Mathematics**Credits – 3**

This course provides a solid and applied understanding of key concepts in discrete mathematics, with an emphasis on their application in the field of cybersecurity. The course covers topics such as mathematical logic, Boolean algebra, set theory, functions, number theory, matrices, graph theory, and combinatorial analysis. These contents support the analysis, modeling, and resolution of problems related to the protection, transmission, and secure management of digital information. May be offered face to face or up to 100% online.

MATH 305 – Probability and Statistics**Credits – 3**

This course provides an introduction to the fundamentals of descriptive statistics and probability theory with a focus on cybersecurity applications. Key topics include data collection and analysis, measures of central tendency and dispersion, data visualization, counting techniques, and probability distributions (binomial, Poisson, and normal). Basic concepts of correlation and regression are also covered to support the interpretation of patterns and risk assessment in digital environments. Throughout the course, statistical tools are applied to analyze security incidents, evaluate vulnerabilities, model threats, and support data-driven decision-making. Emphasis is placed on the responsible use of technology, critical

thinking, and the application of analytical resources in real-world scenarios involving the protection and secure management of digital information. May be offered face to face or up to 100% online.

MEDA 201 Clinical Laboratory Procedures

Credits – 4

This course covers the performance and quality control for medical tests common to a medical office. Involves the study of medical laboratory principles and procedures, and covers the collection, performance and quality control for medical tests common to a physician's office setting, including clinical chemistry, phlebotomy, specimen collection and handling urinalysis, basic hematology, serology, microbiology and quality control. Also studies the theory and develops and practice components relating to universal precautions, OSHA safety regulations, aseptic technique, instrumentation, patient interviewing, taking and recording vital signs. Simulation included. May be offered face to face or up to 50% online. Contact hours: 90.

MEDA 202 Examining Room Procedures

Credits – 4

The course includes medical procedures and instruction in clinical skills for the allied health scenarios. The student will focus on all needed processes to prepare a patient prior examination and routine clinical procedures, including the clinical documentation. It also provides instruction in clinical examining room procedures. Topics include asepsis, infection control, assisting with exams and treatment, patient education, EKG, vital signs, and medical emergencies. Upon completion, students should be able to demonstrate competence in exam room procedures. May be offered face to face or up to 50% online. Contact hours: 90.

MEDA 203 Fundamentals of Pharmacology

Credits – 3

The content focuses on principles of pharmacology, drug classifications, administration routes, dosage calculations, therapeutic use, disinfection procedures, basic concepts of nontraditional medicine, and drug interactions. The advantages and disadvantages of pharmacotherapy and the client's well-being are discussed. May be offered face to face or up to 100% online. Contact hours: 45.

MEDA 204 Medical Office Management

Credits – 3

The content emphasis is to provide the skills to manage a wide variety of medical office settings and tasks. The student will identify challenges in the medical office's field and provide effective solutions based on legal and ethical standards. May be offered face to face or up to 100% online. Contact hours: 45.

MEDA 205 Medical Assistant Externship

Credits – 3

This course provides experience in selected physician's offices or other health care facilities. A qualified medical professional supervises the student during this activity. At Clinical/Practicum site. Contact hours: 160

MGMT 101 Managerial Principles and Leadership

Credits – 3

This course focuses on modern management principles and major theories and models of leadership. The student will distinguish between the concepts of management and leadership, and will expose

business terminology, concepts and current business topics. The course emphasizes the development and orientation towards leadership as well as understand critical related issues. Includes the role and responsibilities of managers and leaders, decision-making at different leadership scenarios, leadership in quality and planning in strategic management. May be offered face to face or up to 100% online.

MGMT 220 Organization and Business Behavior

Credits – 3

Study of concepts, theories, and practices related to individual and group behavior and their impact on the effectiveness and efficiency of the organization as a system. Upon completion of the course, the student will apply the integrated model of organizational behavior, through analysis and case assessment, scientific research, and current events from a professional and ethical perspective. May be offered face to face or up to 100% online.

MGMT 230 Human Resources Management and Handling Diversity

Credits – 3

Study of models and strategies of management and human resource development from the perspective of diversity in the workplace. Analysis and evaluation of basic fundamentals in strategic planning of human resources to promote and ensure the inclusion of a diverse workforce in all aspects of organizational life. Implementation of theories and strategies of human resources linked to recruitment, selection, training and development, compensation, benefits and incentives, retention, and succession of a diverse workforce, aligned to the objectives and business results, changes in the labor market, globalization, and competitive advantage. May be offered face to face or up to 100% online.

MGMT 431 Integration Seminar

Credits – 3

Comprehensive, theoretical, conceptual and decision analysis approach from the perspective of strategic change. This course allows application of knowledge, skills and abilities acquired in previous courses in order to improve the effectiveness and efficiency of the company. Emphasis is placed on research as an essential element in a strategic context, linked to changes occurring in the economy, technology, labor, business and trends in the discipline of study. The course is based on the analysis of case studies and research from international companies. May be offered face to face or up to 100% online.

MGMT 530 Human Resources Management and Handling Diversity

Credits – 3

Study of models and strategies of management and human resource development from the perspective of diversity in the workplace. Analysis and evaluation of fundamentals in strategic planning of human resources to promote and ensure the inclusion of a diverse workforce in all aspects of organizational life. Implementation of theories and strategies of human resources linked to recruitment, selection, training and development, compensation, benefits and incentives, retention and succession of a diverse workforce, aligned to the objectives and business results, changes in the labor market, globalization and competitive advantage. May be offered face to face or up to 100% online.

MGMT 655 Integration Seminar

Credits – 3

Analysis of real and simulated case studies for the appropriate application of the planning, decision-making, and problem-solving processes. Comparative analysis of patterns and managerial problems are covered in the course. The seminar is geared toward the application of related principles, concepts, and

theories. This course includes the development of an individual research project. May be offered face to face or up to 100% online.

MIBC 102 Medical Services Billing

Credits – 3

In this course, students will learn the basics of the health care reimbursement system in the United State. I Reviewed in detail are the types of contracts and coverage that insurance companies provide and the diagnosis and procedural coding systems that service providers are required to use. The course details the correct documentation necessary to submit claims based on the patient's insurance selection, as well as details regarding patient care services, physician care management, release of information, deficiency analysis, delinquency reporting, and revenue cycle management. Offered 100% online. Contact Hours: 45 hours.

MIBC 103 Clinical and Professional Coding

Credits – 4

In this course, the student will learn to identify and select codes for services, procedures, and diagnoses used in the outpatient setting. Skills will be practiced utilizing ICD-10-CM, and HCPCS Level II code books. Emphasis will be in ICD-10-CM diagnosis coding and CPT procedural/service coding for medical services. Offered 100% online. Contact Hours: 60 hours.

MIBC 105 Billing and Electronic Records

Credits – 4

In this course the student will perform activities related to medical billing, referrals, pre-authorizations, and other elements of electronic transmission related to the revenue cycle process). The student learns to use a clearinghouse as well as patient financial management and electronic health record systems to complete the billing process. In addition, students work with the digitalization of paper and electronic documents, the electronic prescribing, and various federal laws that impact medical billing and electronic records. Offered 100% online. Contact Hours: 60 hours.

MIBC 106 Reconciliation and Auditing

Credits – 3

This course allows students to acquire the knowledge to assess the claims and payment process, identify possible errors, reconcile the evidence of payment, recover and mitigate loss for unpaid medical services, and know the steps to follow in order to perform an audit in a medical office or outpatient area. The student will learn the technical or specialized vocabulary and terminology commonly used by health insurance companies and the health care industry. Emphasis is given to the procedures used by various health insurance companies and Medicare, among others, such as their policies, claims and payment processes, reimbursement procedures, and audit processes. Offered 100% online. Contact Hours: 45 hours.

MIBC 110 – Medical Billing and Coding Practicum

Credits – 3

This course constitutes the integrative practical experience of the Medical Billing and Coding program. It allows students to apply the knowledge and skills acquired in theoretical courses within a real-world medical office, hospital, or healthcare center under the supervision of a University-approved professional. Students participate in tasks related to diagnosis and procedure coding, medical claims management, electronic billing, HIPAA compliance, and administrative revenue cycle processes.

If placement in a medical office is not possible, the course may be completed through the Inmediata platform using The Simulated Clinical Scenario Manual designed by the program to ensure achievement of academic and professional objectives. Offered 100% online. Contact Hours: 100 hours.

MSPA 500 Theory Practice Change in the Administration of Public Policy

Credits – 3

This course deals with modern age theories and ideologies which guide and shape the development, administration, and evaluation of public policy. It focuses on and understanding of the concepts of individualism, collectivity and community development by behavioral philosophers and scientists. It provides for planning, as well as its methods and application. The course also presents a critical analysis of the various models which translate public policy and its application to specific approaches and concrete actions. May be offered face to face or up to 100% online.

MSPA 505 Computer Education for Public Administrators

Credits – 3

The course covers basic knowledge in the use of computers (computer literacy). Three basic areas are developed: (1) the ability to use the technological innovations, (2) the ability to incorporate the technological innovations into particular area of interest and (3) the ability to implement strategies and policies geared to the improvement of the administration team. May be offered face to face or up to 100% online.

MSPA 510 Research and Quantitative Methods in Public Administration

Credits – 3

This course deals with the concepts in research methodology and the statistic related to the process which are applicable to the Public Administration program. A multidisciplinary approach appropriate for the Public Administration professions will be presented. The course will also develop in students the capacity for objective decision making with a minimum of prejudice and subjectivity. The course emphasizes practical elements of methodology and applied statistics will be emphasized. May be offered face to face or up to 100% online.

MSPA 520 Administrative Law and Ethics

Credits – 3

Students become familiar with the set of legal norms and regulations concerning the various organizations, institutions, and public agencies, as well as with the justice system, the ordinances of services legally pertaining to these agencies, and the relations between these agencies and the individuals receiving those services. It includes the study of the dispositions which govern administrative processes, as well as ethical models in public administration. May be offered face to face or up to 100% online.

MSPA 530 Planning and Evaluation in Public Administration: Theories Methods and Techniques

Credits – 3

The purpose of this course is to prepare students to deal with problems management, solutions and evaluate outcomes. A panoramic view of the planning and evaluation theories are discussed. The main approach of the course is strategic planning, which in recent decades has become the practice in all organizations, both public, private and nonprofit. The student will learn to think strategically to address the challenges of public, private and nonprofit organizations. May be offered face to face or up to 100% online.

MSPA 540 Seminar: Planning, Development and Evaluation of Human Resources**Credits – 3**

The course will cover concepts and theories on communication, leadership, human motivation, perception, emotions, personality of organization and administration. Analysis of the components of Human Resources administration such as: recruitment and selection of personnel, job classification and evaluation, personnel training, retirement, motivation and human relations in Public Administration. May be offered face to face or up to 100% online.

MSPA 550 Fiscal Resources Management**Credits – 3**

Study of the fiscal administration and formulation in the public sector and in nonprofit organizations. Analysis and evaluation of concepts, theories, models, scopes and strategies in the budgetary process. May be offered face to face or up to 100% online.

MSPA 710 Research Seminar for Public Administration**Credits – 3**

The seminar offers students the opportunity to carry out an investigation integrating the knowledge obtained through the analysis of administrative systems and their contingent functions and how they affect public and private institutions. Students will analyze the activities of planning, organizational, design, and formulation. The decision-making process in the organization will be covered. May be offered face to face or up to 100% online.

NADM 657 Theories and Strategies in Nursing Administration**Credits – 3**

This course exposes the student to a wide variety of managerial and theoretical models that are used as a framework for management. Develops competencies as professional leadership, collaborator, consultant and ethical decision-making in the management nursing role. Provides to establish the difference between a leader and a manager. It emphasizes cultural diversity, inequality, and social determinants. In addition, aspects of communication, stress control and time management in administration are discussed among other topics as they apply to nursing administration based on evidence. For the development of competencies, communication skills, the ANA Standards of Practice, professional expectations of a leader, emotional intelligence, and various health policies, among other topics are used. May be offered face to face or up to 100% online.

NRSE 204 Pharmacology**Credits – 3**

This course provides instruction on the application of pharmacology within the nursing process to direct nursing decisions, safe drug administration, and ensure compliance with standards of practice. This course focuses on identification of drug classifications, drug interactions, calculation dosages and solutions, and application of the nursing process to clinical situations. May be offered face to face or up to 100% online.

NRSE 210 Nursing Informatics**Credits – 3**

This course assists students to develop basic competencies in the use of computers, data management software, patient care technologies, electronic communication, data gathering devices to deliver quality patient care. Issues and policies related to ethics and privacy regarding the treatment of patient

information (HIPAA) and the impact of informatics related to data, technology, privacy, security, and systems are addressed. Offered 100% online.

NRSE 211 Nursing Fundamentals

Credits – 5

This course provides instruction in the fundamentals of nursing, including the nursing process, nursing roles, introduction to professionalism, ethics, and patient care principles with a focus on the elderly population. May be offered face to face or up to 100% online.

NRSE 211C Nursing Fundamentals Clinical

Credits – 2

This course provides the opportunity for students to practice the knowledge and skills acquired in the classroom and laboratory settings. The clinical patient care experiences focus on nursing assessment, use of basic nursing skills sets, and teaching for health promotion. There is an emphasis on patient safety. This course provides 90 clinical hours. Offered on-site only.

NRSE 212L Nursing Skills Lab 1

Credits – 2

This course provides instruction and opportunity to practice basic nursing skills in a controlled environment. This course provides 60 lab hours. Offered on-site only.

NRSE 213L Health Assessment

Credits – 2

This course provides instruction and practice on essential health assessment techniques including interviewing and communication skills, inspection, palpation, percussion, and auscultation. Differentiating between normal and abnormal findings as well as documentation of findings. Social, personal, and sociocultural assessment across the lifespan is included. This course provides 60 lab hours. Offered on-site only.

NRSE 221 Nursing Concepts I

Credits – 4

This is the first course in a three-course sequence that integrates nursing care across a variety of settings across the lifespan from simple/stable to complex/acute. Physical, mental, emotional, and sociocultural care are addressed. May be offered face to face or up to 100% online.

NRSE 221C Nursing Concepts 1 Clinical

Credits – 4

This course provides the opportunity for students to practice the knowledge, and skills acquired in the classroom and laboratory settings. The clinical patient care experiences focus on basic evidence-based management of patients in a variety of settings. This course provides 180 clinical hours. Offered on-site only.

NRSE 222L Nursing Skills Lab 2

Credits – 2

This course provides instruction and opportunity to practice advanced nursing skills in a controlled environment. This course provides 60 lab hours. Offered on-site only.

NRSE 231 Nursing Concepts 2

Credits – 4

This is the second course in a three course sequence that integrates nursing care across a variety of settings across the lifespan from simple/stable to complex/acute. Physical, mental, emotional, and sociocultural care are addressed. May be offered face to face or up to 100% online.

NRSE 231C Nursing Concepts 2 Clinical**Credits – 2**

This course provides the opportunity for students to practice the knowledge, and skills acquired in the classroom and laboratory settings. The clinical patient care experiences focus on intermediate evidence-based management of patients in a variety of settings. This course provides 90 clinical hours. Offered on-site only.

NRSE 235 Maternal Child Nursing**Credits – 4**

This course builds on previous nursing concepts to provide nursing care to women, infants, and children in a variety of settings. Normal development and abnormal processes are discussed. May be offered face to face or up to 100% online.

NRSE 235C Maternal Child Nursing Clinical**Credits – 2**

This course provides the opportunity for students to practice the knowledge, and skills acquired in the classroom and laboratory settings to women, infants, and children in a variety of settings. This course provides 90 clinical hours. Offered on-site only.

NRSE 241 Nursing Concepts 3**Credits – 4**

This is the third course in a three course sequence that integrates nursing care across a variety of settings across the lifespan from simple/stable to complex/acute. Physical, mental, emotional, and sociocultural care are addressed. May be offered face to face or up to 100% online.

NRSE 241C Nursing Concepts 3 Clinical**Credits – 2**

This course provides the opportunity for students to practice the knowledge, and skills acquired in the classroom and laboratory settings. The clinical patient care experiences focus on complex evidence-based management of patients in a variety of settings. This course provides 90 clinical hours. Offered on-site only.

NRSE 290 Nursing Capstone: Transition to Practice**Credits – 3**

This course prepares students for the transition from student to novice nurse including leadership, delegation, emergency management, professional networking, and resumes. It provides the associate degree nursing student guidance on the process of applying for licensure and preparation for passing the national nursing licensure exam (NCLEX-RN). May be offered face to face or up to 100% online.

NRSE 400 Nursing Role in Family Care and the Community**Credits – 3**

The student will apply the theoretical and empirical knowledge in the use of the nursing process in populations and community environments to promote, maintain, and restore health. The students will

examine the roles and various scenarios of professional nursing and public health community during the assessment phase, applying research skills, effective communication, and the satisfaction of health needs of populations and communities. Offered 100% online.

NRSE 401 Diversity in the Nursing Profession

Credits – 3

During this course, the student will examine the influence of cultural diversity in the nursing practice with the patient, individuals, towns, and communities. They will analyze the impact of cultural diversity, beliefs, values, and influence in health care and nursing practice. They will explore their own cultural beliefs related to health care, customer behaviors, cultural perspective, and cross-cultural communication barriers. Offered 100% online.

NRSE 402 Management and Leadership Seminar in Nursing

Credits – 3

In this course, the student will analyze the fundamentals of leadership and management in health services. Emphasis is placed on the application of advanced communication skills in collaboration with the multidisciplinary team. The different types of leadership, the characteristics of a leader, and organizational changes for a better teamwork will be discussed. They will also evaluate the leadership theories and models to foster safe environments and effective work. Through the seminar, they will apply the problem-solving step methods to address complex issues within health organizations. Offered 100% online.

NRSE 404 Regulation and Healthcare Policy

Credits – 3

The purpose of this course is to examine the fundamentals of health policy, the financial structure of the health systems, and regulatory environments that have an impact on nursing practice and care to the individual, family, and community as patients, while emphasizing on those issues affecting the health policy and the focus on the influence of the nursing profession in policy matters and regulations. Offered 100% online.

NRSE 407 Knowledge Integration in Nursing

Credits – 3

The focus of this course is the integration of knowledge, skills and attitudes for professional nursing practice. Students have the opportunity to familiarize themselves with the requirements established by law to practice nursing. Offered 100% online.

NRSE 500 Foundations of Advanced Nursing Practice

Credits – 3

This course introduces the history and current state of Advanced Practice Nursing. Essential topics include the structure of the program, educational requirements, APRN Consensus Model, population foci, regulatory agencies, practice and reimbursement models. Students examine how basic concepts such as theory, evidence practice, and leadership apply to advanced practice. May be offered face to face or up to 100% online.

NRSE 501 Policy, Systems Leadership, and Ethics

Credits – 3

This course integrates systems leadership and ethical concepts into analysis of healthcare policy at the organizational, community, and national levels. Students analyze the social, economic, cultural, and

political forces that impact the provision of primary health services. The professional aspects of advanced practice nursing are analyzed, including the implementation of the role in the reform of the health system. Students design innovative strategies that can influence the direction of public policies that improve health services and contribute to the improvement of the nursing profession through advocacy and the legislative process. May be offered face to face or up to 100% online.

NRSE 502 Evidence Based Practice

Credits – 3

This course focuses on analysis of the research process and evidence-based practice and its application in the nursing profession. Emphasis on the application of evidence to address clinical problems and guide individualized patient care. The limitation and critique of the evidence-based practice movement are included. May be offered face to face or up to 100% online.

NRSE 515 Health Promotion and Culture

Credits – 3

This course provides practical strategies for health promotion and disease prevention including analysis of U.S. Preventive Task Force (USPTF) guidelines, nutrition, physical activity guidelines, and behavior change. Students analyze Healthy People recommendations and evidence and investigate the role of human caring as an essential dimension of advanced practice nursing work, especially dealing with life crises, health maintenance problems, and emerging health developments. The impact of technology on health promotion (both positive and negative) are explored. Students incorporate social determinants of health to develop culturally competent holistic plans of care that address the health promotion and disease prevention needs of diverse patient populations. May be offered face to face or up to 100% online.

NRSE 521 Advanced Pathophysiology

Credits – 4

This course provides an advanced understanding of human physiology and pathophysiology across the lifespan as a foundation for advanced practice nursing. Etiology, pathogenesis, natural history and clinical manifestations forms an interpretive framework upon which to base assessment, decision-making, and patient management. The course includes cellular, genetic, and epigenetic concepts. May be offered on-campus or up to 50% online.

NRSE 522 Advanced Pharmacology

Credits – 4

This course provides a broad analysis of pharmacology across the lifespan as well as pharmacotherapeutic applications for advanced nursing practice. This course is designed to accompany Advanced Pathophysiology. It includes pharmacogenetics, and regulatory issues related to prescriptive authority. May be offered on-campus or up to 50% online.

NRSE 523 Advanced Health Assessment & Diagnostic Reasoning

Credits – 4

This course provides theoretical and lab experience in advanced assessment including history-taking, health promotion, and maintenance across the lifespan. Content includes advanced examination techniques for comprehensive, holistic healthcare with emphasis on diagnostic reasoning skills in assessing deviations from normal findings and utilizing data management to support health assessment. Diagnostic procedures are also addressed. This course includes 30 lab hours. May be offered on-campus or up to 50% online.

NRSE 531 Primary Care 1 Theory - Adults**Credits – 4**

This course is the first of a three-part series focusing on primary care across the lifespan. This course focuses on application of evidence-based practice to primary care knowledge of wellness, illness prevention, diagnosis, and treatment of chronic and acute diseases in adults. Builds upon the advanced practice core courses of advanced pathophysiology, advanced pharmacology, advanced history taking, and physical assessment. Integrates interprofessional practice, cultural competencies, ethical and legal issues. May be offered on-campus or up to 50% online.

NRSE 531C Primary Care 1 Clinical**Credits – 4**

This course provides clinical skills and experience for the advanced practice nurse to apply conceptual knowledge with their individual direct care promoting healthy lifestyle, disease prevention, ethical and evidence-based practice in the primary care setting. Students must complete 200 clinical hours. At Clinical/Practicum site.

NRSE 532 Primary Care 2 - Families**Credits – 4**

This course is the second of a three-part series focusing on primary care across the lifespan. This course focuses on application of evidence based practice to primary care knowledge of wellness, illness prevention, diagnosis, and treatment of chronic and acute diseases in families. Builds upon the advanced practice core courses of advanced pathophysiology, advanced pharmacology, advanced history taking, and physical assessment. Integrates interprofessional practice, cultural competencies, ethical and legal issues. May be offered on-campus or up to 50% online.

NRSE 532C Primary Care 2 Clinical**Credits – 3**

This course provides clinical skills and experiences for the advanced practice nurse promoting healthy lifestyle, disease prevention, ethical, and evidence-based practice. Emphasis includes integrating and synthesizing care of families. Students must achieve 150 clinical hours. At Clinical/Practicum site.

NRSE 533 Primary Care 3 - Women/Children**Credits – 3**

This course is the third of a three-part series focusing on primary care across the lifespan. This course focuses on application of evidence-based practice to primary care knowledge of wellness, illness prevention, diagnosis, and treatment of chronic and acute diseases in women and children. Builds upon the advanced practice core courses of advanced pathophysiology, advanced pharmacology, advanced history taking, and physical assessment. Integrates interprofessional practice, cultural competencies, ethical and legal issues. May be offered on-campus or up to 50% online.

NRSE 533C Primary Care 3 Clinical**Credits – 3**

This course provides clinical skills and experiences for the advanced practice nurse promoting healthy lifestyle, disease prevention, ethical, and evidence-based practice. Emphasis includes integrating and synthesizing care of individuals, children and women. Students must complete 150 clinical hours. At Clinical/Practicum site.

NRSE 590C APRN Clinical Immersion**Credits – 5**

This course provides a concentrated/immersive clinical experience that prepares students for the full scope of nurse practitioner practice. Students in the clinical course will work with a preceptor to meet clinical objectives. Students prepare for their certification exam. Transition to practice issues is explored. Students must achieve 250 clinical hours. At Clinical/Practicum site.

NRSE 700 Nursing Theories, Conceptual Models and Philosophies**Credits – 3**

This course will explore the development of nursing knowledge and theory; the philosophies of science and epistemologies, their influence on knowledge development for doctoral nursing practice, and strategies for theory development and analysis will be discussed. Also, it focuses on the exploration of the nature of theory development in nursing, analysis of selected nursing and related theories, and the relevance of theory to research and practice in nursing. May be offered on-campus or up to 100% online.

NRSE 701 Advanced Epidemiology for Nursing Practice**Credits – 3**

This course introduces students to epidemiology concepts and methods for disease prevention, surveillance, detection, and intervention to promote the health of populations. Emphasis is placed on critical thinking, analytic skills and application to clinical nursing settings. Discuss specific epidemiologic skills including accessing existing datasets, analysis of published epidemiologic studies, data interpretation, and application of criteria for screening for disease in community. Opportunities for active participation in simulated disease investigations are included. May be offered on-campus or up to 100% online.

NRSE 702 Evidenced-based Practice**Credits – 3**

This course introduces students to the fundamentals and principles of Evidence-Based Practice (EBP) and its relation to nursing practice. The resources available to facilitate EBP in nursing practice, the models for implementation, the steps, the components of the establishment of the clinical question in the PICO format (Patient, Intervention, Comparison, Outcome) and the statistical analysis are discussed. General strategies to undertake an evidence-based project are discussed. The challenges and strengths of existing clinical evidence, the role of nursing professionals and their application in patient care, are analyzed. May be offered on-campus or up to 100% online.

NRSE 703 Health Care Policy, Ethics and Advocacy**Credits – 3**

This course provides a holistic overview of health care policy planning from development to implementation. Students will apply current evidence to analyze and evaluate health care policy frameworks from the perspective of professional, political, social, and regulatory issues. They will examine the current U.S. health care system based on public and governmental interests and will explore the role of the doctoral prepared nurse as an advocate and leader in the integration of health care policies into practice. May be offered on-campus or up to 100% online.

NRSE 704 Scholarship Project I: Mentorship**Credits – 3**

The cornerstone course will provide students with the tools and support they require to conduct a scholarly literature review and to develop a clear statement of the problem. Clinical immersion objectives

and activities are developed by the student and revised and approved by the faculty member as a mentor and based on the proposed clinical project. The approved project would be submitted to the IRB for evaluation and final approval. A minimum of 125 hours is spent in clinical immersion. At Clinical/Practicum site.

NRSE 705 Nursing Science for Clinical Practice

Credits – 3

This course explores the scientific principles and philosophical underpinnings of nursing practice relevant to the role of the D.N.P. Concepts, models, and theories from nursing and other disciplines will be applied to clinical practice problems. Students will analyze various approaches used in research and evaluate the published research quality. Models of human resources management, changes, and strategic planning are explored; as well as the development and implementation of programs. The concepts of communication, conflict resolution, leadership, teamwork, patient-centered care, collaboration, and negotiation are discussed. Students will develop search strategies to answer questions related to a selected topic of interest. May be offered on-campus or up to 100% online.

NRSE 706 Scholarship Project II: Project Plan

Credits – 3

This course will provide students with the support and direction needed to develop a comprehensive, site-specific project plan in collaboration with faculty members and his or her mentor. An IRB approval will be required to proceed with the project plan. A minimum of 125 hours is spent in practicum experiences. At Clinical/Practicum site.

NRSE 707 Transcultural and Global Health Disparities

Credits – 3

This course emphasizes interprofessional collaboration in clinical prevention to improve the health outcomes of patients and the general population. The concepts of cross-cultural nursing, theories, philosophies, ethics, research, pluralism and functional relationships for nursing care are discussed. The impact of globalization on health planning and care, and the need to design health care systems that respond to diverse cultural needs, are analyzed. The focus is on selected global health problems assessed in a multidisciplinary manner to ensure attention to the underserved and their complex needs determined by cultural diversity. May be offered on-campus or up to 100% online.

NRSE 708 Scholarship Project III: Implementation

Credits – 3

This project experience provides an opportunity for the student to execute the project plan in collaboration with the sponsoring site. The experience reflects the interest of the student and is designed to meet individual interests and career goals. This advanced practice project allows the student to learn to manage time and resources, assess implementation issues, and utilize communication and collaboration while working with a clinical mentor to implement the project plan. A minimum of 125 hours spent in practicum experiences is required. At Clinical/Practicum site.

NRSE 709 Nursing Technology and Health Care Information Systems

Credits – 3

During this course, the students are introduced to the specialty of nursing informatics, the information system life cycle, telemedicine, and the use of technology to enhance nursing care and patient safety. The foundations for the integration of information sciences and computer sciences are provided as support for both evidence-based practice and administrative decision-making. Emphasis on the

demonstration of conceptual abilities and technical skills essential to managing patient care data with clinical information systems. Current issues, health literacy, and challenges in using clinical information systems are also explored. Finally, the process of designing, using, and manipulating small and large databases for the analysis of patient results is discussed. May be offered on-campus or up to 100% online.

NRSE 710 Scholarship Project IV: Evaluation

Credits – 3

This is the final component of the project experience. All but 125 of the required 1,000 clinical hours must be completed prior to starting NRSE 710. The course content, as in the other project courses, reflects the interest of the student and is designed to meet individual student needs and career goals. This final course allows the student, with guidance from mentor, to evaluate the evidenced-based practice (EBP) project outcomes and develop scholarly written and oral reports that disseminate and integrate new knowledge. The final product will reflect the student's ability to employ effective communication and collaboration skills; to take a leadership role; to influence health care quality and safety; to evaluate practice; and to successfully negotiate change in health care delivery for individuals, families, populations, or systems across a broad spectrum of health care. A minimum of 125 hours is required. At Clinical/Practicum site.

NRSE 711 Scholarship Project Practice Matriculation

Credits – 3

For students with less than 500 hours, students will complete supervised practice hours. This course may be taken before NRSE 704 OR concurrently with NRSE 704, 706 based on the GAP Analysis. Provides up to 500 hours of practicum experience. The course may be completed up to 4 times. For student with more than 500 hours, credit for this course is awarded upon validation of at least 500 supervised nursing practice hours (or 250 hours for non-APRN) at the Master's or post-Master's level and completion of NRSE 704. At Clinical/Practicum site.

OCSE 101 Occupational Safety

Credits – 2

Study of fundamental concepts related to industrial and occupational safety. Emphasis is placed on the development of critical thinking skills and competencies that allow preventive measures to be applied to avoid and/or reduce physical accidents caused by the handling of tools and work equipment, electric shocks, inhalation of toxic gases, explosives, fall prevention, use of ladder and scaffolding; in addition to personal protective equipment (PPE). Includes discussion of inherent risks in entering enclosed and/or confined spaces and the *Wright to Know Act*, and other related topics. It also discusses the regulations of the Department of Labor, OSHA and PROSHO applicable. As part of the discussion, hypothetical and real cases will be analyzed regarding different situations that the student will face in the profession. Teaching-learning strategies will include practical exercises, demonstrations, conferences, and search and management of information through electronic media. Offered on-site only. Contact hours: 30.

ODHR 203 Strategic Organizational Communication

Credits – 3

Introduction to the foundation of strategic organizational communication. This course provides students with an overview of the necessary skills of strategic communication inside organizations. Theories and concepts of strategic communication are discussed and how it integrates other managerial skills such as

planning, interpersonal relations, negotiation, and conflict resolution, among others. It emphasizes the application of concepts to real situations for problem solving. May be offered face to face or up to 100% online.

ODHR 204 Organizational Psychology

Credits – 3

This course studies theories and psychological principles inside organizations. It focuses in relating basic concepts with the opportunity to increase productivity in the work setting, understanding organizational and human behavior and improving individual performance. Topics include teams in organizations, motivation, differences, attitudes and work relevant emotions, stress, leadership, and organizational change and development. Students will apply psychological theories to problems and/or work settings. May be offered face to face or up to 100% online.

ODHR 305 Diversity in Organizations

Credits – 3

This course presents a variety of theories and perspectives that arise from differences in race, culture, religion, gender, age and other characteristics related to diversity in a job environment. Students will understand how these dimensions affect performance, motivation, productivity and success of organizations. How to face and to change practices such as: stereotypes, prejudices, perceptions and other beliefs that present barriers to reach the competitiveness of individuals and organizations will be discussed. The course emphasizes the interconnection of social and cultural processes to avoid possible factors that might generate discriminatory practices. May be offered face to face or up to 100% online.

ODHR 306 Conflict Resolution and Arbitrage

Credits – 3

This course provides students with the necessary knowledge for conflict management at all organizational levels. It emphasizes the development of negotiation skills, arbitration, and managing objections in order to develop alternatives that satisfy the interests of all parties. The design of strategies necessary for a successful negotiation process will be studied. May be offered face to face or up to 100% online.

ODHR 307 Training and Human Resource Development

Credits – 3

Needs analysis, design, implementation and evaluation of training and human capital development in work organizations. The course emphasizes the recognition of human talent as a competitive advantage in high performance organizations. Creating a climate of positive and healthy workplace through professional training programs and human capital development, allowing motivate, encourage and provide skills necessary to optimize their performance. Includes topics such as leadership development, motivation and retention, needs analysis, design and management of training. May be offered face to face or up to 100% online.

ODHR 308 Leading Organizational Change

Credits – 3

Discussion of the principles and models of organizational changes and the development of skills to lead these changes. Emphasizes on managing effectiveness of organizational change elements and forces that act against these changes. Emphasizes intervention designs and recommendations for strategic changes from a human perspective. Includes topics of effective communication, design of strategic plans, process

evaluation, phases of changes implementation and diagnosis. May be offered face to face or up to 100% online.

ODHR 409 Consulting Management Principles in Human Resources

Credits – 3

In this course the student will integrate managerial concepts learned through his/her career education in the area of human resources. Throughout the course the student will develop a consulting strategy to improve the effectiveness of an organization. By integrating managerial concepts, the student will evaluate practices and processes that increase productivity, effectiveness and approach from leaders towards more productive companies in the fundamental areas of human resource management. May be offered face to face or up to 100% online.

ODHR 410 Organizational Coaching

Credits – 3

This course provides the student fundamental knowledge of coaching practices for managerial improvement. Emphasizes the integral approach of human relations in organizations and techniques for the development of organizational coaches. Concepts such as leadership, instructing, training, and motivating teamwork to achieve goals are discussed. The concepts of empowerment and constant feedback to teams are studied. May be offered face to face or up to 100% online.

ODHR 411 Total Quality in Work Scenarios

Credits – 3

Discussion of the principles and techniques in Total Quality Management (TQM) with emphasis on its application in organizations. This course provides the student the necessary knowledge which enables him/her to become part of TQM programs, either as a participant or as who designs it. This allows him/her to understand a general panorama and the specific details of total quality. May be offered face to face or up to 100% online.

OFAD 141 Keyboard Skills

Credits – 3

Special emphasis will be given to key by touch using a computer keyboard. Development of speed and accuracy. Training in simple documents, such as: memorandums, documents with proofreader's marks, and also basic functions of Microsoft Word application such as: create, save, print, edit, and centralize text. May be offered face to face or up to 100% online. Contact hours: 45

OSMB 100 Medical Terminology

Credits – 3

This course is designed for students to learn the terms and procedures used in a medical facility. In addition, students will learn medical vocabulary and their meanings. Offered 100% online.

OSMB 101 Accounting for Medical Billing

Credits – 3

This course prepares the student in the basics of accounting through the study of accounting concepts and the analysis of financial reports. Offered 100% online.

OSMB 102 Billing

Credits – 3

This course provides students with the skills and abilities to process bills for health services. Offered 100% online.

OSMB 103 Coding

Credits – 3

The course includes the study of the nomenclature of diseases and health conditions, as well as an introduction to ICD 10 CM & PCS coding including the organization and implementation of the code sets. Also discussed is the CPT procedural code set, alignment of diagnosis and procedure codes, and application of code sets in the US health care system. Offered 100% online.

OSMB 104 Billing Audit

Credits – 3

This course reviews the basics of medical billing in the US health care system. Students will learn to assess patient charges, review billing for problems, explore denials management, and examine the billing and compliance auditing process. Offered 100% online.

OSMB 105 Legal and Administrative Procedures

Credits – 3

This course legal issues associated with health care administrative processes and the medical billing process. Offered 100% online.

OSMB 106 Electronic Billing

Credits – 3

This course prepares students in the use and management of electronic billing programs. Students will be able to assess the full revenue cycle through an expanded look at the electronic billing process. Offered 100% online.

OSMB 107 Electronic Medical Record

Credits – 3

This course prepares students in the use and management of electronic medical records and how medical records are used in the medical billing process. Offered 100% online.

OSMB 108 Integrated Applications

Credits – 3

In this course students will learn about the use of Microsoft Office programs such as Word, Excel, PowerPoint, Access, and Outlook in the health care organization. Offered 100% online.

OSMB 109 Introduction to Database Management

Credits – 3

This course is designed to enable the students to develop the techniques and skills necessary for the analysis and design of the database. Offered 100% online.

OSMB 110 Introduction to Office System Technology

Credits – 3

This course is designed to enable the student to develop skills for the use and management of technological tools utilized in health care organizations. Offered 100% online.

OSMB 111 Medical Transcription

Credits - 3

This course is designed to enable students to develop the skill to transcribe medical record information from dictated provider reports. Offered 100% online.

OSMB 113 Coding of Services and Procedures

Credits – 3

This course provides students the knowledge and basic skills required for the coding of medical services and procedures. Practical exercises will be included in order to search for coding of services, procedures, and treatments, using the CPT code manual as a resource for services and procedures. Offered 100% online.

OSMB 114 Health, Safety, Medical Law, and Ethics

Credits – 3

This course studies one of the many uses of medical records: its use as legal protection to the patient and to the institution that provides the health care services. It covers the legal requirements of medical records in relation to its retention, security controls, maintenance, and confidentiality, within the institution as well as outside. Emphasis is given to the application of professional ethics and legal aspects in health information management. Offered 100% online.

PARS 101 Introduction to Legal Practices and Ethics

Credits – 3

This course is designed to introduce the student to the paralegal profession and legal ethics. The course focuses on the role of the paralegal in the legal environment and career-related topics, including job search criteria, Leadership and human relations skills and health and safety paralegal environments. The course will also provide an overview of the legal system and selected areas of the law. May be offered face to face or up to 100% online.

PARS 102 Real State Fundamentals

Credits – 3

Survey of real property law in the State, including classification of interests in real property; methods of acquiring ownership in real property; ownership interests; surveys and land descriptions; encumbrances of real property; easements and licenses; buying and selling real property; deeds of conveyance; recording systems; title abstracting and title insurance. Stresses practical application for paralegal. May be offered face to face or up to 100% online.

PARS 103 Civil Litigation Fundamentals

Credits – 3

Focuses on the litigation process as related to the court system of the State. Attention to function of law, roles of the attorneys, judge and jury; basic substantive law, pleadings, discovery, trial settlement and appeal, everything from the perspective of a civil proceeding. May be offered face to face or up to 100% online.

PARS 104 Legal Research and Theory with Legal Writing

Credits – 3

This course provides an introduction to the legal system, law library system, research and analysis and practical American legal writing. Students learn to research, format, and cite all primary and secondary sources on both state and federal levels. May be offered face to face or up to 100% online.

PARS 105 Computer Technology in a Legal Office

Credits – 3

This course is designed to assist students in developing analytical and technological skills to enable them to logically approach the application of computer technology to the field of law. This course includes learning activities designed to ensure competence in the basic use of computers and applications within the law office, from a paralegal perspective. May be offered face to face or up to 100% online.

PARS 106 Foundations of Wills, Trusts, and Estate Administration**Credits – 3**

In-depth analysis of Florida Probate Code as basic substantive law, which governs, wills, trusts and estate administration in the State. It covers the responsibilities and duties in the field of estate administration that can be performed by a paralegal, emphasizing the drafting of estate planning documents and ethical considerations. May be offered face to face or up to 100% online.

PARS 107 Insurance Case Manager of Paralegals**Credits – 3**

This course will introduce the student to fundamental principles of insurance law. It focuses on the pre-suit litigation process as related to insurance claims in Florida. Students will gain experience and skills in dealing with the different types of insurance policies, policy language and its interpretation. From a paralegal perspective, the student will understand general principles such as coverage, insurable interest, risks, exclusions, and the relationship between client, attorney and insurance carrier. May be offered face to face or up to 100% online.

PARS 108 Family Law**Credits – 3**

This course offers an introduction to family law, historical and social contexts that encompass the current definition of the family unit, its creation, preservation and dissolution. The students will examine case and statutory law as well as constitutional limitations from the perspective of the paralegal's role in a family law practice. Students will learn about such topics as marriage, parenthood, support – child and spousal, among others. May be offered face to face or up to 100% online.

PARS 109 Debtor-Creditor/Bankruptcy**Credits – 3**

This course presents an overview of topics in debt collection practices, post judgment debt collection and bankruptcy law. This is a basic course in debtor/creditor law with an emphasis on bankruptcy cases and concepts. Students will examine an overview of topics in debt collection practices, post judgment debt collection and bankruptcy procedures. The course begins by reviewing non-judicial debt collection practices and limitations and judicial state law debt collection; it also studies the Federal Bankruptcy Code – concepts, policies, and cases. May be offered face to face or up to 100% online.

PARS 110 Paralegal Law Office Management Skills**Credits – 3**

This course presents the fundamentals of law office management and organization, including basic principles and structures of management, administrative and substantive systems in the law office, and law practice technology. May be offered face to face or up to 100% online.

PCTC 101 Nursing Assistant Skills**Credits – 4**

This course is designed to provide the student with the knowledge and skills necessary to perform basic and compassionate care services for patients (acute care setting) or resident (long-term care setting) as an entry-level nurse aide. It will prepare students in the following: performing physical comfort measures and safety functions, applying principles of infection control, understanding patient populations, providing physiological and psychological support. Topics include promoting the proper environment; recording and monitoring of vital signs, height, weight measurements; observing, reporting, and charting, admission, transfer, and discharge, and coping with death. Skills demonstrated in lab portion of the Course. May be offered face to face or up to 50% online. Contact hours: 60

PCTC 102 Clinical Laboratory Phlebotomy Procedure with EKG

Credits – 3

Involves the study of laboratory procedures, and covers the collection, performance and quality control for medical tests common in a Laboratory and Health Care Settings. This course covers a more advanced study of the anatomy and physiology of the circulatory system. Laboratory sessions are focused on students learning the effective techniques of blood draws through repetition and covers the phlebotomist's role and responsibilities. The course covers certification for Phlebotomy and includes the requisite number of sticks and blood draws required for certification. Also includes clinical chemistry, properly performing EKG procedures, aseptic technique, instrumentation, and taking and recording vital signs. Lab included. Offered on-site only. Contact hours: 45

PCTC 103 Personal Patient Care-Plan and Procedures

Credits – 3

This course provides training in providing care and assistance with tasks related to the activities of daily living and personal care, under the general supervision of a registered nurse. Including, but not limited to personal patient care, patient care procedures personal care, patient rights, maintaining mobility, nutrition and hydration Topics include Body Mechanics – Positioning and Moving Residents; Care of the Resident's Environment; Assisting Residents with Bathing; Toileting and Perineal Care; Skin Care; Hygiene and Grooming; Nutrition; Hydration; Elimination. Skills demonstrated in lab. May be offered face to face or up to 50% online. Contact hours: 45

PCTC 104 Geriatric Care

Credits – 4

This course provides an introduction of the history and importance of the nurse aide along with scope of practice. Emphasis is placed on the knowledge and skills needed to provide safe, quality care of residents. Topics include Role of the Nurse Aide in LTC; Safety Measures; Emergency Measures; Infection Control; Residents Rights and Independence; End of Life Care; Communication and Interpersonal Skills and Taking Care of Yourself. Also provides the knowledge/skills to understand and interact with the resident who has mental health disorders as well as understand the psychology of interaction with residents on various levels of life. Topics include Psychosocial Needs of Residents; Culture Change; Specific behavior Problems. Skills demonstrated in lab. May be offered face to face or up to 50% online. Contact hours: 60

PCTC 105 Health Care Delivery System and Rehabilitation Services

Credits – 3

This course provides the knowledge/skills needed to help residents maintain the highest possible level of independence and functional ability (physical and psychosocial). Topics include Introduction to

Restorative Services: The Role of the Nurse Aide in Restorative Care. May be offered face to face or up to 50% online. Contact hours: 45

PCTC 106 Patient Care Clinical Externship

Credits – 3

Students are assigned to a healthcare facility, under facility/staff supervision. Clinical externships consist of 120 hours and take place at a local healthcare facility chosen by the University staff. At Clinical/Practicum site. Contact hours: 120 hours

PHAR 210 Pharmaceutical Calculations I

Credits – 3

In this course, the aspects related to the solution of problems of pharmaceutical nature are discussed: foundations of measures and calculations, reasons, and proportions, metric system, apothecary and avoirdupois systems, domestic system, conversions between the system and the interpretation of prescriptions. May be offered face to face or up to 100% online.

PHAR 211 Pharmaceutical Calculations II

Credits – 3

In this course the following aspects related to the solution of problems of pharmaceutical nature are discussed: preparations of percentage, increase, and reduction of formulas, concentration, and dilution, pediatrics dosage, thermometry, parenteral preparations and calculations related to filling prescriptions. May be offered face to face or up to 100% online.

PHAR 212 Pharmacy Administration

Credits – 3

The course is designed to provide the student with the basic business management skills, the laws, and regulations applicable to the operational aspects of a commercial drugstore. The relations with the suppliers, patients, management and other personnel of the community pharmacy are studied. The students through study cases evaluate facts for the purchase, management, and maintenance of a drugstore. May be offered face to face or up to 100% online.

PHAR 226 Pharmacotherapy for Pharmacy Technicians I

Credits – 3

This is the first of a three parts course that integrates the basic knowledge in anatomy, physiology, pathophysiology, and pharmacology necessary to carry out effectively the functions of a pharmacy technician in the state. Emphasis is given not only to the pharmacologic part where the student is familiarized with the generic and trade names of the drug, but also safe and effective use of medicines of more demand today. May be offered face to face or up to 50% online.

PHAR 227 Pharmacotherapy for Pharmacy Technicians II

Credits – 3

This is the second of a three parts course that integrates the basic knowledge in anatomy, physiology, pathophysiology, and pharmacology necessary to carry out effectively the functions of a pharmacy. Emphasis is given not only to the pharmacologic part where the student is familiarized with the generic and trade names of the drug, but also safe and effective use of medicines of more demand today. Students will analyze and evaluate the pharmacotherapy of the most common illnesses. May be offered face to face or up to 50% online.

PHAR 228 Pharmacotherapy for Pharmacy Technicians III**Credits – 3**

This is the third of a three parts course that integrates the basic knowledge in anatomy, physiology, pathophysiology, and pharmacology necessary to carry out effectively the functions of a pharmacy technician in the state. Emphasis is given not only to the pharmacologic part where the student is familiarized with the generic and trade names of the drug, but also safe and effective use of medicines of more demand today. May be offered face to face or up to 50% online.

PHAR 230 Pharmaceutical Technology I**Credits – 3**

This course presents the different types of drug delivery systems. The aspects related to the drug bioavailability and route of administration for different dosage forms are discussed. Emphasis is given to their physicochemical properties, formulations, preparation methods, preservation packaging, and storage. Aspects related to the bioavailability of the drug and route of administration for different dosage forms are briefly discussed. May be offered face to face or up to 100% online.

PHAR 230L Pharmaceutical Technology I Laboratory**Credits – 3**

This laboratory type course offers students the opportunity to put into practice the knowledge acquired in the Pharmaceutical Technology I course. It familiarizes the student with the basic equipment and materials required in a community or hospital pharmacy for the preparation of compounding drugs. Examples of different dosage forms that are prepared are solutions, syrups, tinctures, emulsions, lotions, ointments, among others. Offered on-site only.

PHAR 231 Pharmaceutical Technology II**Credits – 3**

This is a continuation course that presents the different types of dosage forms and drug delivery systems. Emphasis is given to their physicochemical properties, formulations, preparation methods, preservation packaging, and storage. Aspects related to the drug bioavailability and route of administration for different dosage forms are briefly discussed. Laboratory practice is included for almost all the topics of the course. Requires laboratory. May be offered face to face or up to 100% online.

PHAR 231L Pharmaceutical Technology II Laboratory**Credits – 3**

This continuation course presents the different types of drug delivery systems. The aspects related to the drug bioavailability and route of administration for different dosage forms are discussed. Emphasis is given to their physicochemical properties, formulations, preparation methods, preservation packaging and storage. The students also evaluate aspects of how the patient should take proper care of the different formulation types. Offered on-site only.

PHAR 233 Posology**Credits – 3**

Study of the activities related to the filling of facultative prescriptions. The student will apply concepts studied on dose, administration routes, drug concentration, and interactions. Emphasis is given in the prescription interpretation, correct labeling, and instructions to the patient. May be offered face to face or up to 50% online.

PHAR 250 Hospital Pharmacy**Credits – 2**

The course is a comprehensive study of the pharmaceutical services provided by the pharmacy to the hospital departments in concern. The content includes analysis and evaluation of the drug distribution systems. It also emphasizes in-patients and out-patients dispensing procedures that govern the safe administration of drugs and biological. Computers in hospital pharmacy, intravenous additives system, hyperalimentation and other special topics are also evaluated. May be offered face to face or up to 50% online.

PHAR 251 Prescription Dispensing and Pharmaceutical Specialties I**Credits – 3**

This course includes the discussion of all the activities related to the prescription dispensing process to the patient. Among the topics included are the following: interpretation of the prescription, medical indications, product selection, prescription preparation, packaging and labeling, as well as patient orientation regarding the medication's proper use, storage, disposal, and possible interactions. Different pharmaceutical specialties, such as generic drugs, trade/brand names, and medications that do not require a prescription (OTC/over the counter) are also studied. May be offered face to face or up to 50% online.

PHAR 252 Prescription Dispensing and Pharmaceutical Specialties II**Credits – 3**

This is a continuation course that includes the discussion of all the activities related to the prescription dispensing process. Topics included are the following: prescription interpretation, product selection, prescription preparation, packaging and labeling. Instruction to the patient regarding the proper use of medications, possible interactions and proper storage and disposal are discussed. Emphasis is given to the study of the different product specialties such as, generic drugs, trade names and over the counter drugs (OTC). May be offered face to face or up to 50% online.

PHAR 255 Pharmaceutical Legislation**Credits – 3**

This course introduces those laws and regulations that directly affect the profession and the pharmaceutical industry in the United States, and the federal and state regulations related to the production, distribution, and management of pharmaceutical products and other substances of common sale in pharmacies in the United States. May be offered face to face or up to 100% online.

PHAR 256 Supervised Practice in Pharmacy I**Credits – 2**

Supervised practice is designed to develop in students the necessary skills for pharmacy service, patient-oriented, which is acquired through experiences in a community or hospital pharmacy. Clinical practice is conducted under the direct supervision of a state Department of Health licensed and registered pharmacist. Through their work in community or hospital pharmacy, students will obtain experience in the following areas: pharmacy management, prescription dispensing, patient-oriented services and the use of profiles. This clinical practice is directed and coordinated by a professor of the institution and will require a minimum of 80 hours of practice per semester. At Clinical/Practicum site.

PHAR 257 Supervised Practice in Pharmacy II**Credits – 2**

This course is the continuation of Clinical Practice I. Its purpose is to continue the development of previously acquired pharmaceutical services skills. This practice is carried out in a community or hospital setting, under the direct supervision of a pharmacist licensed and registered with the state Department of Health. The student will continue gaining experience in the following areas: pharmacy administration, dispensing, patient-oriented services, and the use of profiles, among other services. This clinical practice will be coordinated and supervised by a professor of the institution and a minimum of 80 hours of clinical practice is required. At Clinical/Practicum site.

PHAR 258 Practicum Seminar

Credits – 2

This seminar course is intended to provide students with the opportunity to review all the knowledge in the approved courses and during the first phase of their practical experience to prepare them to take their professional exam. Emphasis will be given in relevant areas such as pharmaceutical calculations, drug treatment, and technical, administrative and legal aspects of the pharmacy practice. May be offered face to face or up to 100% online.

PHAT 100 Introduction to Pharmacy

Credits – 3

This course familiarizes the student with the history of medicine and pharmacy. Subsequently, the student will understand the pharmacy technician career, as well as, professional technician associations, the importance of continuing education, and the existence of different levels of a pharmacy technician. The student will correlate the different methods of communication (e.g., verbal, nonverbal, written, etc.) in the workplace when interacting with coworkers, patients or any special patient group. Furthermore, the student will adept at using basic pharmacy drug references. The student will identify the role of the pharmacy technician in the community pharmacy practice, as well as, other pharmacy duties, identify the pharmacy layout, and other pharmacy services. Moreover, the student will learn about the different types of institutional pharmacy practice, as well as, the pharmacy technician role within each of the different environments. Finally, the student will discover all the additional pharmacy practice settings and advanced roles for a pharmacy technician. May be offered face to face or up to 50% online. Contact hours: 45

PHAT 115 Pharmaceutical Calculations

Credits – 3

This course describes the history of pharmacy calculations. Furthermore, the student will be able to convert Arabic numbers into roman numerals, as well as, traditional time into military time, and Fahrenheit temperatures to Celsius temperatures. The student will be able to identify the medication dosage form as well as the ability to convert between various systems to calculate quantity and days' supply. The student will apply formulas and calculate doses by body weight and body surface, to calculate infusion rates, dilution and alligations. May be offered face to face or up to 100% online. Contact hours: 45

PHAT 120 Pharmacotherapy

Credits – 3

This course relates competencies learned from anatomy, physiology and a basic knowledge of pharmaceutical chemistry. The student will be able to describe major components of systems, locations, functions, as well as primary symptoms of conditions associated with dysfunction of the system and common drugs used for treatment. These systems include nervous, endocrine, cardiovascular, respiratory, gastrointestinal, renal, reproductive, and hematological systems. The student will

understand the role of the pharmacy technician in the patient care process, as well as how to assist pharmacists in responding to emergent patient situations, safely and legally. May be offered face to face or up to 50% online. Contact hours: 45

PHAT 125 Administration and Pharmacy Law

Credits – 3

This is a comprehensive course, which instructs the student on pharmacy law, ethics, and regulatory agencies in the development, manufacturing, packaging, marketing, licensing, sale, and distribution of controlled substances, medications, and medical devices in various pharmacy settings. Furthermore, the course covers the patient's right of medication safety, as well as safety strategies, including United States Pharmacopeia <797> regulations, to reduce medication errors. Students will discuss how the OTC (over the counter) products are regulated, discuss restricted OTC, as well as, how a prescription drug becomes an OTC drug. May be offered face to face or up to 100% online. Contact hours: 45

PHAT 130L Pharmacy Sterile and Non-Sterile Compounding Laboratory

Credits – 3

This course covers the differences of sterile and non-sterile preparations, the need of certain medications to be sterile as well as necessary standard precautions, supplies, and equipment in the process of compounded sterile and non-sterile preparations. The student will learn about the United States Pharmacopeia (USP) <797>, USP-NF <795>, how to list the main components, as well as, the three risk levels. Furthermore, the student will describe and demonstrate the proper aseptic techniques as well as the key components of USP <800> regulations to be competent in compounding hazardous preparations. Lastly, the student will apply course knowledge regarding pharmacy sterile and non-sterile compounding throughout practice exercises. Offered on-site only. Contact hours: 45

PHAT 135 Posology

Credits – 3

This course will integrate the Joint Commission Official "Do Not Use List", as well as, the medical terminology to interpret prescriptions and communicating effectively in the field. Furthermore, the student will compare the classification of medications and relate them to the pertaining body system. The student will identify the dosage formulation and routes of administration; as well as, the pharmacokinetic and pharmacodynamics of drugs in the human body. Moreover, the student will describe the purpose of excipients in the production of medication. The student will discover and differentiate generic and trade names, define suffixes, and infixes; as well as, discuss therapeutic agents and classify drugs using the drug schedules under the Controlled Substance Act (CSA). May be offered face to face or up to 50% online. Contact hours: 45

PHAT 148 Introduction to Pharmacy Practice

Credits – 3

This course provides the structure to review, emphasize, reinforce, and refresh the knowledge from previous core professional courses such as pharmaceutical calculations, pharmacotherapy, pharmacy administration and law, sterile, non-sterile compounding, and posology to prepare for their externship. The student will submit any pertinent documentation for the placement in the pharmacy of preference. In addition, this course will prepare the student with test-taking techniques, strategies, and reviews to take the Pharmacy Technician Certification Exam (PTCE). May be offered face to face or up to 100% online. Contact hours: 45

PHAT 150 Externship I

Credits – 3

This externship enables the student to apply and integrate foundational professional competencies, as well as personal and interpersonal knowledge and skills. In a real-life pharmacy environment, the student will apply patient care, quality, and safety knowledge and skills. The externship will provide the student with opportunities to process and handle medication orders, while following regulations in compliance with state and federal laws. The student in the externship will complete a total of 80 hours in a retail/chain pharmacy environment affiliated under the supervision of a pharmacist with an active license/registration in the state in which the program is offered. At Clinical/Practicum site. Contact hours: 80

PHAT 151 Externship II**Credits – 3**

This externship provides an additional opportunity for the student to apply and integrate foundational professional competencies, as well as personal and interpersonal knowledge and skills. In a real-life pharmacy environment, the student will apply patient care, quality, and safety knowledge and skills. The externship will provide the student with opportunities to process and handle medication orders, while following regulations in compliance with state and federal laws. The student in the externship will be completing a total of 80 hours in a compounding, hospital, or infusion environment under the supervision of a pharmacist with an active license/registration in the state in which the program is offered. At Clinical/Practicum site. Contact hours: 80

PHIL 201 Introduction to Philosophy**Credits – 3**

Study of the nature and development of philosophical thoughts and its problems. Studies the principal philosophers from Greece to the present.

PHLE 100 Blood Borne Pathogens**Credits – 2**

This course includes topics related to protecting yourself from blood borne pathogens on the job, following the Occupational Safety and Health Administration (OSHA) standards. All health care workers are covered by the standard if it is reasonably anticipated that you could be exposed to blood borne pathogens while performing your job duties. Learn how to properly approach patient, identify patient, and learn all the appropriate steps that the Phlebotomist must apply before collection of blood. Also discussed are topics related to HIV/AIDS, such as understanding the disease, how it is contracted, and understanding what precautions to take as a health care worker and what equipment to use for protection. May be offered face to face or up to 50% online. Contact hours: 30

PHLE 101 Collection Equipment and Specimen Transportation Procedures**Credits – 3**

This course includes topics related to learning how to identify the proper tubes and the reagents within the tubes as well as to identify appropriate laboratories to which to send specimens. Also covered will be the use of safety devices, how to dispose of needles, and understanding what safety devices are available. Some cases may require special preparation of the patient before collection of the blood specimens, special handling techniques for research patients, as well as use of special collection equipment such as for blood cultures or blood gases. Students will also examine the timing specimens and the use of a centrifuge. Offered on-site only. Contact hours: 45

PHLE 102-O Communication and Interview Techniques in Health Care Settings

Credits – 3

This course allows students to explore techniques related to communication with patients. Activities such as role playing will allow for interactive learning of the patient interview process and other important communication techniques. The scope of practice for phlebotomists will be reviewed, as well as job duties and skills, time management of the health care professional, and continuing professional education. Professional organizations for phlebotomists will be examined, as well as the importance of accreditation and certification. May be offered face to face or up to 100% online. Contact hours: 45

PHLE 103 Phlebotomy Clinical Externship**Credits – 3**

Students are assigned to a healthcare facility, under facility/staff supervision. Clinical externships consist of 160 hours and take place at a local healthcare facility chosen by the University staff. At Clinical/Practicum site. Contact hours: 160

POSC 373 Political System of the United States**Credits – 3**

The course covers the evolution of the federal government, its structure, procedures, and functions. Emphasis will be placed on organization as well as on separation of powers in the legislative, executive, and judicial branches. May be offered face to face or up to 100% online.

POSC 380 Constitutional Law**Credits – 3**

The course is an introduction to the constitutional development of United States, with emphasis on civil rights provisions in the Constitution. May be offered face to face or up to 100% online.

PRMG 600 Operations Management**Credits – 3**

This course will introduce concepts and techniques for coordination and planning to manage and control manufacturing and service operations. In general, the course provides definitions of operations management terms, tools, and techniques for analyzing operations, and strategic context for making operational decisions. The content is organized in modules: Operations Analysis, Coordination and Planning, Quality Management, Project Management and Supply Chain Management. May be offered face to face or up to 100% online.

PRMG 601 Project Scope and Time Management**Credits – 3**

This course includes the definition and analysis of the project management processes required to ensure that the project includes all the work required to complete the project according to project goal, objectives, needs, and expectations. Definition and analysis of the processes required to ensure that the project is completed on time taking into consideration activity list, durations, activity sequencing, start and finish dates and graphical representations such as GANTT and Critical Path Method charts. It is the application of how the project scope baseline is defined and how the work breakdown structure is created and defined. May be offered face to face or up to 100% online.

PRMG 602 Project Cost Management**Credits – 3**

Definition and analysis of the processes required to ensure that the project is completed within the approved budget. It is the application of financial concepts, earned value and forecasting techniques.

There is a discussion regarding cost estimating, budgeting, S-curves, operation, and maintenance life cycle costs, contingency reserve and baseline. The budget definition for a project is covered as part of this course. The discussion of the differences between a new change to the approved project budget and project variances are reviewed. Impact analysis about critical project areas is also covered. May be offered face to face or up to 100% online.

PRMG 603 Project Quality Management

Credits – 3

Definition and analysis of the processes required to ensure that the project and each deliverable satisfy the needs for which they were undertaken. It is the application of quality concepts, quality costs and quality control to the management process. The course emphasizes the importance of quality plan definition, the requirements, the audits, the quality control, and the quality baseline. The definition and development of a quality plan are covered. The discussion of the differences between a new change to the approve quality plan, and project variances are reviewed. Impact analysis about critical project areas is also covered. May be offered face to face or up to 100% online.

PRMG 604 Project Human Resources and Risk Management

Credits – 3

Definition and processes required to make more effective use of human resources assigned to the project and the project team development analysis. Study of the characteristics of successful teams. Strategies for the selection and recruitment of members of the team. Development and teamwork control. Description and analysis of the processes involved in the identification, analysis, and answers to the project risks. Development of a plan of risks and opportunities and a plan of responses to risks. Identification, qualification, and quantification of risks and opportunities. Analysis of the impact of risks and opportunities by critical factors of success or “Triple Constraint.” May be offered face to face or up to 100% online.

PRMG 605 Project Integration Management

Credits – 3

The students will have the opportunity to participate in a real project to apply the project management concepts by developing a project (definition and analysis of the processes) required to ensure that the five processes groups and nine knowledge areas of the project are properly coordinated in the project. Aspects required to integrate all areas of knowledge and processes established, will be complemented with the discussion. May be offered face to face or up to 100% online.

PRMG 606 Project Procurement Management

Credits – 3

Definition and analysis of the processes required to acquire goods and services from outside the performing organization. Topics include the discussion about contract types, negotiation processes, contractual terms and conditions, clauses, procurement team, quality levels, financial components among others. Also covered in the class are a cost-benefit analysis, make or buy decisions, management of proposals, quotations, and contracts. May be offered face to face or up to 100% online.

PRMG 607 Project Communication Management

Credits – 3

Definition and analysis of the processes required to ensure timely and appropriate generation, collection, dissemination, storage, and ultimate disposition of project information. Emphasis is on the components

of effective communications with project stakeholders, and the definition of project team ground rules and conflict management are also covered. May be offered face to face or up to 100% online.

PRMG 608 Using a Project Management Information System

Credits – 3

This course covers the use of a Project Management information system tool such as Microsoft Project. The attendee will receive knowledge of schedule development, resource management, dependencies, dashboards, metrics, cost estimating and budget, baseline setup, using reporting options, among others. May be offered face to face or up to 100% online.

PROD 205 Audiovisual Production I

Credits – 3

Introductory and theoretic study of the administrative and production processes of film, video and multimedia. Study of the human resources of production from the point of view of a producer and the processes of pre-production, production and postproduction. Elaboration of the responsibilities and tasks of producer from the conception of the production design, final projection and distribution of an audiovisual object. Study of the languages of audiovisual production. May be offered face to face or up to 100% online.

PRTE 630 Instructional Design and Technological Project I

Credits – 3

In this course, students apply their knowledge and skills gained to develop, write, and present instructional design proposals that meet a need of a hypothetical client of a distance learning program. May be offered face to face or up to 100% online.

PRTE 640 Instructional Design and Technological Project II

Credits – 3

In this course, students apply their knowledge and skills gained to develop, write and present instructional design proposal that meets a need of a hypothetical client of a professional learning program. May be offered face to face or up to 100% online.

PSYC 121 – PSYC 122 General Psychology I and II

Credits – 6

The course is an introduction to basic theories of human behavior and their relation to social progress and individual growth. May be offered face to face or up to 100% online.

PSYC 123 General Psychology (Compendium)

Credits – 3

Study of basic principles, concepts and theories of individual and social behavior. May be offered face to face or up to 100% online.

PSYC 205 Personal Growth and Development

Credits – 3

The course emphasizes the dynamics of human behavior, and techniques for effective interpersonal relations. Human activity and mechanisms for personal and social adjustment are analyzed in order to achieve understanding of oneself and others. May be offered face to face or up to 100% online.

PSYC 206 Human Growth and Development

Credits – 3

A study of the changes in behavior and mental processes across the life-span and the biological, psychological, social and cultural factors influencing those changes. May be offered face to face or up to 100% online.

PSYC 221 Child Psychology**Credits – 3**

Main theories of child development, emphasizing cognition, learning, personality and behavior. May be offered face to face or up to 100% online.

PSYC 222 Adolescent Psychology**Credits – 3**

The course deals with adolescent development and behavior, including personality, learning, vocational selection, moral development and social adjustment in society. Alienation and social Commitment will also be discussed. May be offered face to face or up to 100% online.

PSYC 225 Social Psychology**Credits – 3**

The course centers on the relationship between the individual and society. Attitudes, perception of group behavior, prejudices, and conformity will be discussed. May be offered face to face or up to 100% online.

PSYC 228 Diversity Psychology**Credits – 3**

Study of the human and cultural diversity from the perspective of the sciences of conduct. Analysis of the differences and similitudes of the individual human behavior as it relates to ethnicity, gender, religion, age, disabilities, sexual orientation, learning differences, types and levels of intelligence, language, and socioeconomic status, among others. Analysis of the psychological, social, economic and legal implications using as a framework current research on diversity. May be offered face to face or up to 100% online.

PSYC 283 Human Development**Credits – 3**

Course covers human development theories from conception to death, providing emphasis in personality issues, but also including biological and social bases of human behavior. May be offered face to face or up to 100% online.

PSYC 305 Human Relations and Public Service**Credits – 3**

The course deals with the complexity and the dynamics of human relationships. The variables that influence individual behavior in group situations will be studied. Topics include motivation, leadership, communication, resistance to change, and the importance of good human relations in public service. May be offered face to face or up to 100% online.

PSYC 307 Group Dynamics**Credits – 3**

The course covers group dynamics, cohesion, structure, emotional factors, leadership, and communication. The classroom situation is used as a laboratory for the concepts studied. May be offered face to face or up to 100% online.

PSYC 321 Theories of Personality

Credits – 3

The course deals with theories, problems, and research regarding the role of motivational, perceptive, socioeconomic, biological, genetic, somatic, and learning factors in the development of the personality. May be offered face to face or up to 100% online.

PSYC 343 Learning Theories

Credits – 3

The course covers theories of learning as a determinant of behavior. Topics include variables in the learning process, experimentation, and application to education. May be offered face to face or up to 100% online.

PSYC 350 Principles of Psychopathology

Credits – 3

The course covers dynamics, diagnosis, and prediction of abnormal behavior. Mental disorders and illnesses will be discussed. Psychotherapies used in the treatment of abnormal behavior will be analyzed. May be offered face to face or up to 100% online.

PSYC 355 Industrial Psychology

Credits – 3

The course deals with the application of psychological techniques to industry and business. Emphasis is on promotion and recruitment of personnel. Psychological factors that determine efficiency of industrial organizations will be discussed. May be offered face to face or up to 100% online.

PSYC 360 Seminar on Human Sexuality

Credits – 3

The Human Sexuality Seminar includes the study of the anatomy and formation of sexual organs, analysis of the biological, psychological, and social characteristics that contribute to sexual identity and individual behavior. It also includes the cultural factors of sexuality, the ethical dimension, the dysfunction in sexual behavior and sexually transmittable illnesses like AIDS. May be offered face to face or up to 100% online.

PSYC 400 Experimental Psychology

Credits – 3

The course is an introduction to experimental methods from a methodological point of view. Topics emphasized include epistemological bases of sciences, ethical issues in conducting experimental research, APA Ethical Standards, scientific and non-scientific approaches to knowledge, and goals of scientific methods. Other topics discussed include independent and dependent age, external validity, experimental and statistical hypothesis, and identification of statistically significant effects, elements of descriptive and inferential statistics, treatment effects, experimental treatment, control and experimental groups, and features of the experimental methods. Basic experimental designs discussed include completely randomized, within subject, and factorial designs. Emphasis will be placed on independent group designs, random groups, matched groups and others. May be offered face to face or up to 100% online.

PSYC 405 Physiological Psychology**Credits – 3**

The course covers physiology and human behavior, including the central nervous system, the autonomous nervous system, cortical processes, processes of emotion, motivation, and behavioral disorders with physical etiology. Relationships between learning and psychological processes will be discussed. May be offered face to face or up to 100% online.

PSYC 450 Integration Seminar**Credits – 3**

The course centers on analyzing psychologists' work and functions in diverse service settings. It includes discussion of the psychologist's Code of Ethics and the most relevant laws involved in the rendering of psychological services. The design and implementation of a community service activity are also included. May be offered face to face or up to 100% online.

PUHE 101 Introductions to Public Health and Health Education**Credits – 3**

Introduction to the different conceptions about health, as well as the basic principles of education. Analysis of the relationships that exist among the 4 mayor factors that determine health. Deals with various epidemiologic concepts about health and illness, the natural history of diseases, attention and prevention levels, specific protection measures and health promotion. Emphasis is placed on existing health education models for individual and community intervention. May be offered face to face or up to 100% online.

PUHE 201 Introduction to Biostatistics**Credits – 3**

Basic concepts and principles of statistics applied to life and health. Emphasis in the basic techniques used in scientific research, primarily in areas of health education and public health. Analysis of the major statistical concepts such as: the scientific method and the statistics method and others. May be offered face to face or up to 100% online.

PUHE 203 Introductions to Epidemiology**Credits – 3**

Studies the occurrence, distribution and causes of diseases in communities using the epidemiologic method. The epidemiologic, as well as the scientific method are applied to the health-illness process and its causes, particularly transmissible, chronic, mental diseases and high-risk behaviors. May be offered face to face or up to 100% online.

PUHE 210 Biological Aspects of Human Diseases**Credits – 3**

Develops sound scientific attitudes, the concepts and the basic biological processes of diseases, such as: inflammation, immunological reactions, regeneration and growth control, fibrosis and necrosis using the scientific method as the tool. Pathogenesis is incorporated to the various perspectives of epidemiology and disease control as they relate to public health. Laboratory experiences promote the application of technology to the study of the principal human diseases and agents that cause them. May be offered face to face or up to 100% online.

QUME 250 Quantitative Methods**Credits – 3**

Pre-calculus course for students with the major in Business Administration. Includes: linear equations, linear inequalities and functions, quadratic function, exponential functions and logarithms; financial mathematics and matrix algebra. All topics are applied to problems of Business Administration and Economics. May be offered face to face or up to 100% online.

QUME 507 Quantitative Methods and Statistics for Business

Credits – 3

This course provides an overview of quantitative methods and statistics applied in commerce and industry especially for the analysis of business situations and decision-making. Decision modeling of organizational systems uses statistics, mathematical and computer models to provide a quantitative perspective on identifying, analyzing, and solving complex decision problems. Topics covered include equations for quantitative analysis, introduction to linear programming, break-even analysis, descriptive statistics, correlation and regression analysis, time series data analysis, probability, money variables over time, decisions analysis, networks analysis, sampling methods, statistical inference, hypothesis testing, and managing quantitative research simulation. Some sections may be technologically mediated. May be offered face to face or up to 100% online.

QYLE 110 Attitude Development and University Adaptation

Credits – 3

This course was designed to support students in facilitate the process of student transition to university life. Students will learn to access information, use technology to be able to meet course requirements and gain knowledge of the University's policies and procedures that impact completion of program of study. Must be taken the 1st part of term or enrollment. May be offered face to face or up to 100% online.

REFR 101 Fundamentals of Refrigeration and Air Conditioning

Credits – 1

This course studies the history and evolution of refrigeration. The course details the theories about heat and temperature, its nature and relationship with refrigeration. In addition, the concepts of pressure, temperature, compression, evaporation, condensation, refrigerant controls, piping, welding, tools, refrigerant handling, evacuation, loading and calibration of instruments are discussed; and how they interrelate according to the laws of thermodynamics. It includes the principles related to refrigeration theory and cycle, pipeline operations and refrigerant management, their nature and relationship with refrigeration and its applications. In addition, the student will be familiarized with the tools used in the refrigeration and air conditioning pipe, and welding industry. The safety rules and handling of refrigerators CFCs, HCFCs, HFCS HCs and their derived mixtures as regulated by the EPA in the practical performance of their functions are widely explained. Offered on-site only. Contact hours: 15.

REFR 101L Fundamentals of Refrigeration and Air Conditioning Lab

Credits – 4

In this laboratory, the student applies theoretical knowledge acquired in the REFR 101 course. Through laboratory experiences, he develops manual skills working on the components of the condensing unit: compressors, refrigerants, pipes and materials for application in different refrigeration systems and domestic and commercial air conditioning. Offered on-site only. Contact hours: 60.

REFR 102 Motors and Electrical Controls**Credits – 1**

This course enables the student to master the operation of the most used electric motors and controls in domestic, commercial and industrial refrigeration systems and air conditioners. There is an emphasis of the study of 120V, 240V and three phase motors. Additionally, students learn to work WYE and DELTA connections systems. Finally, the sequence of operation, diagrams and control components of residential, commercial and industrial refrigeration equipment are analyzed. Offered on-site only. Contact hours: 15.

REFR 102L Motors and Electrical Controls Lab**Credits – 4**

In this laboratory, the student applies the theoretical knowledge acquired in the REFR 102 course. Through laboratory experience, the student has the opportunity to work with control system devices, install one-phase and three-phase motor control systems. The student is exposed so that he can master the operation of the most used electric motors and controls in domestic, commercial and industrial refrigeration systems and air conditioners. Emphasis is placed on the study of 120V, 240V and three-phase motors and on the WYE and DELTA connections of these systems and the sequence of operation, diagrams and control components of residential, commercial and industrial refrigeration equipment is analyzed. Offered on-site only. Contact hours: 60.

REFR 103 Domestic Refrigeration and Air Conditioning**Credits – 1**

This course provides the student with theoretical knowledge about the refrigeration cycle of residential equipment and the cooling system of air conditioners for domestic or residential use. The structural, mechanical and electrical components of the different refrigerators, freezers and the different domestic air conditioning systems used in United States are studied. Installation, maintenance and repair procedures are discussed by applying safety measures. In addition, it includes the process of quotation and preparation of invoices in residential services. It includes content related to the operation, installation and maintenance of hermetic compressors, condensers and evaporators used in refrigeration systems and residential air conditioning. It emphasizes the application of the rules and regulations governing this technology. It develops skills to work on techniques for leak detection, evacuation, refrigerant charge and recovery of domestic refrigeration and air conditioning systems. Offered on-site only. Contact hours: 15.

REFR 103L Domestic Refrigeration and Air Conditioning Lab**Credits – 4**

In this laboratory, the student develops manual skills on the refrigeration cycle of residential equipment and the cooling system of air conditioners. Installation, maintenance and repair procedures are discussed by applying safety measures. The basic concepts of the operation, installation and maintenance of refrigeration equipment and residential air conditioning are applied. It includes content related to the operation, installation and maintenance of: hermetic compressors, condensers and evaporators used in refrigeration systems and residential air conditioning. It emphasizes the application of the rules and

regulations governing this technology. It includes laboratory experiences where the student develops practical skills on the electrical-mechanical operation of refrigerators, freezers, ice machines and other household equipment. Skills are developed to work on techniques for leak detection, evacuation, refrigerant charge and recovery of domestic refrigeration and air conditioning systems. Offered on-site only. Contact hours: 60

REFR 104 Commercial and Industrial Refrigeration and Air Conditioning

Credits – 1

In this course, the student is exposed to experiences that will help to acquire the appropriate knowledge related to the installation, repairs, and the diagnosis of different controls and accessories used in commercial and industrial units. It will cover the basic concepts of how commercial and industrial applications of refrigeration are related. Offered on-site only. Contact hours: 15.

REFR 104L Commercial and Industrial Refrigeration and Air Conditioning Lab

Credits – 4

In this laboratory the student will be exposed to practical experiences to develop the manual skills on the refrigeration cycle and the cooling system of commercial and industrial equipment conditioners. It includes the student's exposure to a suitable scenario to install, repair and diagnose different controls and accessories used in commercial and industrial units. It includes the relationship between the basic concepts learned and the commercial and industrial applications of refrigeration systems. As part of this course, 60 hours of theory are worked on and the student must complete 15 hours of specific external work. Offered on-site only. Contact hours: 60.

REFR 105 Fundamentals of Automobile Air Conditioning

Credits – 1

This course presents the theory and operation of the automobile air conditioning system. The car's electrical system, air valves and their replacements, types of compressors, condensers and evaporators are studied. In addition, the procedures of installation, maintenance and repair of air conditioners of cars are described. Therefore, this course teaches the theoretical knowledge and skills to offer a high quality service in the installation and repair of these systems. Offered on-site only. Contact hours: 15.

REFR 105L Fundamentals of Automobile Air Conditioning Lab

Credits – 4

This laboratory offers practical experiences that meet the requirements of the program. Students will demonstrate practical skills on the electrical-mechanical operation of the automobile air conditioning system. It includes the study of the electrical system of the car, air valves and their replacements, types of compressors, condensers and evaporators. In addition, the procedures for installation, maintenance and repair of car air conditioners are applied. Finally, the appropriate skills are worked to offer a high quality service in the installation and repair of these systems. Offered on-site only. Contact hours: 60.

REFR 106 Principles of Renewable Energy and Energy Management

Credits – 3

In this course, the student is trained with the basic concepts of energy management. The different types of energy and basic concepts that are studied are: where it is located, how we can take advantage of it for residential use and improve the environment. In addition, it discusses the processes for auditing energy, analyzing consumption bills and conducting economic analyses. In addition, electrical and mechanical systems, and how they directly affect energy consumption and management are analyzed. It includes strategies on control systems and other technologies to improve consumption spending. Offered on-site only. Contact hours: 45.

REFR 107 Fundamentals of Hvac Inverters and Variable Refrigerant Volume System (Vrv/Vrf)

Credits – 3

In this course, the student is exposed to experiences that allow him to acquire the basic theoretical knowledge about the operation of the different components that integrate the Inverter technology in air conditioning systems. The different electronic stages and fault diagnostics in these systems are included. In addition, the basic fundamentals in the operation, characteristics and principles of the components, the electronics and the diagnosis of the systems are discussed. Finally, the student will acquire the appropriate knowledge to install, repair, diagnose the commercial and industrial air conditioning units of Variable Refrigerant Volume (VRV), also known as Variable Refrigerant Flow (VRF), which are a type of system of central air conditioning of multi-split type. Offered on-site only. Contact hours: 45.

REFR 108 EPA 608 - 609 Certification Prep

Credits – 4

This course is designed to prepare students for the EPA Section 608 and Section 609 Technician Certification Examinations, which are required by federal law for all technicians who handle refrigerants in stationary and mobile (automotive) air conditioning systems. The course provides an in-depth review of the Clean Air Act regulations, refrigerant recovery and recycling procedures, environmental impacts of refrigerants, safe handling practices, and regulatory compliance. Students will gain knowledge and practical readiness to successfully sit for the EPA 608 Universal Certification Exam (covering Core, Type I – Small Appliances, Type II – High-Pressure Systems, and Type III – Low-Pressure Systems) and the EPA 609 Certification Exam for Motor Vehicle Air Conditioning (MVAC) systems. Offered on-site only. Contact hours: 60.

REIL 101 Research and Information Literacy

Credits – 3

This course focuses on analysis of the basic principles of research and the development of information skills. The course presents the basic methodology of researching a topic of interest, identifying appropriate sources after conducting a systematic search for information, and promoting the use of information in an effective, legal, and ethical manner. May be offered face to face or up to 100% online.

REIL 102 Research and Information Literacy

Credits – 4

This course focuses on analysis of the basic principles of research and the development of information skills. The course presents the basic methodology of researching a topic of interest, identifying appropriate sources after conducting a systematic search for information, and promoting the use of

information in an effective, legal, and ethical manner. 15 hours for research lab are required. May be offered face to face or up to 100% online.

RESM 850 Seminar in Information Systems I *

Credits – 3

In this course we examine the scope and role of research in management information systems. An exploration of theoretical foundation underlies the course. Information systems (IS) support the making and communication of decisions. Thus, this course highlights the role of IS research in the decision theory and other managerial frameworks. The course seeks to develop an understanding of the rather unique interdisciplinary nature of information systems research and its application and integration to other organizational disciplines. It is specifically designed for students to develop the necessary knowledge and ability to understand and evaluate current research in the field. This course will also allow you to make progress on your research in a structured way and to help fulfill program requirements, and also to present professionalization information crucial to success in the field. May be offered face to face or up to 100% online.

RESM 860 Seminar in Information Systems II *

Credits – 3

This course presents the fundamental techniques in business research integrating the most effective research design in a changing environment. The course includes the topics of design, configuration, measurement scaling and sampling. It addresses quantitative and/or qualitative research using survey instruments and other data collection procedures. It deals with the issues of planning for data analysis, model building and the data analysis process in light of current developments in the field of modeling. It also deals with the issue of research reporting and evaluation, with contemporary ethical considerations in business research. May be offered face to face or up to 100% online.

RESM 862 Seminar in Management I

Credits – 3

The primary objective of this doctoral seminar is to survey the major theoretical perspectives and issues studied in organization and management research. Organization theory is currently one of the liveliest areas in all social sciences in part because of the importance of understanding organizations. The course is designed to present and discuss the key domains in organization and management research. Also, students will learn how to write research proposals (grant writing) related to the discipline. May be offered face to face or up to 100% online.

RESM 864 Seminar in Management II

Credits – 3

This course presents the fundamental techniques in business research integrating the most effective research design in a changing environment. The course includes the topics of design, configuration, measurement scaling and sampling. It addresses quantitative and/or qualitative research using survey instruments and other data collection procedures. It deals with the issues of planning for data analysis, model building and the data analysis process considering current developments in the field of modeling. It also deals with the issue of research reporting and evaluation, with contemporary ethical considerations in business research. May be offered face to face or up to 100% online.

RESM 872 Dissertation I **

Credits – 3

This is the first of two required courses of dissertation writing and was designed to help the student to produce a research proposal. This research proposal must have at least three (3) chapters as follows: Problem statement, Literature review and Methodology. This proposal should be the input for the second dissertation course. May be offered face to face or up to 100% online.

RESM 873 Continuation of Dissertation I ***

Credits – 3

This is the continuation of the first of two required courses of dissertation writing and was designed to help the student to produce a research proposal. This research proposal must have at least three (3) chapters as follows: Problem statement, Literature review and Methodology. This proposal, after approval by the Dissertation Proposal Committee, will be the input for the second dissertation course. The student has up to a maximum of three (3) attempts, any exceptions must be discussed with the School Dean. May be offered face to face or up to 100% online.

RESM 874 Dissertation II **

Credits – 3

This is the second of the two required courses of dissertation writing and was designed to help the student to produce the dissertation. This document must be the result of the research developed by the student and must comply with the requirements established in the Dissertation Manual of the School. This course should finish with the oral defense of the dissertation made by the student. May be offered face to face or up to 100% online.

RESM 875 Continuation of Dissertation II ***

Credits – 3

This course was designed to allow the student to continue the process of producing the dissertation. This document must be the result of the research developed by the students and must comply with the requirements established in the Dissertation Manual of the School. The course ends with the oral defense of the dissertation. May be offered face to face or up to 100% online.

SCIE 111 Integrated Sciences I

Credits – 3

This course integrates concepts from the different areas of science applying the scientific method. The relationship between science and technology is established. The origin and development of the Universe is studied the planet Earth, and the origin and evolution of the organisms. The concepts of matter and energy applied to systems are studied. The sources and uses of energy and their impact on the environment are described, incorporating real life situations. May be offered face to face or up to 100% online.

SCIE 112 Integrated Sciences II

Credits – 3

This course integrates different science concepts through the scientific method. They will study the origin and evolution of organisms, the interaction among them, with the environment and the importance of conservation of the environment and biodiversity. They will study the human body as a system- emphasizing human and public health, nutrition and sexuality. Finally, the interdisciplinary field of modern biotechnology is studied, considering its variety of applications and contributions. May be offered face to face or up to 100% online.

SOCI 203 Sociology Principles (Compendium)

Credits – 3

Topics include social organization, cultural phenomena, and socialization. Basic institutions, social deviation, stratification, social mobility, social and cultural change will also be discussed. May be offered face to face or up to 100% online.

SOCI 203-O Principles of Sociology/Survey Course**Credits – 3**

This is a survey course on principles of sociology. It focuses on the study of the theories of groups, institutions, and society. Analysis of social organization and social problems is integrated in the course. May be offered face to face or up to 100% online.

SOCI 325 Social of Deviance**Credits – 3**

Theories of social deviance. The role of social and cultural values in the definition of deviant behavior. Emphasizes the influence of traditional and modern society in deviant behavior. May be offered face to face or up to 100% online.

SOCI 325-O Sociology of Deviancy**Credits – 3**

Study of sociological theories explaining deviant behavior. Special attention will be given to the role of cultural values and norms in the definition of deviant behavior. Pathological aspects such as poverty, family disorganization, overpopulation, prostitution, and alcoholism are studied. May be offered face to face or up to 100% online.

SOCI 358 Social Problems**Credits – 3**

The course deals with social problems in contemporary world. Historical perspective on the problems, their causes, public and private problem-solving policies will be discussed. Topics include demographic problems, poverty, educational deprivation, crime, drugs and alcohol and the problems of world-wide. May be offered face to face or up to 100% online.

SOCI 358-O Social Problems of the Hispanic Community in United States**Credits – 3**

The course deals with social problems in contemporary United States. Historical perspective on the problems, their causes, public and private problem-solving policies will be discussed. Topics include demographic problems, poverty, educational deprivation, crime, drugs and alcohol and the problems of victims in United States. May be offered face to face or up to 100% online.

SOSC 101 Introduction to Social Sciences I**Credits – 3**

Course offers introductory view of general principles and fundamentals of the social sciences, specifically anthropology, sociology and psychology. By way of a guided use of the scientific method, social dynamics are scrutinized with attention to the role and effect of cultural, class, gender, race and ethnic differences as well as that of globalization in the contemporary world. May be offered face to face or up to 100% online.

SOSC 102 Introduction to Social Sciences II**Credits – 3**

This is the follow up to the introduction to the social sciences course, focusing on political science, economics and demography. This course analyzes the manners in which political systems obtain, maintain and lose power; the shifts and changes in world population; the effects of a globalized economy in the United States and abroad. Particular attention is placed on important variables such as cultural diversity, social class, gender, race and ethnicity. May be offered face to face or up to 100% online.

SOSC 103 Introduction to Social Sciences (Compendium)

Credits – 3

The course consists of a compendium of the general principles and foundations of the Social Sciences as scientific disciplines. The course specifically studies basic concepts in the fields of anthropology, sociology, economics, and political science, and considers their significance in the analysis of social problems. The course themes are approached from both the global and local perspectives. May be offered face to face or up to 100% online.

SOSC 111 Individual, Community, Government, and Social Responsibility I

Credits – 3

This course focuses on the study of the civic, social, cultural and psychological elements of the individual in our society. Topics are stated in the context of the personal, interpersonal and social dimensions. May be offered face to face or up to 100% online.

SOSC 112 Individual, Community, Government, and Social Responsibility II

Credits – 3

This course focuses on the study of the civic, social, cultural, and psychological elements of the individual in our society. The course emphasizes in the personal, interpersonal, and social dimensions of human behavior and social responsibility. May be offered face to face or up to 100% online.

SOSC 258 Research Techniques in Social Sciences

Credits – 3

Introduces the learner to the application of all scientific techniques for research and investigation in the social sciences. Places emphasis on basic procedures for gathering data, establishing the problem and hypothesis, analyzing, interpreting, and applying findings. May be offered face to face or up to 100% online.

SOSC 303 Applied Statistical Methods for Social Sciences

Credits – 3

The Applied Statistical Methods for Social Sciences is an introductory course to statistical methodology applicable to the field of Social Sciences. It provides an overview of descriptive and inferential statistics of greatest relevance to the field of social services. May be offered face to face or up to 100% online.

SOSC 320 Social Research Techniques I

Credits – 3

The course deals with research methods and techniques for the Social Sciences. May be offered face to face or up to 100% online.

SPAN 101 Introducción a la Lengua Española I

Credits – 3

Study and use of the Spanish language in its oral and written form. Frame of reference: Basic concepts such as reading comprehension, writing, literary analysis and grammatical theories. It emphasizes the

analysis of readings, the writing and execution of grammar exercises in situations, models and strategies based on critical and reflective analysis and creative activities. May be offered face to face or up to 100% online. May be offered face to face or up to 100% online.

SPAN 103 Introduction to Spanish Language I

Credits – 3

Study and introduction to linguistics. The course emphasizes the acquisition of oral and written expression skills through oratory, reading analysis, and text writing. May be offered face to face or up to 100% online. May be offered face to face or up to 100% online. Contact hours: 45

SPAN 101-102 Introduction to Spanish Language - Basic Level

Credits – 6

Study and use of the Spanish language in its oral and written form. Frame of reference: Basic concepts such as reading comprehension, writing, literary analysis, and grammatical theories. It emphasizes the analysis of readings, the writing and execution of grammar exercises in situations, models and strategies based on critical and reflective analysis and creative activities. May be offered face to face or up to 100% online.

SPAN 103-104 Introduction to Spanish Language – Intermediate

Credits – 6

Introduction to linguistics. The historical evolution of the Spanish language. Grammar review, vocabulary enrichment and written communication. Latin American Literature. May be offered face to face or up to 100% online.

SPAN 105-106 Introduction to Spanish Language – Advanced Level

Credits – 6

Study of written communication. Readings of masterpieces of Hispanic literature. Emphasis on techniques of literary criticism and research. May be offered face to face or up to 100% online. May be offered face to face or up to 100% online.

SPAN 110 Elementary Spanish

Credits – 3

It is a basic language class designed for students who enter with no previous knowledge of Spanish. This course is taught with a communicative-based methodology (task-based oriented). The course introduces basic grammatical or vocabulary knowledge and engages students in the practice of the four language skills (listening, reading, writing, speaking) and provides the student with exposure to the target language and culture in different Spanish-speaking countries and/or situations. Critical thinking activities. CMC (Computer-mediated Communication) activities. 15 hours of writing lab. May be offered face to face or up to 100% online.

SPAN 111 Elementary Spanish

Credits – 4

It is a basic language class designed for students who enter with no previous knowledge of Spanish. This course is taught with a communicative-based methodology (task-based oriented). The course introduces basic grammatical or vocabulary knowledge and engages students in the practice of the four language skills (listening, reading, writing, speaking) and provides the student with exposure to the target language and culture in different Spanish-speaking countries and/or situations. Critical thinking activities.

CMC (Computer-mediated Communication) activities. 15 hours of writing lab. May be offered face to face or up to 100% online.

SPAN 115 Reading, Writing and Oral Communication in Spanish I

Credits – 4

This course covers the phases of the writing process, with special emphasis on the structure of writing argumentative/persuasive academic papers. In addition, it focuses on the conventions of paragraph construction, content, organization, vocabulary, and syntax of academic writing. It also aims to prepare students to respond to academic writing demands while focusing on critical reading and incorporating the material they collect as a source for their reading. The student will use their field of study as a context when carrying out most written activities. Research projects will be developed through the responsible use of technology by individual, and group work activities. All course assignments and activities are delivered in the context of topics from the degree programs the students represent. This course requires the use of E- Lab and/or the Language Lab guided by the course Spanish faculty. May be offered face to face or up to 100% online.

SPAN 116 Reading, Writing and Oral Communication in Spanish II

Credits – 4

This course aims for students to develop their oral communication skills in Spanish to the maximum. In addition, it focuses on the study of strategies and trends in public speaking, with topics ranging from effective writing and the use of technology to good practices when presenting; this provides a useful framework for them to apply the knowledge to their professional and academic reality. The course is developed through analysis, process refinement, writing exercises, and constant practice, while promoting the use of technology and trends when presenting. Research projects will be developed through the responsible use of technology by individual, pair, and group work activities. All course assignments and activities are delivered in the context of topics from the degree programs the students represent. This course requires the use of E- Lab and/or the Language Lab guided by the course Spanish faculty. May be offered face to face or up to 100% online.

SPAN 215 Writing and Composition

Credits – 3

Develops proficiency in the practical use of written language; current idiomatic Spanish. Provides practice in the more complex problems of sentence structure and usage and in theme writing and analysis. May be offered face to face or up to 100% online.

SPAN 255 Spanish for Writing and Research

Credits – 4

This highest-level Spanish course focuses on the strengthening of Spanish language skills; allows the adult learner to further develop his/her linguistic skills, technical writing, and oral expression, in order to reach the highest and most effective professional level of communication. The learner will perfect the art of writing technical reports, essays, and conduct research relevant to his/her academic subject area. Finally, the resources and practical exercises found in the Language Lab/E-Lab are essential to this course. This language lab component has been placed in order to support students as they prepare to become bilingual and competent individuals in both their professional and personal lives. This course requires the use of the Language Lab/E-Lab and all its resources, guided and supported by all Spanish faculty members. May be offered face to face or up to 100% online.

SPED 210B Survey of Exceptionalities: The Inclusive Classroom**Credits – 3**

An overview of differences associated with varying exceptionalities as defined under the Individuals with Disabilities Education Improvement Act (IDEIA). Review of professional issues, legal and ethical considerations and best practices in instruction, detection, and programming for culturally and linguistically diverse students with exceptionalities. 10 hours of Field Experience required. May be offered face to face or up to 100% online.

SPED 315 Teaching Exceptional Children**Credits – 3**

This is an introductory course in special education. It includes the analysis of social, emotional and educational needs of children with exceptional qualities, diagnostic, educational and rehabilitation services, family, community attitudes and civil rights. It emphasizes the educational needs and learning styles of exceptional children: teaching, methods, techniques and inclusion process. It also includes the analysis of the assistive technology used for the different needs of exceptional children. May be offered face to face or up to 100% online.

STAT 201 Introduction to Business Statistics**Credits – 3**

Study of central tendency and dispersion measurements, sampling methods, probability theory, binomial probability distribution, normal density probability function and lineal regression. May be offered face to face or up to 100% online.

STAT 300 Elements of Statistics I**Credits – 3**

The course deals with statistics for the social sciences student. It includes sampling, averages, mode, median, probability and others. May be offered face to face or up to 100% online.

STAT 301 Elements of Statistics II**Credits – 3**

The course deals with statistics as applied to psychology, economics, and other social sciences. Topics include probability and probability curves, games and variance, random variables, statistical inference, nonparametric tests, and correlation coefficient. Experimental design, Baye's Formula, and decision-making theory will be discussed. Multivariable and bi-variable lineal analysis will also be presented. May be offered face to face or up to 100% online.

STAT 556 Applied Managerial Statistics**Credits – 3**

Business decision problems can be characterized as situations in which managers must select the best alternative from several competing alternatives. Managers frequently rely on results from statistical analyses to help make the best decision. The decision-aiding tools that can be applied by managers to gain insight into decision problems range from simple graphic displays of data to sophisticated statistical tests. Students use real-world data sets and PC-based software to describe sets of measurements, construct probability distributions, estimate numerical descriptive measures, and build multiple regression models. May be offered face to face or up to 100% online.

STMG 600 Leadership and Entrepreneurial Vision

Credits – 3

Analysis of roles and styles of a leader as an agent of change through the articulation and construction of the organization's vision and mission. The course includes theoretical and analytical studies of types of leadership strategies, leadership styles and organizational context in which the leader works. Human resources strategies for empowerment and their impact on the organizational culture are also explored — application of theoretical knowledge about an individual, interpersonal and group behavior within the organization. The course addresses the study of leadership and organizational behavior in a continuously changing global environment. May be offered face to face or up to 100% online.

STMG 601 Strategic Management**Credits – 3**

Analysis and application of concepts such as ethics and social responsibility. Evaluation and application of elements related to identifying opportunities and analysis of business strengths and weaknesses. The emphasis on the application of the vision, mission, goals, and objectives for the development of strategies in the planning process. Development of a strategic plan that includes identification and evaluation of alternatives for its control. This course is targeted at the development and application of analytical skills related to strategic planning. May be offered face to face or up to 100% online.

STMG 602 Technological Applications and Information Systems**Credits – 3**

The course develops strategic management skills in entrepreneurial leaders for the operational integration of different information resources. It allows for the identification, analysis, and evaluation of alternatives for the improvement of the organizations' effectiveness. The course also emphasizes the importance of technology for strategic planning and problem-solving. This course focuses on the development and application of the knowledge and skills needed to understand, evaluate, and make decisions related to information systems. May be offered face to face or up to 100% online.

STMG 603 Entrepreneurial Communication**Credits – 3**

This course develops the needed communication skills for the efficient, effective, and successful performance of the modern leader. It emphasizes the relationship between effective leadership and communication, its role, both internally and externally. Also included are the types of communication in the organization, reinforcing with the critical use of various techniques and the integration of technologies that support the management process of the effective leader. This course analyzes the responsibilities and tasks inherent in properly informing management decisions, how to handle communication in times of crisis and the expectations and tendencies of the leader as a communicator. It also emphasizes the support provided by the leader in the processes of changes and challenges of communication and the leader in the entrepreneurial dynamics. May be offered face to face or up to 100% online.

STMG 604 Organizations in a Global Economy**Credits – 3**

This course studies the opportunities that global economy offers to management. Analyze economic principles based on problem examination and the challenges presented in a globalized economy. It includes decision making on financial, economic, and stock market issues. This course evaluates strategic opportunities and risks regarding organizational development in the global context. May be offered face to face or up to 100% online.

STMG 608 Strategies for Change, Professional and Entrepreneurial Development**Credits – 3**

Strategic analysis of topics in the areas of power relations and resistance to change, motivation, and human behavior. Tolerance and respect for diversity and group dynamics. Evaluation and design of strategies for the development of a world-class organizational culture. The emphasis in environmental and structural forces within the organization. Appraises the different variables related to the organizational capacity for managing change and the development of plans and strategies. May be offered face to face or up to 100% online.

STMG 738 Management and Strategic Leadership Seminar**Credits – 3**

This seminar is designed to develop in the students the concepts and skills related with the business administration practices driven by a strategic leadership focus. The seminar will allow the integration of subjects like: leadership, entrepreneurial vision, strategic management, technology application for decision making, changing organizations and challenges for enterprises in a global economy. The development of this research as a course requirement will allow students to apply all their business management knowledge acquired. Will also, prepare them to contribute with practical and real solutions through the strategic negotiation theories' research techniques and fundamental principles. May be offered face to face or up to 100% online.

SWGR 504 Social Policy Analysis**Credits – 3**

This course consists of a systematic analysis of the development of the social policies that impact the Social Work field, nationally, internationally and globally. It promotes a critical analysis of the political, social, cultural and economic contexts that influence these policies. It supports the acquisition of theoretical and practical knowledge of the design, implementation and evaluation processes of social welfare policies. The course encourages the use of practice-based research to achieve positive action towards the goal of social justice and equality. May be offered face to face or up to 100% online.

SWGR 505 Human Diversity and Social Justice**Credits – 3**

This course is directed to the study of human diversity and to promote cultural competence among advanced social work students. Students will analyze and evaluate the concepts of human diversity, discrimination, oppression, economic and social inequalities and social justice. Racism, sexism, heterosexism, homophobia, religious fundamentalism, ethnocentrism, classism, ageism and disability status are examined. Strategies are discussed and applied to mitigate the social injustices that affect society. Students will develop self-awareness of their own social and cultural identities and how it affects their professional relationship with participants. May be offered face to face or up to 100% online.

SWGR 506 Social Work with Individuals and Families**Credits – 3**

An introductory course that presents the historical and theoretical foundation of Social Work, its values, and the skills required to serve and work with individuals and families. It promotes a critical analysis and evaluation of the principal models that explain the person's functionality within the environment from a bio-psycho-social perspective. Analyses the Social Worker's role and instill in the students the commitment to work with diverse populations. It allows the development of knowledge of the specific models of intervention. Systemic elements are discussed such as injustice, inequality, racism, discrimination and violence, and their impact on individuals and families. The course explores the

different codes of ethics that guide social workers and the legal considerations inherent in the profession. It, also, introduces students to the importance of conducting practice based on research evidence and conducting research on professional interventions and practice. May be offered face to face or up to 100% online.

SWGR 507 Social Work with Groups and Communities

Credits – 3

The course explores the process of formation, maintenance, and evolution of groups, communities, and organizations as social entities from a Social Work perspective. Attention is given to the unique structural characteristics that make up these entities and their roles in the promotion of systemic and structural changes that advance justice and equality. The course addresses the theoretical framework and develops the professional competence to work with groups, communities, and organizations. It also examines the socio-economic, political, and cultural aspects as well as the role of minorities in the group, community, and organizational processes. The focus is placed on the social worker's commitment with social justice, equality and respect for human rights in order to maximize the opportunity of oppressed and alienated groups to participate in the social life and economy. It emphasizes the ethical and legal responsibility of the professional social worker towards these populations. May be offered face to face or up to 100% online.

SWGR 510 Research Design

Credits – 3

This course deals with the methodology of designing scientific social research. It discusses quantitative and qualitative concepts and procedures applying them to the practice of social work. The topics include research development, theoretical approaches, ethics in research, and elements of diversity in the investigation, the discussion comparison and application of quantitative and qualitative designs, samplings, the elaboration of research tools and data and information gathering. It facilitates skill development and fundamental knowledge for the design and completion of research in social work. May be offered face to face or up to 100% online.

SWGR 511 Research Analysis

Credits – 3

This is the second part of the 6 credits course centralized in the scientific, social investigation in Social Work. It deepens the elements of quantitative and qualitative data analysis as well as the preparation of reports with analyzed data and their conclusions. Among the topics are the techniques for data gathering, validation criteria, reliability and quality in research, data processing and presentation, and the use of programs for quantitative and qualitative analysis. Importance of protection of human subjects and diversity in populations is discussed. May be offered face to face or up to 100% online.

SWGR 555 Social Work with Seminar and Field Practicum I

Credits – 6

The course corresponds to the foundation component of supervised social work generalist practice at the graduate level. It provides training experience in direct service and intensive supervision focused on the importance of acquiring generalist intervention skills with individuals, groups, families, communities, and organizations. It is expected that students can consolidate their education at this level based on the foundation of social work given the systemic multiplicity, diversity, equity, welfare and social justice of the client system. In the early stages of the course the social workers in training, within their practice scenario, should analyze, contrast and evaluate individual idiosyncrasy versus the professional role and how to harmonize them, considering the ethical and legal issues which frame their execution. The course

encourages students to achieve mastery of the practice scenario, applying their understanding of the services' philosophies, institutional policies and procedures, applying intervention skills under the generalist model, evaluating the relationship of human behavior and their environment from an ecosystems perspective. In addition, the course allows for the integration of social research conducted by students in the practice scenario and in the practice seminar in social work. At Clinical/Practicum site.

SWGR 601 Theories and Models of Human Development and Behavior I

Credits – 3

This is the first of two courses that introduce students to models and theories of human behavior and development. This course covers the early span of development, from conception through adolescence. Students are required to critically analyze the implications of these models for a diverse society. The most recent research and its application to the diverse populations served by the field of Social Work are examined. May be offered face to face or up to 100% online.

SWGR 602 Clinical Intervention I

Credits – 3

This course is part of an advanced component of the curricular model. This is intended to aid the students, therapeutic skills in the context of clinical social work based on the theoretical and practical components aimed at intervention with individuals, families, couples, and groups. The approach is aimed at the development of skills through analysis and application of established models, therapeutic techniques, treatment plans and also by identification and precise diagnosis of mental disorders as described in the Diagnostic and Statistical Manual of Mental Disorders. Several aspects that relate to the environmental and psychosocial functioning in which humans operate are also considered. Moreover, analysis of the clinical interventions, strategies, various roles of the social work professionals, their functions, activities as well as personal traits or qualities necessary to facilitate the process, are also taken into consideration. Similarly, with the learning of this course, it is intended that students develop necessary the skills to identify the strengths and the importance of prevention and promotion r to achieve improved psychosocial functioning among individuals. Students are expected to follow social work ethics and practice within the human diversity and cultural context to identify the needs, problems, and concerns that require attention during clinical intervention. May be offered face to face or up to 100% online.

SWGR 606 Theories and Models of Human Development and Behavior II

Credits – 3

This is the second of two courses that introduce students to models and theories of human behavior and development. This course covers the later span of development, from young adulthood to death. Students are required to critically analyze the implications of these models for diverse society. The most recent research and its application to the diverse populations served by the field of Social Work are examined. May be offered face to face or up to 100% online.

SWGR 607 Clinical Intervention II

Credits – 3

This course is part of an advanced component of the curricular model. It's designed to continue developing in the student the clinical intervention skills required for the social work field. It also enables students to correctly identify the proper selection of the theoretical model and therapeutic intervention techniques considering the target population. It emphasizes on the analysis of various mental disorders and the situations presented by the participants with the purpose of enabling students to develop effective treatment plans. Provides attention to the discrimination that can occur when an individual is

diagnosed with a mental disorder, such as their needs and limitations to human services. Students are expected to further develop the skills in identifying needs, problems, and concerns that require attention during the clinical intervention. May be offered face to face or up to 100% online.

SWGR 608 Psychopathology, Human Behavior, and Social Environment

Credits – 3

The course examines the history of mental health, its sociocultural context and evaluation of different approaches to studying psychopathology. The student is expected to classify mental disorders, identify its causes, categories, symptoms, severity level, time and specific criteria for effective clinical diagnoses. It is important to analyze the factors that influence the development of mental conditions from a biological, psychological, social and spiritual perspective to a systemic and holistic approach. Likewise, the relationship between human behavior and social environment.

The course explores some of the most common mental conditions, their etiology, and prevalence, prevention and treatment methods according to the Diagnostic and Statistical Manual of Mental Disorders, as a diagnostic tool for the social worker. The student is directed to the evaluation of the functions, roles, and social responsibility as well as the contrast of the ethical and legal aspects of the social worker in clinical practice. May be offered face to face or up to 100% online.

SWGR 623 Drug and Substance Abuse

Credits – 3

This course will address current theories on the use, abuse, and chemical dependency of psychoactive drugs and alcohol. It also evaluates the social worker interventions with populations that face these addictions. The significance of drugs such as caffeine, nicotine, cocaine, opiates, hallucinogens, inhalants, marijuana, amphetamines, sedatives, and alcohol will be discussed according to their classification in the Diagnostic and Statistical Manual of Mental Disorders. On the other hand, theoretical intervention models with active populations will be identified in the use, abuse or dependency of psychoactive drugs and alcohol as well as rehabilitation and relapse prevention services. May be offered face to face or up to 100% online.

SWGR 655 Social Work with Seminar and Field Practicum II

Credits – 6

The course corresponds to the advanced curriculum in clinical social work. Allows students to contrast generalist social work and clinical social work and discusses values, ethical and legal issues in professional practice. It is expected that students develop clinical and therapeutic skills for the identification of psychosocial problems on the client system. From this perspective, students will demonstrate practice behaviors and skills in the clinical area to assess human behavior and its relationship with the social environment on the client system, for objective clinical analysis of the various situations presented. At this stage, it is expected that students, within the practice scenarios, should analyze, contrast and evaluate the intra-psychic world and ecosystem factors in the client system, in order to identify problems, diagnose, select models and therapeutic techniques to guide the design of clinical interventions. The course encourages students to achieve integration of evidence-based practices in the intervention with the client, and practice communication strategies with different professionals. In turn, students should reflect on their role and performance to identify strengths and limitations in the training process. In the seminar the students should evaluate the use of supervision and consultation in social work practice. At Clinical/Practicum site.

SWGR 665 Social Work with Seminar and Field Practicum III

Credits – 6

The course corresponds to the advanced curriculum in clinical social work. It provides students the opportunity to continue their development of advanced diagnostic skills, design, and implementation of therapeutic interventions with the client system. The course emphasizes effective utilization of the Diagnostic and Statistical Manual of Mental Disorders for the diagnosis of mental health conditions and the identification of psychosocial problems by the client system and clinical conceptualization, guided by the design and implementation of the treatment plan. From this perspective, students will demonstrate practice behaviors and skills in the clinical area to assess human behavior and its relationship with the social environment on the client system for objective clinical analysis of the various situations presented. During this course, it is expected that students integrate their knowledge, values, and skills expected for the advanced level in social work. The course is designed to strengthen professional identity and the commitment of the student to work with individuals and groups providing emphasis on intervention with families and couples, by applying appropriate models and therapeutic techniques. In addition, the course encourages students to achieve integration of evidence-based practices in the intervention with the client and to communicate with different professionals. Students must reflect on their role and performance to identify strengths and limitations in the training process. In the seminar, the students should evaluate the use of supervision and consultation in social work practice. At Clinical/Practicum site.

SWGR 670 Comprehensive Exam (1st Part)

Credits – 0

The comprehensive exam 1st part is an individual exercise course covering the master's degree core professional courses, these are: SWGR 504, SWGR 505, SWGR 506, SWGR 507, SWGR 510, SWGR 601, SWGR 606 and SWGR 555. The exam is divided into three areas: a) research, b) professional foundation and c) generalist practice. May be offered face to face or up to 100% online.

SWGR 671 Comprehensive Exam (2nd Part)

Credits – 0

The comprehensive exam 2nd part is an individual exercise course covering the master's degree Specialization courses; these are SWGR 511, SWGR 602, SWGR 607, SWGR 655 and SWGR 665. The exam is divided into three areas: a) research, b) clinical specialization and c) advanced practice. May be offered face to face or up to 100% online.

SWGR 801 Philosophical Foundations of Social Work

Credits – 3

This course focuses on the analysis of the epistemological, ontological, and ethical bases of Social Work. This course pretends to develop the knowledge, understanding, and application of the epistemological, ontological, and ethical grounds of Social Work, underlying its nature as an applied social science guided by the promotion of social justice in different social and economic environments. Accordingly, the course will assess the various conceptions of and aims of Social Work regarding the constant challenges post by modern and contemporary social history. May be offered face to face or up to 100% online.

SWGR 802 Justice and Social Policy

Credits – 3

This course will assess the evolution of the concept of Social Justice and its various historical meanings according to the different economic, cultural, political, and ideological contexts within which it is assumed. The course will critically analyze the importance of Social Justice as a guiding principle of Social Work in society, as well as a fundamental constitutive element of the XXI century ethics for social workers. May be offered face to face or up to 100% online.

SWGR 803 Social Policy and Organizational Behavior in North and Latin America**Credits – 3**

This course addresses the various theoretical models for the analysis of social policies and organizational behavior, and how those models respond and their impact upon the different social, economic and political orders. Case studies are examined in order to understand the scope and limits of the diverse models and to enable a serious consideration about the applicability of the social policy theories. May be offered face to face or up to 100% online.

SWGR 804 Social Work Theory and Practice: Programs Administration and Social Policy**Credits – 3**

During this doctoral course, we will promote critical and in-depth analysis of the different models used throughout the history of public and social administration in the West. Special attention will be placed upon the insertion of the Social Work perspective in the evolution of the social policy administration. In addition, the course will promote, among the registered doctoral students, the development of the essential administrative skills and knowledge that can allow them to become qualified administrators of social policy programs in the present world. May be offered face to face or up to 100% online.

SWGR 811 Epistemology in Social Work Research**Credits – 3**

This course addresses the epistemological considerations underneath research designs in the Social Sciences and in Social Work. Throughout the course we will examine the theoretical grounds of social knowledge and their implications upon contemporary methodological controversies and ethical issues related to the research on Social Policies. Finally, the seminar will assess the various ways in which the particular nature of social work research might help to acquire the knowledge required for the promotion of Social Justice. May be offered face to face or up to 100% online.

SWGR 812 Social Work Quantitative Research**Credits – 3**

Throughout this course, we will study the general aspects related to the scope and limits of quantitative methods in the Social Sciences and in Social Work. Also, we will conduct in depth analysis of the more relevant quantitative strategies for the analysis of Social Policies, including the full knowledge of the conceptual considerations and the mechanics related to the application of the corresponding mathematical and statistical procedures. May be offered face to face or up to 100% online.

SWGR 813 Social Work Qualitative and Mixed Methods Research**Credits – 3**

Emphasis on promoting qualitative research as a strategy for the production of knowledge related to the Social Work practice and the conceptualization, implementation, and evaluation of social policy. Analysis and advanced application of qualitative and mixed methods for the creation of social policy, legislation and social programs that respond to the needs of diverse populations. Exposure to available technology for the collection and analysis of qualitative data (NVIVO and others).

Throughout this course, we will study the general aspects related to the scope and limits of qualitative and mixed methods in the Social Sciences and in Social Work. Also, we will conduct in depth analysis of the more relevant qualitative strategies for the analysis of Social Policies. The course will emphasize on the conceptual considerations that enable the social work student to integrate the various research strategies in complementary fashion. At the same time, the course will underline the importance of individual and intersubjective narratives in the analysis of social policies. May be offered face to face or up to 100% online.

SWGR 820 Social Services Management**Credits – 3**

Throughout the course development, the philosophy, basic and theoretical principles, processes, and practices of administration and supervision will be studied. The student will have a progressive approach to the process of administration and supervision, through the development of activities that allow appreciation of all the stages of such a process. Lastly, it highlights the importance of the administration and supervision process within the organizational context, as well as the role of the Social Worker as an executive leader in the position of manager who provides effective social services. May be offered face to face or up to 100% online.

SWGR 821 Human Resources Management**Credits – 3**

This course examines the importance of human resources in organizational development. Includes the study of planning in the administration of human resources, which allows selecting, training, and retaining competent personnel for the growth, development, and success of the organization. The topics of discussion are human resources law, selection and hiring process, effective supervision, conflict management, performance evaluation, professional development plan, and collective bargaining. May be offered face to face or up to 100% online.

SWGR 822 Management and Budgeting in Government and Social Organizations**Credits – 3**

The course covers the philosophical principles of fiscal administration applied to the government sector and service organizations. The study of the theories of public policy in its relationship with the budget administration of the public and private sector. It integrates the principles of budget admission of social work organizations. It analyzes the different ways of managing the budget from a government and private perspective. The administrative principles of public administration, the organizational culture, and policy of fiscal actions, and the different models of the government and fundraising budget are studied. It also addresses the study and analysis of budget management and administration models in other countries so that graduates of the doctoral program can acquire a broad knowledge from a global perspective. May be offered face to face or up to 100% online.

SWGR 823 Executive Leadership: Models and Strategies**Credits – 3**

This course is designed to expose students to the development and practice of identified leadership skills. A comprehensive study of the theory base for leadership, analysis of leadership and management processes, exploration of individual assets and liabilities of leaders, examination of leadership in groups. May be offered face to face or up to 100% online.

SWGR 830 Compendium for Social Work Practice with Individuals, Families, Groups and Communities**Credits – 3**

This course is designed to expose students from other disciplines to social work theory and practice with individuals, families, groups and communities. Emphasis is given to social work evidenced based practice. Study of the ethical, professional behaviors and competencies in social work practice. Exposure to the following topics: social justice, human rights, diversity, and differences in social work practice. Contemporary theoretical perspectives of social work and their contributions to a critical practice are addressed, specifically: evidence-based practice, anti-oppressive practice, post-structuralist, hermeneutic and Marxist currents. It studies the notion of professional projects and the ethical-political

dimension of the profession in the neoliberal context. Exposure to the ethical principles of social justice, equity, democracy, human rights, diversity and inclusion from critical approaches. Discusses the importance of social research for the profession and social policy. May be offered face to face or up to 100% online.

SWGR 831 Strategic Planning in Organizations and Community

Credits – 3

In this course, the students will explore the theory and practice of the Strategic Planning Paradigm. As a tool for social programs administration, the students can learn how to apply the strategic planning, like mission and vision statements, environmental scanning, identification of strengths and weakness, strategic policies, interventions, and others. May be offered face to face or up to 100% online.

SWGR 832 Social Programs Evaluation: Theory and Practice

Credits – 3

This course focuses on the examination of evaluation strategies, techniques, and models applicable to social programs. Study of the application of objectives to evaluation development of designs, systematic approaches to assessment, problems of implementation and accountability. The course allows students to analyze and design appropriate strategies for evaluating social programs. The course emphasizes applications in fieldwork settings. May be offered face to face or up to 100% online.

SWGR 839 Doctoral Dissertation I

Credits – 3

This course is part of the doctoral dissertation process and aims to develop, orally defend, and approve the doctoral dissertation proposal based on a review of recent scientific literature. The proposal will include Chapters I, II, and III of a dissertation in social work and will be supervised by the dissertation committee, previously selected in course SWGR 840. This committee will ensure ethical compliance and academic rigor. May be offered face to face or up to 100% online.

SWGR 840 Dissertation Seminar

Credits – 3

This course focuses on the formulation, discussion and approval of the doctoral dissertation proposal and the designation of the Doctoral Committee. Includes conceptualization of research and methodology. May be offered face to face or up to 100% online.

SWGR 842 Doctoral Dissertation II

Credits – 3

This course is aimed at the application of theoretical knowledge that underpins the practice of Social Work and the application of qualitative, quantitative, or mixed methods research methodology used by the Doctoral Program Students, to initiate the data analysis and the writing of their dissertation, with the changes recommended by the Director of Dissertation and Doctoral Committee. This course is aimed at obtaining a Ph.D. May be offered face to face or up to 100% online.

SWGR 843 Doctoral Dissertation Continuation

Credits – 3

This course is aimed at the application of theoretical knowledge that underpins the practice of Social Work and the application of qualitative, quantitative, or mixed methods research methodology used by the Doctoral Program Students to complete their dissertation, with the changes recommended by the Director of Dissertation and Doctoral Committee. At the end of the course, the student will present and

defend the dissertation, as part of the requirements for obtaining a Ph.D. degree. May be offered face to face or up to 100% online.

TCOM 500 Applied Mathematics in Telecommunications

Credits – 3

This course covers elementary discrete mathematics for computer science and engineering. It emphasizes mathematical definitions as well as applicable methods. Topics include formal logic notation; sets, functions, relations; elementary graph theory; Number theory; growth of functions; permutations and combinations, counting principles; discrete probability. Further selected topics may also be covered, such as state machines and invariants. May be offered face to face or up to 100% online.

TCOM 503 Introduction to TCP/IP

Credits – 3

The Internet is also one of the world's most powerful communication tools. This course will discuss and present the underlying applications, components and protocols of TCP/IP and its necessary link to the Internet. The Introduction to TCP/IP course will help participants learn how to identify TCP/IP layers, components and functions. Navigation tools, TCP/IP services and troubleshooting methodologies are also covered in this course. May be offered face to face or up to 100% online.

TCOM 511 Internet Technologies

Credits – 3

The Internet Technologies course begins with an overview of the Internet, its history, organization and structure. Once the general structure is understood, we look at different ways to access the Internet, both as an individual user and as a group of users. Areas such as copyrights issues, bandwidth considerations, portal development, practical research using the internet, FTP and electronic mail, HTML, web servers, graphics, scripts, tables, audio, video and security are covered. May be offered face to face or up to 100% online.

TCOM 512 Introduction to Networks

Credits – 3

This course introduces participants to the key concepts of data communications, telecommunications, networking, technologies, components, and protocols used in local area networking (LAN) and wide area networking (WAN) environments. Students will learn about the popular LAN protocols of Ethernet, Token Ring, and asynchronous transfer mode (ATM), with emphasis on all speeds of Ethernet. This course also introduces the most widely used network operating systems. May be offered face to face or up to 100% online.

TCOM 513 Information Technology (IT) Project Management

Credits – 3

Information Technology (IT) Projects are major organizational investments. In today's Global Economy the level of success of these projects is paramount to Enterprise Sustainability and continued business. This class will concentrate on providing not only the basic PM skills but will concentrate on the particular techniques designed for technology-based projects, ITPM. It will discuss and explain PMBOK techniques (Project Management Body of Knowledge), the ITPM cycle, tools and processes, scope definition, verification and control. ITPM estimation techniques, risk management, analysis, assessment, monitor and control methods will be covered also. Implementation, closure and evaluation techniques specifics for ITPM projects will also be presented and discussed. May be offered face to face or up to 100% online.

TCOM 514 Telecommunications Governance I**Credits – 3**

IT governance is an integral part of the business and an integral part of corporate governance. IT governance consists of the leadership, organizational structures and processes that ensure that the organization's IT sustains and extends the organization strategies and objectives. The key goal of technology governance is enterprise sustainability. This series of two courses will cover the framework elements, areas of focus, risk management, strategic alignment, performance measures, IT value delivery and resource management in the design of an effective IT governance plan and strategy. This first course will focus on the basics of IT governance including the legal framework, global standards and considerations, governance archetypes and will study practical cases in various organization types. May be offered face to face or up to 100% online.

TCOM 515 Telecommunications Governance II**Credits – 3**

IT governance is an integral part of the business and an integral part of corporate governance. Its governance consists of the leadership, organizational structures and processes that ensure that the organization's IT sustains and extends the organization strategies and objectives. The key goal of technology governance is enterprise sustainability. This series of two courses will cover the framework elements, areas of focus, risk management, strategic alignment, performance measurements, IT value delivery and resource management in the design of an effective IT governance plan and strategy. This second course will focus on the mechanisms for implementing IT governance, linking strategies and performance, leadership principles, business intelligence, real time business intelligence, and changing landscape of the telecommunications industry. Multiple cases will be presented, and the students will create a BI based strategy and roadmap. May be offered face to face or up to 100% online.

TCOM 521 Networking Fundamentals**Credits – 3**

This course introduces participants to the key concepts of data communications, telecommunications, networking, technologies, components, and protocols used in local area networking (LAN) and wide area networking (WAN) environments. Students will learn about the popular LAN protocols of Ethernet, Token Ring, and asynchronous transfer mode (ATM), with emphasis on all speeds of Ethernet. This course also introduces the most widely used network operating systems. Basic network design and security concepts are discussed. May be offered face to face or up to 100% online.

TCOM 522 Telecommunications Management and Policy**Credits – 3**

This course presents and discusses the most relevant aspects of the telecommunications sector from policy, business, and technology perspectives. It presents and studies the driving forces behind the changes in the telecommunications policy and the significant impact of legal and regulatory changes on business operation. It focuses on the globalized enterprise challenges, opportunities, and threats. Such key issues as the global economy and its impact on information and communications technologies (ICT's), enterprise strategy and telecommunications, standards, ISO's and good practices, challenges and risk involved in information and telecommunications management are thoroughly covered. The role of ICT's in innovation, value creation, and global strategic positioning are also presented through actual cases. May be offered face to face or up to 100% online.

TCOM 523 Wireless Networks**Credits – 3**

This course covers fundamental concepts related to wireless networks including wireless channel characteristics, wireless data transmission, multiple access protocols, error control, wireless standards, and cellular concepts and resource allocation. It provides a broad understanding of modern wireless networks, in particular local area networks and cellular networks. Students are exposed to design and analyze concepts that are essential in the development of wireless networks. May be offered face to face or up to 100% online.

TCOM 524 Technological & Scientific Innovation

Credits – 3

Innovation; practical creativity; effective creative scientific thinking methods and procedures; new ideas development are all key elements of a successful scientist. This course will introduce and cover the scientific methods used in innovation and creative thinking. Will introduce innovation from the standpoint of the modern school of innovation scholars such as, Schumpeter, Eric Rogers, Von Hippel, Altshuller (the engineer that created TRIZ or theory of inventive problem-solving), Alex Osborn, Robert Sternberg and others. Will cover innovation toolkits such as Altshuller's innovation pyramid, Burgelman and Seigel's minimum winning game, Osborn and Parnes' creative problem-solving (CPS), Altshuller's TRIZ, Amabile's internal and external motivation, Guilford's convergent and divergent thinking and Ries' build-measure-learn wheel. Will also cover Christensen's disruptive innovation process, Usher's path of cumulative synthesis, Van de Ven's leadership rhythms, d.school's design thinking modes, Henderson and Clark's four types of innovations, Rogers' adoption and diffusion curve, Abernathy and Utterback's three phases of innovations, Chesbrough's open innovation, March's exploration vs exploitation, Powell and Grodal's networks for innovation and Boyd's OODA loop. May be offered face to face or up to 100% online.

TCOM 556 IP Tel & Design and Configuration of Voice Networks

Credits – 3

This course explains the structure and design of telecommunication networks, both large and small. It begins with an overview of the public telephone network and describes the large networks and transmission facilities that switch telephone calls. Presents and explains the many and varied techniques, solutions, principles, and challenges both carriers and end users develop, experience, and overcome in implementing Voice-over IP services. Then it focusses the PBX switching systems that are essential to most businesses. May be offered face to face or up to 100% online.

TCOM 606 Network Design Project

Credits – 3

Development, analysis, simulation and implementation of a significant design project related to the area of Computer Networks. Discussion of design constraints and manufacturing cost, compatibility with the environment, aesthetics, safety, possible social, political, or ethical implications. Development of a prototype including discussion of the design cycle and experimental verification or simulations. A detailed written report and final presentation are required. May be offered face to face or up to 100% online.

TCOM 609 Thesis

Credits – 3

This course aims to establish the relationship and working environment between the student and thesis advisor. The course studies the principles and methods, techniques of scientific investigation, and proper academic writing. At the end of the course, the student will have a written thesis proposal. May be offered face to face or up to 100% online.

TESL 223 Applied Linguistics in ESOL**Credits – 3**

Language educators need a well-grounded background in the area of language study in order to meet the diverse and specialized needs of their students. This course is designed to provide students with the essential basis on which they can build future studies of language learning and teaching. It examines major areas of linguistics (e.g., phonetics, phonology, syntax, semantics, and sociolinguistics) and focus on various aspects of language structure and use. May be offered face to face or up to 100% online.

TESL 310 Language Development: English Learners**Credits – 3**

Study of second language development including the developmental stages and acquisition processes for reading and writing in students first (L1) and second language (L2). Language variety with an emphasis on social and cultural contexts and the successful development of multilingualism in families, communities, and schools. May be offered face to face or up to 100% online.

TESL 315 Teaching and Learning of English Learners in the Classroom**Credits – 3**

Current approaches to second language acquisition and instruction; methodology of teaching and testing English Learners (EL); design, implementation and evaluation of EL programs and materials. Analysis of language contact in society including code switching, language varieties and multilingualism. 20 hours of Field Experience required. May be offered face to face or up to 100% online.

TESL 522 Theory and Practice of Teaching ESOL Students in Schools**Credits – 3**

The above course examines the various methods for teaching a second language, as well as its principles & foundations. It reviews the evaluation, design and adaptation of materials for teaching English as a second language. May be offered face to face or up to 100% online.

THMC 100 Massage Introduction**Credits – 3**

This is an introductory course that offers students theoretical knowledge about the history and origins of massage therapy. Studies the professional, ethical, legal, hygiene, cleaning and sterilization techniques, and security aspects in the massage room, types of clients, basic massage theory and techniques, with the preparation of the therapeutic environment. It also covers equipment and products mostly used, with their general effects and contraindications. Includes concepts of OSHA in the profession. May be offered face to face or up to 50% online. Contact hours: 45

THMC 102 Massage Therapy I**Credits – 3**

This course provides students with the basic techniques in therapeutic massage. Includes the study of massage techniques, including their effects, benefits, indications and contraindications in the anatomy and physiology of body structures. It is considered as a general introduction to the theory, history and practice of massage. The student will be able to fully perform the basic concepts and manipulations of massage, and at the same time demonstrate such concepts and skills in the classroom. Also, will enable students to learn the theory and practice of Hydrotherapy modalities using various applications of water for the purpose of therapy and rehabilitation. Students will learn and practice the correct use of contrast therapy, ice packs, hot packs, herbal wraps, and other related techniques. Offered on-site only. Contact hours: 45

THMC 103 – Essential Science for Massage Therapist**Credits – 2**

The Essential Science for Massage Therapist course gives the future massage therapist an in-depth point of view of the need-to-know anatomy and physiology for therapists to develop clinical critical thinking skills. By developing critical thinking skills with applied anatomy, the future therapist will be able to custom tailor a massage treatment according to specific client needs because there is seldom only one correct way to do anything. Essential science will cover many topics, such as the facial system, musculature system, skeletal system, and innervation. This course has also included indications and contraindications as a continuation of practice from other courses. This course has been designed to address various learning approaches to massage students. May be offered face to face or up to 50% online. Contact hours: 30

THMC 105 Clinical Pathology**Credits – 3**

Introduction to the study of diseases and how conditions affect the anatomy and physiology of the human body. The student will learn to recognize specific diseases, and health conditions through observation and the use of different diagnostic sources, to determine the appropriate massage treatment or further referral to other specialists, when necessary. This includes HIV/AIDS education, how the immune system works, how these infections are spread, identified, controlled and how it is affected by HIV/AIDS among other diseases. Offered on-site only. Contact hours: 45

THMC 108 Massage Therapy II**Credits – 3**

Review of the anatomy and physiology of the musculoskeletal system and its implications on the therapeutic massage. Includes the theoretic support and Chiro massage techniques for musculoskeletal systems. Students will be trained in the use of different techniques to manipulate soft tissue and alleviate muscular conditions. This course will provide the student with the basic theory and history of anatomic concepts related to the lymphatic system and the main practices that support the draining of lymphatic fields. Students will learn the main conditions and diseases affecting the lymphatic system and will develop the basic skills to apply the manipulation protocols for lymphatic draining. Offered on-site only. Contact hours: 45

THMC 110 Allied Modalities in Massage Therapy**Credits – 5**

Introduction to the basic theory and practical applications of related massage modalities such as sports massage, reflexology, aromatherapy, therapeutic stretching, positional release, massage in clinical chair, SPA techniques, Shiatsu, Swedish Massage, massage with stones and Asian bodywork therapy. The course covers prevention of falls, safety practices, procedures, and contraindications for each modality of massage. Offered on-site only. Contact hours: 75

THMC 113 Structural Kinesiology**Credits – 3**

In this course, the student will learn to define, identify, and locate bony markings of the upper extremities, lower extremities, and both the axial and appendicular skeleton. The course also reviews the anatomy and physiology of skeletal muscles and their origins, insertions, actions of the scapula, shoulders, elbows, radioulnar joints, wrists, hands, hips, knees, ankles, and feet. Also, the student learns

to identify muscle origins, insertions, and actions of the neck, face, trunk, vertebral column, respiration, and how massage theory and techniques apply for each body structure. May be offered face to face or up to 50% online. Contact hours: 45

THMC 115 Massage to Special Populations

Credits – 3

In this course, the student will learn methods, techniques, and allied modalities of clinical massage, which are combined to treat an array of conditions and diseases in persons of different ages, gender, and physical constitution. The course will also prepare the student to understand, adapt and provide massage therapy modifications for clients with special needs due to specific physical restrictions that may limit their mobility. Offered on-site only. Contact hours: 45

THMC 116 Clinical Therapeutic Massage Seminar

Credits – 2

In this course, the student will review all the competencies and concepts needed to become a Certified Massage Therapist by the National Certification Board of Therapeutic Massage & Bodyworks (NCBTMB). This course will include the discussion of the Florida Laws, Rules, and Regulations (Chapter 456 and 480, F.S. and Chapter 64 B7). May be offered face to face or up to 50% online. Contact hours: 30

THMC 117 Clinical Practice

Credits – 2

The Clinical Practice Course constitutes the most important clinical experience in the Massage Therapy certificate. In this course, the student will apply all the knowledge, skills, and techniques acquired throughout the program. Practicum will take place in entities or venues that meet all requisites and standards established by applicable laws, in order to be authorized to provide therapeutic massage (sports facilities, health centers, elderly centers, therapy centers, institutional activities, among others), and will be supervised by a licensed professional in the field. The course requires 125 practicum hours. Offered on-site only. Contact hours: 125

WEDE 100 Web Design and Graphics Studio 1

Credits – 3

This course will cover elements of computing, programming, performance situations, and types of Internet connection. Topics such as security, effective email composition, web etiquette, organization of information, introduction to e-commerce, customization of tools, chats, online synchronization, forums, and blogs will be discussed in detail. Finally, basic design using the web publishing language, HTML, and XHTML will be covered. May be offered face to face or up to 100% online. Contact hours: 45.

WEDE 200 Web Design and Graphics Studio 2

Credits – 3

This course focuses on the principles of Web Usability, client purpose and needs as the key element in successful Web Design. Simplicity of design is introduced as a practical Web Design principle. Page Loading time, graphics design for the Internet, writing for the web, document size and readability, fonts for the web, color schemes and visual impact, site architecture vs. content are some of the subjects covered. Introduced to some software tools and effective web site navigation strategies. May be offered face to face or up to 100% online.

WEDE 250 Web design and Graphics Studio 3

Credits – 3

The student begins the course learning the fundamentals of digital imaging, audio combined with Web technologies. Also, this course will introduce the student to the interactive media authoring, video technology, learning programming and scripting techniques using Flash, JavaScript and ActionScript for design, animation, and data handling. A study of 2D and 3D animation using computer modeling and animation software program as the primary tool. This course will emphasize the creation of animated sequences and GIF animation for multimedia applications. May be offered face to face or up to 100% online.

WEDE 260 Web Design and Graphics Studio 4

Credits – 3

This course will teach the student through the methods used in dynamic websites integration. Will create content types and management, social media and mobile applications. May be offered face to face or up to 100% online.

WEDE 275 Integration Seminar for Web Design

Credits – 3

This course allows application of knowledge, skills, and abilities acquired in previous courses in order to develop an advanced web environment. Emphasis is placed on research as an essential element in design and functionality of the website. The student will create and test applications, interfaces and navigation menus for the Web-based environment that aligned with actual trends in the profession and presents the project for critique and discussion by the entire class. May be offered face to face or up to 100% online.

WEDE 280 Portfolio

Credits – 3

This studio will focus on the preparation and refinement of a portfolio that encompasses the student's work within the program and any other distinguishing activity. The goal will be the production of a refined, multifaceted presentation of the student goals and creative vision and his or her ability to engage in professional practice. May be offered face to face or up to 100% online.
